GREENHOUSES
CONSERVATORIES
ROSE HOUSES, GRAPERIES, Etc.

Our success in greenhouse construction is due to a practical taste for horticulture and is the outcome of a close study in the requirements of plant life. With this in mind, we are continually making improvements and our houses are unexcelled for durability, appearance and for unsurpassed horticultural results.

PENN. AND HOMEWOOD AVE.
PITTSBURG, PA., Jan. 11, 1904

Mr. David Fraser, gardener to H. C. Frick, Esq., writes—I wish you could see the house of Cyclamen I have from your seed. Out of 500 plants there is scarcely a poor one in the lot; some of the plants are carrying 40 to 60 large flowers. Every one says they are the finest Cyclamen they have ever seen.

DECORATIVE ART

The illustration is an example of extreme simplicity in the arrangement of flowers. We endeavor to have some of these touches, even when we decorate a house most elaborately. The selection of the place, the receptacle, the flowers and the colors are all to be considered. If wisely done, will not go unappreciated.

H. H. Battles.

FLOWERS IN HISTORY

In all ages and among all nations there has always been an especial reverence paid to flowers, and many legends and superstitions have attached themselves to different members of the floral kingdom. In tracing the pages of history, also, one frequently finds flowers associated with important events. It is scarcely necessary to begin this sketch as far back as the garden of Eden, yet some old commentators start their floral records even at that happy era. St. Ambrose and St. Basil, for example, both state that the roses in Eden grew without thorns, and Milton says there bloomed in Paradise,

"Flowers of all hue, and without thorn the Rose."

Sir John Mandeville derives earthly roses from a later epoch. He tells of a virgin martyr, burned at the stake in Bethlehem. From the unkindled brands there grew white roses, while from the extinguished fire-brands there sprung red ones. The Mussulman has quite another story for the beginning of roses. He says that when Mahomet made his journey to heaven, the drops of perspiration which fell to earth from his forehead became white roses, but the perspiration of the animal he rode gave rise to yellow roses. The Mandeville story is the prettier one. He gives it in some detail in his "Voiage and Travails." A Jewish maid of Bethlehem was falsely accused by a rejected suitor and condemned to be burned. When the flames were kindled they encircled the false accuser and burned him to a cinder, but the fagots around the virgin remained unlit. Suddenly the brands turned into white and red roses, — "And these were in the first roses that ever ony man saugh," says the earnest Sir John.

We come to much surer ground in ancient Egypt, where, 4,000 years ago, the florists must have driven a thriving trade. Many were the musical parties given by the old Egyptians, and at these the guests were generally supplied with lotus flowers. There is a painting on the walls of a Theban tomb of forty centuries ago, which pictures all the guests sitting with flowers in their hands, while music and dancing is taking place before them for their amusement.

In ancient Greece and Rome something very similar was done in the banquet room. The guests reclined upon couches (for they did not eat in a sitting posture) crowned with myrtle, while often showers of rare flowers were scattered upon them from above. The Romans were fond of flowers, and it is very pos-

sible that the first floriculture in England was introduced by these beneficent invaders. Ancient China, too, had a taste for floriculture, and one of the most popular and ancient songs of the entire empire celebrates the Mu-li, a fragrant blossom, with much ardor. Yet the name of "the flowery kingdom," constantly applied to China, is not entirely deserved. It comes from a mistranslation of "Hwa Kwoh," which properly means "the flower of kingdoms."

The ancients associated flowers and trees with their deities. The worship of trees was especially ancient in the north of Europe. The Vikings worshipped the ash tree and built their dwellings around it. They believed that the whole earth was sustained by the sacred ash tree — Ygdrassil! The old Druids held the oak and mistletoe in reverence. It may not be generally known that the bringing home of the Yule log at Christmas, and the Christmas-tree itself, are merely survivals of old pagan tree-worship.

The pagans of southern Europe had the following connection of trees and flowers with their divinities: — the laurel was dedicated to Apollo, the cypress to Pluto, the lily to Juno, the myrtle to Venus, the narcissus to Ceres, the oak to Jupiter, the olive to Minerva, and the vine to Bacchus. The Christians following this example, dedicated the lady's-smock to the Virgin, the rose to Mary Magdalene, the daisy to St. Margaret, etc.

Certain flowers have become national emblems and represent some countries almost as clearly as the flag itself. Thus the fleur-de-lis was adopted for France by Louis VII in the 12th century, and has remained the emblem of the Royalist party of that country ever since. The leek typifies Wales, the thistle Scotland, the shamrock Ireland, the pomegranate Spain, the corn-blume Germany, the linden Prussia, etc. America has not yet chosen a national flower; possibly it is impossible to choose one that would be representative of all of her widely separated states and different climates.

But England has been represented in history by the rose. Indeed, at one time the rose was the definite emblem of two opposing parties and armies. During the great Civil war which raged for thirty years in England, in the 15th century, the house of York had the white rose as its emblem (it had worn this in its coat of arms for centuries) and the red rose was chosen by the house of Lancaster. Shakespeare in his "Henry VI," mistakenly pictures the factions choosing their emblems just before the combat, —

"PLANT. Let him that is a true-born gentleman,
If he supposes I have pleaded truth,
From off this brier pluck a white rose with me."

"SOMERSET. Let him that is no coward nor no flatterer,
But dare maintain the party of the truth,
Pluck a red rose from off this thorn with me."

England has a fair right to be represented by the rose, but one would prefer to have Scotland typified by its beautiful and sturdy heather rather than by the thistle.

We have already stated that the Romans brought something of their love of gardens with them into old England. Once these were established in Britain, however, they became permanent. We have an eloquent picture of London more than seven hundred years ago, penned by Fitz Stephen, who died in 1191. He gives a long Latin eulogy of the city, in the course of which he says, —

"Adjoining to the houses on all sides lie the gardens of those citizens that dwell in the suburbs, which are well furnished with trees, spacious and beautiful. On the north side too, are fields for pasture, and a delightful plain of meadow land, interspersed with flowing streams on which stand mills whose clack is very pleasing to the ear. Close by lies an immense forest, in which are densely wooded thickets, the coverts of game, stags, boars and wild bulls. The tillage lands of the city are not barren, gravelly soils, but like the fertile plains of Asia. . . . There are also round London, on the northern side, in the suburbs, excellent springs; the water of which is sweet, clear and salubrious, . . .

"Mid glistening pebbles gliding playfully'

amongst which Holywell, Clerkenwell, and St. Clement's well, are of most note, and most frequently visited, as well by the scholars from the schools, as by the youth of the city, when they go out to take the air in the summer evenings. The city is delightful indeed, when it has a good governor."

Once more, in England and in Scotland too, long after the "Wars of the Roses" the rose became the emblem of a monarch and a war. It became the representative of the Pretender, James, since his adherents were obliged to meet "under the rose" ("sub rosa") in the greatest secrecy, in the days just after the first uprising, in 1715.

The very phrase of "under the rose" leads us into further history and legend. The old pagan myth tells of Cupid giving Harpocrates (the god of silence) a rose as a bribe not to reveal the amours of Venus. Because of this legend, the rose became the emblem of silence among the ancients. The significance of the rose passed on into modern times, and it was painted or carved on the ceiling of many an old banqueting-room as a suggestion that secrets divulged under the influence of the feast must not be revealed any further. Soon after the year 1500 it was carved over religious confessionals.

It would be interesing to study the plant language of the various nations, but it would require far more space than is at disposal in this initial number of HORTICULTURE; suffice it to say that all nations have indulged in a symbolism of this sort. In England it was very ancient. Long before the time of Shakespeare there were ballads with the refrain — "Oh the broom that makes full sore," — alluding to the broom-plant as an emblem of tragedy; and Desdemona's "Oh willow, willow," is but an indication of the willow being an emblem of blighted affection. We have, however, sufficiently indicated the power of flowers as emblems, metaphors and signals, and believe that we have shown that mankind in general agrees with Wordsworth's view that

"One impulse from a vernal wood
May teach you more of man,
Of moral evil and of good,
Than all the sages can."

Louis C Elson

M. H. WALSH, *Rose Specialist,* Woods Hole, Mass.

HARDY ROSES, the best new and old varieties; STRONG FLOWERING PLANTS; HYBRID TEA ROSES, the best and hardiest varieties; NEW RAMBLER ROSES, LADY GAY, DEBUTANTE, WEDDING BELLS, SWEETHEART, LA FIAMMA and MINNEHAHA. Strong field grown plants to flower next summer. Best varieties PAEONIES, PHLOX and HOLLYHOCKS.

Catalogue describes all the above.

WINTER VEGETABLES

There is always a difficulty in supplying the home demand for fresh vegetables during the winter months, and the gardener is often puzzled to supply enough in quantity, where the conveniences are limited.

It is a good time now to lift roots of asparagus for forcing purposes. This vegetable is highly appreciated always, is easily forced, preferably in a light place, for darkness spoils the color which should be a lively green to be appetizing when served. There are plenty of vacant spaces under greenhouse benches that may be utilized for this purpose providing there is room for soil to be placed over the roots. We utilize grapery borders inside also for this purpose, placing the roots on the surface of the borders and placing loose soil over them.

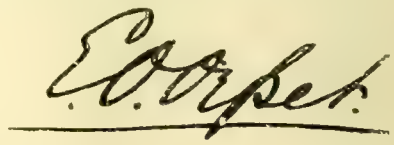
The principal thing is to have home grown roots with strong crowns at disposal. These should be lifted carefully that mutilation does not impair the value of the same, for it is not fair to expect good results from the best of crowns if these have been denuded of their roots in part when lifting.

Asparagus plantations may be made to last many years by liberal manuring, but for the best results, young vigorous plantings of five to six years' growth make the finest and most succulent shoots, hence we plan to plant a new bed each year to take the place of the lot taken up for forcing purposes, keeping the whole in fine vigorous bearing condition.

It has been demonstrated to our entire satisfaction that asparagus roots should be planted at least a yard apart in the rows, making the latter four feet apart if it is intended to use a horse cultivator through them after weeds begin to grow.

When the roots for forcing are lifted, it is very important that they be well frozen before taken into heat, for, after being thus put to sleep it is much easier to waken them. The same applies also to rhubarb, which may be put in tubs well frozen and brought in in succession as needed. Rhubard is best forced in darkness, the boiler cellars being a good place to put the earlier roots to ensure early results.

After forcing, asparagus roots are valueless, but rhubarb may be stored away from cold and later planted out in spring to grow for two years, when the same roots may be forced again.



Miltonia Vexillaria

There are few orchids that lend themselves more readily to graceful decorative combinations than this Miltonia, and the plants bloom at a season when the display of Cattleyas are on the wane. For June weddings these flowers are invaluable, as they blend so readily with pæonies, roses, or whatever other flowers may be the predominant feature.

A note at this time, reminding cultivators that this is the best time to repot the plants, is seasonable — it is preferable to use shallow pans rather than deep receptacles, as this Miltonia is a surface rooting species. We have tried all materials for growing them in and prefer sound fern fiber with a surfacing of living sphagnum moss, this last to ensure a constant supply of moisture at the roots, this plant being very impatient of anything approaching dryness either in the atmosphere or at the roots, owing to its being found wild, where there is fog and rain every day in the year — indeed, the late Consul Lehmann, in describing the habitat of this Miltonia, stated that the conditions under which the plant grew were as nearly uniform during the whole year as it is possible to find; hence we have to place the plants in the coolest possible place in summer with shade, while in winter, when most growth is made, a genial temperature of 55 to 60 is essential. A very successful cultivator in Massachusetts carries the plants through the hot months in a cold frame.

It is found that these plants, like all other orchids, will take stimulants when in active growth, and will be benefited thereby if applied in homeopathic doses. This is the great secret in keeping the plants in vigor.

How often has it been remarked that many of the difficult genera of the orchid family are very successfully grown near the smoky centers of industry where rain water is carefully conserved for use on the plants. Doubtless the deposit of soot on the glass roofs is largely the factor that makes for success.

We hope you will like HORTICULTURE and recommend it to your friends in the trade. Send in their subscription now to insure complete file from first number. We want to see on the list of subscribers every one identified with any horticultural industry. We draw no lines, but *invite you all* to help by your subscriptions, your contributions, and your approving words to make HORTICULTURE the best known and the best liked professional journal in our country. Every $1.00 subscription sent in is a *practical help* to this end.

THE RIVERWAY

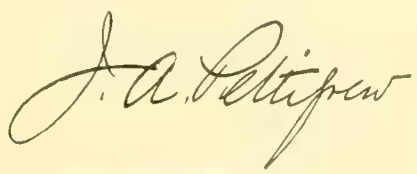
[*See Frontispiece*]

The creation of the Riverway in Boston's park system may be considered as one of the late Frederick Law Olmsted's greatest conceptions. Previous to its improvement, the site was a stretch of swampy bottom, through which ran a drainage course, — appropriately named (except for its narrow banks) Muddy River, — which marked the dividing line between the City of Boston and the Town of Brookline. Land values contiguous to its most objectionable sections were much depressed. For a part of the distance, on the Brookline side, a passenger branch of the Boston and Albany railroad ran parallel to the stream; and, although possessing good topographical advantages, taken altogether, the tract now known as the Riverway was one of very uninviting aspect, and in marked contrast to the present connecting link in the parkway system between the Fens and Jamaica Pond, about 1.9 miles in length. The driveway on the Boston side is carried generally along the bank at an elevation sufficiently high to afford fine views, while on the Brookline side it runs lower down and nearer the water.

The muddy swamp is now a meandering stream, near the head of which is a beautiful sheet of water of eleven acres, called Leverett Pond. Further southward the ground rises abruptly to an oak and chestnut-covered hill, beyond which is Ward's Pond; one of the steep slopes of which is planted with rhododendrons and kalmias, while the pond itself is the home of aquatic and semi-aquatic plants.

The bridle-path is carried between the driveway and the stream on the Boston side, and walks are provided on both sides of the stream near the water's edge, the drives, bridle-path and walks winding, at some little distance apart, in sympathy with the topographical features, thus affording ample space for the planting of shrubbery, and at the same time leaving room for desirable views, of which advantage has been taken.

The Riverway has a fine growth of young trees, and has also many fine old ones, yet its most conspicuous and chiefly adorning feature is its wealth of shrubbery. Few shrubs of exotic origin are used, the native varieties predominating and comprising, in many species, cornus, viburnum, azalea, rhus, berberis, rosa (Rosa lucida, rosa nitida, and rosa setigera, which are planted in thousands on the borders of paths and drives), pyrus, crataegus, ilex, ligustrum, andromeda, vaccinium, and many others.



Several handsome stone bridges span the stream. Longwood bridge, shown in the frontispiece illustration, is a beautiful stone arch of one hundred feet clear span. The stone church appearing in the same view is said to be a copy of a church in Colchester, England. The second illustration is of a bridge which carries the bridle-path over a footpath. The bridge architecture and landscapic art

in the Riverway are in perfect sympathy, and support each other with rare fidelity.

An example of how such an objectionable feature as a railroad may be screened from view, is shown on the Brookline side, where a mound has been raised and planted with trees and shrubbery.

Taking everything into consideration, the Riverway, with its varied effects in its masses of flowering shrubs in spring, its gorgeous autumn colors in berries and foliage, its bridge architecture, its pleasing topographical features, is a practical illustration of how an almost waste and useless tract of land may be converted into a thing of utility and harmony, and is one of the most beautiful, interesting, and instructive portions of Boston's system of parks.

Widespread publicity, incessantly followed up, is to-day essential to business prosperity. We invite the patronage of all having goods or business to advertise, whether large or small, in all horticultural lines. We will see to it that HORTICULTURE reaches the buyers.

Lots of good printers' ink is wasted in profitless advertising. We don't want that kind. When your advertisement has done its work, take it out. We don't tie you down with any contract.

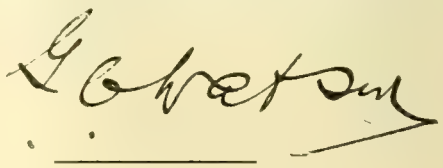
Lynch and the Baby Rambler

It is currently reported that a Rochester firm paid ten thousand dollars to the originators in France for the American rights in the "Baby Rambler."

I cannot vouch for the truth of this, but if they did it is significant of their faith in the merits of this plant. I hope they will reap a handsome reward for their enterprise, and I hope also, that the other firms in this country who got stock indirectly from Europe as soon if not sooner than the right holders will come in on the crest of the wave at the same time. A little bird whispered to me that there was a stock of some two hundred and fifty thousand of it in the vicinity of West Grove, Pa., so when I ran up

against P. J. Lynch of that burgh the other day I tackled him on the point. But he is a wary bird and I had to use diplomacy to get what I wanted. I think you can put it down as a sure thing that there's a big stock of the Baby in West Grove, although P. J. didn't tell me that in so many words. But in regard to the merit of the Baby he was quite outspoken.

"George, mark my words; inside of three years the Baby Rambler will be the sensation of the horticultural world. Just think of it; an exact replica of the Crimson Rambler, only a bit larger and brighter flowers and only a foot high. What a gem for edgings, what a subject for the window garden and conservatory, what a beauty for the summer rose bed, what a magnificent thing for a dozen purposes! Why, they talk about Crimson Rambler and the millions that have been sold of it — this is destined to be entirely cast in the shade when the people get acquainted with the Baby."



At this point I ventured to hint that perhaps this rosy view was caused by the fact that P. J.'s firm had a big stock of Babies.

"No you don't, my boy, none of your underhand questions. But even admitting for the sake of argument that we had, what then? doesn't it prove our faith? Do you suppose we would propagate this plant with every wile and at the highest pressure regardless of expense if we didn't believe in it? Not much!"

I had still another shot in the locker of the devil's advocate, however, and I fired it. A visitor to the Madison show had seen some specimens on exhibition and reported to me that the thing was "absolutely no good."

"Don't you believe it! Wait until next year when some one who can grow stuff puts it up as it should be. Why, man, you can have plants covered with flowers all the year round, every day in the year, as thick on the plants as the blooms of a Lorraine Begonia. What do you think of that?"

I thought that was great and realizing that the man who runs the biggest rose growing establishment in America ought to know what he was talking about, I made a graceful advance northward toward the north pole as Kuropatkin would put it. The picture herewith gives a good idea of the "Baby." Who knows what wonderful potentialities may be hidden away in the little morsel? keep an eye on it!

Allamanda Williamsii Grown in Bush Form.

These beautiful free-flowering stove plants, mostly natives of South America, are generally found in most places trained as roof climbers. But they also make elegant bush specimens if treated in a different way. The accompanying picture shows three of six plants exhibited at the Newport summer show two years ago. These specimens were nearly five feet in diameter and covered with an abundance of expanded blossoms.

Allamandas are of easy culture, but a few remarks here may be interesting to some of the younger element. Plants this size can be obtained in two years from rooted cuttings if they are struck the latter part of February or early in March (which they can easily be, by pruning back any old plants to four or five eyes) and started in a stove temperature, keeping the plants well up to the light and syringing them several times daily to soften the wood and make them break. When the young growths have obtained the length of four or five inches, take them

Allamanda Williamsii

off close to the old wood and insert them in a propagating case with bottom heat, and in about two weeks they will be ready for potting into small pots. From this time throughout the entire summer they should be encouraged to grow as much as possible, potting them on as they require it, and stopping them occasionally when they have made five or six inches of growth. They require no shade even in the hottest part of the summer. See that they are syringed at least twice a day and do not suffer for want of water at any time during the growing season.

Toward the end of September gradually withhold water, letting them sometimes flag for the want of it, which will check further growth, and treat in this way till about the end of October, allowing the soil to become a little drier each time before water is given, so as to ripen the leaves which will soon turn yellow and fall off. The plants can now be placed in a cooler temperature of about 60°. Lay the pots on their sides and away from the hot pipes, giving them a little water once in two or three weeks to prevent the wood from shrivelling. About the middle of February prune them back hard to four or five eyes, turn them out of their pots, and reduce the ball, leaving a reasonable quantity of soil attached to the roots, which if very dry should be soaked in tepid water ten or fifteen minutes, seeing that the ball is well saturated, draining the same when taken from the water for an hour or so. They can then be potted into the same size pots they were taken from, or smaller if necessary, using good fibrous loam with a small quantity of sand and about one-sixth part of well-rotted manure, potting them good and firm. Return them to the stove, keeping them well up to the light and syringing them three or four times a day to soften the old wood and make them break.

When they have nicely filled these pots with roots, they can be shifted into their flowering pots the size of which can be determined according to the size specimens required, which may be from ten to eighteen inches in diameter. Take care to see the pots are well crocked, as they will require an abundance of water and liquid manure twice weekly throughout the growing season, using the soil more lumpy at this potting. When the new growths are about four inches long, take out the points which will induce them to break from the lower eyes; when they have obtained a similar length again take out the points of each of them, and continue this at least till the middle of the summer if large specimens are wanted, or the pinching can be withheld at any time according to size plants required, and the time they are wanted in bloom, which will be in about three or four weeks from the last pinching. When they have done flowering they should be ripened up gradually and wintered as before advised.

WM. J. STEWART, Editor and Manager.

Next Comes Ye Editor

GREETING.

"Together let us beat this ample field,
Try what the open, what the covert yield."

HORTICULTURE here makes its bow. Its sponsors bespeak for it a kindly welcome and express the earnest wish that, favored with the encouragement and forbearance of a host of good friends, it may grow better and better with each issue, take deeper root in the affections of all those who find their life work among flowers and plants, fruits and trees and gardens, and, that it may, in due time, reach the eminence to which it aspires, as the foremost American exponent of horticultural aspiration and achievement.

To our contemporaries in the field we express our hope for a cordial reception into the growing family of horticultural journals, recognizing how largely the craft are indebted to them for present enlightenment and looking forward eagerly to a joint participation in whatever work or honor the future may have in store.

AFORETHOUGHT.

The charge intrusted to HORTICULTURE is —

To advance the interests and elevate the standard of American horticulture

By presenting to the readers in the profession our craft and our goods in the most attractive and most instructive light.

By keeping them informed of what is being done and what is sought by enterprising horticulturists throughout the world.

By introducing to them in an unprejudiced and trustworthy manner new and meritorious plants, devices and discoveries of interest and practical value to the craft.

We hope to give individuality to HORTICULTURE and make it distinct from all other publications in its class and, discarding overworked features and substituting new ones, to provide the American florist and gardener with the best journal ever published in their interests.

If our purpose carries, readers will find our advertising columns among the most useful and entertaining contents of this paper. We propose that in them shall be found offers of everything in the market which can be desired by the progressive florist, gardener, nurseryman and seedsman, or that can be found advertised elsewhere. The most reliable houses are especially sought as regular users of our advertising columns, and we shall endeavor to present their offers in a conveniently classified form, which affords all the advantages of ready information, while at the same time directing the attention of the buyer to the larger advertisements on other pages. Readers and advertisers are invited to note the special features we have adopted and to make suggestions as to how, in their opinion, these can be improved.

Although early in the field with horticultural periodicals that commanded attention at home and abroad, Boston, the recognized horticultural center of this continent, has now been for many years unrepresented by any local publication devoted to the "art that doth mend nature." Yet in the country adjacent to the New England metropolis are found the best cultivators; better products are shown on the exhibition tables and in the markets than can be seen elsewhere and consequently the highest class of cultural information is here conspicuously available.

It is reasonable to assume that a weekly paper published among the people who support the most prosperous horticultural society in the world, devoted to the interests of all branches of the profession, should live and prosper. Local pride should insure for it loyal support from the territory which it directly represents, and the store of expert knowledge from which it is privileged to draw, should secure for it a solid footing in every community where an aspiring gardener or florist is to be found.

The craft everywhere are invited to make HORTICULTURE their medium for interchange of thought and experience. Its columns will be always open to their use in any way that will contribute to their intellectual or material advancement or dignify their calling.

A plant grower of high repute on being asked one day recently, to tell the secret of a lot of remarkably fine cyclamens which he, with due pride, was showing to some visitors, replied, "Eternal vigilance is the price of anything worth having." He then went on to tell how, for a number of years he had watched and studied his cyclamens, noting carefully the slightest mark of individual superiority or advancement on any line and by diligently following up a systematic plan of selection and seed-saving from his own and other high-grade stocks had brought his strain up and up, gaining a little every season until now its supremacy was unmistakable.

The burden of our friends' little talk was that, while it is true that some of our finest floral treasures have come to us without any specially directed effort,

yet the greater part of what we now prize as garden flowers attest, in their perfection of to-day, many years of assiduous devotion and toil on the part of some one or several enthusiasts.

Many of our popular flowers and, undoubtedly, many that have thus far no marked prominence, await only the attention of some zealous worker who, with clear insight and well-directed effort on specific lines, will yet evolve from them a progeny having a value hitherto unknown. The grower quoted from had been aiming especially for early flowering qualities and a habit of holding the blooms well toward the center of the plant rather than for eccentric attributes of form or color, and it was on these valuable qualities that he had made his best advancement. Whether it be in one or the other of the many species raised annually from seed by the plant growers, full recognition awaits anything that is a practical improvement over what we have previously known.

Thus far most of the successful work in this direction has been done abroad, but there are gratifying indications that American specialists are now coming to the front, to whom we may reasonably look for distinguished services in the near future.

The paper by H. H. Groff of Simcoe, Ont., on "Breeding from 'Tame' *versus* 'Wild' species," which was presented at the Plant and Animal Breeders' Convention in St. Louis, December, 1903, has had such a wide circulation and attracted so much attention in England and the United States that a second edition of the printed copy has been issued. Since the circulation of the first edition, Mr. Groff's claims for the great advantages to be gained by breeding from domestic specific types has been supported by Prof. Hugo de Vries in his lecture at St. Louis in September of 1904. Prof. de Vries' conclusions were reached after an exhaustive series of experiments conducted for the purpose of proving that domestic species could be produced within a comparatively limited period of operation. Breeding from select mothers, with domestic specific types as sires is the line on which Mr. Groff claims to have made his greatest advancement, and his is the honor of having been the first to call attention publicly to the theories of which the correctness has now again been verified.

OUR ADVERTISERS

The advertising columns of this, the first issue of Horticulture, present an impressive example of confidence and enterprise. The confidence in the management of the new paper thus practically expressed, before a type had been set or the contents and makeup of its pages known, is deeply appreciated. The enterprise shown adds luster to the commercial aspect of our profession and is a convincing proof of the lusty vitality which permeats every department of horticultural industry to-day. Every line of advertising in this paper has been legitimately contracted for; there is no "padding." We ask our readers to recognize these firms that have displayed so much brains, courage and progressiveness, by reading their announcements and giving them all possible business patronage. This will be a most practical compliment, and the more of it you bestow on them the better it will be for Horticulture.

Jerome Jones

Chrysanthemum lovers will be glad to look upon the likeness of this staunch friend of floriculture, the husband of the lady whose name is a household word wherever a florist exists, through the peerless flower that bears her name.

Mr. Jones is one of the solid merchants of Boston. For over half a century he has been associated with the importing firm of Jones, McDuffee & Stratton. He is an ex-president of the Boston Commercial Club and Boston Board of Trade, ex-trustee of Mt. Auburn Cemetery, and is a director in the Boston Transcript.

Mr. Jones' friendliness to horticulture was well shown when, a few years ago, he established an ample fund under the direction of the Massachusetts Horticultural Society, the income of which is to be devoted annually to premiums for the exhibition of the varieties of chrysanthemums originated by the late Henry A. Gane.

He was a guest at the recent banquet to the Chrysanthemum Society of America at Boston, where his genial company and entertaining address gave much pleasure to the participants.

THE BEST NOVELTIES FOR 1905

Let us book your order now. This will insure earliest delivery and best stock

Chrysanthemums our Specialty

Do not fail to procure OUR FIVE SUPERB

American Bred Novelties

FIDELITY—Pure white.
BRIGHTHURST—Soft rose.
PINK QUEEN—A future early pink.
OKOLONA—White, pink center.
KINKORA—Light mauve.

In addition to above we offer all the OTHER AMERICAN NOVELTIES and BEST IMPORTATIONS.

As to This Year's Introductions and Standard Varieties, we have all that are worth growing. TRY US.

Valuable Assistance to Successful Culture

SMITH'S CHRYSANTHEMUM MANUAL treats all phases in detail. Only 25 cents, postpaid.

Carnation Novelties

CARDINAL—Improved Estelle.
FIANCEE—The world's best pink.
FRED BURKI—White.
RICHMOND GEM—Scarlet.
PHYLLIS—Light pink.
CHICAGO WHITE.

All future money-making varieties. Can give earliest delivery on above at introducer's prices.

Also best of 1904, including FLAMINGO, LADY BOUNTIFUL, WHITE LAWSON, etc.

OUR TWO

Geranium Novelties

SNOW QUEEN—The best single white.

OROSA—The double Mrs. E. G. Hill. Both decided improvements.

Also large stock of standard varieties, outdoor propagation, ready for immediate delivery. WRITE US.

Our New Begonia Rex, the Seven Sisters

GENESEE, ARENAC, HURON, EMMET, DELTA, BARAGA and CLARE.

These will be in future collections. Illustrated and described in our catalogue for 1905.

Cannas

THE EXPRESS—
As a dwarf crimson bedder this has no equal. Awarded a Gold Medal at World's Fair, St. Louis.

OSCODA—
Same dwarf and free flowering habit as The Express; color of Queen Charlotte. Do not fail to add these to your stock.

Hardy Perennials

A complete list of the best, including HELIANTHUS SPARSIFOLIA and choice named Phlox in variety.

OUR ILLUSTRATED TRADE CATALOGUE WILL BE MAILED EARLY IN JANUARY

What Ye Neighbors Say

"The love of praise, howe'er concealed by art,
Reigns more or less, and glows in every heart."

I think there is room for a good paper devoted to Horticulture and not to gossip. — J. M. K.

Your personality, together with your well-known ability, is bound to make your venture a successful one. — A. M.

I am very much interested in the publication, and wish you the greatest success and prosperity in your undertaking, as I feel that you, from your wide experience, will make this a paper to be sought and read by those interested in Horticulture. — M. H. W.

I am glad to see you at the head of this new venture, and feel sure that there is no one in the country better able to make such an enterprise a success from the start. You have my very best wishes for the success of the enterprise. — J. S. V.

While it may seem that the ground is already well covered with the three present trade papers, I still believe that there is ample room and good prospects for a well edited, practical paper.

That you may have the best of success in this new enterprise is the sincere wish of S. R.

Under your able management I am sure that success will crown your efforts and that the journal will become a potent factor in the trade. You may take my order for an ad. for one year from date of first issue, and when the year terminates, continue it for second, third and other years. — S.

The first number of *Suburban Country Life* comes to us full of the aroma of the woods, the thrill of country air and all the healthy inspiration that springs from the love of beautiful homes and rural surroundings. It is superbly illustrated and in all its features are found the fulfillment of the promise of its publishers to provide a high-grade magazine for the popular price of ten cents. *Suburban Country Life* is the outgrowth of *The Suburban*, and is published monthly by the Colonial Press, Boston

Advertisements for Number Two

After Ye Adjournment

"De-lighted."

The launching seems to have been a success.

Don't forget Elliott's plant sale, New York, Tuesday, December 6.

Chrysanthemum shows all over: the holidays next claim our attention.

Results of the season's tests of Thorburn's sensational new potato, Noroton Beauty, indicate that this will prove to be just what its introducers claim for it, "the best all-round potato in existence." The highest authorities on potatoes agree in pronouncing it the earliest and most productive variety ever produced.

Our fastidious contemporary, Job — he of the variable identity — has discovered a remarkable propensity for "kicking" on the part of the Canadian brethren, and takes occasion in the latest issue of the *Florists' Exchange* to offer them some sound advice (applicable to some others besides Canadians) on the evil the "kickers" do and the dangers of the bickering habit.

Christian Moeckel, Fitchburg, Mass., who has brought suit against the C. A. Cross Company to recover for glass broken at the gasoline explosion at the company's tanks in March last, has had the case entered in the superior court now in session here. He claims $3000 damages.

Pompon Chrysanthemum "Baby"

Our illustration of this dainty little chrysanthemum will give some idea of how it appears grown in an eight-inch pan for commercial purposes. The color is a clear rich yellow, making an excellent contrast, and standing well above the dark green foliage. Each blossom is of the most refined and perfect form and the habit of the plant is excellent. Craigs of Philadelphia, had a 100-foot house of it for the Thanksgiving trade this season, and sold it all out in a week. In addition to its usefulness as a pot plant, it is also excellent for bunching as a cut flower.

Aphelandra aurantiaca

We have some self-sown seedlings of this bright flowering, hothouse or what European gardeners would call "stove plant," in bloom at the present time. These plants were found early last June near where the old plants bloomed a year or so ago. The second seed leaves are still intact, and there are twelve to fourteen leaves of all kinds on each plant, and the total height from the tip of the flower buds to the soil is less than six inches, making them dwarf and very attractive plants.

The flower buds on first showing color are lemon yellow, gradually becoming deeper, until when fully expanded they are brilliant scarlet, which is a color very highly appreciated at this season of the year when all nature outdoors is sombre and sere.

Another batch of seedlings were dibbled in pans in light rich soil a few days ago, that were found in the same way and are also the result of self-sown seeds. The plants from which these seeds fell were in bloom last May. Strange as it may seem, the seed fell upon 'stony ground' as it were — among pebbles with no soil only what perchance was washed from the pots when being watered, which goes to show that as a rule, an abundance of water must be given when starting seeds.

Of the dozen and a half plants we have here, all are showing flower buds in various stages. Some are only barely visible, while two plants are now in bloom. From present indications it looks as though some would be just right for the holidays, and what more brilliant and appropriate centrepiece for a Christmas dinner table could be imagined than half a dozen such plants in a ten-inch pan?

Edwin Lonsdale.

Plantsmen's Topics

Chrysanthemums are now nearly all relegated to the rubbish pile, except favored varieties selected for another season's trial. Some few varieties have had honors showered upon them, particularly the newer varieties, introductions of 1903, but many alas! have made their final appearance, for no other reason than failure to reach the required abnormal size on the exhibition table.

This should not be so, for many beautiful varieties look their best when grown ten or fifteen blooms to a plant, and why do not our schedules call for such plants, naturally grown, not covered with a net-work of tying material, but growing gracefully as nature would have them.

The flat-board system is a thing of the past and in the near future the educated public taste will demand plants grown naturally, without a suggestion of formality, but in their own artistic arrangement of bud and bloom. I recall a few such plants this season, which certainly were a pleasure to look upon, and gave more satisfaction than a house full of exhibition blooms, with all their attendant length of stem and wealth of foliage, a ladder being required whenever a visit to the blooms was contemplated, and wherever chrysanthemums are grown for pleasure it certainly seems to me the bush plants to which I have referred are by far the most desirable. Size of bloom should not be the only standard for judging the merits of a chrysanthemum for general purposes; form, color, and attractiveness are the qualities which appeal to the public, and more would be encouraged to make an attempt to grow a few plants if size alone were not the predominating requisite for exhibition purposes.

A. J. L.

Begonia Vesuvius

The proper name of the above plant is perhaps B. Vesuvé, but of this we are anxious to be certain. Perhaps some reader may be able to supply the desired information, for this plant has a future both for outdoor bedding in summer and pot culture in winter.

In our opinion it ranks next to the famous Lorraine Begonia of Lemoine in value, being a perpetual bloomer of the semperflorens type, very easily propagated from cuttings at any season.

The clusters of flowers are a bright coral red, the foliage taking on a bronze tint in summer by exposure to the sun.

For dinner-table decoration the flowers and buds, when used with asparagus Sprengerii, produce a charming color effect, very light, graceful and pleasing.

It is our impression that we have to thank M. Lemoine also, for this begonia.

E. O. ORPET.

All indications point to a continued and probably increasing popularity for jardinieres and baskets of mixed plants for the Christmas holidays. Bright foliaged dracæna terminalis, coral berried ardisias and Euphorbia Jacquinæflora with its racemes of orange-vermilion flowers, in fact, anything bright in flower, fruit, or foliage will find a ready market.

Notice to the Trade!

The HAERENS COMPANY of SOMERGEM (Belgium)

combining the Firms of the two modern and extensive Nurseries of **Messrs. John B. Haerens & Henri Wille**, besides the firm of **Mr. Henri Haerens**, both located at Somergem (near Ghent) Belgium, have disconnected their interests with the firm of Messrs. Haerens Bros. The latter name will be discontinued by mutual consent after January, 1905.

THE HAERENS COMPANY will henceforth supply their own Cultivations and Specialties direct to the Wholesale American Florist Trade and

MR. AUG. RHOTERT, 26 Barclay Street, New York

will act as their SOLE REPRESENTATIVE FOR THE UNITED STATES AND CANADA.

The requirements of the American Trade have been carefully studied by a Member of the Haerens Company during several extended visits to the United States and to the leading Florist Establishments.

Our Nurseries (being located on land especially adapted for the culture of *Azalea Indica*), are producing in large quantities an unsurpassed quality of all the approved best commercial varieties. A large range of modern Greenhouses enables us to supply Palms, Araucarias and other Hothouse Plants of selected quality in all commercial sizes and important quantities.

OUTDOOR ART AND CRAFT

Lilley & Chinberg have sold half interest in their nursery at Hankinson, N. D., and the name will be changed to Hankinson Nursery Company.

John P. Brown, the hustling secretary-treasurer of the International Society of Arboriculture, has just returned from Pensacola, Fla., Selma, Ala., and New Orleans, La., where he has been inspecting the great railway plantations of Catalpa which he found eminently satisfactory. Catalpa speciosa has made a wonderful growth throughout the South.

The town of Reading, Mass., has adopted a definite plan for fighting the brown tail moth. The town is to be divided into 44 districts, with a chief for each district. J. Woodward Manning is chairman of the general committee. Children will be employed in the work of gathering the nests at a price of five cents per hundred nests, the work to be confined to town limits and to be under the supervision of the district chiefs.

In removing a nest recently from one of the large elms in Cambridge, Mass., a large piece of the trunk was accidentally broken off, disclosing along every portion of the decayed inner surface specimens of the development of the gypsy moth from the egg state to the full-grown moth. There were millions of eggs, winged moth specimens, shells of moths, and moths in their winter state. It is the intention of the commissioners to preserve the specimens as an exhibit of the real need of an appropriation by the city to protect the city shade trees from this pest.

About Hedges

In seeking a good hedge plant to take the place of the handsome but uncertain California privet, many owners of gardens in the New England States have selected Berberis Thumbergii and already fine hedges of this beautiful subject are frequently seen. One of the earliest of the garden shrubs to put forth its buds and leaves in the spring, it is from first to last an object of great beauty and especially so in the fall after shedding its glowing orange and scarlet foliage and during the winter, when it becomes a veritable fountain of bright coral fruit.

Ligustrum Ibota is coming into favor also with those who are partial to privet hedges, its reliable hardiness being regarded as a partial compensation for its lack of the brilliancy and gloss of foliage characteristic of ovalifolium. When in flower it is also extremely handsome, but it sheds its foliage comparatively early in the fall, and thenceforth until spring it has no special attraction.

What Women Are Doing

"In man this blunder still you find,
All think their little set mankind."
HANNAH MOORE.

SACRAMENTO, CAL. Miss Alice Eastwood, of the Academy of Science of San Francisco, one of the leading botanists of California, is to name and classify the trees and shrubbery in Capitol Park. Miss Eastwood is doing this work for the benefit of the tourists and residents of this city who are interested in botanical work, and receives no compensation for her trouble. "As I classify the trees, I will put a temporary tag on them, which will tell the common name, botanical name, and the country of which the tree is native. The temporary tag will be replaced in a few days by a label similar to the labels used in the United States Botanical Garden. When I complete the work I will make a map showing the location of all the trees." — *Sacramento Bee*, Oct. 31, 1904.

SOMERVILLE, N. J. On his great estate near this village, Mr. James B. Duke, the tobacco king, is working night and day at the head of a force of three hundred and fifty men. The splendid estate of 1,700 acres is to have an addition of 700 or 800 acres, which will make it almost as large as Central Park. It is by far the largest private estate owned by any bachelor in this country. His conservatories are second only to those of the botanical gardens in the Bronx. One fountain alone represents an outlay of $200,000. The bronze statuary on the grounds cost $250,000. Single clumps of shrubbery brought from distant parts of the world cost thousands of dollars. One can travel fifteen miles over the farm without traversing the same road twice. The entire grounds are open to the public so long as the visitors obey the rules, which are simple and few. They are to "Keep off the grass," "Do not destroy shrubs and flowers," "Do not deface the statuary," "Do not fish in the lakes," and "Guns and firearms not permitted." There are no closed gates, no fences. The public may come and go and enjoy the beauty of the place almost as freely as the owner himself. In spite of this liberality Mr. Duke has been greatly bothered by vandals and reckless persons. The entire management of the estate falls upon the shoulders of one young girl. Her name is Miss Margaret Smith. If the coachman wants a new whip or the cook a new dishpan, they must go to Miss Smith for them. Upon her weekly expense account are expenditures of $1,200 a day, or more than $10,000 a week. For these payments she gives her personal check, rendering account only to Mr. Duke. She hires and discharges the help. She supervises the directions for house parties and, in fact, superintends every detail of work upon the estate; she is, withal, a charming person. — *The World Magazine*, Oct. 30, 1904.

The Liberty Bell, *en route* from St. Louis to Philadelphia, had a glorious reception in Indianapolis, the car being decorated by a committee representing the State Florists' Association and the route through the city being covered with flowers by the school children. These festivities, together with the elaborate banquet tendered to the Philadelphia Committee, used up large quantities of flowers.

Park Encroachments

Mr. George A. Parker, vice-president of the Park Department of the American Civic Association, is sending out the following "chaser for information."

Inquiries have been received asking for information regarding the encroachment on parks or public grounds, either by selling for private use or by the location of buildings, public or semi-public, which were not in keeping with the purposes of the park. One inquirer writes:

"I am fighting a building encroachment on our principal public park. Will you do me the favor of sending me any printed matter of information or references conveniently available in regard to the fights other cities have passed through to preserve the integrity of their parks. I want to be able to make specific quotations, and not confine myself to generalities. I am going to have a big fight, and I want as many authorities as I can get."

In another city some citizens are discussing the proposition of selling their public park to pay the municipal bonds due two years hence, and are about to circulate a petition to the next legislature for authority to do so.

Will not all who receive this send in such printed matter as they may have, or write out an account of his knowledge regarding encroachments on parks, whether successful or not? Please consider it in this way: If this was your park that was threatened, would you not be very desirous of obtaining such information as would help you to defend it? If so, then make the effort to send the information to those who are fighting to save their park. The information received to be compiled and sent out as a bulletin from this office. This request will go to every city in the United States of more than 10,000 population. If all report what they know regarding the subject, the result will be a most valuable bulletin. If no encroachment has been attempted on the parks of your city, please write and say none has been made. The record of cities where no attempt has been made is of importance in consideration of the question. Address reply to G. A. Parker, P. O. Box 397, Hartford, Conn.

Profitable Advertising. That's our business.

You / We want / to sell goods. / to do your advertising.

Let us get together.

See that poinsettias do not become pot-bound. They require liberal feeding, especially when crowded into pans or in small pots, and if they do not get it are liable to shed their foliage.

The man who is too busy to take time to think over his advertising generally has time later on. — White's Sayings, (Rusty Mike's Diary).

News of the Clubs and Societies

A spring show to take place before Easter is being talked of by the Buffalo Florists' Club, and the prize schedule will soon be out.

The Gardeners' & Florists' Club of Boston will have a field day at South Framingham, Mass., on Saturday, December 17, visiting several of the growers in that section.

The Louisville, Ky., Florists Society will hold its monthly meeting Tuesday evening, December 6, probably at F. Walker & Co.'s store. Annual election of officers will take place at this meeting.

The Massachusetts Horticultural Society has awarded first prize for school gardens for 1904 to the Fairhaven School, Fairhaven, and second prize to the Groton children's gardens, Groton, Mass.

The Utica (N. Y.) Florists Club has a membership of sixty-two, drawn from as far east as Canajoharie, thirty-five miles, Syracuse, fifty miles west and Norwich, twenty-five miles south. It is a prosperous and useful organization.

The Massachusetts Horticultural Society has made a proposition to the managers of the Boston Flower Market looking to an arrangement for holding the annual Market carnation exhibition in coöperation with the Society at Horticultural Hall.

The Cincinnati Florist Society holds its exhibitions in the club rooms at the Jabez Elliott Flower Market. These shows have always been eminently successful, bringing new varieties of flowers before the public as well as the craft, thereby educating the flower lovers and directly helping the trade.

The annual exhibition of children's herbariums at Horticultural Hall, Boston, took place on Friday and Saturday, November 25 and 26. It was, like its predecessors, a comprehensive display of New England flora, preserved and mounted in a manner indicating painstaking care and love for the study on the part of these enthusiastic young botanists.

The annual exhibit of the State Floral Association of Indiana was held November 15th at Indianapolis, in the agricultural rooms at the State House. No admission fee was charged and hundreds of people admired a fine display of the new and leading varieties of roses, carnations and chrysanthemums. Local florists, as well as florists over the state, made exhibits and the whole affair reflected great credit on all those interested.

The first annual exhibition of the recently organized New London and Groton Horticultural Society was held at New London, Conn., on November 21 and 22. President Thomas W. Head, gardener for Morton F. Plant, was a large exhibitor, with handsome decorative plants and cut bloom. W. A. Manda, Lager & Hurrell, Julius Roehrs, Cottage Gardens, Cohanzie Carnation Co., and the estate of G. Geduldig were among the notable commercial establishments represented by fine displays of their specialties.

The fourteenth annual meeting of the American Carnation Society will be held in the Auditorium Hotel, Chicago, Ill., January 28th and 29th, 1905. The exhibition will be held in the same place, and the hall is almost ideal for exhibition purposes, having a mosaic floor and good ventilation, so that it can be kept cool and damp.

The schedule of rules and prizes is ready and copies may be had on application to secretary A. M. Herr, Lancaster, Pa. The rules and regulations as given are preceded by the following pertinent announcement:

"Read these Rules; they are important and will be followed to the letter."

A word to the wise should be sufficient and there is no need for any exhibitor to be disqualified.

Papers will be read by Prof. Hasselbring on "Carnation Diseases," George Wienholber on "Carnations from a Retailer's Point of View," Fred. Lemon on "Exhibition Carnations,' and C. L Washburn on "Cutting, Packing and Shipping Carnations for Long and Short Distance Shipments."

A special rate of one and one-third fare has been conceded by the railroads for those attending this meeting.

Botanical Society of Pennsylvania

Dr. H. S. Conard of the University of Pennsylvania will be the lecturer at the regular meeting of the Pennsylvania Botanical Society, December 16. His subject will be "The Bark of a Tree." The lecture will take place in the Harrison Lecture Room of the University of Pennsylvania at 3 P.M. Tickets of admission can be procured by writing to Professor Macfarlane. During 1905 the following lectures have been arranged for.

Jan. 14, "The Chemistry of the Tree," Dr. Henry Leffmann.

Jan. 25, "The Distribution of American Trees," Dr. S. C. Schmucker.

Feb. 11, "The Evergreens," Oglesby Paul.

Feb. 25, "The Care of Trees," Alfred S. Haines.

March 11, "A Sugar Camp," Prof. M. G. Brumbaugh.

March 25, "The Trees in Winter," Miss Marion Mackenzie.

April 15, "The Folk Lore of Trees," Prof. A. W. Miller.

During the seven years of its existence these lecture or class meetings on Saturday afternoons, alternating with the general meetings on the first and third Fridays of the month, have proven a valuable feature of the society's work and have met a real need in the educational life of the community. Combined with the excursions which are held during the summer months, these meetings have undoubtedly been of great value in fostering and developing a widespread interest in botanical study.

G. C. WATSON.

One of the most enterprising firms in the West is the Butte (Montana) Floral Co. Last summer they bought out the old established firm of Law Bros. and Al. Wilhelm, who has been for a number of years, head decorator and salesman for the Butte Floral Co., is now manager of both stores, where the displays of roses and chrysanthemums this fall are said to be the finest ever seen in Butte. J. Seitz, formerly with Law Bros., is turning out the best chrysanthemums Montana has seen and R. Miller, a rose grower recently from the East, is equally successful with his specialty.

The Fall Exhibitions of 1904

The story of the shows in detail has already been told to all those interested in them locally or generally, and it only remains now to sum up in a few words the result collectively.

It would appear that the number of November exhibitions was larger than ever before and the attendance upon them seems to have been satisfactory in the majority of cases. The increase in number of shows given through private enterprise has been especially large, and it is to be noted that not infrequently the local florist club has been called into requisition to assist in making the enterprise presentable. This is a reversal of the old method where the club took all the responsibility and was not always successful in enticing outside coöperation. The innovation is a good one from the standpoint of the flower dealer, as it helps his business, stimulates the public interest in flowers, and, at the same time, relieves him of the risks of financing these affairs, a responsibility for which he is proverbially unfitted.

The records show the usual number of new aspirants in the chrysanthemum arena, but the ground has been well-contested by the older favorites, and the evidences of advancement are not striking in any instance. It also appears that varieties of foreign origin have been winning most of the honors, although there are two American novelties, Adelia and Majestic, that are spoken very highly of, and a number of unnamed seedlings of high promise.

In roses several new varieties of American origin have been shown, and high honors have been won, particularly by E. G. Hill's Richmond, previously known as Etna. La Detroit kept up to its good record and Wellesley impressed all who saw it very favorably.

Carnation growers kept their specialty well in the foreground in every exhibition of any consequence. Fiancee, Victory, Robert Craig, Red Lawson, Phyllis and several others merited and won great distinction.

Other novelties that attracted special notice were Begonia Turnford Hall, Geranium Telegraph, and, of course, those omnipresent and invincible ferns, Scottii and Piersonii elegantissima.

As to the big shows, each and every one of them was "the finest ever staged," and far ahead of anything to be seen elsewhere. Still, each had its individuality and pre-eminence in one feature or another. Boston was unapproachable, as always, on trained chrysanthemum plants; the World's Fair Show brought out an unprecedented display of florists' roses; the American Institute display included magnificent orchid groups, and furnished a valuable object lesson in the great value of potted evergreens in securing artistic effects in arrangement. It is said that the management of the Chicago show had to turn away intending exhibitors for lack of room and that Buffalo suffered from the same cause as well as overcrowding by visitors.

Perhaps the most notable example of enterprise was the set of fifty magnificent blooms sent to the Boston exhibition by W. Wells & Co., from England. And many of the blooms showed not a trace of their long journey.

THE ONLY HOUSE HANDLING THE NEW

Scarlet Seedling Carnation

(To be Disseminated in 1906)

VICTORY

Certificated at St. Louis World's Fair, Chicago, Boston and New York. Its splendid keeping qualities were demonstrated by the fine showing made at distant points, all the blooms having been shipped from New York.

Christmas Greens

The prospects for Christmas Greens are not over-bright this year. What few samples have already appeared on the market are not extra as to quality, and the prices are high. According to the latest reports from Jersey, Delaware, Maryland, and Virginia, holly is light colored and not well berried, and orders are being shipped about 50 per cent short. Lycopodium is fair as to quality, but is about 20 per cent higher in price as compared with last year. Mistletoe is fair quality and normal as to supply and price.

Widespread publicity, incessantly followed up, is to-day essential to business prosperity. We invite the patronage of all having goods or business to advertise, whether large or small, in all horticultural lines. We will see to it that HORTICULTURE reaches the buyers.

FLORISTS' TOPICS

Carnation Robert Craig as seen at J. D. Thompson Carnation Company, Joliet, Ill., is superb. Blooms are now 32 inches diameter on 30-inch stems.

The supply dealers are offering wreaths of prepared ruscus foliage which a short distance away, closely imitate the fresh box-wood material.

Judging from the quality of the blooms coming to the New York wholesalers thus far, the "Up-the-Hudson" violet growers have lost none of their proficiency.

Roses in the vicinity of New York have suffered severely from thrips this fall. The loss to growers from damaged buds, of American Beauty especially, must have been very large.

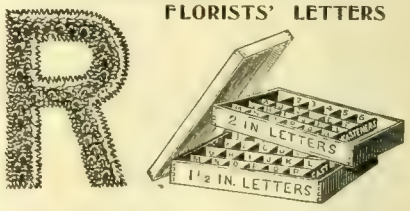
The floral establishment of Michael Conroy at Fall River, Mass., was badly damaged by fire on November 25. Mr. Conroy estimates his loss at nearly $500. There was no insurance on the property.

The new greenhouses at Columbia Gardens, Butte, Mont., are nearly completed and Superintendent R. Siegel expects to be comfortably settled therein by December 15. The new conservatory will be stocked with palms and other show plants under the direction of the assistant florist, Mr. Cocayne.

Indianapolis, Ind., reports business all through the fall as fairly active and now steadily improving. Social affairs, funerals and other events that bring business to local florists have been numerous, and the coming months promise large orders for fashionable teas, banquets and debutante parties. Violets, carnations and roses are coming in more freely and in improved quality. Among the local growers now supplying high grade flowers are the Smith Young place, whose violets are fine; E A. Nelson, with roses and chrysanthemums above the average; John Hartje, with his new Moonlight carnation, and Baur & Smith, with several seedling chrysanthemums and carnations of great promise. Lorraine Begonias at H. W. Rieman's, and general plant stock at Bertermann Bros.', are excellent. Recent trade visitors were J. A. Haugh, Anderson, Fred Lemon, Richmond, Robert McKeand, Marion, W. W. Coles, Kokomo, Peter Weiland, New Castle, Wm. Humfeld, Muncie, Ind., and L. L. May, St. Paul, Minn.

Chicago Wholesale Cut Flower Market

As Reported Nov. 28, 1904.



Receipts smaller and prices advanced with ending of chrysanthemums and colder weather. Rose market active, receipts light and demand fair to good. Carnation receipts very light. Longiflorums scarce, callas in good demand. Violet receipts larger than last week and prices firmer. Lily of the Valley sufficient for all demands.

Chicago Wholesale Prices per 100.

American Beauty, four ft. stem, $40; three ft., $25; 30 inch, $25; smaller sizes, $8 to $20. Tea roses, extra, $7 to $8; select, $5 to $6; seconds, $3 to $4. Carnations, fancy, $5; select, $4; ordinary, $2.50 to $3.00. Callas, $12 to $16. Violets, double, $1 to $1.50; single, $.60 to $1.00; Swanley white, $2 to $2.25. Lily of the Valley, $3 to $4. Chrysanthemums, Eaton and late Chadwick, $25 to $33. Stevia, $3. Myosotis, $2 to $4. Paper whites, $3 to $4. Roman hyacinths, $3 to $4. Asparagus, strings, $40 to $60.; sprays, $2 to $3; Sprengerii, $2. Smilax scarce at $10 to $16.

Orchids are C. W. McKellar's great specialty; Vaughan & Sperry have a fine grade of Princess of Wales violets; Peter Reinberg is cutting Uncle John rose in splendid form; the old established Fuchs establishment is for sale on account of ill-health of owner; Weiland & Risch are cutting Beauty, Liberty, Bride, 'Maid and carnations of remarkable quality; their trade has doubled since last year. George Wittbold Co. have a splendid stock of specimen palms and decorative plants. Wietor Bros. are just in season with fine holiday stock.

Thanksgiving Day Reports

Thanksgiving business in Boston was somewhat of a disappointment. Much material that should have been on the ledger by Wednesday night was still in the wholesalers' ice boxes. Carnations were in much larger supply than anticipated and there was a large surplus of white ones left over. Second class carnations were immovable, but the percentage of these was not large, the quality generally being excellent. Roses showed a disposition to lag also. Chrysanthemums were off quality. Their season is waning, yet there have been enough of them on hand to weight down the market. It is not considered that Thanksgiving business fell off any in volume this year, but the weather had been favorable for heavy production.

Louisville, Ky., reports that business conditions were particularly favorable all through the week and Thanksgiving Day caused a good demand for flowers. Chrysanthemums sold very well, and this is also true of carnations, especially the choice grades of which this market had a fair but not adequate quantity. Violets were shy in supply, with a good call. Window displays by William Walker, of High School colors, purple, gold and red, Mrs. C. B. Thompson of pink chrysanthemums, Nanz & Meuner of mammoth chrysanthemums with small red electric lights, and by Mrs. Charles W. Reimers of chrysanthemums and poinsettias, were all very attractive and appropriate. All the above named, also A. R. Baumer and Jacob Schulz, did a fine business. Jacob Schulz, who has an unprecedentedly fine lot of Lorraine begonias, found a brisk sale for them.

Thanksgiving business was the best ever experienced in Baltimore. All stock is reported short at present, with the exception of carnations, of which there are just about enough to supply the demand. Roses are called for in excess of supply and violets are very scarce. Prices to dealers in hundred lots during Thanksgiving week were as follows: Roses, Beauty, extra $35; Nos. 1, 2 and 3, $8 to $25; Bride and Bridesmaid, extra $6 to $8; Nos. 1, 2 and 3, $3 to $5; Perle, $3 to $5; Golden Gate, $3 to $8; Ivory, $4 to $8.

Carnations, Lawson and Enchantress, $2 to $3; other standard varieties, $1.50 to $2.50. Violets, single, $.60 to $1; double, $.50 to $.75. Lilies, $8 to $10. Narcissus, $3. Roman Hyacinths, $2 to $3. Asparagus bunches, $25 to $50; strings, $25 to $50. Smilax, $15 to $25.

A. Wiegand & Sons of Indianapolis, had quite a novel Thanksgiving window. Nearly every product of the farm was represented. A liberal display of moss-covered rail fence, some neatly constructed turkeys of bronze, galax and ponpom chrysanthemums were used. The window was illuminated by a moon shining through a large tree constructed of imported beech sprays.

Chicago reports having enjoyed an ample Thanksgiving supply and good demand, but more or less loss on low-grade or stored flowers. Carnations were abundant. Violets seemed to resent any effort to boom their value.

Flower Market Reports

Boston Wholesale Cut Flower Market

Report for Wednesday, Nov. 30, 1904.

The cutflower market is quite strong, much improvement over Thanksgiving conditions being noticed. American Beauty roses are being received in greatly reduced quantities, violets clean up finely every day and generally healthy conditions prevail in the carnation traffic, the only exception to the prevalent activity being white carnations which lag considerably, owing to the remnants of chrysanthemum crop which yet remain.

Boston Wholesale Prices

Wholesale prices to dealers in hundred lots are quoted as follows:

American Beauty and Edgely, best, $25 to $40; medium, $12 to $20; low grades, $2 to $6. Bride and Bridesmaid, best, $12; medium (best sellers), $6 to $8; Culls, $1 to $3. Liberty, good demand for special, $12 to $15, and common, $6 to $8. Carnations, best, $3 to $4; ordinary, $1 to $2. Violets, $.75 to $1. Chrysanthemums, $6 to $12. Lily of the Valley, $3 to $5. Roman Hyacinths, $1.50 to $2. Narcissi, $1 to $2.50. Cypripediums, $12.50. Cattleyas, $40 to $50. Smilax, $8 to $12. Adiantum, $.75 to $1. Asparagus, $35 to $50.

Summary of New York Wholesale Cut Flower Market

For week ending Monday P.M., *Nov.* 28.

Roses and carnations have been meeting with a fairly good demand and the tendency is toward strength in prices of teas, the better grades of which are in especial demand, especially in the case of Bridesmaid. Bride is steadier than 'Maid in the No. 1 and 2 classes. Of American Beauty there is an ample supply and the demand has been fair. They have, however, reached a figure that cuts out the small dealers, except when a surplus compels a drop in figures and under these conditions, with an increasing cut, the menace of a possible surplus haunts the dealer constantly. The fancy and special grades of Killarney are selling well. Violets are not selling nearly as freely as they did previous to Thanksgiving Day and prices are unsteady. There is an abundant supply of them. In carnations the tendency is towards an increase in quantity. Smilax is very plentiful. Chrsanthemums are heaped up on all sides and any offer buys them.

Current Wholesale Cut Flower Prices in New York City to Dealers, in 100 lots

For week ending Monday P.M., *Nov.* 28.

Roses, Beauty, special, $30 to $40; extra and fancy, $15 to $25; No. 1, $10 to $15; Nos. 2 and 3, $1 to $8; Bride and Bridesmaid, special, $12 to $15; fancy, $6 to $10; Nos. 1, 2 and 3, $2 to $5. Liberty, fancy and special, $12 to $25; No. 1, $6 to $8; Nos. 2 and 3, $2 to $4; Mrs. Morgan and Golden Gate, $2 to $10. Carnations, Lawson, $2 to $4; Enchantress, $3 to $6; general list, $1 to $4. Violets, single, $1 to $1.50; double in fifties, $.50 to $1.25; specials in hundreds, $1 to $1.75. Lilies, $8 to $15. Lily of the Valley, $2 to $4. Roman Hyacinths, $1 to $2. Narcissus, $1 to $2. Adiantum Croweanum, $1.25 to $1.50; Adiantum cuneatum, $.50 to $.75. Asparagus, bunches, $25 to $35; strings, $25 to $50. Smilax, $8 to $12.

Business Changes and New Establishments

W. L. Kennedy of Kennedy Bros., has opened a retail store at 702 N. Fremont Avenue, Baltimore.

E. Law has opened a new flower store on Broadway, Butte, Mon.

William Billingsly of Indianapolis has taken Robert Norwood into partnership.

J. J. Casey has opened a fine new store, under the title of "The Rosary," at Bromfield Street, Boston.

The partnership between C. & F. Davis at Denver, Colo., has been dissolved, F. Davis retiring from the firm.

John Kepner has opened a store at Harrisburg, Pa.

Robert Newcomb of Des Moines and W. E. Kemble of Oskaloosa have bought out their partners' interests in the Morris-Blair Floral Company of Des Moines, Ia.

Sigmund Geller, dealer in florists' supplies, has moved down to the ground floor at 110 W. 28th Street, New York, and has now a very convenient and commodious establishment.

The old store, so long occupied by Robert Veitch & Son at 974 Chapel Street, New Haven, Conn., is being remodelled and will be occupied by Charles Munro.

Ellis Bros., long established as a firm in Keene, N. H., have organized as a corporation under the laws of New Hampshire.

The greenhouses of the Twin City Floral Co. at Benton Harbor, Mich., have been sold and torn down.

Edwin Dove has gone into business, with one greenhouse, at North Leominster, Mass.

Collins & Harrison Company have opened a store at 164 Euclid Avenue, Cleveland, O.

McKerr & Hawley, Canandaigua, N. Y., have dissolved partnership and Mr. McKerr will continue the business.

J. J. Beneke has removed from the store he has occupied for many years at 1220 Olive Street, St. Louis, to 1216 Olive Street.

W. J. Palmer, Buffalo, N. Y., is remodelling his downtown store, and when completed it will be a model in its line.

J. Breitmeyer's Sons of Detroit are preparing to demolish their old buildings on Gratiot and Miami Avenues and erect on the site a large business block, the ground floor to be especially fitted up for their own use as offices, show rooms and work rooms.

The Johnson-Lundy Floral Co. have opened a new store at Pueblo, Colo.

Thomas J. Leyden has opened a first-class flower store at 117 W. Water Street, Elmira, N. Y.

C. E. Smith & Co., 121 North Liberty Street, Baltimore, Md., have remodelled their store and added a conservatory at the rear.

James Burke has bought the greenhouses and business of James Mann, at Ipswich, Mass.

T. W. Hardesty and Howard Oots of Cincinnati have organized as the Lexington Floral Company and are opening a fine store in Lexington, Ky.

S. W. Pike of Akron, O., has sold out his business and retired.

M. Z. Kellogg has opened a new store at 447 East Water Street, Decatur, Ill.

Thomas G. Thrasher, Avon, Mass., has filed a bankruptcy petition. He owes $2743.71. No assets

PIPE WROUGHT IRON vs. STEEL

The question is settled in favor of Wrought Iron for the florist; but the problem is: How to get wrought iron?

C. T. RAINEAR & CO.

Have proved their standing on this question by their record on "GUARANTEED" WROUGHT IRON PIPE. You get what you order with an absolute guarantee. You get it promptly and you get it at the lowest market rates. Our motto: "PROMPTNESS, LOW PRICES." Mention "Horticulture" when you write.

C. T. RAINEAR & CO., 518 ARCH STREET PHILADELPHIA

INVESTIGATE THIS FOR YOUR OR YOUR FRIENDS, SAKE. $20,000 VALUE FOR LESS THAN ONE-HALF, ON ACCOUNT OF FAILING HEALTH FOR SALE!

One of Chicago's best and oldest retail places newly rebuilt this summer, established 24 years: 100 feet from boulevard, four different cars stopping in front of store, located on two main thoroughfares three blocks to the Lake, Elevated and railroad, consisting of one of the prettiest stores, with large, light basement, and three beautiful conservatories, all highly modern, cement walks, 200 feet long. The store is connected on three sides with greenhouses, all visible from the store and the street, showing waterfalls, grottoes, etc.; patronized by the aristocracy of the city. 2500 apartment buildings are within 10 blocks radius, besides the best residences of the city. The store has marble floors, large mirrors, colonial mantels, steam heat, large refrigerators, showing to the street and store. The view to the conservatories is grand all through; large art glass windows. There is enough glass to grow all the bulbous stalk, the Chrysanthemums, the Azaleas, Lilies and bedding plants, besides 10,000 Palms, 50,000 bulbs, 800 Azaleas, 3,000 Lilies, 200 Araucarias; $500 worth of supplies, $500 worth of boxes, and enough coal for all winter included. Running expenses $16; present owner holds very large real estate, all accumulated here during the last six years, but will sell for a very small price, on account of failing health. Please take the trouble to make a thorough examination. Address MR. CROPP, of J. C. VAUGHAN, to do it for you; can be had at once or later.

Address HORTICULTURE,
11 Hamilton Place, Boston.

It will cost you but 90 cents an inch each week to tell 10,000 people what you have to offer and the price. Send us copy now while you have it in mind.

BARGAINS IN HIGH-GRADE RELIABLE BULBS

Our new crops of seeds are arriving daily and the question of storage room is a serious one. In order to make space we will clear out what bulbs we have left at very low prices. Every one of the following would be good value at 20 per cent higher.

HYACINTHS EY. WHITE ROMAN selected, 12 to 15c.; $22 per 1000; $42 per case of 2000.
HYACINTHS EY WHITE ROMAN extra selected, 13 to 15c.; $25 per 1000; $30 per case of 1250.
HYACINTHS DUTCH, Single, all colors mixed, $2.50 per 100; 22.50 per 1000.
HYACINTHS DUTCH, Double, all colors mixed, $2.75 per 100; $25 per 1000.
CHINESE SACRED NARCISSUS, $1 per basket of 30; $3.50 per bundle of 120.
NARCISSUS DOUBLE VAN SION, selected, $12 per 1000.
NARCISSUS DOUBLE ORANGE PHOENIX, $8 per 1000.
CALLAS WHITE, fine roots, $5 per 100.

BULBS GIVEN AWAY!

Besides offering our Surplus Bulbs at about one half cost to all purchasers of $10.00 and upwards—we will present

1,000 SPANISH IRIS BULBS—VALUE 5.00—FREE! **Spanish Iris,** being hardy, may be planted either outside or in cold frames, and will stand gentle forcing. As a flower for Decoration Day it has no equal, either as a cut flower or pot plant, having long, upright stems, and large flowers of much substance and various colors

SPECIAL OFFER SURPLUS BULBS, $15.00 FOR $10.00.

LILIUM HARRISII Some of these have commenced to root. This should make little or no difference with their flowering—if planted at once. Otherwise they are in splendid condition, and the best bargain we have ever offered.

Planted now, they will flower just between times—that is, just after the early potted Harrisii and before the Japan Longiflorums; or you can hold them till Easter. We are sure the following prices will interest you.

Your choice of sizes. All same price, difference only in number of bulbs cases contain.

$8.00 PER CASE. REGULAR PRICE, $16.00.

5 to 7 in. bulbs are packed 400 in a case. 6 to 7 in. bulbs are packed 300 in a case. 7 to 9 in. bulbs are packed 200 in a case.

When less than whole cases are wanted, add 10 per cent. to above prices for packing and boxing.

WHITE ROMAN HYACINTHS **13 to 15 ctm., 1700 in a case, $2.50 per 100; $22.50 per 1000, worth $30.00.**

LOS ANGELES, CAL. — J. W. Wolfskill Nurseries, rose house, 26 × 350.

Miscellaneous Notes

Hinsdale, Mass., hardy fern gatherers, report ferns several millions short of the usual supply this season.

Rennie & Pino of Providence, R. I., report an excellent fall business with bulb stock short of the demand.

Vitis rhomboides, with handsome trifoliate leaves of leathery texture, has all the desirable qualities of an evergreen climber for dwelling-house cultivation.

They continue to say good things about C. W. Ward's phenomenal scarlet carnation, Robert Craig. This is evidently one of the varieties which loses nothing in estimation on long acquaintance.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column

F. J. Clark has purchased the seed business of Carl E. Taube, Trenton, N. J.

H. A. Dreer is putting up a large seed warehouse on Locust Street, Philadelphia.

Charles P. Braslan of San Jose, Cal., started November 20 on his annual eastern trip.

H. E. Meeker & Co., Bay City, Mich., have incorporated as the H. E. Meeker Seed Company.

The Capital Seed Company of Des Moines, Ia., have purchased the Hawkeye Seed Company's business.

The Western Seed Company is erecting a new warehouse at Shenandoah, Ia., with storage room for 9,000 bushels of corn and seeds.

Dealers were early sold out of crocuses and Poets' Narcissus bulbs and the demand left unsupplied is large. The custom of planting these favorite early spring bloomers in the grass so that they will come up in nooks on the fringes of plantations and alongside garden walks is growing, as it should with those who appreciate artistic home surroundings.

Notes on Philadelphia Cut-Flower Trade

For the week ending November 26th (Thanksgiving week) S. S. Pennock reports as follows:

Beautys: demand pretty fair; prices stiffening quite a little. Libertys: about the same as Beautys; the demand for all red roses was good for the week. Brides and others: market about normal. Carnations: quality improving and prices getting better. Chrysanthemums: good demand and fair prices. There was a run on yellow for the army and navy game. Lily of the Valley: going O.K., good demand, good quality, good price. Orchids: cattleyas very scarce, Dendrobium formosum to be got in quantity, also phalænopsis cypripediums and Vandas plentiful. Paper Whites: plentiful and not going fast. Romans: only a few in the market yet and not much demand. Christmas Greens: very little holly has arrived as yet in this market. Crop promises poorly, light green and not extra well berried. Lycopodium good and plenty of it, prices a shade higher than last year. Wreathing and mistletoe about normal as to supply and quality.

Edward Reid, for the same period, reported as follows: Beautys: in brisk demand, especially the shorter grades; long stems did not go so well and were not so remunerative in proportion. Libertys: moved good. Brides and others: good demand for good stuff; seconds went for anything we could get. Kaizerin on the wane — no one seems to want it now. Carnations: early in the week scarce and bringing good prices on account of the brisk out-of-town demand; but a glut on Thursday with poor returns, the result of holding back on Monday and Tuesday. Growers are apt to forget that the shipping trade requires the stock about 3 days earlier than the city demands. Best sellers were Enchantress, Lawson, Nelson and Dorothy. Thinks Flora Hill still holds first place in whites, if well grown. Violets: very scarce; a great many more could have been sold. Chrysanthemums: moved well but no advance in price. Best sellers were Bonaffon, both white and yellow, Maud, Dean, and Mrs. Jerome Jones, both white and yellow. The call for yellow for the army and navy game far exceeded the supply. Lily of the Valley: moved well at about normal figures. Paper Whites: slow. Romans: not many around; demand fair. Greens: big demand for Asparagus plumosus.

Philadelphia Price Quotations for week ending Monday P.M., November 28. Rates per hundred to dealers:

Roses: Beauty, fancy to special, $25 to $40; No. 1, $15 to $20; Nos. 2 and 3, $6 to $12.50. Bride and Bridesmaid, fancy to special, $6 to $10; Nos. 1, 2 and 3, $1 to $4. Liberty, fancy to special, $12.50 to $20; Nos. 1, 2 and 3, $2 to $10. Golden Gate, fancy to special, $5 to $10; Nos. 1, 2 and 3, $1 to $4.

Carnations: Lawson and Enchantress, $3 to $5; common, $1 to $2; fancy, $3 to $4; novelties, $4 to $6.

Violets: Single. $.50 to $.75; double, $.75 to $1.50; special, $1.50 to $2.

Chrysanthemums: common, $12 to $16; fancy, $25 to $35.

Narcissus Paper White, $2 to $3. Roman Hyacinths, $2 to $4. Poinsettias, $12.50 to $40. Cattleyas, $60. Cypripediums, $15. Vandas, $20. Dendrobium Phalænopsis, $8 to $10. D. formosum, $40. Adiantum Croweanum, $1.50. A. Cuneatum, $.75 to $1. Asparagus, $25 to $50. Smilax, $12 50 to $15.

The numerous friends of Edgar Sanders will be rejoiced to learn that the old veteran has recovered from his long illness sufficiently to permit him to go downtown for the first time since July, 1902, and see the exhibition at Chicago.

Personal Items

Continuous advertising wears away dull times.

I. N. Kramer, Cedar Rapids, Ia., and B. G. Lambros were visitors in Chicago this week.

George W. Wienhoeber of Chicago, has just returned from a trip to the World's Fair.

Sidney Smith, Indianapolis, has been on the sick list for several weeks but is now improving.

Mr. and Mrs. Timothy O'Connor of Providence, R. I., are sojourning at the Arkansas Hot Springs.

George B. Windler of St. Louis was married to Miss Anna Margaret May on Tuesday, November 22.

From Buffalo comes the report of gratifying activity and excellent shipping trade for Thanksgiving.

James Dangelzer, formerly employed at Columbia Gardens, Butte, Mont., has gone to Albuquerque, Mexico.

Miss Josepha Then of Chicago was given a surprise party in honor of her 18th birthday. Quite a number of the trade were present.

A. P. Calder, formerly of Dorchester, Mass., is meeting with success in his new business at Brockton, where, under the title of the Calder Floral Company, he has two new greenhouses, for the product of which he finds a good local market.

Joseph R. Freeman, vice-president-elect of the S. A. F., and Mrs. Freeman celebrated the twenty-fifth anniversary of their marriage, at their home in Washington, D. C., on Saturday evening, November 26. A large concourse of friends extended congratulations and hearty good wishes.

Buffalo Wholesale Flower Market Report

Roses and carnations of the best grades are selling readily and are frequently in short supply. Second quality stock is more plentiful. Chrysanthemums are still with us in quantity. The high price which we were forced to demand for violets at Thanksgiving has scared the public, consequently we now have more violets than we can dispose of. Such stock as Roman hyacinths, paper whites, lily of the valley and stevia are not moving very fast. Smilax is very plentiful.

Buffalo Wholesale Prices

Reported for Nov. 28, 1904, to dealers, in hundred lots: —

American Beauty Special, $33 to $50; extra, $20 to $25; No. 1, $12.50 to $15; Culls, $2 to $5; Bride and Bridesmaid, extra $8 to $10; No. 1, $5 to $6; No. 2, $3 to $4; Cusin, $2 to $6; Golden Gate, $2 to $8; Kaiserin, $2 to $8; Liberty, $3 to $12; Meteor, $2 to $8; Mrs. Morgan, $2 to $6; Perle, $3 to $5; Cattleyas $50 to $60. Carnations, Novelties, $6 to $8; fancy, $3 to $5; standard, $2 to $2.50; inferior, $1 to $1.25. Callas, $8 to $12.50. Chrysanthemums, fancy, $12.50 to $25; ordinary, $4 to $10. Roman hyacinths, $3 to $4. Lilies, $15. Lily of the Valley, $3 to $5. Mignonette, $3 to $4. Narcissus, $2 to $3. Stevia, $1 to $1.25. Violets, extra, $1.25 to $1.50; ordinary, $.75 to $1. J. D. Thompson Carnation Company
JOLIET, ILLS.

New Daisy Queen Alexandra.

This is a charming form of Chrysanthemum frutescens, and originated in South Africa. It is a novelty of great merit and the anemone-formed blossoms are of the purest white.

Double, semi-double and single flowers appear in profusion on the plant; the majority, however, are double

and semi-double. The three forms are shown in the illustration. Every shoot produces a blossom and in summer outside it makes a bushy specimen very rapidly and is soon covered with hundreds of flowers which last several days when cut. It is being distributed by Sorder & Sons, St. Albans, England.

WATSON'S CLEARING SALE

After the Chrysanthemums are out of the way, fill up with Callas, Gladioli, the Bride, Freesias, etc. See below for some timely bargains.

Report on Greenhouse Glass

Owing to a strike which has been going on since last spring in the factories in Belgium, all glass for greenhouse purposes for the present can be obtained from manufacturers in this country only. At the present time prices for American glass of certain kinds are quite low. If the strike abroad should continue for any length of time, the demand for greenhouse sizes on the American manufacturers would be so large in proportion that it would seem likely that they would restrict purchasers either to limited amount of those sizes or obtain much higher prices.

In buying American glass, purchasers should take into consideration that there is a great difference in the quality of glass as manufactured in different factories. The best glass is often the cheapest in the end, as glass having bubbles or strings is not suitable for greenhouse purposes. We should advise buying in American glass only A or second quality, and would recommend obtaining it through dealers who carry only the best Pennsylvania makes. The foreign glass has been used to the greatest extent in this market, and for those who do not intend to use glass until late the coming year, it might be well to wait until it can be determined whether the foreign factories will resume operations or not. If, however, glass will be required in the early spring, it would seem that it might be well to place the order before the demand on the American manufacturer has become too great.

TO-BAK-INE FUMIGATING PAPER

Scarborough, N. Y.

Dear Sir: — We wish to say that your To-Bak-Ine Fumigating Paper is the most satisfactory agent for the destruction of Green Fly that has ever been brought to our notice. It is clean, quickly applied, and effective. As you know, we have been heavy buyers of this product, all of which has been used in our own greenhouses. And as actions speak louder than words, we think no further recommendation on our part is necessary.

F. R. & P. M. PIERSON.

$6.50 per case of

each 36 inches long

TO-BAK-INE LIQUID

Mt. Clemens, Mich.

Dear Sir: —Having used your To-Bak-Ine products in all its forms, will say that your To-Bak-Ine Liquid is the article for our purpose, as it does its work effectively without injuring the most sensitive blooms, and it is so easily applied. You can book us as regular customers, as we are more than pleased with same.

Yours very truly,

JOHN BREITMEYER'S SONS.

TO-BAK-INE FUMIGATING POWDER

Corfu, N. Y.

Dear Sir: — For the past 4 weeks I have used your To-Bak-Ine Fumigating Powder in several carnation and rose houses, fumigating in the carnation houses once a week and in the rose houses twice a week. The quantity used each time was 4 half pounds of the dust equally divided as to distance in a house 125x20, burning it in pie dishes with the bottoms cut out and a piece of mosquito netting in its place, and one end of dish raised 3 inches from ground, which gives sufficient draft for the dust to smolder and burn clean up. It has entirely kept down all signs of Aphis. It leaves no odor on the flowers, and has not in the slightest hurt either flower or foliage on the roses, as does burning tobacco stems.

Very truly yours,

WILLIAM SCOTT.

A FEW USEFUL FERNS FOR EVERYDAY USE

"Which are the best ferns for apartments?" is a question often asked the florist. The unfavorable conditions of a room and unhealthy atmosphere in which they have to grow after leaving the healthy surroundings of a greenhouse, makes it quite hard for these beautiful plants to live. Some are hardier than others and stand longer the dry, dusty air of the rooms, and a great many are grown for that purpose There are lots more that can be used with great advantage for room decoration. Let us look over a few.

The Cyrtomiums are, without exception, some of the best when it is not too hot where they are raised, for they are natives of Japan and stand quite a good deal of frost if necessary, better than too much heat.

Cyrtomium falcatum is known well enough for its durability, and its large, glossy, dark-green fronds. Just as hard and effective is the variety Cyrtomium falcatum pendulum, with narrower pinnæ and of a graceful, pendulous habit which is accentuated in fully developed plants.

Cyrtomium caryotideum (or falcatum caryotideum, to be correct) is different from falcatum in its drooping habit, much larger pinnæ and the dull green color of its fronds.

Cyrtomium Fortuneii (or falcatum Fortuneii) is quite distinct from the others. The fronds are longer in proportion, the plant more leafy and of an upright habit, the color of a dull, dark green and lighter green in the young frond. It makes a well-formed bushy plant.

Cyrtomium atratum (Lastrea atrata or Nephrodium hirtipes) has the fronds arching and the pinnæ narrow and long. The fronds, one to two feet long, tapering at the top, are not unlike a short nephrolepis frond, but of more substantial texture. It is a nicely built fern.

Cyrtomiums have the fruit dots scattered irregularly all over the under part of the top pinnæ of the fertile fronds. They are very easy to grow from spores and need no different treatment from that given any other ordinary ferns. They are of rapid growth, but do not like much heat. They stand the dry, gassy atmosphere of apartments the best and are very attractive when mixed with other fine cut-leaved ferns.

Lastrea erythrosora is a veryeffective Japanese fern. The fronds, two feet long by one wide, of triangular form, are bluntly divided, strong of texture, and most beautiful when the young well-formed fronds, of a bronzy color, are growing out. They turn with

age to a dark, shiny green. This is a rapid grower, makes good plants and is easily raised from spores.

Lastrea prolifica, another Japanese fern much related to the preceding, is of smaller habit, has the divisions of the fronds narrow and spaced, and the fruit dots before maturity are of a red color. It is easily propagated from spores and from leafy buds that grow on the surface of the frond. Both are easily grown, and no special treatment is needed.

Polystichum setaceum, of Japanese origin, will be one of the most popular ferns for decorative purposes. The fronds, over one foot long, are of leathery texture, of a dark shining green color. The leaflets are close together, and bristly. The plant is of a spreading habit and very effective. Easily grown from spores.

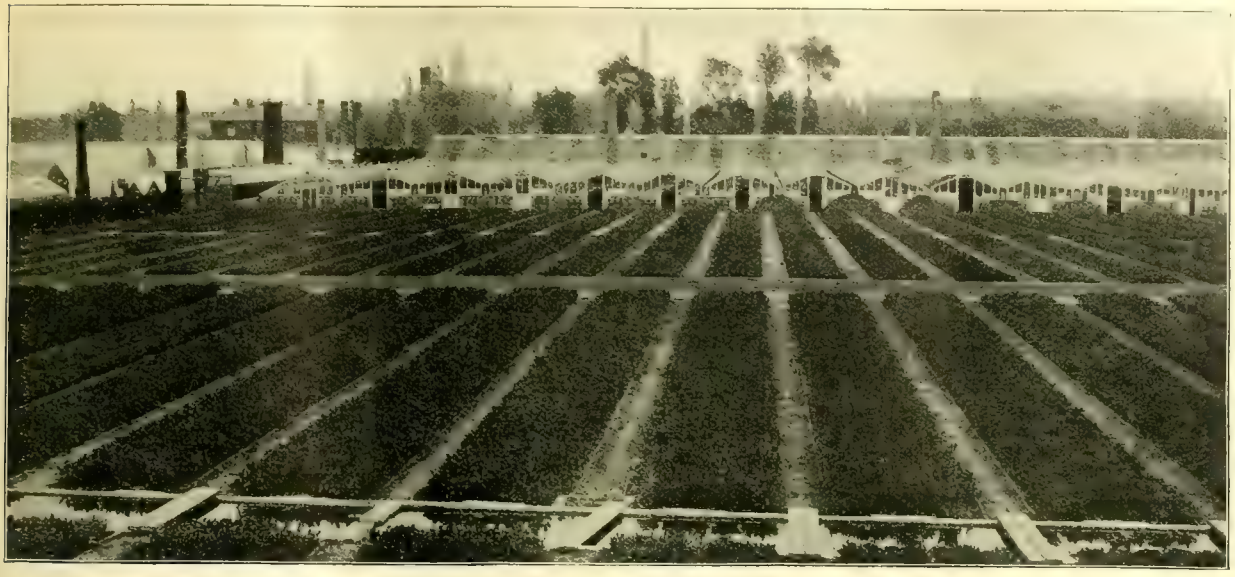
Lastrea Standishii (laserpidifolia). Another Japanese fern of luxuriant growth. The fronds are of firm texture and not very numerous, and when full grown are often over two feet long and one and a half in breadth, of broad spire-shaped form. The pinnules being close together and finely cut, give the plant a massive but feathery appearance. The accompanying picture is from young seedling plants. This makes a very elegant plant when grown up as well as when young. It is easily grown from spores.

(To be Continued.)

Pot Grown Carnations

One of the subjects of especial interest to carnation growers at present, is the behavior of certain varieties, under the diverse conditions of "field grown" and "pot grown" culture. By the latter method we mean carrying the young plants along into 3 in. and 4 in. pots, inside or in a cold frame, until the beds or benches can be secured for their final planting, without subjecting them to outside planting whatever.

While, as a general rule, field growing and early benching give good results and is a safe and conservative system to adopt with any variety, it has been proved beyond a doubt that "pot culture" with some varieties will give earlier flowers, longer stems, and equal production of first grade flowers. A great objection to "pot culture," and no doubt one of the reasons that it is not more generally adopted, is that by the time the plants are thoroughly established and ready to bloom, the soil has become impoverished and there is little left in it to produce large flowers and carry the plants along. As a natural consequence, "feeding" must then be resorted to and kept up, and right here is where trouble commences. It is a simple matter to describe any operation in the culture of a plant, or the various methods that may be adopted to gain a certain result, but when it comes to advice on administering "stimulants," we have reached a point where, without a thorough knowledge of the treatment the plants have been receiving, and some knowledge of the traits of the soil in which they are growing, it is sheer guess-work to say what particular "feed" would be suitable. The only method one can pursue and be assured of success, is to confine oneself to the use of ingredients such as well-rotted cow or horse manure, or pulverized sheep manure, and only use concentrated manures in a small way until their effect has been demonstrated.



Among the staple varieties that seem to derive the most benefit from "pot culture," are Mrs. Lawson, Enchantress, Queen Louise and Harlowarden. The Queen and Lady Bountiful, especially the former, do not seem to do quite as well. Enchantress is equally good either way, and in fact, in a house of plants under each system no perceptible difference is discernble with the exception that the field-grown plants are throwing hardly any stem cuttings, while the others have from two to four, the length of stem, size of flower, etc., in each being the same. Of the new varieties, viz, Nelson Fisher, Mrs. Patten, Ethel Ward, Octoroon, Judge Hindsdale, Indianapolis, Flamingo, and others it is too early to pass an opinion, for, if it requires three years to test a seedling, it surely will take two years to find out whether a new variety will pay to grow or not, considering the condition in which stock of the majority of new varieties is received. It takes usually one season to get a healthy lot of plants for a fair test, the few scraggy flowers produced during their first season sufficing only to give one an idea of the color, etc. Seldom, indeed, during their first year do they send up a flower at all approaching the glowing descriptions that have heralded their advent, and alas! how many of them after having a "fair show" find their level amongst the "has beens" and "also ran."

We hope you will like HORTICULTURE and recommend it to your friends in the trade. Send in their subscription now to insure complete file from first number. We want to see on the list of subscribers every one identified with any horticultural industry. We draw no lines, but *invite you all* to help by your subscriptions, your contributions, and your approving words to make HORTICULTURE the best known and the best liked professional journal in our country. Every $1.00 subscription sent in is a *practical help* to this end.

Azalea indica and Houses at Bruges, Belgium

Herewith are seen two views of Sander & Sons' Azalea field in Belgium. There are some 150,000 plants grown, from the small grafted plant to specimens of immense size up to 10 feet in diameter. Here also will be found the largest collection of pyramid azaleas in Europe. Only the finest and most showy kinds are grown. From the open ground all orders are executed in the autumn, and the remainder are planted out in the houses shown in the photographs, where they remain until the spring, when they are again transferred to the beds outside. At the extreme left of the picture there are houses devoted to Kentia culture. The method of watering is entirely by hand, 20 to 30 men doing the work with two cans each, the water being obtained from long tanks similar to the one in the foreground of illustration.

A. Dimmock.

PYRAMID AZALEA INDICA

Isn't My Money as Good as Theirs?

I heard this query put the other day by a wealthy private citizen with a fine country residence, "Isn't my money as good as theirs?" to a firm in the horticultural trade from whom he was trying to buy some stock in quantity. Mr. A. had seen some wholesale catalogue and naturally thought he ought to buy from Messrs. B. at trade rates. Messrs. B. do a wholesale and a retail trade and have a scale of prices for each department. They explained to Mr. A. that the wholesale prices were only for those who bought to sell again, or in other words for those who were "in the trade." But Mr. A. contended that if he bought in equal quantity, he was entitled to just as good prices even if he didn't want to sell again and demanded indignantly, "Isn't my money as good as theirs?" He finally declared that unless he got trade rates he would go to another firm and felt sure he could get there what he wanted. Messrs. B. stood to their guns and lost the customer.

The question arises: did they do right? And did Mr. B. get what he wanted from another firm? I think we may say "yes" to both questions. And here arises a burning point in trade ethics which has been too little discussed in the rush of modern American business. In the Old World it is no new problem. They have gone through it over there and have wrestled with it strenuously for many generations. They even have it now in a mild form, as we can see from their trade papers where soul-piercing wails anent the inroads of the Dutch houses greet us frequently. It seems the Dutch growers go to the trade and sell all they can; then they coolly turn round and sell the customers also, so that the tradesman is left high and dry. A case of getting your pie and your penny too, which may be smart, but which few right-minded people would care to endorse.

On the other side there has grown up a system of trade limitations which has reached just and stable proportions awarding to each a proper share in the profits of production and distribution, and which in course of time has become the unwritten law of business. If any concern oversteps that unwritten law, there is prompt and effective ostracism enforced which soon brings the offending party back into line.

But under the newer conditions, or as we might say the cruder methods under which we push along in this country, there are but few firms that have the courage to stand out for correct business principles in this matter. These firms are, as a rule, the old, well established concerns who have a stable trade. It is to their credit that they practice fair and square methods in both their wholesale and their retail departments and do not mix them up and shuffle both together whenever an extra dollar is to be made regardless of whoever may be hurt. They are doing the honorable thing in thus sticking to correct ethics, and in the long run they come out on top. A proof of the latter assertion is apparent in the fact that these old established firms started in on the fair and square method and stuck to it until they were the only ones left of dozens who started differently at the same time, and who have long since disappeared and left nothing behind them but a bad odor.

I suppose it is only a question of time when we will all come to a realizing sense of what is the best policy in this country as they have found it in the Old World; but in the meantime that good era may be hastened if we thrash the matter out among ourselves and try to come to a clear understanding of the rights and wrongs of it. I should like to hear the opinions of others in the trade on this point.

In planning your advertising for the coming year, remember that HORTICULTURE proposes to work overtime the season through to prove itself the best medium in the country.

DECORATIVE ART

The illustration shows a Japanese basket made of rattan and colored a beautiful shade of brown It was filled with small orange plants (Otaheita Orange) (?), Cypripediums, lilies of the valley, a few Dendrobium Formosum, and several fern plants. I like the shape of the basket, think the light blue ribbon is handled fairly well, and see a value in the imaginary curve starting from the spray on the right of the bow following down to the two oranges on the left, then through the basket and ending with the two lower oranges on the right side of the basket.

H. H. Battles,

Protect the Rhododendrons

Before the frost has had time to penetrate the soil, it will pay a handsome dividend to protect the rhododendrons; especially is this true if newly planted, as these rarely become well established the first summer, though the past one has been specially favorable to them, owing to frequent showers. The past month, however, has been unusually dry in this vicinity, and it has been proven in the past beyond doubt that winter killing is much to be traced to drouth during the months preceding frost; hence it is not wise to put on a covering of dry leaves if the soil is also in a condition bordering on dryness. This protection of leaves is mainly beneficial in enabling the roots to keep active during winter, making good any loss by evaporation by cold, drying winds; but if the soil is dry the roots cannot well perform their allotted part in the economy of the plants.

Spruce branches also are a great protection to the tops of the plants; where available we also place them over the leaves to hold them in place, as well as to hide them in a tidy way where a well kept appearance is an essential. In protecting large rhododendrons by the use of branches, it is very important that they be well supported independently of the plants themselves, or the weight of snow will cause collapse when the covering is most needed.

E. O. Orpet.

WM. J. STEWART, Editor and Manager.

Next Comes Ye Editor

Sincerely grateful are we for the many words of cordial approval with which the first issue of HORTICULTURE has been received. For such excellence as it possesses the preponderance of credit is due to the numerous steadfast friends everywhere who, by word and deed, helped to inspire the confidence and enthusiasm which counts for so much in carrying any new undertaking to a successful consummation.

Prof. W. G. Johnson is being strongly urged for appointment by President Roosevelt to the position of Assistant Secretary of Agriculture, now vacant, and the qualifications of the gentleman for that important office are well set forth by his friends who are laboring zealously for his success. Assuming these qualifications to be as represented, Prof. Johnson's appointment would be distinctly a boon to the horticultural interests of the country, but it is unfortunate that the candidate is not better known by representative horticultural men. In a list of some ten influential organizations with which Prof. Johnson is actively identified, as given in the columns of a contemporary, the name of the Society of American Florists and Ornamental Horticulturists does not appear. Yet this society, as represented by its officers and many prominent members, is doing spirited work in his behalf and, should he succeed, it will be in ome degree due to their help.

It is learned from the news despatches that while a quantity of oak plank was being unloaded at Lubec, Me., from a car recently arrived from Boston, there were discovered a number of brown-tail moth nests among the lumber, and much consternation was caused thereby. Modern modes of travel and transportation make quick work of distribution and the incident at Lubec is liable to duplication at any point on the continent. Brown-tail moths in their hibernating state, and gypsy-moth egg patches, seem proof against any extremes of weather, and the chances of their detection, particularly by people who have had no opportunity to become familiar with their appea - ance, are very slim. Those people in places as yet unvisited by the pests, who have been serenely counting on immunity for many years to come, are perhaps destined to a rude awakening in the near future. It will not be long before other states besides Massachusetts will be clamoring for relief at Washington, and the national government will be forced to some more emphatic action than it has hitherto seemed disposed to take. The evil will soon become a national one.

With the approach of Christmas comes the impulse to voice the oft-repeated warning to the growers raising flowers for the metropolitan wholesale markets, against the pernicious practice of holding back the cut of several days previous to the holiday and overloading the market all at once with the accumulated material. To this cause more than any other may be charged the decadence of the holiday shipping trade in cut flowers. The fictitious values set upon all shipping flowers two or three days in advance of the holiday as a result of the enforced scarcity left no margin of profit for the out-of-town dealer who, handicapped still further by the unfresh condition of much of the stock sent him, could not be blamed if he sought a more remunerative means of supplying his establishment with holiday stock. Under such conditions the grower suffers to a like extent because of the overloaded market on the last day, the loss of so much unsaleable material, and the resultant dispiriting effect on the really fresh stock. Better, far better, forget the fact that a holiday is due and send every bloom to market the moment it is ready. A universal adoption of this course would give the cut-flower trade a new lease of life. Those who follow it consistently and persistently will be the winners in the end.

Insurance people are showing hostility to all interior festoonings of Christmas greens, especially in department stores and such large places. If this should lead to the more general adoption of living plants for holiday decorations, so much the better. The beautiful mountain laurel, which has been all but exterminated in many localities, is entitled to a "close season" for a few years, if this were possible.

"Hipper I." is the name of a new tomato for forcing, offered by an English raiser, said to be remarkable for its fine clusters of fruit, deep crimson color, rich flavor, and ideal as to size (5 or 6 to the pound). It's a tough name. Let's hope the thing itself is better than the name would imply.

"A long pull, a strong pull, and a pull all together," — for advertiser, buyer and us means success for all.

HORTICULTURE is the only paper of its class in America.

First Prize Group of Chrysanthemums in Variety for Effect.
Exhibition of the Missouri Botanical Gardens at the World's Fair Flower Show.

After Ye Adjournment

The single violet seems to gain in popularity.

Chrysanthemum salad to be fashionable? Guess again.

Christmas is not far off. It will soon be in order for the flower grower to be "off crop."

Shake hands with the Poinsettia Man. He's a good fellow to know about now.

Society is getting down to business again. And the florist has his ear close to the receiver.

It is not yet too late to sow cyclamen seed. They will come in all right for Christmas, 1905.

For up to date florists' supplies, honest goods at honest prices, you need not go outside of the firms advertising in these columns.

The manuscript for some of the best notes in last week's great issue of Horticulture were written with S. S. Pennock's invincible, business-getting pencils.

Monday, December 5, was the anniversary of the christening of La Detroit The infant has made good its promise and its sponsors have reason to feel proud of its record up to date.

Begonia Gloire de Lorraine is still the queen of early winter flowering plants. There seems no prospect of a surplus of this charming table plant for many years to come. "You can't have too many of them."

Are you an "out-of-town" florist? Write to some of the wholesale flower dealers whose advertisements you find in this paper and see what inducements they have to offer you in Holiday flowers and greens. They'll treat you all right.

Our pride in our initial number is duly tempered by the disclosure of the expected crop of typographical inaccuracies, some discovered by ourselves and others by the eagle eye of kind friends. In the main they are very harmless, however, and if our readers will mentally substitute "right-holders" for "right holders" on page 18, "3½" for "32" inch in describing Robert Craig Carnation on page 28, and "Sander" for "Sorder" on page 50, we think the balance will have no more serious effect than to necessitate the purchase of a new pair of glasses especially adapted to proof-revision in "The dead of midnight — the noon of thought."

Retail florists are sometimes apt to overlook the benefit they might derive from the dissemination among the customers of a better knowledge of how to care for flowers after receiving them from the florist. Many erroneous ideas are prevalent on this subject and it is reasonable to assume that, if better informed as to how to preserve their flowers for a reasonable time, customers would be inclined to purchase them more liberally.

In this connection we are glad to call attention to a neat little card prepared by D. B. Long, for distribution by retail florists, on which the following good advice is given.

Flowers require fresh air that is moist rather than dry, and free from gases or draught exposures.

Fresh water too is a vital need, and the stems should be treated to such *immediately* on receiving them. The best holders are those which provide water sufficient so the stems can be set in deep, and well submerged. The water should be changed at least daily, and as becomes absorbed more should be added.

The stems of blooms should be recut occasionally, slanting, with a sharp knife, so not to close absorbing stem pores, and dead foliage should be removed.

As a rule, flowers keep best if the blooms or petals are kept dry, but spraying of the foliage is beneficial.

When not in use or display a cool and dark place, or moist also, is favorable for flowers. To help produce such conditions, tissue paper or a light fabric covered over them, and well sprinkled, is effective.

Florists are frequently asked the questions which our Buffalo friend in his never-wearying ambition to provide system in easy doses for his fellow-florists, answers so well on this little card.

ASTERS

The Two New Varieties:

Benthey's White | **Benthey's Pink**

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite astors in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever.

PRICE LIST:

Trade Package, white or pink, $1.00 | **1-4 oz. white or pink, $2.50**
1-2 oz., white or pink, . . 4.50 | **1 oz., " " " 8.00**

What Ye Neighbors Say

"The love of praise, howe'er concealed by art,
Reigns more or less, and glows in every heart."

The best start I ever saw any paper make. — H. F. L.

Paper received and looks tempting. Wish you great success. — D. S. B.

I want to congratulate you on the fine appearance of HORTICULTURE. — S. J. R.

I want to congratulate you on your start. I was surprised and pleased. — H. H. B.

I rather like your title. Hurrah for HORTICULTURE! Long may it wave! — G. W.

Congratulations! Nothing succeeds like success! 56 pp. and 40 of them ads! Bully! — W.

I am much pleased with the general make-up of HORTICULTURE, and its good appearance, and with you at the helm I have no doubt but what you will make a prosperous voyage. I wish you success. Please enter me on your subscription list. — A. M.

I want to congratulate you upon the first issue of HORTICULTURE. I certainly think you deserve a great deal of credit for getting out the first issue in such good shape, and I extend my warmest congratulations, and best wishes for a prosperous future.—S. S. P.

To say that I am pleased with your new paper expresses it but mildly. I am delighted to see so splendid an initial number. Your advertising speaks volumes for the preliminary work you must have put in. May HORTICULTURE prosper is my sincere wish. — W. N. C.

We are in receipt of the first number of HORTICULTURE, and beg to congratulate you upon its splendid appearance, more especially upon the nice line of advertising which it contains. We hope that you will not only carry as much in the future, but that it will increase with each issue. — D. & C. Co.

Your sample copy of HORTICULTURE to hand, and it struck me at once as being a good thing. Find enclosed $1 in payment of one year's subscription. Under so able management, and being issued from the leading horticultural city, should make it a success from the start, and I trust that your venture will prove a highly successful one. — A. E.

The first copy of your new paper, HORTICULTURE, came to hand this morning, and I wish to send you my congratulations on the fine appearance of your paper; from your wide experience of horticulture and intimate relations with the florists and gardeners of the country, we are sure you will make a success of the venture. I wish you every success, and trust the high character of this, your first number, will be continued in those to follow. — P. B.

Telephone, 356 Madison Square

Rose Wellesley.

The new seedling rose, Wellesley, was originated in 1900 at the Waban Rose Conservatories, Natick, Mass. It is a clean, healthy grower, free flowering and very vigorous. The flower is medium size, being larger than Mad. Abel Chatenay, which it somewhat resembles in color, although the tints are very much purer. The outside of petals is bright pink, and the reverse, clear silvery pink.

COLD STORAGE

LILY OF THE VALLEY WILL FORCE EASIER and better than the NEWLY IMPORTED STOCK — till the latter has had a thorough freezing. We have both — but recommend the COLD STORAGE VALLEY for forcing for at least a further six weeks.

¶ We are now booking orders in advance, and are prepared to ship on the shortest notice, the best grade of **LILY OF THE VALLEY PIPS**, in any quantity from 100 to 100,000 placed in **Cold Storage last December**. ¶ No special treatment required. The pips will flower naturally in three or four weeks in a temperature of 60 to 65 degrees Fahrenheit. Your propagating bench is just the place for them.

Savannah, Ga., Oct. 4, 1904.

Flower Market Reports

Notes on the Boston Wholesale Cut Flower Trade

There is but little change in values from those reported in our issue of last week. The most favorable symptom is a considerable falling off in the receipts of white carnations which had been coming in excess of the demand, and of all other varieties, so that now the balance is much better maintained. At the same time there is an abundance, and with the moderate weather prevailing at the time of going to press there is no indication of any stiffening up that would cause stringency. A very fine type of American Beauty rose is available at present, and Queen of Edgely is also coming in in elegant form but limited as to number. It is noted that the demand for the latter is much more steady than heretofore. There is a daily call for it from some of the best retail dealers in Boston, and it has apparently found a permanent place for itself amongst the standard varieties for the coming season. As to Bride and Bridesmaid all that can be said is, that the quality seems to improve each week as winter approaches. The quantity coming in is somewhat diminished as compared with the receipts of a week ago, but this is attributed to natural causes only, and is not regarded as an evidence of any attempt at storing as yet. Very fine Liberty roses are being received, but not in any quantity. Chatenay begins to make a little impression, but is not yet sufficiently well known to the public to count for much as a staple variety. The new rose, Wellesley, is making rapid headway because of its unrivalled color and persistent qualities. Combined with the soft green of the coarser growing Adiantum it is exceedingly effective, and critical buyers seem to realize it.

Violets and lily of the valley are in fair supply and demand. Paper white narcissus goes slow, so do Roman hyacinths. Smilax is plentiful. It is worthy of record that at last Boston seems to have developed a demand approaching regularity for orchids. This market is supplied only in a limited degree and receipts are intermittent, but the tendency is toward greater regularity in demand and in the supply. Christmas evergreens are beginning to assert themselves and there is evidence of the usual activity ahead, but the demand is not yet sufficiently defined to indicate more than a fair promise for a good general trade in this class of material. Late rumors regarding the scarcity of holly are confirmed from Southern sources, but dealers are sceptical because of past experiences in this line.

Boston Wholesale Prices to Dealers in Hundred Lots.

As reported Thursday, December 8, 1904.

American Beauty and Queen of Edgely, best, $30 to $50; medium, $12 to $25; low grades, $3 to $8; Bride and Bridesmaid, best, $10 to $12.50; medium, $6 to $8; culls, $1 to $3; Liberty, special, $12 to $15; ordinary, $6 to $8. Violets, $.60 to $1. Lily of the valley, $3 to $5; Carnations, fancy, $3 to $4; ordinary, $1.50 to $2. Roman hyacinths and Paper Whites, $1 to $2. Cypripediums, $12.50. Cattleyas, $40 to $50. Smilax, $8 to $12. Adiantum, $.75 to $1. Asparagus, $35 to $50.

New York Wholesale Market Report

Dark days have made a marked difference in the supply of roses and carnations with an increased call for finer grades. Prices have advanced materially and the general market has taken on a better tone. There are fewer of the fancy and special grade teas than the shorter sizes; the best find readiest sale. There are more Beauties coming into the market than teas, but these also are moving at satisfactory figures. Of the Carnations, Enchantress, some of the fine reds and good white command top prices. (If the present conditions hold for a while, there ought to be no inducement for growers to hold stock for Christmas.)

Violets move slowly. Chrysanthemums are no longer a factor, the quality growing rapidly poorer. The market is supplied with a good assortment of such flowers as bouvardia, red, white and pink, which sells well, mignonette, forget-me-not and stevia. Orchids are in limited supply and command good prices. Of the green goods, asparagus plumosus and Sprengeri sell best. Smilax is very abundant and cheap.

New York Wholesale Prices to Dealers, in 100 lots

Reported up to Thursday, Dec. 8

American Beauty, special, $35 to $40; fancy, $20 to $25; extra, $15 to $20; No. 1, $10 to $15; No. 2, $4 to $8; No 3, $2 to $3; Liberty, special, $15 to $20; fancy, $10 to $12; extra, $8 to $10; No. 1, $5 to $6; No. 2, $3 to $4; Bride, Bridesmaid, etc., special, $10 to $15; fancy, $8 to $10; extra, $5 to $8; No 1, $4 to $5; No. 2, $2 to $3; No. 3, $2. Carnations, novelties, $5 to $8; Enchantress, $3 to $6; Lawson, $2 to $4; standard varieties, $2 to $4; inferior and ordinary, $1.50 to $2. Violets, single, $.75 to $1 25, double special, $.75 to $1.50; ordinary, $.35 to $.75. Lilies, $8 to $15. Narcis., $1.50 to $2. Roman Hyacinths, $1 to $2. Ferns, $.50 to $1.50. Asparagus, strings, $25 to $50; bunches, $20 to $35. Smilax, $8 to $12.

St. Louis Wholesale Market.

The report from St. Louis this week indicates a fairly good demand and the general run of stock satisfactory. American Beauty roses of the higher grades are quoted at $25 to $33; medium, $12 to $20; culls, $5 to $10. Bride and Bridesmaid, $3 to $6; Liberty, best, $6 to $8; ordinary, $3 to $5; Perle, Golden Gate and Ivory, $3 to $6. Carnations, Lawson and Enchantress, $4 to $6; Estelle, White Cloud, Hill, Joost, Nelson, $2 to $4, according to quality. Violets, single, $.50 to $1; double, $1 to $1.50; special, $2. Lilies, $10 to $15. Narcissi, $3 to $4. Roman hyacinths and lily of the valley, $2 to $4. Smilax, $12.50 to $15. Asparagus Sprengeri, $1 to $3.

Obituary.

Mrs. Mahala Joyce who, until a few years ago, was a constant attendant and enthusiastic exhibitor at all the shows of the Massachusetts Horticultural Society, died at her home in Medford on November 11, at the advanced age of 91 years.

Mrs. Joyce was descended five generations from a Mayflower ancestor.

MRS MAHALA JOYCE

Her husband was a famous shipbuilder She was attached to the old ways, refusing to ride in electric cars or recognize other "new fangled" inventions. She retained her faculties up to the sudden illness which caused her death.

Mrs. Joyce's home was long a treasure house of Colonial relics, one of the most prized being a clock more than 200 years old, which was once the property of Governor Gamaliel Bradford.

Louis Unverzagt died November 23d at his home in Springfield, Ill., aged 58 years. He was a man highly respected by a host of friends who were endeared to him by his integrity and manly traits.

Out of the Ginger Jar

By GEO. C. WATSON

"I'm monarch of all I survey,
My right there is none to dispute,
From the mountain all round to the sea,
I'm lord of the fowl and the brute."

According to the poet, that was what Robinson Crusoe sang on the proud eminence of his island hilltop, his chest swelling, his proud eyes flashing, his right foot extended, while he gave an added cock to his bonnet that might have been envied by the proudest follower of Bonnie Dundee.

I can imagine the same attitude in the Great P. Welch of Boston, as he dictates his advertisements for HORTICULTURE, telling the trade of the country in vigorous yet graceful Bostonese, "We are the largest handlers of cut flowers in the United States," with the emphasis on the WE. Bravo, P! I can hear the stamp of your foot as you pronounce that WE and then pause; and I can imagine how even your impassive stenographer warms up and puts a little of your enthusiasm into Isaac Pitman's curlycues. It's a curious thing how the good men get on top of the heap like the good roses on top of the box.

Here in Philadelphia our cut flower distributors are very modest; but there are a few symptoms lately apparent which lead to the belief that some of them are beginning to dream of becoming world powers on a par with our Boston Napoleon. For instance, there's Sam Pennock calling himself "The wholesale florist of Philadelphia," with the emphasis on the THE, so that all may know where HE stands; and his near neighbor, Baker, calling himself "the oldest wholesale florist of Philadelphia," with the emphasis on the THE, and D'Artagnan defiance in every letter. Looming large and deliberate between these two champions is Edward Reid, who at present contents himself with being merely GOOD — "good stock, good packing, good treatment." But we can imagine how that good will grow when the Leo Niessen Company uses BETTER and the Cut Flower Company uses BEST. Edward will progress to VERY BEST, and the next one will have to cap the climax with SUPERIOR TO THE VERY BEST, and by that time we will doubtless all have arrived at the pinnacle of P. — well drilled and dauntless Crusoes in the crusade of distribution.

What does Wm. F. Kasting, the hustling Buffalonian, mean by "Green Goods"?

He says "all kinds." Does he include the Irish variety, the counterfeit stuff, the rural youngling, and the creme de menthe? Does he have green kail, green peas, scullions and all the proper ingredients that go to the making of good cock-a-leekie? Does he have the Nebuchadnezzar Breakfast Food — that mighty green so appreciated by Dean Swift, rhapsodized over by Walt Whitman, and apostrophied by John James Ingalls? If he has all these, and all the others people might think of, what a World's Fair Ellicott street must be at present!

I can imagine the looks of distress on the faces of such keen investigators into the new and strange in natural phenomena as John Raynor, John Young, Frank Trændly, Walter Sheridan, *et al.* when they realize that they are far too rushed in distributing the immense floral product of New York and are utterly unable at present to visit Buffalo and absorb these wonders which to the unprejudiced will appeal as being far more wonderful than Niagara Falls. Some may doubt if anything could be more wonderful than Niagara Falls. It all depends on the point of view. Doubtless many of you remember the story about the visitor from the Land o' Cakes. A kindly native had led him up to the brink of the great natural wonder. The visitor gazed and gazed, and better gazed. But he said never a word. Occasionally he would wag his head from side to side; sometimes he would nod his head up and down. Finally he turned and began walking away. The native expected to have heard the usual exclamations — the Mys and the Ohs and the Wonderfuls — and none being forthcoming, he ventured to ask:

"Well, what do you think of it?"

"Oh, it's nothing very wonderful."

"What's that? Do you mean to tell me you ever saw anything more wonderful than Niagara Falls?"

"Aye, man; I have so. I have seen a thing a sight more wonderful than that. Over in Hawick, where I come from, they have a hen with a wooden leg, and to my mind that's a great deal more astonishing than Niagara Falls."

I was going to say let us hope that Mr. Kasting will not add the green-eyed monster to his verdant assortment, but that is unnecessary, as W. F. is far too jolly and good natured ever to be jealous of anybody. May his tribe increase!

Buffalo Wholesale Flower Market Report

Flowers in abundance for all calls. Business somewhat quiet. Beauty roses are selling very slow, but good Bride, Bridesmaid and Liberty go fairly well, as do also good carnations. The violet trade is very dull. Narcissi, Roman hyacinths and smilax are very plentiful.

Buffalo Wholesale Cut Flower Prices

Reported for Tuesday, Dec. 6.

Beauty, extra, fancy and special, $25, $33, and $40; Nos. 1 and 2, $5 to $15; Liberty, extra, fancy and special, $10 and $12; No. 1, $6 to $8; Culls, $3 to $5; Bride and Bridesmaid, extra, fancy and special, $8 to $10; Nos 1 and 2, $2 to $7; other varieties, $3 to $10. Carnations, Lawson and Enchantress, $3 to $5; Prosperity, $4 to $6; white and colored, $2 to $3. Violets, $ 75 to $1 50. Lilies, $15. Narcis., $2 to $4. Roman Hyacinths, $2 to $4. Adiantum Crowianum, $15 Asparagus, $40 to $50 Smilax, $12 50 to $15.

Baltimore Wholesale Market

Recent society events have made heavy drafts on the supply of choice material at times, but generally speaking, there is stock enough to fill ordinary demands. The quality of roses is tending downward, many being short and weak stemmed.

Baltimore Price as Quoted to Dealers in Lots of 100

Week ending Dec. 7, 1904

American Beauty, best, $25; medium, $15; ordinary, 8. Bride and Maid, $4 to $8. Golden Gate and Ivory, $4 to $8; Perle, $3 to $6; Gontier, $3. Carnations, $1.50 to $3. Violets, single, $.75 to $1; double, $.50 to $.75. Lilies, $6 to $10. Narcissi, $2.50 to $3. Roman Hyacinths, $2 to $3. Asparagus, $25 to $50. Smilax, $15 to $25.

News Gleanings from Everywhere

BATTLE CREEK, MICH. — The Warburton Greenhouses were destroyed by fire on the night of November 27. Loss about $2000.

SOUTH FRAMINGHAM, MASS. — The Woodward farm and greenhouse property has been sold to a Chicago purchaser.

The December meeting of the New York Horticultural Society takes place on Wednesday the 14th at the American Institute Rooms, and will be devoted to a discussion of the recent progress that has been made in adding to the fertility of the soil by inoculation with bacteria. Dr. George T. Moore of the Department of Agriculture, will be the chief speaker. He has given much attention to this subject from the practical standpoint, and will tell about the actual results under cultivation. There may be great possibilities in the practice to progressive growers, even under greenhouse culture. Prof. W. G. Johnson, of the American Agriculturist, is also expected to speak on the results as he has seen them in the farms of the country. The usual council dinner will take place at six o'clock that same day. The meeting is called at eight o'clock.

DREER'S DOUBLE PETUNIAS

Have long been known for superior quality; this year's stock is no exception, and we now have a large supply in strong 2 1-4 inch pots, plants which if potted up now will quickly furnish quantities of cuttings. These we offer in fifteen distinct varieties for immediate delivery at 60 cents per dozen; $4.00 per 100; $37.50 per 1000.

SEEDS. — Saved at Riverton, the finest in existence. DOUBLE FRINGED, 75 cts. per 500 seeds; $1.50 per 1000 seeds. SINGLE FRINGED, 50cts. per pkg.

HARDY PLANTS FOR FORCING

We are carrying a large stock of the following, a specially selected grade for forcing:

AZALEA MOLLIS

For early and late forcing Azalea Mollis is rapidly gaining favor, easily forced at a minimum cost for heat and labor. They are profitable stock for the retailer to handle. We are supplying at present an unusually fine grade of plants, 15 to 18 inches high and covered with flower buds, $4.50 per doz.; $35.00 per 100.

DEUTZIAS FOR FORCING

Strong two-year-old, field-grown plants suitable for 6-inch pots.

	Per doz.	Per 100
Gracilis Rosea	$1.00	$8.00
GracilLis Lemoinei	1.00	8.00

FORCING LILACS

A fine lot of pot-grown plants, well set with buds and in prime condition for forcing, $6.00 per dozen: $45.00 per 100.

RHODODENDRONS FOR FORCING

These are being used more extensively every season, and this year with Easter at such a very late date should prove especially acceptable, as they can be retarded much easier than Azaleas and at the same time may be flowered at just the right moment at a minimum cost. We are carrying an extra large stock of bushy, well shaped plants 16 to 18 inches high, covered with buds, $9.00 per dozen; $70.00 per 100. Larger plants 20 to 24 inches high, fine specimens, $11.00 per dozen; $90.00 per 100.

NOTE. The prices given above are strictly for the trade, and retail consumers will not be supplied at these prices.

HENRY A. DREER, Phila., Pa.

Christmas Plants

There was no essayist at the meeting of the Philadelphia Florists' Club on the 6th inst., but Christmas plants was the topic set down for discussion.

Edwin Lonsdale thought we were all familiar enough with the regular supplies for the Christmas season, and that what we were looking for was new things. He was of the opinion that one of the most promising subjects was the new Baby Rambler Rose (Mme. Levavaseur). Its fine bright color and freedom of bloom, its good habit and ease of culture rendered it one of the daintiest little pot plants that could be imagined for the Christmas trade if well done.

E. G. Hill concurred in this view and said he considered the Baby Rambler a good thing, although he was sorry the name was not better. Baby Rambler did not sound right to him somehow, and the French name was also unlikely, as most of us objected to twisting our mouths over Mme. Levavaseur. (One aspiring member tried it later, and it sounded like Levavaseur.)

Robert Craig mentioned some promising new begonias he had seen in his recent travels, and was especially struck with the new white Lorraine he had seen at Dreer's, it being in his opinion far superior to the first white Lorraine introduced, and a charming thing for Christmas. H. H. Battles said he also had seen this new white begonia and could indorse the previous speaker's remarks. He could not agree with the oft repeated remark that scarlet was the only Christmas color. White and pink were all right if given a touch of red in the shape of ribbon with a pot plant, or holly and mistletoe in the case of baskets, etc. But he would draw the line at yellow, and admit that was not a Christmas color. He had an idea that the fuchsia would make a fine subject for Christmas, if it could be done well for that season. Mr. Lonsdale doubted if any of the fuchsias could be grown well for Christmas. The only one he could think of as being likely was F. coccinea.

BUFFALO, N. Y. — Prof. J. F. Cowell has returned from an eastern trip, bringing about two hundred new species of new plant life for the botanical garden at South Park.

Business Changes and New Establishments

PITTSFIELD, MASS. — R. Grigg & Son have sold out their business and retired.

The Cambridge (Mass.) Botanical Supply Co. has been incorporated, with headquarters at Belmont.

JAMAICA, N. Y. — A greenhouse owned by William Grimm was destroyed by fire on November 28th.

SPRINGFIELD, N. J. — Henshaw Bros. have been incorporated with a capital of $100,000. The list of incorporators is given as William Henshaw, Archibald N. Henshaw, and Minnie Henshaw.

MANCHESTER, MASS. — The green house business formerly conducted by J. S. Tappan has been sold to Mrs. W. S. Fitz., who will move the buildings to her estate and establish the greenhouses for private use.

Grand Rapids Florists' Association has been organized to sell the cut of members at the Growers' Market in Chicago. Officers are C. R. Hills, pres.; G. F. Crabb, vice-pres.; Mr. Stover, sec'y; H. Smith, treas., all of Grand Rapids.

Philadelphia Wholesale Markets

Reports from Reid show American Beauty roses to have been in supply about equal to the demand until the end of last week, when a sharp advance was experienced owing to the demands caused by the launching of a new cruiser and a big event at Baltimore. Bride and Maid of best quality in good demand, but inferior grades going very slow. Carnations moving well in the better grades. Poor stock lagging. Violets: New York M. Louise going at remunerative prices. Chrysanthemums still represented by some very good Eaton and Mrs. Jerome Jones. In the bulbous line, Roman Hyacinths are in fair supply and demand and Paper Whites move very slowly. Green material is in good demand at about normal prices.

Pennock's report shows a good out-of-town demand for American Beauty and improving prices for Bride and others. Of Liberty the supply has increased considerably, prices remaining stationary. Kaiserin is on the down grade, being outsold by Bride. Carnations are going pretty well and quality improving. Hinsdale and Patten from the Strafford Farm are very fine. A few chrysanthemums are still coming in, Bonaffon, Chadwick and Faust mainly, the latter very good. Prices satisfactory. Very few cattleyas are being received, but dendrobiums, cypripediums and vandas are plentiful. Paper White narcissi move a little better than last week, but are still laggy. Some excellent Roman Hyacinths are coming in and moving satisfactorily at normal prices. The prospects are for a fine supply of poinsettias and a good demand. The Battles product, which Mr. Pennock handles, will amount to 7,000 or 8,000 blooms. Holly is reported as fair in foliage but not extra as to berries. Mistletoe plentiful, but no material demand yet.

Philadelphia Wholesale Cut Flowers. Quotations to Dealers in 100 Lots
For week ending Tuesday, Dec. 6.

Beauty, extra to special, $25 to $40; Nos. 1, 2, 3, $8 to $20; Liberty, best, $20 to $25; medium, $15 to $18; inferior, $2 to $10; Golden Gate, $8 to $12. Carnations, Enchantress, $3 to $5; Lawson, $3 to $4; novelties, $4 to $6; standard varieties, $3 to $4. Violets, single, $.50 to $.75; double, $.75 to $1.50. Lilies, $12.50 to $15. Paper Whites, $2 to $3. Roman Hyacinths, $2 to $4. Cattleyas, $60. Vandas, $20. Cypripediums, $12.50 to $15. Dendrobium formosum, $40. Poinsettias, $12.50 to $40. Ferns, $1 to $1.50. Asparagus, $35 to $50. Smilax, $12.50 to $15.

Chicgao Wholesale Cut Flower Prices
For week ending Tuesday, Dec. 6

American Beauty, $8 to $40, according to grade; Bride and Bridesmaid, $4 to $12; Liberty, $4 to $15, scarce. Callas, $10 to $15. Carnations, $2 to $5, the latter price calling for very fancy. Lilies, $12 to $16. Lily of the valley, $4. Roman hyacinths and Paper White narcissus, $3 to $4. Stevia and forget-me-nots, $2 to $3.

Random Notes Abroad

Thinking that maybe some of the readers of HORTICULTURE might be interested in reading a little about the doings of their fellow craftsmen abroad in the line of floriculture, etc., and which have more or less interested myself, I have jotted down the following notes.

Having left Boston on August 11, 1903, after an ocean trip of a delightful nature, we landed in Liverpool on the 20th of August and proceeded directly to Glasgow the same day, arriving there late in the evening. I found the weather exceedingly cold and wet, a condition indeed that marked last year throughout in the northern countries of Europe and to an unheard-of extent in Great Britain, causing great hardship to agriculturists and not a little to horticulturists in general. Under those circumstances, then, horticultural as well as floricultural business would naturally suffer from a spectacular or display standpoint, as indeed it did, as could be seen everywhere.

Visited Kelvin Grove Park, a beautiful undulating piece of ground within the city limits, surrounded with fine residential buildings, the university building conspicuously poised on a high knoll within the park, making an imposing picture. I was much struck on entering the grounds to observe the stunted and stumpy growth, also the sparse foliage of the trees and shrubs within the park. On closer inspection, however, the cause was clear, the foliage being thickly coated with soot vomited from an endless number of tall manufacturing chimnies that surround Glasgow, and for which it is well-known as a manufacturing center; to these can be added numberless dwelling-house chimnies belching forth the same sooty deposit resulting from the combustion of soft coal.

Queen's Park in the same city being a little further out, and composed of high land commanding a splendid view of the city, showed to better advantage floriculturally and otherwise. Here I saw one particular feature that pleased me immensely — a long, narrow border planted in the ribbon style, the central row eight to ten inches wide, being of Arenaria tomentosum, a low, spreading plant of a silvery gray color, and on either side a row of Lobelia Crystal Palace Gem, making a splendid combination. The great length of the border contributed to produce an imposing and singularly charming effect. Within the same grounds were to be seen some nice examples of carpet-bedding. There are fine modern greenhouses in this park, stocked with various classes of plants, and evidently well taken care of.

The Botanic Gardens of Glasgow are well within the city limits, and consequently showed the injurious effect of unfavorable surroundings. The glass structures are quite extensive, there being a large oval-shaped flat-roofed structure, called (if my memory serves me right) "The Winter Garden;" designated thus, I presume, from its contents which consisted of winter and early spring-flowering plants. Camellias, azaleas, fuchsias, New Holland and Cape spring-flowering plants, etc., were mostly planted out in a more or less natural way and luxuriated splendidly, the camellias being in fine shape and promising a grand display when in flower. A person could easily imagine that he was outside, except for the roof above, so spacious the structure is, and outside-like the planting.

Next visited Auld Reeky and, though I was not a stranger to Auld Reeky, having worked for some time in the nurseries there in my younger days, yet it never impressed me so favorably before. Its clean and wide streets, with its community buildings, splendid monuments and picturesque situation, made a lasting impression, the salutations of the great German poet, Goethe, when first seeing Edinburgh coming forcibly to my mind, "Edina s darling seat; Hail to thy palaces and towers." Being favored in Edinburgh with one of the very few fine days that I enjoyed while abroad it looked anything but "Auld Reeky."

Princess St. Gardens looked floriculturally much better than the same kind of grounds around Glasgow. One of the finest displays I ever witnessed made of violas was seen here; it consists of three rows of different colors, white, yellow and blue, extending nearly the whole length of the garden. They were planted in rows in their respective colors in front of a large serpentine, so-called, shrubbery border banked up against the railway bed for the purpose of screening the locomotives from view as they traverse the garden. The length of this border being nearly, if not fully, a quarter of a mile, was again instrumental in helping to make the scene impressive and beautiful, the size and correctness of the coloring adding materially. The size of those violas was remarkable, being as large as the prize pansies that we are accustomed to see on our side of the Atlantic, the weather condition that was so detrimental to the majority of other flowering stuff, being doubtless ideal for violas. On the top terrace, on the garden side of Princess St., was to be seen some very good sub-tropical bedding; lilies and gladioli, intermingled with foliage plants, made a very fine showing.

The Botanic Garden, Edinburgh, is very interesting for many things. I was particularly struck with the wealth of hardy climbers for outside work and an equal wealth of tropical and half-hardy climbers for inside work. The rockery is always interesting for the variety of subjects it contains. The glass structures are commodious and contain many fine samples of diverse plants. There are some very large palms to be seen in the palm house.

After leaving Edinburgh, I shaped my course to the north, into the ancestral home, my objective point. This trip being purely taken for recuperating and health-giving purpose, necessarily curtailed the field for the horticultural vision, and only such things as actually came in my way and were of especial interest in this line, were noticed. The ancestral home above mentioned is in Strathconan, Ross-shire, until recent years the northern home and shooting property of the distinguished gentleman who now shapes the destiny of England, Arthur J. Balfour. This is the largest deer forest in Great Britian at the present time. What has that to do with horticulture? Nothing, — only I am coming back to that presently. The shooting lodge is of a long and rambling style of architecture and covers an immense piece of ground. Against the walls of this building and completely covering one-half of it, I found an old "apprenticeship associate,' that most charming creeper, Chilian Flame Nasturtium (Tropæolum speciosum), growing like the proverbial weed in luxuriancy. Such a splendid sight as this was sufficient to banish dyspepsia and all its accompaniments or weeks, and at all times since when the sight is recalled. Ross-shire so far, I believe, can claim to be the home of this creeper, outside its own country, for it luxuriates on all sides, against the cotters', gamekeepers' and shepherds cottages, etc., and without any particular care whatever. This is rather strange when we take into considera-

GEO. C. WATSON, Juniper and Locust Sts., **PHILA.**

tion that it stubbornly refuses to grow with any degree of freedom in England or the south of Scotland, with all the coaxing that a skilled gardener commands. I believe, however, that of very recent years it has been induced to do better in the south. It is easily propagated by seeds, which it abundantly produces in dry seasons; it also increases rapidly by slender underground rhizomes, not unlike couch-grass roots.

Another pretty half-hardy tropæolum I have noticed here and for the first time made its acquaintance, Tropæolum tuberosum or Peruvian Nasturtium. As its specific name indicates, it is tuberous-rooted, and the tubers are good to eat after having been boiled, it is said. Let this be as it may, it is floriculturally a very neat species, and worthy of more extended popularity. The flowers are yellow or spotted and blotched red, half the size of the ordinary nasturtium, but abundantly produced, the leaves being small in proportion. The tubers must be taken up in the fall, and stored away similar to gladioli and such like bulbous plants.

K. FINLAYSON.

Possibilities in Plant Breeding

The plant breeder is an explorer into the infinite. He will have "No time to make money," and his castle, the brain, must be clear and alert in throwing aside fossil ideas and rapidly replacing them with living, throbbing thought, followed by action. Then, and not till then, shall he create marvels of beauty and value in new expressions of materialized force, for everything of value must be produced by the intelligent application of the forces of nature which are always awaiting our commands. The vast possibilities of plant breeding can hardly be estimated. It would not be difficult for one man to breed a new rye, wheat, barley, oats or rice which would produce one more grain to each head, or a corn which would produce an extra kernel to each ear, another potato to each plant, or an apple, plum, orange or nut to each tree. What would be the result? In five staples only in the United States alone the inexhaustible forces of nature would produce annually, without effort and without cost, 5,200,000 extra bushels of corn, 15,000,000 extra bushels of wheat, 20,000,000 extra bushels of oats, 1,500,000 extra bushels of barley, 21,000,000 extra bushels of potatoes. But these vast possibilities are not alone for one year, or for our own time or race, but are beneficent legacies for every man, woman and child who shall ever inhabit the earth. And who can estimate the elevating and refining influences and moral value of flowers with all their graceful forms and bewitching shades and combinations of colors and exquisitely varied perfumes? These silent influences are unconsciously felt even by those who do not appreciate them consciously. Cultivation and care may help plants to do better work temporarily, but by breeding, plants may be brought into existence which will do better work always in all places and for all time. Plants are to be produced which will perform their appointed work better, quicker, and with the utmost precision. *Los Angeles Times*, Oct. 23, 1904.

Number Three

Should reach us by Monday, December 12, if possible, or Tuesday, December 13, at latest

News of the Clubs and Societies

Advice for club meeting. Don't let red tape formalities stand in the way of progress. Parliamentary contention has caused the early death of many a promising association.

The Newport Horticultural Society held its seventh annual ball at Masonic Hall, Newport, R. I., on the evening of Dec. 2. The hall was profusely decorated and every feature of the occasion was a pronounced success.

Mr. W. E. Beal of the State University, Urbana, Ill., was the speaker at the special meeting of the Chicago Florists' Club. Resolutions were adopted to appoint a permanent committee to ask an appropriation from the legislature to carry on floricultural experimental work at the Experiment Stations.

The second monthly bulletin of the Park Department of the American Civic Association has been issued under the title of "Items of Park News No. 2." Copies may be secured as long as the edition lasts by writing to Mr. G. A. Parker, P. O. Box 397, Hartford, Conn., who is vice-president of the Department of Parks.

The monthly meeting of the New York Florists' Club will take place on Monday evening, December 12. Election of officers will be an event of absorbing interest to the several candidates and their friends, and a display of florists' supplies from various sources is expected to furnish a further inducement to a record-breaking attendance of members.

The New York Florists' Bowling Club perpetrated the following scores on Monday evening, Dec. 5: —

Ford	208	136	140
Scott	143	132	67
Shaw	124	121	145
Traendly	104	97	127
Burns	124	134	147
Guttman	127	143	157
O'Mara	—	128	114
Holt	—	128	149
Lang	—	175	142

The annual report of the Proceedings of the Society of American Florists and Ornamental Horticulturists has been distributed by the secretary. It contains the complete minutes of the St. Louis Convention, list of plant introductions during the year, and many other documents of great practical value. Accompanying this volume is a copy of the charter, constitution and by-laws of the society, also a full catalogue of all the plants registered up to date by the S. A. F.

The Gardeners' and Florists' Club of Boston will hold a field day at Framingham, Mass., on Saturday afternoon, Dec. 17th, visiting the greenhouses of William Nicholson, S. J. Goddard, and J. T. Butterworth.

Electric car leaves Park Square, Boston, at 12.45, arriving in Framingham one hour later.

The next meeting of the Club will be held Tuesday evening, Dec. 20th, at Horticulture Hall. The speaker of the evening will be David Lumsden of Roslindale. The subject will be Ferns

The Pierson-Sefton Co.
HORTICULTURAL ARCHITECTS and BUILDERS
West Side Ave., Jersey City, N. J.

PIERSON Water Steam BOILERS

have more direct fire surface than any other horticultural boiler on the market, and this together with their ample flue surface and area is the reason of the economical results obtained last winter.

We Have Letters from All Who Used Them Last Winter

THEY ARE ALL ALIKE; HERE IS ONE:

Mr. Henry Hentz, Jr., of Madison, N. J., writes; "The two 36 in., nine section 'Pierson' Water boilers you furnished to replace the 36 in., thirteen section boilers of another make, used in connection with the heating of my greenhouses, have proven thoroughly satisfactory in every respect, and I consider the money expended in the change one of the best investments I have ever made.

"In the old boilers I was compelled to use anthracite egg coal to get results, but in the 'Pierson' boilers I was able to use pea coal, and they did the work better with a considerably less quantity of coal, although last winter was the most severe we have had for many years."

WRITE US FOR PRICES

Secretary Herr calls attention to an error in the date as given in the program for the carnation meeting at Chicago, which should be January 25 and 26, not 28 and 29.

Papers and discussions are announced as follows:

Carnation Diseases. By Prof. Hasselbring, of the University of Chicago. Discussion opened by W. N. Rudd and Fred. Dorner, Sr.

Carnations from a Retailer's Point of View. By George Wienhoeber, of Chicago. Discussion opened by P. J. Hauswirth and W. J. Smyth. This paper will be illustrated with a practical demonstration of effects possible with carnations.

Exhibition Carnations. By Fred. Lemon, of Richmond, Ind. Discussion opened by Eugene Dailledouze. This paper will show methods of cutting, packing and staging exhibition carnations.

Cutting, Packing and Shipping Carnations for Long and Short Distance Shipments. By C. L. Washburn, of Chicago. Discussion opened by E. G. Gillett. This paper will be illustrated by practical demonstration.

The regular monthly meeting and floral display of the New Jersey Floricultural Society took place on Dec. 2 at their rooms in Orange. Among the exhibits were choice orchids from the collections of Henry Graves, gardener Edwin Thomas; William Barr, gardener Arthur Bodwell; roses from John Crosby Brown, gardener Peter Duff; carnations from Sydney and Austin Colgate, gardener William Reid; A. C. Van Gaasbeck, gardener Wm. Bennett; Mrs. William Pierson, gardener Charles Ashmead; and Charles Hathaway, gardener M. Hornacker; chrysanthemum Gold Mine from John Crosby Brown; begonia Gloire de Lorraine from Mrs. Wm. Pierson, and a pandanus and crotons from Wm. Runkle.

Totals for the year were given out in the contest for the Society's prizes: —

Flowers.

John Crosby Brown (Peter Duff), 895; Sydney and Austin Colgate (Wm. Reid), 780 — Class A.

Mrs. Wm. Pierson (Charles Ashmead), 665; Charles Hathaway (M. Hornacker), 645 — Class B.

Plants.

William Barr (Arthur Bodwell), 993; William Runkle (D. Kindsgrab), 954 — Class A.

Charles Hathaway, 700 — Class B.

Vegetables.

John Crosby Brown, 475; Mrs. William Pierson, 455 — Class A.

Charles Hathaway, 455; E. J. Brocket (Thomas Maybury), 425 — Class B.

Fruits.

John Crosby Brown, 365; S. and A. Colgate, 330 — Class A.

Chas. Hathaway, 375; E. J. Brocket, 310 — Class B.

The election of officers for the forthcoming year resulted as follows: Pres., Detrick Kindsgrab (unanimously); Vice-Pres., Arthur J. Caparn; Sec'y, William Bennett (re-elected); Treas., M. McRorie.

Jos. B. DAVIS.

And Numerous Diplomas and Certificates of Merit.

The beauty and value of this new fern to be introduced Spring of 1905 can best be appreciated by seeing it. It is a sport from the Pierson Fern (Nephrolepis Piersoni), but it is very much more beautiful and of greater commercial value. It is as different from the Pierson Fern as that is from the Boston. The small side pinnae are again subdivided, producing an exquisite and beautiful effect, changing the entire character of the fronds, which measure less than half the length and about twice the breadth of the fronds of the Pierson Fern. The fronds also assume an entirely different form, the side pinnae standing at right angles to the mid-rib of the frond, on edge rather than flat, as is usual, making both sides of the frond equally beautiful—entirely different from any other fern.

The plant is very dwarf, only about half the height of the Pierson Fern, and of very much more compact habit. Taking it altogether, it makes one of the most exquisite plants and one of the most valuable for table and house decoration that has ever been introduced. The cut fronds, on account of their beauty, will be in great demand for table decoration, design work, and for use in boxes of loose flowers. Well-grown plants make most magnificent specimens. We think there is nothing in the fern line that is so handsome as this beautiful fern when well grown. It is a wonderful improvement over Nephrolepis Piersoni in every respect, both in regard to beauty and habit of growth.

PRICES:—2¼-inch pots, $9.00 per doz.; 50 plants at 60c. each, 100 at 50c. each, 500 at 45c. each, 1000 at 40c each. LARGE PLANTS READY FOR IMMEDIATE USE—5-inch pots, $18.00 per dozen; 6-inch pots, $24.00 per dozen; 8-inch pots, $36.00 per dozen; 10-inch pots, $60.00 per dozen.

ASTERS

The Two New Varieties:

Benthey's White

Benthey's Pink

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite asters in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever.

PRICE LIST:

Trade Package, white or pink, $1.00 **1-4 oz. white or pink, $2.50**
1-2 oz., white or pink, . . 4.50 **1 oz., " " " 8.00**

THE BEST NOVELTIES FOR 1905

Let us book your order now. This will insure earliest delivery and best stock

Chrysanthemums our Specialty

Do not fail to procure OUR FIVE SUPERB

American Bred Novelties

FIDELITY—Pure white.
BRIGHTHURST—Soft rose.
PINK QUEEN—A future early pink.
OKOLONA—White, pink center.
KINKORA—Light mauve.

In addition to above we offer all the OTHER AMERICAN NOVELTIES and BEST IMPORTATIONS.

As to This Year's Introductions and Standard Varieties, we have all that are worth growing. TRY US.

Valuable Assistance to Successful Culture

SMITH'S CHRYSANTHEMUM MANUAL treats all phases in detail. Only 25 cents, postpaid.

Carnation Novelties

CARDINAL—Improved Estelle.
FIANCEE—The world's best pink.
FRED BURKI—White.
RICHMOND GEM—Scarlet.
PHYLLIS—Light pink.
CHICAGO WHITE.

All future money-making varieties. Can give earliest delivery on above at introducer's prices.

Also best of 1904, including FLAMINGO, LADY BOUNTIFUL, WHITE LAWSON, etc.

OUR TWO

Geranium Novelties

SNOW QUEEN—The best single white.

OROSA—The double Mrs. E. G. Hill. Both decided improvements.

Also large stock of standard varieties, outdoor propagation, ready for immediate delivery. WRITE US.

Our New Begonia Rex, the Seven Sisters

GENESEE, ARENAC, HURON, EMMET, DELTA, BARAGA and CLARE.

These will be in future collections. Illustrated and described in this issue of "HORTICULTURE."

Cannas

THE EXPRESS—
As a dwarf crimson bedder this has no equal. Awarded a Gold Medal at World's Fair, St. Louis.

OSCODA—
Same dwarf and free flowering habit as The Express; color of Queen Charlotte. Do not fail to add these to your stock.

Hardy Perennials

A complete list of the best, including HELIANTHUS SPARSIFOLIA and choice named Phlox in variety.

OUR ILLUSTRATED TRADE CATALOGUE WILL BE MAILED EARLY IN JANUARY

DECORATIVE ART

In arranging flowers for a debutante, where the young lady is to receive a great many, it is wise to let each bouquet have an individuality of its own. Often the simplest flowers if combined wisely as to color and an addition of rare foliage are very pleasing. In this case we used some deep crimson and very light pink dahlias with a liberal quantity of Adiantum Farleyense, the whole backed by a cornucopia of parchment paper acting as a frame.

In the above illustration we made a cluster of lilies-of-the-valley with pieces of very light Cibotium fronds. The cornucopia was made of very delicate blue silk and tied with ribbon to match.

H. H. Battles.

ROSA MULTIFLORA JAPONICA AS A ROOT STOCK

Having used Multiflora as a root stock for Teas and Hybrid Teas for outside planting for the past four years, I can safely say that it is the best stock for roses that we have to-day.

The hardiness, free growing and rooting qualities needed in a good stock can be found in Multiflora. No other rose roots so freely, and strong, fibrous roots make first class stocks.

I have put all outside roses upon Multiflora — Teas, Hybrid Teas and Hybrid Perpetuals, also Maman Cochet and Mrs. B. R. Cant. These, grafted February 15 and planted out May 12, made plants 2½ feet by August 20, with a profusion of long-stemmed blooms of fine quality.

If seedling roots are used, care must be taken to take roots below the seed leaf. Multiflora cannot sucker if roots are used. I use whole roots and sections of roots according to the size of plants needed at a given date. This only refers to one year old; on older plants it does not make any difference.

Roses upon Multiflora root stocks planted in May can be cut down in November within six to eight inches of the ground, and treated as herbaceous plants. No covering is required except a shovelful of soil upon the crowns; and in the spring you have strong shoots that make plants that have no crippled wood by mice. Because of the severity of our northern winters, Multiflora is the only stock to-day that will not sucker or be killed by the cutting down.

My experience with Multiflora under glass has not been upon a large scale. For two years I have tried Liberty, Bride, Bridesmaid, American Belle, Perle, Sunset, and Golden Gate. I must say all of them grew beautifully and bloomed in July in a tempera-

ture of 55 to 60 degrees. Liberty grew fine upon Multiflora roots, while Manetti stock did not do as well in the same temperature. I saw a house of Brides and Perles at Newport two years ago and they looked as fine as anything I have ever seen, and these were grafted on Multiflora. Mrs. W. A. Richardson grew and bloomed in great profusion in August and September in our nurseries out doors upon Multiflora, and was greatly admired. This rose when first tried as an outside variety had to be discarded on account of not being hardy, but it has proved with me to be quite hardy grafted on Multiflora and cut down in November.

The Crimson Rambler is a multiflora, also Electra, Gardeniæflora, Helene, and many of our own new rambling and trailing varieties spring from the Rosa multiflora.

John G Gardner

Plant Improvement

Referring to your comments on plant improvement in issue of December 3d: — The system of improving the cyclamen, as noted therein, is of such a primary character and so comparatively barren of results, that in this day of valuable time I can hardly reconcile such dallying on the border of a field of limitless possibilities, as consistent with our boasted twentieth century progressiveness.

Selection of varieties and raising naturally fertilized seedlings from such selections, is only a short step toward an infinitessimal fraction of the possible satisfaction open to all plant breeders, who must be considered as advancing, more or less slowly, toward the ever rising — but never to be fully risen — sun of scientific horticultural achievement.

The first step should be, hybridization or cross-breeding between such selected varieties — irrespective of color or race — to the limit of variation and stability; with a cotemporaneous systematic effort, to develop domestic specific types, from every obtainable wild species by using pollen from these advanced selections. These efforts should be conducted on many lines, with the hope of rendering the possibilities of each species controllable, for the definite use planned by the operator.

For example: — If the desire is to produce a white section, every effort should be made to originate such colors and shades from every known wild species, without regard to their colors. When fixed types of a desirable character have been so produced, these should be used as sires on selections from existing varieties as mothers, for the creation of new and valuable economic types.

While the foregoing operation is progressing for the production of commercial types, crosses should be made between all of these sires on individuals prepared for use as mothers by removal of the anthers before ripening of the pollen, with the object of creating new and distinct domestic specific types to be used as the progenitors of new forms and races, as well as for the revitalization of strains possessing valuable characteristics worthy of perpetuation and elaboration.

The results to be obtained from blending vital forces that have been isolated for ages in the natural production of wild species, gives unbounded satisfaction, and the present surprises are only limited by the activity of the worker.

In my work on the gladiolus, some of the most beautiful red shades came from crosses between light types that had been revitalized by a dash of choice red blood from new species. The effect of working through the light section added most materially to the substance of the flower.

My highest satisfaction, however, is from a series of new forms with large, round, cup-shaped flowers, like the tulip or nymphea. Many of these are self colors ranging from pure white to lilac and pink, with intermediate shades of the most delicate shell pink and flesh tints.

Multiplicity of the floral pieces, as in semi-doubles, is now quite frequent. Infusions of such blood induces twinning from the seed so produced — a point that proved most interesting to Professor Bateson of England, at the International Plant Breeders' Conference, New York, 1902.

Valuable and interesting variations like the above, are among the side-lines of limitless possibility yearly made apparent to the ardent worker, and selections made by me from over a half million of my new creations, give promise of endless satisfaction, as well as increased opportunities for greater and more rapid progress in the future.

We hope you will like HORTICULTURE and recommend it to your friends in the trade. Send in their subscription now to insure complete file from first number. We want to see on the list of subscribers every one identified with any horticultural industry. We draw no lines, but *invite you all* to help by your subscriptions, your contributions, and your approving words to make HORTICULTURE the best known and the best liked professional journal in our country. Every $1.00 subscription sent in is a *practical help* to this end.

WM. J. STEWART, Editor and Manager.

Next Comes Ye Editor

Widespread and incessant publicity is to-day essential to success. LOOK WELL TO YOUR ADVERTISING.

Banquets make business that begets more business. Funerals make business also, but they kill as much business as they make. One joyful wedding is worth more to the florists' business in the long run than a dozen funerals, each with a wagon load of "designs."

Wonder whether Mr. C. W. Ward or his hundred visitors got the greatest benefit out of that trip to his place last Friday? These social affairs that bring us together in friendly interchange of views on matters of common interest, repay manifold both host and guests, and in the good fellowship they breed, go a long way toward making life worth living.

The beginning of the year 1905 is near. Unless all signs fail, it is to be a year of great prosperity in our land. Now is the time to lay plans to participate in the harvest which seems assured. We think we can help you. Our business is with and for the gardener, florist, plantsman, landscape artist, seedsman, nurseryman, greenhouse builder and manufacturer of or dealer in goods used in these industries. The Hub of horticulture in America has within its circle of easy communication, a very large number of the best buyers of horticultural wares on the continent. This profitable field can be reached more thoroughly and at less cost through advertising in HORTICULTURE than by any other means. These are facts. Test them.

We came upon an old acquaintance a few days ago, none other than the time-honored "orchid with hose attached." According to the *New York Sun* which is, or should be, a model of veracity, this most wonderful thing can be seen "on the shore of a large lagoon in the neighborhood of the Rio de la Plata" doing its daily stunt of sucking up water through several feet length of hose. Having replenished its tank, it rolls its tube into a neat coil and stows it away for future use. The eminent naturalist who watched this interesting phenomenon in its thirst assuaging act should have tested its appetite for something stronger (if he had any to spare), and noted results. W. R. Smith delights in showing a pitcher-plant in his collection at Washington which he has nick-named the "Boston Saloon" because the flies enter at the back door to get a drink. What an amusing pair the "Boston Saloon" and the "Orchid with the Hose" would make!

The history of Begonia Gloire de Lorraine as a people's plant in America throws an interesting light on the struggle which even a superior novelty has oftentimes to make before acquiring the standing of a well-established favorite. Some of us can recall the sensation of overwhelming admiration that came over us when that grand old gardener, the late Fred L. Harris, set before our admiring gaze the first specimen of this peerless plant ever shown in America, remarking in that tone of conscious yet modest pride which was his wont when he had accomplished something that pleased him, "There's the best table or basket plant ever introduced." Scarcely had the new-comer been disseminated, however, when complaints were heard in many quarters of the transitory nature of its flowers after being taken from the greenhouse. Store florists discarded it generally; they condemned it, discouraged customers from buying it and advised growers to drop its cultivation. Here and there, though, a very different story was told. Staunch advocates came forward with an earnest plea that the pretty little novelty be given a fair trial under intelligent cultural conditions, and at last the word was passed around — "She's all right when properly grown." And this claim we have found to be true to an extent not hitherto attained by any other flowering plant. Of no other subject, however popular, can it be asserted that, taken from the greenhouse to the living-room it will thrive in undiminished beauty for months, flowering profusely the winter through.

There are instances of other plants and flowers, now looked upon as almost indispensable, that had to undergo in their early days an experience not unlike that which befell Lorraine begonia, while their habits and their needs were being learned by painstaking gardeners. For all these we owe especial gratitude to the men who, by their skill and perseverance have worked out the practice whereby successful culture of these floral gems becomes an attainment within the scope of all.

What Ye Neighbors Say

"The love of praise, howe'er concealed by art,
Reigns more or less, and glows in every heart."

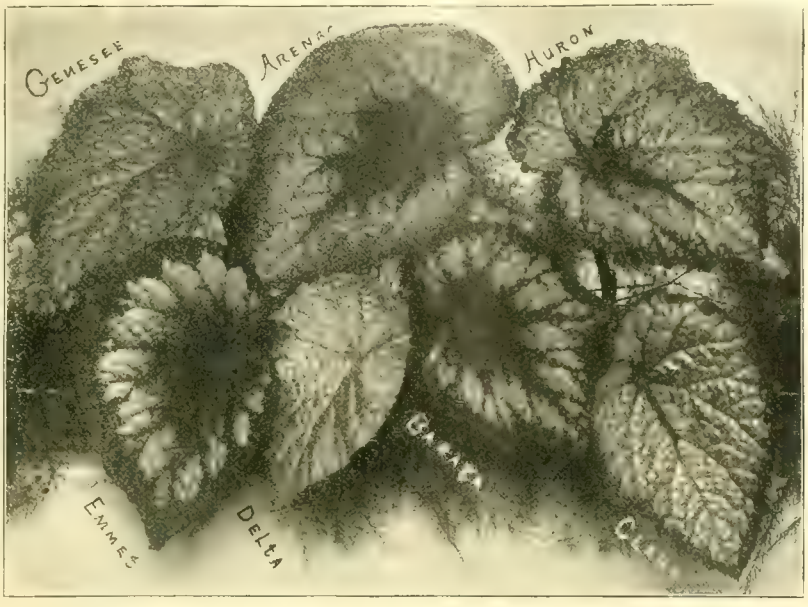
Your initial number is a great triumph for you, and augurs well for the success of your new venture. — L. C.

Allow me to congratulate you on your first edition of HORTICULTURE. I am taken with its appearance and shall feel proud to be numbered among its correspondents. — T. P. L.

Permit me to compliment you on the initial copy of HORTICULTURE which has just been received. It certainly is most creditable for a first number. May its shadow never grow less. I wish you success, which you richly deserve in your new enterprise. — P. O.

The first issue of HORTICULTURE duly received, and if it were not marked Volume One, No. One, we would conclude that it was a publication of long standing from the neatness and workmanship which is pronounced in every department. — N. S. & Son.

Inclosed is Postal Order, amount $1.00, for subscription to HORTICULTURE for 1905. Copy No. 1 received, and am pleased with the contents. Hope you will make a success of it; there is plenty of room for such a good paper as it promises to be. Wishing you success, also the compliments of the season. — J. T. T.



We must congratulate you upon the successful and solid appearance of HORTICULTURE, the first copy of which we received yesterday.

It certainly looks like a "Winner," and we think your paper is in the "Front Ranks" already. We are also pleased with the appearance of our ad., and the manner in which it is set up. — C. & B. Co.

I am in receipt of your No. 1 of HORTICULTURE, and think it is a beauty. The general appearance of the paper is good, and the thing that strikes me is the signed articles with the fac-simile signatures. The paper looks as if it is devoted to the arts and science of horticulture. I think that if you will keep it along on these lines, your success will be unquestioned. You have my heartiest congratulations. — U. G. S.

No. 1 of HORTICULTURE before me, for which you have my thanks. Truly you have reached very nearly the "Ideal" in Horticultural Literature. That you may be successful is my hope, my wish. It almost makes me wish that I was an advertiser, as anything in that line in your paper would be likely to attract attention. Certainly the paper is very much alive Again, accept my congratulations. — C. L. A.

HORTICULTURE just at hand. Delighted! I have looked it over quite closely and the more closely, the more I am pleased. From the title page, which is fine, through the book, I have found very many commendable and pleasing features. I like the form and size. I like the illustrations, and of course "through force" I like the subject matter from such a corps of writers. Keep it up and more, too! — C. W. H.

NATHAN SMITH & SONS' SET OF NEW BEGONIA REX.

After Ye Adjournment

Anton Schultheis, College Point N. Y., sends out a sheet listing his Christmas specialties; a very tempting line.

The Pittsburg Cut Flower Co.'s pencils are all right. We know because we have tried them. Supplemented by a good, live card in HORTICULTURE, they make an excellent advertisement.

Killarney, "the pretty rose with a pretty name," is making staunch friends in the Boston retail stores. But they have to send to New York to get it. Here's a chance for some Boston grower to wake up.

The visit of the Japanese prince to Boston had a favorable effect on the local cut flower market. The Japanese are generous spenders, and on this rare occasion they went the full limit, the best being none too good and price no object.

Adiantum Croweanum is developing a tremendous demand all along the line as its superiority becomes known. John I. Raynor, who handles the supply for New York City, is selling from 2000 to 3,000 a day at $1.50 per 100 fronds, which is double the price of cuneatum.

In the course of a little speech at Queens, last Friday, appreciative of Mr. Ward's hospitality, Patrick O'Mara said that "Long Island is God's country." This acknowledgment from a Jersey man almost took the breath away from his hearers. Anything is possible hereafter!

What is pronounced the finest house of Lorraine begonia ever seen in this country is now at the height of its beauty at the greenhouses of Mr. J. Montgomery Sears, Southboro, Mass. Large numbers of specimen plants are suspended from the roof, making a gorgeous display. Mr. Sears cordially invites all who wish to come and see the show.

News of the Clubs and Societies

At the next meeting of the Gardeners' and Florists' Club of Boston, December 20, a talk on ferns will be given by David Lumsden. The meetings of this association are held at Horticultural Hall.

The Central Passenger Association and the Trunk Line Passenger Association have granted the rate of a fare and one-third to the members going to the meeting of the American Carnation Society in Chicago, Ill., January 25 and 26. It is presumed that the other associations will fall into line and help make this the best meeting and the largest attended of any we have yet held.

There will be a supplement to the premium list go to press the 27th of this month. Any one wishing to offer special premiums or advertise in this supplement should get into communication with the secretary at once.

ALBERT M. HERR, *Sec.*

Lancaster, Pa.

On Tuesday, December 14, the bowlers of the New York Florists' Club went over to Madison, N. J., full of confidence in their ability to vanquish the countrymen. They came home weeping. The scores were as follows:

NEW YORK			
Burns	122	149	151
Kessler	125	153	124
Guttman	93	114	107
Holt	117	136	112
Manda	138	114	148
Fenrich	105	134	145
	700	800	787
MADISON			
Herrington	189	165	163
Keating	162	167	113
Totty	149	108	140
Connors	131	198	147
Duckham	145	195	138
Pluch	161	157	136
	937	990	837

A fine lunch was served at the hotel. A return match in January is proposed.

Landscape Architecture of the St. Louis Exposition

The Exposition recently closed at St. Louis may in area devoted to it, in the size of buildings and in the reported cost, be characterized as great.

An international exposition should represent the development and progress, the honor and trend of the nations and individuals participating. Accepting this view, it is desirable to study the Exposition in its landscape phases.

Landscape architecture is in its crudescent stage in the United States Among its professors Parmentier practiced frankly in Old World styles; Downing — a disciple of Repton — and others have designed works markedly strong and distinctive in a spirit and tradition foreign to our native soil.

The development of the art in this country offers many excellent examples of exceptionally meritorious design in the arrangement of the earth's surface, the verdure, water and buildings upon it. Both where the natural features dominate and where dominated by structural edifices, or again where both are inter-related, there are many illustrations of counterparts being systematically and cleverly coördinated into a unified whole which is strikingly fit and well adapted to its intended use and with complete harmony of appearance.

When the constituent parts of a complex problem are so planned that there is a coördination of functions, the result is above the ordinary. This end is rarely secured except by those having exceptional training and ability.

It is these larger problems and their treatment by American artists that marks the principal advance and trend of our national progress in landscape art.

In modern works there is ever more forcibly evident a broader conception of the main theme, a more unique and fit arrangement of its counterparts, more definiteness and consistency in the motives controlling the elaboration of a plan, besides a finer nicety in foreseeing effects proposed in plan. There is, in addition, a tendency toward a simpler plan — one where the main lines and masses shall be so frankly direct of interpretation, and more simple color scheme; where greater breadths of fewer colors are more boldly and cleverly applied and greater effort made to secure richness by the more delicate use of texture and the arrangement of forms in details.

However we may regard the merit and wisdom of individual examples, the boldness of untrammeled American initiative is evident in executed works. But with the advancement in wealth and culture of our populace the value and vitality of tradition and historic styles is better appreciated. With it there is a greater recognition and more profound deference to the merit of older styles of ornamentation and the difficulty of evolving new styles without reverting to rudimentary crudeness. And yet the style most typical of the United States as a nation, though not strikingly differentiated, is perceptible and real.

Trees seriously injuring and weakening the prospective view along the main axis

Every meritorious design is the outcome of good ideas applied in accordance with the dictates of approved principles. Such a scheme may be dominated by structural edifices; by purely natural objects, or by a fusion of both, but always a good work will perforce present a proper, satisfying and consistent elaboration of the main theme throughout.

There is a peculiar admixture of good with less meritorious design in the landscape architecture of the St. Louis Exposition. The pity is that as a whole it inadequately represents the modern development of the art in this country.

Primarily it is to be noted that in location the St. Louis Exposition lost a feature of extreme value by not having the mighty Mississippi River prominently included in it. North of the city are lovely meadows bordering the river, and south of the city is a rocky eminence commanding views over the city up and down stream and over the Illinois flats to the blue distance. To forsake both of these suitable sites for one more easily accessible and approached by way of a better residential district of the city was an irreparable error for which no proper compensating advantage was gained.

The scheme seems to find its strongest feature in the treatment along its major axis.

The plan disposes of the principal buildings on a main axis, others on another intersecting the former transversely, and then angled and on yet two others diagonal to the main axis and intersecting it in front of Festival Hall. State and minor buildings are distributed promiscuously on a wooded plateau to the east. The scheme of building location seems to find its strongest feature in the treatment along its major axis. At the lower end on a broad flat area is a vast rectangular, graveled plaza with the statue of St. Louis near its upper end; continuing the plaza is a broad lagoon. The upper end of the lagoon is at the base of a semicircular slope rising to a plateau, skirted on its edge by Festival Hall, which is located on the main axis, and two segmental pergola wings, terminated by smaller buildings. From the base of Festival Hall a cascade gushes forth and splashes, during about half the day, over impediments to the lagoon below. The cascade is an imitation of an arrangement at the French Trocadero conceived to allay the objection to stair climbing. By following the water course, pedestrians are led in the original to ascend steps excellently arranged as to proportions of rises and tread, so that with slight exertion beyond that required in walking on level ground, they are enticed to a higher elevation. At St. Louis the volume of water is not sufficiently profuse to afford an impelling attraction, the flanking ornaments are too high to permit of an easy and uninterrupted view of the water, and the steps are so abundant and poorly arranged that visitors are not only not attracted to mount them but are actually discouraged from so doing. Similarly the very narrow overlook terrace in front of Festival Hall and its pergola wings is arranged on several elevations necessitating alternate ascents and descents in traversing it from end to end.

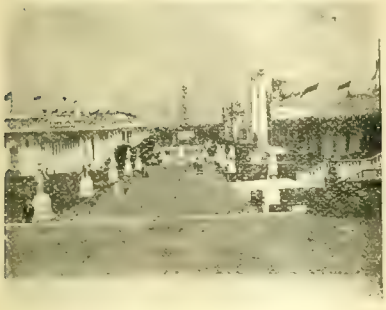
Facing the main lagoon and the plaza are several large buildings, and in front of these is a double row of large trees, softening the fierce sun reflection from the buildings and adding a harmonizing mass of color, but seriously injuring and weakening the perspective view along the main axis.

Angles in the minor transverse axis effect a weakening of the design and the buildings flanking it neither take advantage of the awkward axial angulation nor lessen its ill effects. Separating the buildings on this axis are rows of trees with a narrow — disproportionately narrow — lagoon midway between.

Radiating from the Festival Hall are three axes. Along one the buildings are separated by a sunken panel devoted to low-growing, tender bedding plants with a few trained specimen plants and statues well disposed and in good proportion.

Another axial vista is good, but its terminus is an unmasked skeleton telegraph tower, lamentably injuring a strong architectural feature.

On another axis the area between the buildings is somewhat overwrought in detail and is injured in perspective view by the intrusion of a concession airy structure at its terminus, not designed in strict sympathy with the principal buildings coming into view with it.



The main entrance is wanting proper dignity through a lack of appropriate structural demarcation, its attendant surroundings, and by its relation to the plan as a whole.

A sunken panel devoted to low growing, tender and trained specimen plants and statues well disposed and in good proportion

In locating the state buildings a most unfortunate result is evident in that no comprehensive or specially meritorious plan is evident; indeed, their disposition would appear to have been without plan. Most flagrantly is this noticeable with the Missouri state building located immediately in the rear of the government building and about forty feet higher in elevation. By too close juxtaposition the appearance of both is injured.

Decidedly proper and consistent was

An unmasked skeleton telegraph tower lamentably injuring a strong architectural feature.

the idea of providing the so-called model street as an important exhibit. There is popular endorsement in this country to efforts tending to have structural architecture requiring an expenditure of public funds represent and reflect the artistic sensibilities of citizens. A suitable demonstration of what has been accomplished as a proper illustration of what may be done or striven for would admirably prove to be one of the fittest displays of this exhibition.

A seeming attempt was made to fulfill this purpose, but as executed merely represents a possible example of a quite ordinary village street. The stupendous potentialities of a large and important problem concerning all our civic centers were neither illustrated or suggested with proper adequacy or force. Whether or not the abortive attempt to instal a commendable exhibit of this phase of our national impulse and progress was due to the limitations of the designers or another is immaterial. There is evidence that the necessary grasp of the problem as a whole or the originality to be reasonably demanded in evolving a single entirely successful example was sadly lacking. As a result, it could hardly be expected that it should be very distinctive or mark an epoch of our progress as does the Federal government exhibit, for example, in its many and varied sections.

Never before has there been such a conspicuous example of the need of the master landscape architect. The preconception of effects dependent mainly on differences of elevation, proportion, grouping and numerous practical considerations are impressive by their bad solution or want of solution.

To-day there is a strong undercurrent of popular feeling that the cities of this country shall give heed to the demands and requirements of art in the selection of statues and other art works; that if a utilitarian structural necessity can be made ornamental at a reasonable added cost without reducing its power to efficiently perform the service which calls it into being, such expenditure is proper. That many public works could be beautified without justifying the expense attendant thereon cannot be gainsaid.

The "model city" might have illustrated how certain public buildings could be grouped, indicate how rail, water and highway approaches to a city might inductively enhance the beauty of each other, suggest the distribution of parks, playgrounds, and parkways, illustrate the disposal of sewage, suggest means of rapid transit and modern sanitation, in short, express what a suitably conceived plan may effect in the furtherance of municipal art and civic development and administration.

It is quite probable that many municipalities in this country shall be beneficially affected by the shortcomings of the landscape demonstrations at St. Louis. In our national development we have passed the stage of requiring an explanation of why a plan is needed, but we are still in need of more critical elimination of plans as expressions of ideas. If this Exposition enforces one of its principal lessons upon the nation, it will be that though a plan may have much merit and display exceptional cleverness in some of its details, it may still be seriously inadequate and undignified in proportion to what may be done.

Abundant opportunity offered itself at the St. Louis Exposition for the exercise of the highest talent in evolving a plan practical in execution and artistic in result. Its scope was such as to engage the most profound thought and creative ability of the most experienced and highest trained professional mind. Whether such has been applied and the result injuriously affected by the interference of directing officials, or whether the outcome is due to the calibre of the designer, is of less moment

The area between the buildings is overwrought in detail.

than a frank recognition that the deficiency exists to a serious degree.

By installing the Louisiana Purchase Exposition, St. Louis, Missouri, and the Federal Government have conjointly made a noble effort, displaying in its execution many excellent attainments; particularly is this notable in the architecture of individual buildings, but real progress is never gained by being deceived into believing bad work to be good. The spirit of these remarks is not to press strictures, but merely to point out defects, and they are rehearsed in a sympathetic feeling for the project. It is immaterial who is responsible, but quite pertinent as to what result has been achieved.

The buildings neither take advantage of the awkward axial regulation, nor lessen its ill effects.

New York Wholesale Cut Flower Market

For Week ending Dec 14, 1904

Snow and cold, cheerless weather left their impress on the roses during the past ten days, and it can be truthfully said that seldom at this time of year do the Brides and Bridesmaids average so low in quality. Color and texture are away off in much of the stock coming in. American Beauty also feels it, but in less degree. Other than the above there is little to be said regarding the flower situation. Some fine lilacs, calanthes and camellias displayed in Thomas Young, Jr.'s showcase this week are the advance guard of the rarities that may be looked for from time to time from now on. L. Coatsworth of Chicago, and Jos. Heacock, Wyncote, Pa., made a tour of inspection of the wholesale establishments the past week.

New York Cut Flower Prices per 100

American Beauty, fancy and special, $25 to $50; extra, $15; Nos. 1 and 2, $4 to $8; Bride and Bridesmaid, extra, fancy and special, $8 to $15; Nos. 1 and 2, $2.50 to $6; Liberty, extra, fancy and special, $12 to $25; Nos. 1 and 2, $3 to $8. Carnations, Lawson, $3 to $4; Enchantress, $6 to $8; ordinary, $1.50 to $3. Violets, $.60 to $1; special, $1 to $1.25. Lilies, $16. Lily of the valley, $3 to $4. Narcissi and Roman hyacinths, $1.50 to $2. Smilax, $8 to $10.

Buffalo Wholesale Cut Flower Market

For week ending December 13, 1904

There is no scarcity of flowers of any kind in this market. Plenty of everything for all demands. Last week's conditions as reported in HORTICULTURE still prevail.

American Beauty, special and fancy, $35 to $50; Nos. 1 and 2, $10 to $25; Bride and Bridesmaid, special and fancy, $8 to $10; Nos. 1 and 2, $3 to $6; Liberty, special and fancy, $10 to $12; Nos. 1 and 2, $3 to $10; other varieties, special and fancy, $8 to $10; Nos. 1 and 2, $3 to $6. Carnations, Lawson and Enchantress, $3 to $5; ordinary, $2 to $3. Violets, $1 to $1.50. Lilies, $15 to $18. Narcissi and Roman Hyacinths, $2 to $4. Asparagus, $40 to $60. Smilax, $12 50 to $15

FLORISTS' TOPICS

It Bobs Up Again

What can the growers and retailers do to improve present conditions?

The growers say low prices. I call on John Jones who grows Brides, Bridesmaids and other roses of a similar character, and he holds up a bunch in front of me.

"What do you think of them?"

Some of them are as big as your fist and the foliage is perfect, and I respond, "Fine."

"Fine, heh! What do you think I got from my commission man last month for such stock?"

"Oh, I don't know. I see extra and specials quoted at from six to eight dollars per 100."

"Six to eight is it! Well, let me tell you that my returns for November averaged just about one cent apiece."

"The deuce, you say."

"Yes, sir! And what's your old florists' club doing about it? Do you think we can pay labor and coal and interest and other running expenses on one cent for such roses as these?"

"Well, but here! What's the florists' club got to do with it?"

"Why, what's it for? Isn't it to help the trade? And what would help the trade better than getting remunerative prices? Let the growers all get together and cut off the fakirs who bring down our average from 8 cents to 1 cent, and they will be doing something that will justify them in having an organization."

"Very good; will you come down and start the ball a-rolling at next meeting?"

"*No*, sir. I'm not looking for notoriety."

And there you are! We all know what's hurting us, but who's going to "Bell the Cat?"

Until the men who are hurt make up their minds that they must apply the remedy themselves it will never be applied. A club is only a collection of individuals. Of course one remedy is to have all stock not sold to the regular trade repressed and not sold to the fakirs. Can the growers get together on that? Are there enough here tonight to make a committee to try and see what can be done?

The foregoing is the gist of some remarks I made at the last Florists' Club meeting in Philadelphia. The discussion that followed was animated. John Burton thought we had settled years ago that the fakir in the long run was not really a detriment but a help to the business, and he could see no prospect of bettering conditions by abolishing him. E. G. Hill of Richmond, Ind., said they had passed an ordinance in Chicago forbidding the fakir, but he could not say that it had improved conditions. In Chicago a Greek firm bought up all the left-overs and shipped them out to nearby cities to their agents. Ben Dorrance, of Wilkesbarre, thought the fakir was a good thing, and told of his experiences shipping to New York. H. H. Battles was of the opinion that many a person got his taste for flowers by buying a cheap bunch on the street and regarded the street man rather as a pioneer and feeder for the more advanced distributors of flowers. Robert Kift spoke in a similar vein. The consensus of opinion seemed to be decidedly in favor of the humble street merchant and the discussion was valuable in that it made this fact quite evident. John Jones was present at the meeting, but he must have been double-rivetted to his seat, for he never rose to say a word.

GEO. C. WATSON.

Crowding Flowers

The general public is slow in grasping a correct taste in the arrangement of flowers. When the fair one gets a bunch of roses, her first impulse, after a few ecstatic sniffs, is to crowd them together and put them in the window for the benefit of the neighbors and passers-by.

We see miserable examples of this bad taste in arrangement in countless windows, and it gives a painful shock to see good flowers so wasted.

How much more graceful and effective if she would take just a few of them and place them loosely so that each flower could show some individuality. Three carnations in a thin vase are far more effective in a table decoration than fifty crowded close together in a jug. The up-to-date flower stores have made good progress of late years and study continually all the fine points of arranging and designing. They would be doing a good work in educating the public if they would put a card in each box of flowers something like this:

TO ALL FLOWER LOVERS

Do not crowd your flowers. Arrange them loosely so that the individuality of each blossom can be appreciated. The effect will at once be seen to be much more graceful and charming. POSEY & CO.

Of course these remarks refer only to long stem flowers. Violets, nasturtiums, and subjects of that nature are a different proposition. The violet, for instance, owes its popularity to its delightful fragrance, and it is not to be considered as a flower for decorative effect.

Here, There and Everywhere

Mr. A. S. Fetters, formerly of the firm of Smith & Fetters of Cleveland, O., has removed to Detroit, Mich.

There is a well-grounded impression abroad among the retail florists that the coming season is to be a very busy one.

The greenhouses of Claude Warburton at Battle Creek, Mich., were damaged by fire on the morning of Nov. 27, to the amount of $2,000.

Miss Emma E. Cartwright, daughter of George Cartwright of Dedham, Mass., was married to Mr. Claude T. Taggart of Philadelphia, on November 30th.

Thomas H. Kearney of the bureau of plant industry at Washington, is about to take a trip to North Africa in search of new plants adapted to cultivation in the southwestern U. S.

A fine new wagon and a new electric sign are the outward and visible evidences of that prosperity which has rained of late on James M. Thoirs, the popular Camden, N. J., florist.

Another Lawson Scheme

SALEM, Nov. 17. — Tears coursed down his cheeks and sobs of deep grief shook his manly bosom as he told Florist Ward how to make a huge floral pillow for his deceased wife.

"Spare no expense," he sobbed as he wiped away a few tears, "and put the word 'wife' across it in big letters of purple immortelles."

"My name is Lawson, William F. Lawson," he continued, giving his address, "and I'll just take a couple dozen of those big Lawson pinks; don't you think they'd be rather appropriate, for my wife's name is — was Lawson, too, you know."

Florist G. E. Ward thought "Lawson" pinks would be appropriate all right, so Lawson took his pinks, brushed away a few more tears and walked sobbing and unsteadily from the shop. That was yesterday. In the afternoon the florist delivered the floral pillow, on which no expense had been spared, and also on which the word "wife" had been placed in purple immortelles.

"Here is the pillow for Mrs. Lawson's funeral,' said the florist as he delivered it.

"For what?" asked the woman who came to the door.

"Isn't this where Mr. William F. Lawson lives?" asked the florist, thinking he had got the wrong house, as he saw no crape on the door.

"Well, here's the pillow for Mrs. Lawson, who has just died; it was ordered by her husband," said the florist when the woman told him he was at the right house. She took the floral design, ripped off the tissue paper, read the word "wife," and then looked at the florist.

"Do I look as though I were dead?" she asked. There was considerable color in her face and much fire in her eyes, together with certain firm lines about her mouth that caused the florist to admit instantly that she was the healthiest looking corpse he ever saw.

The "deceased" wife wouldn't take the pillow; she said she had no use for it, but would like to see her husband just then. The florist said he would, too, and said something about "Lawson pinks" being appropriate also.

This morning, on the charge of the larceny of one bunch of Lawson pinks, Mr. Lawson was sentenced to a month in the House of Correction.

BOSTON, MASS.

F. H. TRAENDLY
Re-elected President N. Y. Florists' Club.

The New York Florists' Club held a rousing meeting on Monday evening, December 12. Although the program as announced provided no specially important business other than an exhibition and the annual election of officers, yet the hands on the clock had passed the 11.30 P.M. mark before adjournment was reached, and even then many of the attendants seemed to be in no particular hurry to depart.

The expected exhibition of florists' holiday supplies did not materialize. Not an article of this kind was offered by any one, although the opportunity for the dealers in these goods to get a little business thereby would appear to have been excellent. On the tables were, however, some very interesting novelties. Among them were vases of two new roses from E. G. Hill, viz. Richmond and Rosalind Orr English, both American seedlings. Richmond with its generous, broad petals of glowing crimson scarlet, fine stem, foliage and fragrance, impressed all who were present as a sure winner that would supplant Meteor and Liberty as florists' roses. From Ben. Dorrance came a vase of his seedling No. 6, a pink bud of only moderate size, but which Mr. Dorrance said would offset this lack by its extreme florifcrousness. Wellesley, the lovely pink rose from Waban Rose Conservatories, was represented by two large vases of full blown flowers which did not do full justice to the variety.

The two scarlet carnations of which we have heard so much of late — C. W. Ward's Robert Craig and Weber & Guttman's Victory — were each shown to advantage in large vases, and under the favorable conditions for comparison, it was seen that the two varieties are widely different in form and other characteristics, including color, which, under artificial light at least, was quite distinct, Victory being of a lighter tint. Geranium Telegraph from Thos. Devoy & Sons was shown in good form, its enormous orange scarlet flowers in big trusses, and its Bruant lineaments giving promise of a bright future as a bedding variety. Fiancee from the Chicago Carnation Co., Lieut. Peary and a number of seedlings from Cottage Gardens, and Dorner's Eclipse and Lady Bountiful from Vaughan's seed store, completed the list of exhibits, all of which were duly noted and mentioned by the examining committee.

The committee on awards reported on its recent visit to Cottage Gardens. Seven members had been present to inspect carnation Lieut. Peary, had found it a free grower, and a commercial variety good in all points, scaling 90 points and entitled to a certificate. Ethel Ward had scored 82 points. Robert Craig which had been certificated last spring by a sub-committee was again examined and given 93 points in confirmation. It was stated that the same plants that had been inspected last April were found to be still in splendid condition. Two members of the committee had gone on invitation to inspect Messrs. Guttman & Weber's Victory. Their report showed it to be a superb scarlet entitled to 86 points and a certificate. Mr. Guttman later in the evening asked to have the variety re-submitted to a view by the full committee, feeling that a small committee's report would have less weight, but after considerable discussion it was voted to stand by the original report. A report was also made on carnation Phyllis, being grown by J. N. May at Summit, N. J., which the committee had inspected and given 86 points as a good "bread and butter" variety, well-tested and verified.

J. Austin Shaw reported for the outing committee, showing a surplus after paying all bills. The committee appointed to promote the interests of Prof. W. G. Johnson as a candidate for the position of assistant secretary of Agriculture, had done their duty, but were unsuccessful, as the position had been filled by an appointment from Minnesota.

A hearty vote of thanks was accorded Mr. and Mrs. C. W. Ward for their hospitality on the occasion of the recent visit of the club to Cottage Gardens.

The election of officers resulted in the choice of Frank H. Traendly, president, J. Austin Shaw, vice-president, John Young, secretary, C. B. Weathered, treasurer, and Messrs. John Scott, A. S. Burns and W. F. Sheridan, trustees. The officers-elect were severally called upon for speeches and each responded, giving credit to their associates in office during the past year and promising faithful work for the next. Messrs. Hafner, Sheridan and Weathered were appointed committee on annual dinner, and Messrs. Moore, Beaulieu and Nash on death of Mrs. Henry Hentz, late of Madison, N. J.

E. G. Hill of Richmond, Ind., who was an interested visitor at the Club meeting, contributed an entertaining little speech replete with wit, stories and wise counsel. Speaking of the usefulness of flower shows, he expressed regret that at the recent World's Fair show in St. Louis, free admission had not been provided for, so that 350,000 people instead of 30,000 might have witnessed the display.

William Duckham endorsed Mr. Hill's remarks and told of the fine flowers he had seen on his western trip. Ben. Dorrance of Wilkesbarre was the last speaker. He made an earnest plea for united effort from the entire country on behalf of the approaching Rose Exhibition at Boston, deprecated the tendency to sectionalism, and urged united effort in support of all the organizations working for the common good.

As at all New York Florists' Club affairs, the inner man was well remembered by the efficient house committee and the social features of the meeting were no small factor in its enjoyableness.

Providence Wholesale Cut Flower Market

For week ending Dec. 14, 1904

Business in Providence has been very brisk ever since Thanksgiving. A great many social events called for all the cut flowers grown regularly, besides a good many that are brought from outside sources. Roses are somewhat scarce at present. It looks as though there would be an abundance of violets for Christmas. In the plant line there is a brisk sale for Lorraine begonias and poinsettias.

A Visit to Cottage Gardens

BEGONIA GLOIRE DE LORRAINE
As Grown at Cottage Gardens.

The visit of the New York Florists' Club to Cottage Gardens, Friday, December 9, on invitation of Mr. and Mrs. C. W. Ward, was one of the most enjoyable affairs of the kind on record. A special train was placed at the disposal of the party, which numbered close to one hundred, and conveyed them over a local branch track direct to the greenhouses. Once there, they found material in abundance to interest them, — in the houses, among the carnations which looked handsomer than ever before, if that were possible, and the Lorraine begonias which made a superb show; in the sheds and storehouses devoted to choice nursery stock and in the big workroom where was provided a generous feast — just the kind and served in just the way best calculated to touch the heart of a florist and gardener gathering. The day was spent most happily, and at its close an appreciative speech was made by Mr. O'Mara on behalf of the visitors, which was responded to by Mr. Ward, who announced that it was his purpose to make this a semi-annually recurring event and invited all now present to come again in the spring, when the nursery will be at its most attractive stage. Mr. Ward's remarks were received with enthusiastic cheers. A special train conveyed the party back to Long Island City.

Among the varieties especially admired were Robert Craig, Enchantress, Octoroon, Ethel Ward, President, Mrs. Lawson, Hinsdale, Mrs. Patten, Nelson Fisher, Lieut. Peary, Mackinaw and a number of phenomenal seedlings, one of which is a chaste and altogether lovely white of enormous size, of Prosperity parentage. The Lorraine house was a sight to be long remembered. A photograph of a single plant accompanies these notes, also a group picture of some of the visitors. This group was taken in the new storage house now being finished off for the reception of rhododendrons and other garden material benefiting by winter shelter. The building is 35 × 200 feet in area and will be followed by another of 400 feet in length. The glass roof is on the north exposure, the south side being boarded up to keep the sunlight out.

NEW YORK FLORISTS' CLUB AT COTTAGE GARDENS.

NEWPORT HORTICULTURAL SOCIETY

The annual meeting of the Newport Horticultural Society was held on Wednesday evening, 7th inst. The attendance was the largest in years.

The reports of the officers for the past year were of a most gratifying nature, showing that the society was not only in a sound financial condition, but that more had been accomplished along the lines on which the society is founded than ever before.

At this meeting much business was transacted but what may be of most interest here was a recommendation made by the secretary and treasurer and unanimously adopted by the society, — that a permanent fund should be immediately created in order that the society may be able to purchase property whereon in the near future a building may be erected for the society's uses.

The members are enthusiastic over the building project, one of the society's oldest members — one of its founders, in fact, — remarking that he could not understand how such a scheme had been so long delayed.

The Rhode Island Horticultural Society at a recent meeting passed resolutions favoring the idea of a federation of all the agricultural and horticultural societies of the State, and with this end in view, elected a delegate to represent it on an executive committee thereof.

It is expected the action of the Rhode Island Horticultural will be heartily endorsed by the Newport Horticultural, and a delegate appointed when next it meets.

Mufflers and 'Mums

According to the veracious reporter in Paris of *London Truth*, mufflers on Chrysanthemums are a specialty of M. Chauchard of Longchamps, an amateur with a small collection of some ten thousand varieties and a mere bagatelle of gardeners which he calls "an army" to take care of them.

Here are a few of the solemn truths this careful observer reports: —

"On the 11th (November) the Loubet family were the guests of M. Chauchard during the unique annual flower festival. Professional gardeners all over the world contribute to it (Chauchard's Chrysanthemum collection) the rare varieties they have discovered."

Discovered is good. No doubt those professional gardeners penetrated to the heart of the unknown deserts of Asia and Africa, scaled the Andes, the Alps and the Himalayas, chased the Aurora Borealis and hung their hats on the north pole in their search for many of those ten thousand varieties.

"He (M. Chauchard) has from mid-October quite an army of gardeners at work every evening covering the chrysanthemum beds with white muslin. They have straw over their roots and this textile over their heads to protect them from the night frosts. Air and sunshine are given in the early afternoon when both mufflers are removed."

Early afternoon is undoubtedly a good time to take off the mufflers. If they waited until late afternoon, it would of course be too late to take them off. Our American experts will please note that about two hours' exposure to daylight between early afternoon and late afternoon is the "proper caper."

"All the reception rooms of the villa were marvellously decorated. The greatest specialists in the art of flower decoration had been called in during the decoration period. The 10,000 varieties registered overtax by profusion and variety the retentive faculties of eye and mind."

Yea, verily! And the greatest decorative artists were called in! No wonder. Perhaps they even sent to America for some of our capital I's and We's. Has any one heard of Battles, of Pennock or Stumpp, or Klunder or Galvin having been abroad lately?

"A novelty of last week's show was Candeur de Enfance, dedicated to the czarewitch. The peculiarities are extremely long, irregularly curled petals, snow white and resembling silk threads in gloss and texture. Other peculiarities are russet foliage blended with red and yellow and having the vividness of Indian summer hues The creator of this species sent a crateload of his best flowers to Russia for presentation to the empress."

White silk floss! Russet yellow and red foliage! Indian summer hues! Where are you, Elmer D? Do you hear that?

And to think that all this was happening among the festive denizens of gay Paree while we of St. Louis, Chicago, Boston, New York and Philadelphia each thought we had "the biggest show on earth." What gazaboos those Johnny Crapauds must think we are!

And to think that a great daily —

R. C. HAYDEN, Secretary and Treasurer WILLIAM J. MUTH, Manager

the one claiming to have the largest circulation in the State of Pennsylvania — should provide such tommy-rot for the information of its readers!

Is it any wonder that the horticulturists of the country had a serious conference at St. Louis last November, and that one of the problems they wrestled with was how to educate our educators (the Press) so that they might be a real help in making America blossom like the rose. They could so easily do it if they would only take a little trouble. Of course the average editor is human, and he wants first of all to make his paper entertaining, so that the masses will read it and put money in his purse. As a rule he is mortally afraid of a long article in a professional journal. To him it is dry-as-dust, dull, uninteresting.

But couldn't he take such an article and give it to one of his bright young men to dress up and make entertaining, without departing from the essential facts? It's not what you say, but how you say it, that makes all the difference between an article that is dull and prosy and one that is bright, interesting and readable. Few of the professional men have the newspaper instinct. They have a good grip of their facts all right, but as a rule they have no more idea of how to dress them up to make them readable or entertaining than a pig has of playing the fiddle. The Falconers, the Stewarts, the Scotts, the Donlans, the Rudds, and others of their class are far too few to be much heard in the mighty hum of professional monotony. I wish I could write entertaining things! I'd tackle those newspapers myself!

I used to be a thoroughgoing pessimist about the press. Eleven years ago, before the Society of American Florists at its convention in St. Louis, my subject was "How to increase a love of flowers among the people," and I used then all my little eloquence in denouncing the misinformation about horticulture in the press of that day. On many occasions since, in public and in private, I have done the same. But I am not so much a pessimist. I think I can see a change for the better as I look back. Many of the great dailies are now giving us much better stuff and the lapses into nonsense are much fewer. So after all — nevertheless and notwithstanding and moreover — the outlook is more cheerful than many of us suppose when we stumble on an example of heinous tommy-rot like that of my London truthful friend of the chrysanthemums and mufflers.

Philadelphia Wholesale Cut Flower Market

For week ending Dec. 14, 1904

The American Beauty rose is coming in a little more plentifully. No advance is yet apparent in the price of these, although there is some talk of a higher value this week. Cloudy weather has affected business somewhat, and has had a decidedly unfavorable effect on quality of roses.

Carnations are moving satisfactorily, with a tendency to stiffer prices. More of the white varieties could be used at present. Some fancy stock sold as high as $8 per hundred. Hinsdale, Patten and Enchantress are extra sellers. Chrysanthemums are about over, but there are a few Dorothy Faust and late Mrs. Jerome Jones still in evidence, that bring from 25 to 30 cents a flower. The sale of violets has been unfavorably affected by the late bad weather, otherwise the market is normal. Good lily of the valley moves all right. Cypripediums are plentiful and find a fair outlet. Cattleyas still scarce. Dendrobium formosum, phalaenopsis and vandas plentiful. Paper white narcissi plentiful and slow. Roman hyacinths plenty; moving in pretty fair shape. Smilax moves slowly. Asparagus in good demand. There is some very good holly about, but it brings full value. Mistletoe is good and plentiful; also bouquet green and wreathing.

Philadelphia Wholesale Prices as quoted per 100 to Dealers

American Beauty, extra, fancy and special, $30 to $50; Nos. 1 and 2, $12.50 to $20; culls, $6 to $8; Bride and Bridesmaid, $4 to $12; Liberty, best, $20 to $25; ordinary, $8 to $15; Golden Gate, $4 to $12. Carnations, Lawson, $3 to $5; Enchantress, $5 to $8; Prosperity, $6 to $8; Hinsdale, $8; other sorts, $4 to $5. Violets, single, $.30 to $.75; double, $.50 to $1.50. Lilies, $16 to $20. Lily of the valley, $3 to $4. Narcissi, $2 to $3. Roman hyacinths, $2 to $4. Asparagus, $35 to $50. Smilax, $12.50 to $15.

Cincinnati Wholesale Flower Prices

The Maine Christmas tree cutters say that the demand for small trees has fallen off rapidly for the past four years. Symmetrical trees of large size, such as are now called for, are difficult to find, and the profits of the former years, when neat little 10-ft. trees which are abundant were saleable, are no longer possible.

Providence, R. I., florists complain of the absence of fancy material, such as gardenias and orchids, in their market.

OUTDOOR ART AND CRAFT

The estate of Mr. Moses Taylor, where Robert Beatty is gardener, is fast becoming one of the show places of Mt. Kisco, N. Y. Large plantings of conifers Rhododendron maximum and other shrubbery have been made this fall.

At a meeting of the mayors and officials of the cities and towns in eastern Massachusetts on Nov. 29, an organization was formed under the name of the "Massachusetts Association for the suppression of the gypsy and brown-tail moths." Many gentlemen interested in tree life were present. The executive committee was authorized to attend the meetings of the State Board of Agriculture in the interests of legislation in connection with the moth problem.

NEW YORK, N. Y. We have the most cordial appreciation for the work of the Tree Planting Association. If it were only possible to enlist the earnest workers behind this propaganda in an effort to do something more useful than trying to make trees grow in impossible places and under impossible conditions, it would furnish cause for unmixed congratulations. If one-half the enthusiasm manifested in promoting the idea of tree planting could be enlisted in an effort to save the trees we have, the results would be of vastly greater immediate benefit to the city. Thousands of fine trees in the parks and public places in New York are dying of neglect. They are in this condition because the persistent effort of experts of the Park Department to secure an adequate appropriation for their care in a form in which it cannot be diverted to the pay roll of labor for other purposes (chiefly the satisfaction of the district leaders) does not have and has never had the support of an organized public opinion. The item has come up year after year in the Park Department budget, and has been stricken out by the Board of Estimate and Apportionment because no one appeared to speak for it or to show the slightest interest in it.

A good deal less than the cost of one tree in one of the tenement-house districts would have multiplied for distribution among public-spirited citizens prints of some instructive photographs lately taken in Central Park showing the trees with their roots completely denuded, perishing from inability to draw nutrition from an impoverished and exhausted soil. They would have shocked into a desire to do something, every lover of trees. It is admittedly a good thing to plant a tree where one has a chance to grow; but it should need no argument to show that it is a better thing to save a tree dying from neglect when it represents the growth of many years and is unreplaceable in something like a quarter of a century under the most favorable conditions. During the past year twelve of the beautiful elms on the Mall have died, leaving ugly gaps in the lines which cannot be filled during the lifetime of many of those who remember their planting. Within the next twelve months probably as many more will die, unless that is done for them which saved the Prince of Wales Elm. These are very serious facts, and their significance will not be appreciated until just such a body of citizens as the Tree Planting Association wakes up to the fact that it has here a neglected duty which none can perform so well. — *New York Times*, Nov. 12, 1904.

At a business meeting of the Massachusetts State Board of Agriculture on Dec. 6, it was voted to adopt the report of the gypsy moth committee of the State Board as the report of the Board to the incoming legislature.

The report opens by saying that since the stopping of appropriations in 1900 the work of the committee has been confined to observing and recording the increase of the moth, informing local authorities of the appearance of new colonies and advising citizens concerning the best means of combating outbreaks of the gypsy and brown-tail moth.

Taking up the condition of the various infested cities and towns, the committee says that a careful survey of the territory shows an alarming and remarkable increase of infestation and damage.

On the parasite question the report is somewhat noncommittal, but the committee considers it highly desirable that an investigation of the gypsy moth in Europe should be made, particularly with reference to parasites.

Taking up the question of damage from the gypsy moth the past season as against that at the close of the work in 1900, the committee says that the weak woodland colonies have increased by leaps and bounds. Prof. Marlatt says in his report: "During the years 1903–1904 the gypsy moth has made extraordinary progress and defoliation or stripping was found which I had never seen before in the gypsy moth region and undoubtedly many times greater than in the worst of the earlier years of gypsy moth damage."

In closing, the committee says: "In view of the alarming conditions above reported . . . with the certainty of immense increase of damage and expense with the further spread of the insect, your committee believes that the time has come when some concerted and vigorous action should be taken looking to the control of this pest."

The committee further states that it believes extermination was possible at the time the work ceased, but that it is no longer. The best that can be hoped for is control. They recommend that national aid should be sought, and also that the state make a large appropriation, extending over a number of years, with a minimum and maximum amount to be expended in any one year, work to be done against the insect at all times and in all forms.

Have you anything to sell? You are on the wrong track if you don't try some advertising in HORTICULTURE.

What do you need? You will find it advertised in these columns. If not, advise us.

A NEW DEPARTURE in growing

Ornamental

TREES and SHRUBS

Having established an extensive Nursery for the special purpose of supplying Public Parks and Avenues, Cemeteries and Estates with

LARGE AND ESPECIALLY WELL GROWN CONIFERS, RHODODENDRONS, TREES AND SHRUBS

Suitable for immediate effects, which have been so frequently transplanted as to render their further transplanting and future success a practical certainty, we beg to announce that we carry the largest and most complete assortment of the finest formed and best grown specimens in America, which are fully described in the

COTTAGE GARDENS NURSERY BOOK

which is sent free to all who will send us their address.

COTTAGE GARDENS COMPANY, Inc., Queens, New York

THE KING OF ALL CARNATIONS

THE NEW SCARLET SEEDLING ROBERT CRAIG

Robert Craig (Ward)

has been awarded the following honors:

Preliminary Certificate	*American Carnation Society*
Special Diploma	*American Institute of New York*
First Class Certificate of Merit	*Mass. Horticultural Society*
First Class Certificate of Merit	*Penn. Horticultural Society*
First Class Certificate of Merit	*New York Florists' Club*
Craig Cup, for best undisseminated seedling	*Philadelphia*
G. Hartman Kuhn Special Prize, for best undisseminated seedling	*Philadelphia*

The largest, strongest stemmed, most vigorous, healthiest growing, most fragrant, and the best FANCY COMMERCIAL SCARLET CARNATION produced to date. Ranks with Enchantress and Fiancee, having defeated the latter variety in all competitions at Philadelphia.

The Ideal

Christmas Carnation

An Enormous Bloom

Just the color of the Christmas Holly Berry

An Easy Doer — Anybody can Grow It

Having already entered orders for 100,000 cuttings for delivery season of 1906, we are still booking orders subject to buyer's cancellation if dissatisfied with variety at any time up to December 1st, 1905.

PRICES:

$2.50 per doz	$12.00 per 100	$100.00 per 1000
2500 lots . . .	at $95.00 per 1000	
5000 " . . .	90.00 " "	
10,000 " or more .	80.00 " "	

Send your orders early to... **C. W. WARD, *Originator*, Queens, N. Y.**

COTTAGE GARDENS COMPANY, Inc.

DREER'S DOUBLE PETUNIAS

Have long been known for superior quality; this year's stock is no exception, and we now have a large supply in strong 2 1-4 inch pots, plants which if potted up now will quickly furnish quantities of cuttings. These we offer in fifteen distinct varieties for immediate delivery at 60 cents per dozen; $4.00 per 100; $37.50 per 1000.

SEEDS. Saved at Riverton, the finest in existence. DOUBLE FRINGED, 75 cts per 500 seeds; $1.50 per 1000 seeds. SINGLE FRINGED, 50cts. per pkg.

HARDY PLANTS FOR FORCING

We are carrying a large stock of the following, a specially selected grade for forcing

AZALEA MOLLIS

For early and late forcing Azalea Mollis is rapidly gaining favor, easily forced at a minimum cost for heat and labor. They are profitable stock for the retailer to handle. We are supplying at present an unusually fine grade of plants, 15 to 18 inches high and covered with flower buds, $4.50 per dozen; $35.00 per 100.

DEUTZIAS FOR FORCING

Strong two-year-old, field-grown plants suitable for 6-inch pots.

	Per doz.	Per 100
Gracilis Rosea	$1.00	$8.00
GracilLis Lemoinei	1.00	8.00

FORCING LILACS

A fine lot of pot-grown plants, well set with buds and in prime condition for forcing, $6,00 per dozen: $45.00 per 100.

RHODODENDRONS FOR FORCING

These are being used more extensively every season, and this year with Easter at such a very late date should prove especially acceptable, as they can be retarded much easier than Azaleas and at the same time may be flowered at just the right moment at a minimum cost. We are carrying an extra large stock of bushy, well shaped plants 16 to 18 inches high, covered with buds, $9 00 per dozen; $70.00 per 100. Larger plants 20 to 24 inches high, fine specimens, $11 00 per dozen; $90.00 per 100.

NOTE. The prices given above are strictly for the trade, and retail consumers will not be supplied at these prices.

HENRY A. DREER, Phila., Pa.

REPORT ON HOLIDAY PLANTS

Philadelphia reports azaleas as in fine demand, S. Mardner, Vervaeneana, Apollo, Pauline Mardner and Hexa are in the lead. A small number of the Deutsche Perle can be sold.

Araucarias are not in as good demand as formerly but a good many are being sold, compacta robusta being the best. The new white begonia, Turnford Hall, is a gem, and although white is not much of a Christmas color, it sells on account of its great beauty.

English hollies are selling better this year because they are being sent over in better condition and with more berries than usual. Well-berried plants of Skimmia japonica are seen and are a welcome addition to the list. Solanums in the better varieties are in good demand. The scarlet berried aucubas would take high rank as Christmas subjects if they could be imported in good shape and well-berried, but much of the stock sent over from Holland is very inferior in all respects.

Ardisias lead everything as berry-bearing favorites. They are now so well-grown and so durable as to be exceedingly satisfactory. Some of the Philadelphia growers are growing poinsettias splendidly, dwarf plants with enormous spread of head, in pots and small pans. Done this way, poinsettias are hard to beat for popularity.

Combinations of bright dracænas, crotons, etc., with ferns and other green-foliaged subjects, are finding an increased appreciation from buyers. When started by the growers a month or two before Christmas they give better satisfaction than if filled by the florist just before delivery. The Baby Rambler rose is likely to be used next Christmas in small, well-bloomed plants for basket work. Robert Craig says that all indications point to a record-breaking plant trade this Christmas and New Year's.

Philadelphia Wholesale Plant Market

Kentia Forsteriana, 6-in. pot, $1 to $1.25; 7-in., $2 to $2.50; 8-in., $3 to $3.50; larger plants, $5 to $20 each. Kentia Belmoreana, 6-in. pot, $1.25 to $1.50; 7-in., $2.50 to $3; 8-in., $3.50 to $5; larger plants, $7.50 to $25. Areca lutescens, 6-in. pot, $.75 to $1; 7-in., $1.50 to $2.50; 8-in., $3 to $4; larger plants, $5 and upwards. Phœnix rupicola, 6-in. pot, $2 to $3; 7-in., $5 to $7.50; larger plants scarce. Cocos Weddelliana, 3-in. pot, $.15 to $.20; 4-in., $.35 to $.50; 5-in., $1; larger plants scarce. Livistonia rotundifolia, 3-in. pot., $.20; 4-in., $.50; 6-in., $1. Dracaena terminalis, 5-in. pot, $.50 to $.75; 6-in., $1; well-grown plants in good demand. Dracaena fragrans, 6-in. pot, $1; 7-in., $1.50; 8-in., $2.50. Dracaena Sanderiana, 3-in. pot, $.12 to $.15; 6-in., $1 and upwards, 5 plants in pot. Begonia Lorraine, 5-in., $.75; 6-in., $1; 12-in. pans, $2.50; in good demand. Poinsettia, 4-in. pot, $.20 to $.25; 5-in., $.25 to $.35; in 12-in. pans, $2.50 to $3. Ardisia, 6-in. pot, $1.50 to $2.50; 7-in. $3 to $4; very good demand. Orange, 6-in. pot, $2 to $2.50; 7-in., $3 to $4; in good demand. Chinese primrose, 5-in. pot, $.20; 6-in., $4 per dozen; in good demand. Cyclamen, 5-in. pot, $.50; 6-in., $1 to $1.50; in good demand. Araucaria excelsa, 5-in. pot, $.75 to $1; 6-in., $1 to $1.50; Araucaria compacta, 5-in. pot, $1; 6-in., $1.50 to $2; 7-in., $2.50 to $4.

Chicago Jottings

A. Fuchs is recovering from a severe sick spell.

William McKaig, buyer for the George Wittbold Company, was recently married to Miss Hilda Norborn of Burlington, Ia.

The Benthey-Coatsworth Company has harvested a fine crop of their new aster, and the seed will be distributed to the trade this winter.

E. Wienhoeber Company shipped a Christmas order from Chicago to Dresden, Germany. The arrangement was composed of California Pepper Berries.

F. Lautenschlager of 2023 N. Marshfield Ave., is headquarters for California Pepper Berries. The stems are cut up to three feet in length and are covered with bright coral fruit.

ORCHIDS

We are strictly specialists in ORCHIDS. We collect, import, grow and sell them EXCLUSIVELY. We have them in all stages, freshly imported, semi-established and established. Send for catalogue of imported Orchids just received in fine condition. We have CATTLEYA MENDELII, Laelia Anceps, Oncidium Tigrinum, Oncidium Papilio, etc. Write for special list No. 14. Live Moss, selected Peat and Orchid Baskets in all sizes on hand.

WANTS

Advertisements in this column one cent a word. Initials count as words. Cash with order. One insertion free to any gardener or florist seeking a situation.

FOR RENT—Low price if taken immediately—Greenhouse property in Pittsfield, Mass. Consisting of three houses, each 100 ft. long, 3 acres of land or less, part of dwelling-house, 2800 carnation plants in one house, without charge.
Address "A." Care HORTICULTURE, Boston.

FOR SALE—One of longest established rose-growing establishments within five miles of Boston. For particulars, inquire at office of HORTICULTURE, 11 Hamilton Place, Boston.

News Notes

Mr. Julius Roehrs is very sick with bronchial pneumonia at his home in Rutherford, N. J.

F. Macrae exhibited his new white carnation. It scored 91 points and received a certificate of merit.

Warren B. Craw, treasurer of the Lord & Burnham Co., was married December 1, to Miss Lindburg, at Indianapolis, Ind.

E. G. Hill was called home from New York to Richmond, Ind., by a telegram announcing the impending death of his father-in-law, Mr. Stuart.

The Rhode Island Gardeners' and Florists' Club held its regular monthly meeting on December 8, and voted to hold an annual banquet at the January meeting.

William J. Stewart of Boston has been appointed by President Montgomery as Secretary of the American Rose Society, to fill the unexpired term of Leonard Barron, who has resigned.

J. T. Butterworth of South Framingham, Mass., is dangerously ill. An operation was performed a few days ago and news of a successful outcome is anxiously awaited by many sympathizing friends.

"Benthey's White" will probably be the most extensively grown aster for florists' use next season. Flowers 4 to 5 inches across and stems 30 to 40 inches long. The blooms rival the chrysanthemum.

Mr. and Mrs. Alex. S. Burns of Woodside, N. Y., have now settled their suit against the railroad company for injuries sustained by Mrs. Burns, on terms entirely satisfactory to them. The judgment of the Supreme Court in their favor was affirmed with costs.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

A farmer had a seeder for the sowing of his seed.
'Twas a seeder made of cedar and, said I, "Pray is there need
Of a seeder made of cedar? Said the farmer, "Yes, indeed!
I hev never seed a seeder, sir, that I'd concede the speed
To exceed a cedar seeder for the seedin' of the seed." — *Life.*

Thomas J. Grey was a visitor to New York this week.

In Boston: William E. Sanderson, representing J. M. Thorburn & Co., New York.

A prominent seedsman asserts that from November 1 until the last of February he loses weight steadily under the strain of the mental work of this seemingly dull period.

Otto Katzenstein & Co., Atlanta, Ga., and New York City. A very comprehensive list of American seeds and plants. Notable for scientific accuracy and will prove a very useful reference book for those interested in hardy native plants, shrubs and trees.

Sensible advertising is an investment not an expenditure.

COLD STORAGE

LILY OF THE VALLEY WILL FORCE EASIER and better than the NEWLY IMPORTED STOCK — till the latter has had a thorough freezing. We have both — but recommend the COLD STORAGE VALLEY for forcing for at least a further six weeks.

¶ We are now booking orders in advance, and are prepared to ship on the shortest notice, the best grade of **LILY OF THE VALLEY PIPS**, in any quantity from 100 to 100,000 placed in **Cold Storage** last **December**. ¶ No special treatment required. The pips will flower naturally in three or four weeks in a temperature of 60 to 65 degrees Fahrenheit. Your propagating bench is just the place for them.

Savannah, Ga., Oct. 4, 1904.
Messrs. Clucas & Boddington Co.

Chicago Wholesale Cut Flower Market

For week ending December 13, 1904

There has been a considerable shortage of American Beauty roses for some days past and prices held stiff for anything in the higher grades. A look among the local greenhouses would indicate that Bride and Bridesmaid will be the heaviest cut in roses for the holidays. Uncle John, as seen at Reinberg's, is on in full crop. There is also a good supply of Chatenay. Meteor will be relied upon to fill orders in its color, as Liberty is very scarce. The extra long stemmed American Beauty gives evidence of being in full supply by Christmas, but medium lengths will be scarce. There is an abundance of Lawson in sight among the carnation growers, closely followed by Enchantress. All white varieties are plentiful, and bulbous stock, with the exception of lilies, is beginning to accumulate. This week the price of holly has advanced 25 to 50 cents per crate. There is a big supply of wild smilax in Chicago.

American Beauty, special and fancy, $40 to $50; Nos. 1 and 2, $15 to $25; Bride and Bridesmaid, $6 to $15; Liberty, $4 to $12; other varieties, Chatenay, $4 to $10; Meteor, $3 to $8; Uncle John, $3 to $12. Carnations, Lawson, $3 to $5; Enchantress, $3 to $6. Violets, single, $.75 to $1; double, $.75 to $1.50; special, $1.50. Lilies, very scarce at $20. Callas in light supply at $16. Narcissi and Roman Hyacinths, slow at $2 to $3. Asparagus, $50. Smilax, $12.50 to $16.

St. Louis Wholesale Cut Flower Market

The demand for cut flowers is generally quiet. Stock is fairly plentiful and of good quality. This is true of all classes of roses excepting the higher grades of American Beauty.

St. Louis Wholesale Prices

American Beauty, fancy and special, $35 to $50; inferior grades, $6 to $25. Bride and Bridesmaid, best, $5 to $6; ordinary, $4; Liberty, best, $6 to $8; ordinary, $4 to $5; Golden Gate, Perle and Ivory, best, $5 to $6; ordinary, $4. Carnations, Lawson, $4 to $5; Prosperity, $5; Enchantress, $5 to $6; ordinary varieties, $2 to $3; fancy grades, $4. Violets, single, $.50 to $1; double, $1 to $1.50. Narcissi and Roman Hyacinths, $2.50 to $3. Asparagus plumosa, Strings, $35 to $50; Sprengerii, $1 to $3. Smilax, $15.

HEADQUARTERS FOR

Lily of the Valley Pips

Special quotations will be made on 50,000 and over.

From Cold Storage: HAMBURG 3-YEAR-OLD PIPS (one year in cold storage) $1.25 per 100, $10.00 per 1000.

For Immediate Forcing: HIGH GRADE 3-YEAR-OLD BERLIN PIPS $13.00 per 1000, $31.00 per case (2500).

Large Importation Just Received: HIGHEST GRADE 3-YEAR-OLD BERLIN PIPS $12.00 per 1000; $23.00 per case (2000).

Can arrange to keep in cold storage here if desired.
Send for Our Surplus Bulb List.

JOHNSON & STOKES, 217 & 219 MARKET STREET, **PHILADELPHIA, PA.**

Boston Wholesale Flower Market

Flowers of all kinds are going rather slowly this week, buyers devoting their attention mainly to Christmas greens, all classes of which sell well. Leading all, except holly, is the Southern boxwood which Welch Bros. are making a specialty of and which is called for now in barrel lots by even the country florists. Roses show considerable improvement during the past few days. American Beauty and Edgely are coming in in elegant form. Carnations are abundant, especially the white varieties, which are inclined to accumulate in dealers' hands.

Boston Wholesale Prices to Dealers, in Hundred Lots

As reported Thursday, Dec. 15, 1904

American Beauty, best, $25 to $50; ordinary, $6 to $20; Bride, Bridesmaid, etc., $3 to $16, according to grade. Violets, $.75 to $1. Lily of the valley, $3 to $5. Narcissi and Roman hyacinths, $1 to $2. Lilies, $12.50 to $16. Poinsettias, $25 to $35. Carnations, fancy, $3 to $4; ordinary, $1 to $2. Smilax, $8 to $12.

Louisville, Ky., Wholesale Cut Flower Market

Business conditions were entirely satisfactory through the week, there having been quite a few decorations, using up a lot of surplus stock. Chrysanthemums are about over with. The season has been particularly good for them. Carnations were in good demand, and the quality remained very good; however, the supply is far from being adequate. The local market is furnishing some roses of unusually good quality, and the demand is very good. They are plentiful. Good mignonette can be seen and sells well. Violets are selling very well; the quantity is satisfactory, and the quality usually good. Green goods are a little short, especially smilax.

ASTERS

The Two New Varieties:

Benthey's White

Benthey's Pink

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite asters in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever.

PRICE LIST:

Trade Package, white or pink, $1.00 **1-4 oz. white or pink, $2.50**
1-2 oz., white or pink, . . 4.50 **1 oz., " " " 8.00**

DREER'S DOUBLE PETUNIAS

Have long been known for superior quality; this year's stock is no exception, and we now have a large supply in strong 2 1-4 inch pots, plants which if potted up now will quickly furnish quantities of cuttings. These we offer in fifteen distinct varieties for immediate delivery at 60 cents per dozen; $4.00 per 100; $37.50 per 1000.

SEEDS. — Saved at Riverton, the finest in existence. DOUBLE FRINGED, 75 cts. per 500 seeds; $1.50 per 1000 seeds. SINGLE FRINGED, 50cts. per pkg.

HARDY PLANTS FOR FORCING

We are carrying a large stock of the following, a specially selected grade for forcing

AZALEA MOLLIS

For early and late forcing Azalea Mollis is rapidly gaining favor, easily forced at a minimum cost for heat and labor. They are profitable stock for the retailer to handle. We are supplying at present an unusually fine grade of plants, 15 to 18 inches high and covered with flower buds, $4.50 per dozen; $35.00 per 100.

DEUTZIAS FOR FORCING

Strong two-year-old, field-grown plants suitable for 6-inch pots.

	Per doz.	Per 100
Gracilis Rosea	$1.00	$8.00
Gracilis Lemoinei	1.00	8.00

FORCING LILACS

A fine lot of pot-grown plants, well set with buds and in prime condition for forcing, $6,00 per dozen: $45.00 per 100.

RHODODENDRONS FOR FORCING

These are being used more extensively every season, and this year with Easter at such a very late date should prove especially acceptable, as they can be retarded much easier than Azaleas and at the same time may be flowered at just the right moment at a minimum cost. We are carrying an extra large stock of bushy, well shaped plants 16 to 18 inches high, covered with buds, $9.00 per dozen; $70.00 per 100. Larger plants 20 to 24 inches high, fine specimens, $11 00 per dozen; $90.00 per 100.

NOTE. The prices given above are strictly for the trade, and retail consumers will not be supplied at these prices.

DECORATIVE ART

A wreath of galax leaves can be taken out of the ordinary by a judicious use of foliage. In this case we used the red galax leaves on a crescent frame, Adiantum, Farleyense, begonia leaves, sumac heads, and a variety of ferns.

H. H. Battle,

Hydrocyanic Fumigation

Probably no other factor as potent in the matter of aiding the cultivator in the attaining of the best results has been given him during the past decade, as the cyanide system of killing insect pests.

It is admitted that until within the past few weeks its use was not considered safe by the writer, but the reason is freely given that others may become converted likewise.

When first advocated as an insecticide, it was tried here and condemned as too risky to the operator, and equally so to the plants, but at that time it was not figured out properly *how little* would do the work, and it was used too strong, with dire results.

Now, however, it is found that 1 ounce of the cyanide to 1,000 cubic feet is sufficient to kill all insect pests and also the lowly toad that creeps under the benches — in fact, everything that breathes.

One would think when trying to sponge off scale insects from palms, orchids or crotons that they had no vulnerable point, but there must be a breathing place, for all are easily killed at the first application of the gas. Mealy bugs also are killed, but their eggs survive, and a new crop will follow that needs another dose when hatched out.

The only plant that has been injured thus far is tradescantia that grows under the benches. This plant seems very tender and easily injured; a few other subjects were also, but this was due to their being directly exposed to the steam of the acid when hot. This, it appears, should always be guarded against.

In using hydrocyanic gas in winter it is of course impossible to air the house in the morning before going into it, owing to the cold weather. This is

avoided by using the gas at a lower strength, at dark, and by morning it is safe to go in the house. It is possible, however, that in summer time when all plants are in active growth, injury may follow after being exposed to it for so long. This we have yet to prove, but it will be an easy matter then to ventilate.

It is said that one inhalation of hydrocyanic gas injures the lungs so that they never recover from it. This will bear remembering, for it is unfortunately too true that familiarity often engenders carelessness. The operation should always be performed by some responsible person, the house itself secured against any other entering accidentally, and if the acid and cyanide be kept out of the reach of the irresponsible, no harm can follow, and it appears at present writing that an agent is at hand that will make mealy bugs and all other insect pests little to be feared.

If we only could discover a factor equally effectual for the treatment of plant diseases, there would not be much money in the florist's business.

E. O. Orpet.

A New Hardy Grape

The accompanying photograph is of a new hybrid grape, that has so many good qualities that I believe that many of the readers of HORTICULTURE may be interested in its history. The cluster from which the photograph was taken was fourteen inches long; the vine that bore the cluster is one of a group or family produced by combining the following species, viz., Vitis labrusca (our native Fox grape), V. vulpina (our native Frost grape), V. rupestris (a native of Texas and Indian Territory), V. lincecumii (also from Texas and Indian Territory), and V. vinifera (the European, or hothouse grape); combining in its makeup, the best two northern grapes with the best two southern and one of the hardiest and earliest of the European (the White Frontignan). The vines produced from the above combination are named or designated as the Five Nations Group, and the subject of this article is No. 6 of that Group. It is of fine quality, hardy, prolific, and exceedingly vigorous. It is a noteworthy fact that the blood of the southern grapes seems to add vigor and healthfulness to the offspring of the combination, making of them vines that should be successfully grown over a large extent of territory.

R. B. White

Mr. White has no vines for sale.

Rochford's Market Cucumber

Although I grow Rochford Market, Telegraph, and Duke of Edinburgh, and especially like the old Telegraph as it makes the finest specimens for exhibition purposes, yet my favorite is Rochford's, as it will stand two or three degrees cooler treatment, bears longer, and is the best cropper of the English varieties I have tried.

I sow the seeds in 2½-inch pots. When they are ready for planting out, I plant in mounds two feet apart and, as the roots spread, gradually add more soil; when they are strong enough I give a top dressing of cow manure. The best top dressing I have tried is the sun-dried cow droppings you can get where the cow grazes, broken up into 1 and 2-inch pieces. After the roots get all through it, give a watering with liquid cow manure once a week; if the roots show much on the surface, give them a little sprinkling of soil; keep up a moist temperature 65 to 70 degrees at night, and 70 to 80 degrees in the day.

THREE COMMERCIAL WINNERS

Adelia Madonna Majestic

J. Breitmeyer & Sons are much pleased with the demand that they find for their two new commercial white chrysanthemums, Adelia and Majestic, illustrations of which are herewith presented. Madonna is a handsome pink one. These are all mid-season varieties and are decidedly in the profitable commercial class.

Destruction of Enfield Hall

The news of the destruction of Enfield Hall, Staffordshire, Eng., by fire November 26, will be noted with regret not only by the many graduates from the gardens of that fine estate who are now located in this country, but by lovers of the beautiful in architecture and landscape everywhere. The fire completely gutted the castle and lasted some eight or nine hours. Only a small remnant of the priceless collection of furniture, pictures, and historical relics was saved. Edwin Lonsdale, Stephen Taplin, John Savage, John Burton, John Thatcher, William Thatcher, and many others we do not recall for the moment, are among those graduates of this historical estate who have achieved distinction in this country.

A Practical Help

We hope you will like HORTICULTURE and recommend it to your friends in the trade. Send in their subscription now to insure complete file from first number. We want to see on the list of subscribers every one identified with any horticultural industry. We draw no lines, but *invite you all* to help by your subscriptions, your contributions, and your approving words to make HORTICULTURE the best known and the best liked professional journal in our country. Next Comes Ye Editor

Subscriptions for the coming year have already been received from a multitude of readers who take this practical way of showing their approval of HORTICULTURE. We would like to hear in like manner from as many more before the new year begins. *Do it now.*

Parties mailing communications to HORTICULTURE are respectfully requested to be careful to give the correct address, 11 Hamilton PLACE. The receipt of several important communications has been delayed through their being incorrectly addressed to Hamilton Street, which is in an outlying district of Boston.

Those two scourges, the gypsy and brown-tail moths, although as yet mainly local in Massachusetts, are being multiplied and disseminated so rapidly notwithstanding all efforts at repression, that it is only a question of a short time before they will reach localities far remote from the section now afflicted. Federal money only will avert widespread disaster. The bills introduced by Congressman Roberts should have been promptly passed, and all efforts directed against the spread of the pest by public-spirited men and scientists should have enthusiastic support from every individual and organization. Write to your congressman and the senators of your State, urging them to take an interest in this all-important subject and to use their influence for the passage of repressive measures. The longer decisive action is deferred, the heavier must the sacrifice be. The problem is vastly more important than any that this country has had to face in many years.

The annually recurring complaint about carnations "going to sleep" is again heard. This is a phase of the carnation's status, of infinitely greater importance at the present time than the question of size, length of stem, or any of the other points that go to mark progress in carnation development Growers seem all at sea on this subject, notwithstanding earnest efforts to reach an explanation of the peculiarity which, although unquestionably more pronounced in some varieties than others, yet appears to affect most varieties to a greater or less degree, with all growers some of the time and with some growers all of the time. While a common cause cannot be found thus far, it will be generally acknowledged that excessive feeding for the purpose of promoting rank growth and size, permitting flowers to remain on the plant after being fully developed, shipping directly after picking, or storing the flowers where they will be exposed to extremes of temperature, draughts or vitiated air may at any time send a carnation to the place where there is no awakening. Still it is a problem and one that must be solved or the improved carnation will suffer a serious loss of prestige.

The decided advancement in recent years in the quality of cut flowers grown for the wholesale markets is doing much to fix the attention of the public on the cut flower as something they cannot dispense with. The Lawson carnations, American Beauty roses and Rhinebeck violets of to-day are the bulwarks of the cut flower trade against the onward progress of the plantsman's tempting product. The Robert Craigs, Richmonds, and Wellesleys of to-morrow can be depended upon to maintain the prestige already won. Just here we think is the salvation of the cut flower industry from the ignominy that had well-nigh overwhelmed it through the reckless disregard of the honor of their profession and the rights of the public, by short-sighted growers who would coerce the out-of-town florist and his customers into buying, at outrageous prices, holiday flowers that had been held up for days or even weeks. It was perfectly natural that the public should protest and, when the plant grower, with commendable wisdom, came forward with attractive material at stable values, turn its favor in his direction. The plantsmen have never betrayed this confidence. Each year sees their product improved in quality, enlarged in variety, and consequently appealing more strongly to the flower-loving people. The holiday plant cannot be dislodged and it should not. It has come to stay. But it is certainly refreshing to those who have watched the career of the cut flower industry and deeply regretted the folly of so many of its followers, to note the change that has come about and the splendid recuperative resources displayed. The extinction of the "salter," the enterprise of the hybridizer and the consequent awakened interest of the retail dealer and the public are opening up a future full of promise for the flower grower.

What Ye Neighbors Say

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

Your paper is almost the expression of what my ideal has been for years. If you keep it up you are a winner. — B.

Discontinue our ad. for thermometers after this week's edition. Entirely sold out and unable to procure more.

Yours respectfully,
WM. ELLIOTT & SONS.

Allow me to congratulate you on the first issue of HORTICULTURE. The style, the arrangements of the advertisements, and the press work are far superior to the other three Florist papers. — J. D. T.

Let me congratulate you on the appearance of HORTICULTURE, your new enterprise. I like the lines upon which it is laid, its height, and its breadth, and its general prosperous appearance. May its aspirations always be to elevate is the sincere wish of E. L.

Accept my congratulations on your most attractive paper. The achievements possible to workers in the field of horticulture are only limited by their application of intelligent activity.

For such workers, and for journals like HORTICULTURE, there is always plenty of room at the top. — H. H. G.

Yours truly,
T. ROLAND.

After Ye Adjournment

Ralph M. Ward & Co.'s calendar for 1905 now adorns our office wall. It is a stunner and eclipses anything in the American Beauty line that we have seen for many a day. The Western contemporary of "fetching" title-page fame, is completely out-classed.

We should like to know more of that "rose that will not fade," said to have been "propagated" by Luther Burbank. What a boon it would be to the chronic "salters." Store up all the roses cut for a whole year! How the wicked retailers would have to shell out! And how the Christmas price would soar, to be sure! The "Wizard" of horticulture will now have steadfast friends where he had none before.

Prosperity is in full swing, beyond a doubt, among the retail flower people, or at least that large section of the trade supplied by Messrs. Bayersdorfer & Co., with the material demanded now-a-days by an artistic and luxury-loving public. We are informed by Messrs. Bayersdorfer & Co., that never before have they experienced so overwhelming a call for Holiday goods. We are glad to hear it, for this firm is a liberal advertiser in HORTICULTURE. Why shouldn't they be prosperous?

Wholesale Prices and Trade Prices

George C. Watson has received the following communication from Thomas Meehan & Sons.

Dear Sir: We are glad to have seen and read your article in the December 10th issue of HORTICULTURE, on the subject of wholesaling stock to the consumer. As we understand your attitude on the question, we think it a very proper one. There is no question in our mind, it is not right to supply the persons indicated in your notes with goods at trade prices. The dealer or the grower who purchases to complete his orders has a right to expect some difference between the prices he pays the grower and the current retail prices.

We do feel that buyers of a quantity of stock should be given some consideration, and in our business dealings we freely offer what might be properly termed wholesale prices to large buyers. Note that we make a distinction between wholesale prices and trade prices. In fact, we think we were the first nurserymen who printed a catalogue giving wholesale prices. While they are wholesale, they are not trade, and the one in the trade can secure stock from us, with perhaps two or three exceptions, at less than the wholesale prices in our retail catalogue, which protects him and at the same time gives considerable advantage to the large buyer.

As to a person's moral right to sell at whatever prices he chooses to make, we raise no question, — not because we have no opinion, but because there is a good business policy that is applicable without going deeper. Any good business house will not completely overlook the dealer who really does considerable to develop trade. He is an important factor in the dissemination of stock, and is entitled to consideration. It is an easy matter for nurserymen to maintain such a system of pricing if they choose, and it is simply the desire on the part of some to grab all they can without loss of time that induces the practice of reckless price cutting.

We believe in occasional bargains and these are cut prices. Sometimes they are heavy cuts, but they are on special things only and for a limited time. Our general system of pricing is as firm as it can be. We have many times lost good orders because the prospective purchaser could not cajole us into disregarding those good business rules; but we have the satisfaction of knowing that our customers, as a whole, place confidence in our system of pricing and know that they are not paying more than others in their class do.

We hope to see the subject further discussed and that the best business systems will be put forward and will prevail.

Yours very truly,
THOMAS MEEHAN & SONS, Inc.
S. MENDELSON MEEHAN,
Vice-Pres.

A movement has been started in Eastern Massachusetts to raise by subscription a fund of $60,000 to be used in fighting the gypsy moth pest. It is planned to spend most of the money in the search for and securing a parasite that will keep the moth in pest.

Plantsmen's Topics

Prepare for blizzards.

"By the work one knows the workman."

Clean flower pots bespeak the well-trained gardener.

Watch out for red spider on the azalias. Keep the hose handy.

Read the advertisements in this paper carefully each week. There are some novelties of rare merit advertised now or about to be.

News of the arrival of Mr. James Farquhar at Porto Rico, has been received. Mr. Farquhar will stay there a good portion of the winter.

Otto Strassenburg, who has been with W. W. Edgar at Waverley, Mass., for the past year, has resigned and gone to Florida for the benefit of his health.

A GARDENER EXONERATED

Philadelphia, Dec. 17. Alphonse Pericat of Philadelphia has been adjudged not guilty of the charges brought against him of stealing pipe, orchids, hybridizing records, etc., by his late employer, George B. Wilson. This verdict is hailed with great satisfaction by Mr. Pericat's many friends in the trade who have from the first believed that the charges were unfounded, and to the unprejudiced observer smacked largely of persecution. Let us give thanks that there is still some justice in our courts even though the defendant be a poor man and the prosecutor a rich one.

G. C. W.

DRACÆNAS MASSANGEANA AND LINDENII

These two varieties are invaluable for general decorative work. In the private collection they have a grace and beauty which always attracts admiration. They can be grown not only in stove temperature but in the palm or intermediate house with equal success, and will maintain their foliage for years. I have some specimens that I planted in the center of a palm bed twelve years ago and they still retain some of the old foliage. I get three and four crops of cuttings a year from them. There are not many plants that can so well stand the hardships of indoor decoration and they are especially useful to fill up places where palms would be too spreading. I have put them into the dwelling-house in November and taken them out in April in good condition.

There is no dracæna more easily propagated than these two subjects. They do not lose their bottom leaves when potted from the cutting bed, as most varieties do. They do not require to be exposed to the sun at any time and if given plenty of shade and moisture, will at all seasons be an ornament in the greenhouse or dwelling.

JAMES WHEELER.

Money invested in wise advertising is well invested. HORTICULTURE advertising is always wise.

FERNS

A PAPER READ BY DAVID LUMSDEN BEFORE THE GARDENERS' AND FLORISTS' CLUB OF BOSTON

I know of no class of plants, taken the year round, which give us so much pleasure and real enjoyment as ferns. Where can we find any plant that will excel or even equal the fern in grace, beauty, and utility?

Ferns are now in greater demand than ever before, not only for greenhouse cultivation, dwelling-house adornment, ferneries, and other decorative purposes, but also for use with other flowering and decorative plants, making many excellent combinations. Persons in every station of life are taking a great interest in ferns, and are desirous of cultivating them. What gardener or florist have we present among us this evening that has not been called upon repeatedly to answer questions, such as "What is the best kind of a fern I can get to live in my house? I have steam heat (or furnace heat as the case may be) and we want a fern that will grow. What variety can you recommend? What is the proper way to treat them?" It is very true they are flowerless plants, nevertheless they are, I may say, everybody's favorite; in fact, through the whole of my experience in Europe as well as in America I have met no one who is not a fern-lover.

Ferns have a very wide geographical distribution and are found in almost every part of the world. They range from the tropics, where they are found in greatest profusion, to the arctic region as far north as Greenland. In some places they are found at the sea level, in other places they attain an altitude of several thousand feet. Some will grow only in hot climates, others only in cold, and in their native haunts you find some growing in a dense shade, while others stand the scorching rays of a tropical sun. We find them growing by the side of winding streams, in dense shady glens, others revelling in crevices of rocks when we would think it impossible for them to get sufficient nourishment to exist, and some are small, their fronds being scarce one-half inch in length, while others (tree ferns) attain a height of fifty feet. Thus, among ferns we find every conceivable kind of growth, and a great diversity of habits and requirements, yet, notwithstanding all this, no other plants are so easily managed in cultivation.

While it is considered necessary to have a knowledge of the various species in order to excel in their cultivation, yet the whole family can be satisfactorily cultivated by careful attention to a few rules. First, as to the right kind of a soil to use; second, the temperature to be maintained winter and summer; third, a moist atmosphere free from drafts; fourth, abundance of light and at the same time protection from the scorching rays of the sun during the summer months.

We find most tropical ferns are evergreen, that is to say, they retain their foliage until new foliage is produced the following season, and some varieties retain their foliage for a number of years. Very few of the tropical varieties are deciduous, while amongst the species from colder climates we find the deciduous varieties predominate. A great mistake made by the novice is, when ferns have lost their foliage, placing them on their sides or away in some corner of the greenhouse unseen and forgotten, where they are left for weeks without water. The chances are the roots are injured, and if the plants are not killed outright, it is impossible for them to make such vigorous growths the following season as they would if they had been kept continually damp. Those that have lost their foliage must be supplied with sufficient water to keep them moist while resting.

The right kind of soil to use for fern cultivation is fibrous loam, and to obtain it grass sods should be taken from the field, stacked up grass-side down, layer upon layer, and left to remain a year or longer. By that time the roots of the grass will be dead. Care should be taken in cutting the sods from the field that they are about three or not more than four inches deep, as the fibrous part of the loam is the portion we require. Leaf mould made from

leaves collected during the fall and allowed to lie in large heaps for a season or two, until entirely decomposed, or collected from the woods, where the leaves fall annually and decay, forming nature's fern garden, is an excellent material.

At one time the idea was prevalent that ferns could not be grown without peat in the compost. By experience we find that this is erroneous. The great value of leaf mould is acknowledged by our leading growers. Clean, sharp river sand should be used to keep the compost open, and admit the passage of the surplus water freely through the soil. Charcoal, broken small, is very valuable, and can be freely mixed with the compost for some varieties of ferns. It is also a valuable agency placed on the tops of the crocks, as it tends to insure good drainage and keep the soil pure. A great many persons have the mistaken idea ferns need a dense shade to grow in. Most ferns like abundance of light, and our fern ranges are better from the beginning of November to the early part of March without any shade.

There are various methods of propagating ferns, some being propagated from tubers on the roots, some from bulbils formed on the rhizomes, and some from spores, the latter being certainly the most interesting process. The spores vary in the different species. In some species we find them arranged along the edge of the frond, in others spread all over the surface, and in others they form large patches on certain parts of the frond. Some of the clusters are covered with what we would call a very thin membrane, which gradually lifts as the spores ripen, and oftentimes shrivels or falls off. In some species the spores are not covered at all, being a pale green in their infancy, and as they advance to maturity becoming some brown, some black, others green, according to the species. When the covering shows signs of beginning to lift, it is an indication that the spore is almost ripe. The fronds bearing the spores can then be gathered, wrapped in paper and hung up to dry in any warm, dry place where there is no danger of water reaching them. In the course of a few days when they are sufficiently dry, they are taken and rubbed through a very fine wire sieve, to remove the frond and a portion of the chaff. They are then ready for sowing.

After experimenting in various ways with the sowing of spores I find the most satisfactory results are obtained by using pots of, say, 5 or 6 inches in diameter. They should be filled to within one inch of the top with drainage consisting of small crocks, cinders or charcoal. The pot is then ready to receive the soil, which must be loam (to which no manure has been added) screened fine and thoroughly sterilized either by baking over a fire or by the use of steam until all forms of vegetable and insect life have been destroyed. After filling the pots with the compost, be careful to make the surface perfectly level, then water them thoroughly and allow them to stand an hour or so. They are now ready to receive the spores. Care must be used when sowing to select a place free from drafts, as the spores being so fine, the least breeze will scatter them in every direction, and disappointment will result.

After sowing, the pots should be put in a shady place in the greenhouse and covered with glass. This glass covering should be kept on continually to prevent other spores getting in and to maintain a humid atmosphere. A dry atmosphere is detrimental to germination. The pots should stand in saucers containing water which will rise up and keep the compost moist. If any of the pots are found to be drying out, they must by no means be watered overhead, which would disturb and wash the spores out of their places, but placed in a pail of water, until it has soaked up and saturated the whole compost. It is an old axiom in human life that "cleanliness is next to godliness;" in plant life this is equally true, especially among seedling ferns, for they readily rebel under unclean conditions.

The warm or exotic ferns germinate best in a temperature of say about 65°. The cooler or hardy ferns will germinate in a much lower temperature. The first sign of growth appears in a faint coloring of green on the soil which will rapidly spread over the whole surface. At first indication of the spores making tiny fronds they should be separated in small patches and planted in other pots or flats containing fern compost. Overhead watering may now be indulged in, but use a very fine rose on your watering pot, also keep under glass for a time longer and give more light. They will soon need dividing again, and presently when large enough to handle they may be placed in 2 or 2½ inch pots. There is mystery attached to raising ferns from spores, and it is no uncommon occurrence for a kind to appear which is totally different from the one which has been sown. Also, despite the utmost care in collecting and saving spores, several kinds may appear in the same pot. It is reasonable to assume that the spores in the fern house are being constantly wafted by currents of air, and readily attach themselves to fronds of other species, and of course mixed plants must result.

As I have previously stated, there is an increasing demand for ferns in this country, especially in varieties suitable for jardiniere work. In fact, the demand is far in excess of the supply, although I may say millions of ferns are raised annually throughout the country. We find our old favorite, Nephrolepis. Bostoniensis, still in great demand, and the new and beautiful variety "Piersoni Elegantissima" or Ornamental Boston Fern, also Nephrolepis Scottii, a wonderfully dense and compact growing variety, making an excellent house plant, and a beautiful centerpiece for a table when grown in the shallow pan pots. In my humble opinion this excellent fern has a great future before it.

I shall now enumerate a few varieties of ferns suitable for filling jardinieres. The pteris family is for such work indispensable. Among the best are P. adiantoides, a deep green and glossy fern, P. argyrea, a showy green and white variety, native of the East Indies, P. cretica and its varieties albo lineata and magnifica, together with the showy variety Mayii, P. serrulata and its varieties cristata, cristata compacta and densa, all natives of the tropics, and P. tremula from New Zealand, a quick grower which makes a nice pot plant, together with the crested variety Smithiana. Aspidium Tsussimense, a Japanese fern commonly known in this city as "Tensemense," is a general favorite on account of its good keeping qualities, but is somewhat slow of growth.

Crytomium falcatum, the "Holly Fern" of Japan, is always in demand, Lastrea opaca and chrysoloba, the former from China and the latter from Brazil. Polystichum (lastrea) aristatum variegata, a dense green fern with yellow stripes on the fronds and Onychium Japonicum or "Parsley Fern," both of Japanese origin, Pteris Chinensis and Polystichum coriaceum, a South African fern when well grown will make a nice specimen, are all among the best. Cibotium (Dicksonia) Schiedei, a beautiful graceful fern much in demand by the leading decorators throughout the country, makes a good house plant; stock is always scarce and difficult to obtain. Sitolobium (Dennstædtia) cicutarea tenera is very showy, native of tropical America.

In adiantums we have first to mention Adiantums cuneatum, decorum and gracillimum, the latter in demand on account of its light and graceful appearance; also Adiantum Croweanum, the new maiden-hair which, owing to its strong vigorous growth and long stems, will become a general favorite with the trade, where marketing the fronds is a feature, as well as in private places where cut maiden-hair is always used. Adiantum Farleyense, the queen of the maiden-hair family, a native of the West Indies, is now grown in quantities by the trade, both as a pot plant or for cut fronds whenever first-class decoration is a feature.

Alsophilla Australis, a fern frequently asked for and very desirable on account of its stately appearance, and Dicksonia antarctica, are both Australian ferns. The davallias are an interesting family. The variety bullata or "Squirrel's Foot Fern," is sold in large quantities made up in fern balls and various other shapes as received from Japan. The variety Canariensis makes a nice pot fern and readily develops into a nice specimen, as do also the varieties Figiensis, plumosa, and majus. Platyceriums or Stag-horn Ferns are always interesting on account of their curiously shaped fronds, resembling stag horns. The variety Alcicorne majus is a free-growing variety and P. Grande is also a fine variety, but somewhat scarce.

In taking a survey of the ferns I have mentioned, we find we owe much to Japan, as a great many of our most beautiful species are natives of that country. There are thousands of other varieties of most beautiful ferns that time will not permit me to talk about, but the varieties mentioned in my paper are the most popular from a commercial point of view. Let us each do our own part to make them still more and more interesting to fern-lovers so that we may all say with Twamley:

"The green and graceful fern,
How beautiful it is;
There is not a leaf in all the land
So wonderful, I wis.

"Have ye 'eer watched it budding
With each stem and leaf wrapt small,
Coiled up within each other
Like a round and hairy ball?

"Have ye watched that ball unfolding
Each closely nestling curl?
Its fair and feathery leaflets
Their spreading forms unfurl?

"O, then most gracefully they wave
In the forest like a sea,
And dear as they are beautiful
Are these fern leaves to me."

OUTDOOR ART AND CRAFT

CHICAGO, ILL. — Every schoolboy on the South Side will be a horticulturist now. The South Park Improvement Association has decided to give the boy or girl who can bring proof of having caused the greater number of trees to be planted from now until November 1, 1905, a cash prize of $50. To the two next successful tree planters, prizes of $30 and $10 will be given. — *Chicago Inter-Ocean*, Nov. 17, 1904.

NEW YORK, N. Y. — A small park of perhaps 25 or 30 acres at the north shore on Little Neck Bay, adjoining Fort Totten, would secure for the people of New York one of the most commanding natural situations in the greater city, and the finest point of view on Long Island. Suitable land for a park can now be secured free of costly improvements and with varied topography, from the high points on the bluff down to the water of the Sound, thus combining land and water views from a small area. This location will soon be accessible by the trolly from Whitestone, now extended to within about half a mile of the property. It is estimated that this land should be secured for from two to three thousand dollars per acre. — *Brooklyn Eagle*, Nov. 13, 1904.

LOS ANGELES, CAL. — One of the features of the report which the Committee on Shade Tree Investigation will likely make next week to the Board of Trade, will be the recommendation that live oaks be planted along the streets, and another feature will be the exoneration of the pepper tree, which has come into disfavor on account of its breeding black scale to a great extent. The committee, consisting of T. P. Lukens, T. J. Ashby and W. A. Butterworth, has made exhaustive research into the kinds of trees that are suitable for lining public thoroughfares. They expect to get out an illustrated circular, listing the different kinds of trees and telling where they grow best, respectively. — *Los Angeles Times*, Nov. 14, 1904.

SAN FRANCISCO, CAL. — The association for the Improvement and Adornment of San Francisco has renewed its efforts for the carrying out of its plans which include, primarily, the establishment of a high standard in the architecture of our municipal buildings, the creation of a civic center, the acquisition of more parks, connected by parkways, an insistence upon æsthetic possibilities of railway lines and the removal of telegraph poles and billboards and other hideous advertisement signs which now deface the public thoroughfares. Secondarily the association's efforts are being directed towards the encouragement of the decoration of houses to conceal architectural defects, such as the cultivation of vines and window box and balcony gardens. The association is inviting the coöperation of a larger membership. — *San Francisco Chronicle*, Nov. 15, 1904.

PHILADELPHIA, PA. — On the farm of Irwin H. Schantz, who lives near Spinnerstown, Bucks County, stands a mammoth chestnut tree, one that eclipses all the rest of the giant chestnut trees in the Keystone state. Two feet above the ground the circumference of the trunk of this tree measures exactly thirty-six feet. The tree's height is sixty feet, and ten feet from the ground are two branches, one to the left and the other to the right, and the circumference of the former is eight feet and the latter nine feet, two inches. Ten feet above the ground its great branches extend, one of them is six feet, 4 inches in circumference, each of the others a few feet less. Its boughs spread nearly ninety feet. The age of the tree is known to be at least 221 years, from tales told by ancestors of the proprietors of the property on which the tree stands. With luxuriant foliage like that of a young tree, the monster chestnut still bears abundant crops. — *Hartford Times*, Nov. 25, 1904.

SACRAMENTO, CAL. — At the foot of Mt. Tamalpias, and within easy reach of San Francisco, lies Redwood canyon, one of the most beautiful spots of California. The canyon is not large, does not contain in all more than 600 acres, but 400 of these are covered with magnificent redwood trees, giant ferns, and the beautiful undergrowth peculiar to California forests. That such a natural garden could exist unmarred by woodman's axe within an hour's ride of San Francisco has long been one of the most remarkable things about it. But for half a century it has remained undisturbed one of San Francisco's most popular outing places, until San Franciscans have grown to regard it as their own, and unthinkable that the suggestion to cut down the canyon's trees would ever be seriously entertained. But the canyon is private and not public property; the trees have a commercial value. It is announced that the property is for sale, and that certain individuals who run largely to commercial instinct are "figuring" on the amount of lumber and wood that can be gotten from it. It is said that the entire canyon trees, wild flowers, ferns and picnic grounds can be purchased for $80,000. As has been said, the canyon is within an hour's ride of San Francisco; once the ferry is crossed, it is an easy walk to the grove. The State has purchased the Great Basin of the Santa Cruz mountains for a State Park; Los Angeles has numerous tracts lying outside of the city limits, one of them, at least, containing 3,000 acres, which are used or being prepared for park purposes; San Jose has a beautiful natural park at Alum Rock, several miles outside the city limits. There are plenty of precedents to govern San Francisco in acquiring the Redwood Canyon property, and if the purchase be made, the city will have one of the most beautiful natural parks in the world. — *Sacramento Union*, Nov. 15, 1904.

NEW YORK, N. Y. — The city of New York is permitting rapid deterioration in the value of one of its assets which cannot be replaced — the trees in the parks and public places. The reason for this is that there is no organized public opinion behind the effort to those who are doing all in their power to save them. We have societies for all sorts of purposes, but not for this purpose. The Tree Planting Association comes the nearest to taking an interest in this matter, but its energies are largely wasted in trying to persuade people who do not want trees in front of their houses to plant them where the chance of their growing is scarcely better than would attend the growing of an orange crop in Maine. To make a small hole in a stone sidewalk, plant a tree whose roots can find nothing more nutritious than illuminating gas, and expect to have it become a neighborhood ornament and promote the health and happiness of coming generations of citizens, suggests the innocent but futile play of children who are "making believe." Meanwhile, for lack of such coöperation as the members of this association could give and which none could give as well, the official guardians of our public trees are powerless to do for them what their exigent needs demand. A study of the trees in any of the parks of New York will show a condition of neglect which threatens in a very few years to convert these pleasure grounds into waste places. This is as true of the grass as of the trees, with the essential difference that the grass may be more easily and quickly replaced and the consequences of neglecting it are for that reason less serious. Prospect Park contains many sad examples of fine trees left to die from neglect; but the field is much too large to be covered in one descriptive article and it is unnecessary to look outside of Central Park for as many examples of destructive cruelty to beautiful trees as the reader who may be willing to take an interest in the subject can profitably study. A large proportion of the trees in Central Park show signs of deterioration and in many cases are rapidly dying from lack of proper nutrition. The first and surest indication of this is found in the sparse foliage, less readily recognized now than it might have been two months ago. This may mean weakness which comes from great age, in which case a tree requires extra nutrition to stimulate its failing vitality; but it is more likely to mean poverty of the soil if it has received little or no attention for a long time, though the more necessary in the case of trees that have to struggle against the disadvantage of a vitiated atmosphere more or less charged with sulphur from coal and the acid fumes of a thousand industries. What should be done for these trees? Samuel Parsons, landscape architect for the department, answers this question by an illustration. On the west side of the Mall, near the bronze eagler, is an English oak, presented by the Prince of Wales, now King Edward VII. Like the other trees in the Park, it was neglected and two years ago it was in a forlorn condition and appeared to be as near death as any tree which still lives. Its scanty foliage turned yellow in midsummer and fell off, and it was infested with insects. To the depth of twelve or fifteen inches, which was as deep as it was possible to go without danger of injuring the roots, the surface soil was removed over an area about thirty feet in diameter. For it was substituted a rich compost of two parts good mold and two parts stable manure. The tree was then syringed for the purpose of destroying the insects which infested it. The effect was magical. Within a fortnight the tree re-leaved, it took on the appearance of

vigorous health, and is now in excellent condition. During the past year it has been possible to treat in this way some twenty of the most important trees in the Park, with results the same as those noted in the Prince of Wales oak. The interests of the city demand that not less than $50,000 be spent in 1905 for this purpose alone. Very little of this would be devoted to tree doctoring, but practically all of it should be used to provide fresh and fertile top soil and compost, and the work, so far as areas immediately about the trees are concerned, will amount to resurfing Central Park. — *New York Times*, Nov. 20, 1904.

A bill has been introduced in the national senate by Senator Gallinger for the purchase of a national forest reserve in the White Mountains of New Hampshire. This effort to save what is left of these noble forests comes none too soon, and it is to be hoped that the bill will be promptly passed and become a law. To this end our readers are urgently requested to communicate with their respective congressmen and do what they can through this and other means to impress upon Congress the fact that this great movement has the support of the people all over this country. The American Civic Association has taken up actively the work of agitation and the Appalachian Mountain Club, in reiterating its former prayer for favorable action on the bill relative to the proposed reservation in the Southern Alleghanies, now couples with it the request for prompt consideration on the White Mountain project.

HORTICULTURE

Two Useful Hardy Roses

The accompanying illustrations show the manner in which the borders of roads and paths are treated generally throughout Boston's park system. Shrubbery, mostly of native species, is planted in an irregular grouping along the edges and allowed to wander almost at will, thus tending to soften the too often hard lines of paths and drives.

It will be noticed in our illustration that the Michigan rose (Rosa setigera) has grown down into and beyond the gutter. The same softening effect is produced on the path side of the border, the planting illustrated being simply that of a strip separating a walk from a driveway, on the parkway connecting the Arnold Arboretum and Franklin Park.

The second illustration shows the Japanese rose (Rosa multiflora) bordering a bridle-path, just within the entrance of Franklin Park.

The program of the seventh annual meeting of the Maryland State Horticultural Society has been received. The meeting will be held in the Maryland agricultural college, College Park, Md., on Wednesday and Thursday, December 28 and 29. The subjects proposed for discussion are interesting, and a number of prominent gentlemen, including Hon. James Wilson, Secretary of Agriculture, are to make addresses. J. B. S. Norton, College Park, is secretary of the society.

Random Notes Abroad

[No. 2]

One of the most striking and meritorious hardy border plants that came within my observation while abroad, meritorious for cutting purposes as well as for the bold show it made in the hardy border, especially when massed in large clumps, was Chrysanthemum leucanthemum maximum, a name sufficiently long to assure the purchaser of his money's worth, if a name goes for anything. As if the above name wasn't long enough to describe the merits of this really good thing, an additional prefix of *superba* was tacked to a variety of the type, and which is evidently a superior selection of the former inasmuch that the flowers are considerably larger and the plant seemingly stronger. The above plant is a close relative of our "Shasta daisy," which it very much resembles in many respects; if I remember aright, the former being one of the parents of the Shasta daisy, but far superior to it as I have seen it grow and flower in Great Britain, the flowers being in many instances nearly five inches across, with correspondingly long stems. It certainly was, as seen in large clumps, a striking and conspicuous object, producing its large white flowers in abundance for a number of weeks at a time; and unlike the Shasta daisy, as I have experienced on this side the Atlantic, its flowers didn't seem to be affected in the least, or but very little, with the almost incessant rains that prevailed at the time when I saw it.

Though the Shasta daisy is prolific enough in producing its flowers, the trouble is, as I have experienced it, that it is supersensitive to moisture in the air, the flowers becoming rusty, and spotting readily with the least moisture, making it difficult to gather a bunch of perfect flowers from a large number of plants at any one time. In the beginning of November I came across an exceedingly pretty, if not gorgeous, piece of Clematis Jackmanii that covered a large portion of the front walls of a wayside inn, "Achilty Inn" in Ross-shire. The size of the flowers and the wealth of same in a given space I have never seen equalled. It was a perfect sheet of massive blue flowers, covering from view leaves and wall alike.

Beyond the clematis in the same border and against the same wall, a plant of Gloire de Dijon rose was planted. It also claimed a goodly portion of the wall disputing the right of the clematis by insinuating some of its lateral branches through the other vine. It also flowered in abundance and made a splendid show, the portion that encroached on the clematis being particularly charming, as its creamy-white flowers arose a few inches above the solid curtain of blue made by the other flowers.

Beholding such fine floral displays as those produced apparently with the minimum of care, a person cannot help regretting that the same subjects couldn't be made more amenable to our climate and conditions.

Speaking of vines and creepers for wall covering in general, one of the most charming of them all in the writer's opinion, and as seen grown in the British Isles, was "Cotoneaster Simonsii." It is elegant at all seasons, with its small evergreen bay-wood-like leaves. In the early fall and winter it is covered with a profusion of coral-

red berries that give it a singular charm. As seen trained up against the pretty cottages at the mineral watering resort — Strathpeffer — and other places, it formed a dense mat not unlike Ficus radicans in density and literally covered with berries. In another place and not so far distant from the above, I have seen it used as a canopy over a retaining wall, where it formed a thick, but comparatively low hedge, completely covering the top of the wall and draping its face with its drooping branchlets, producing a continuous curtain of dark green foliage, abundantly bedecked with coral-red berries, furnishing a picture of rare elegance, and to me novel, as I haven't seen it used in this fashion before.

In favorable and mild winters it is hardy here. In sheltered localities near the sea-shore, where the inland colds and harsh winds are somewhat moderated by the influence of the salt water, it ought to do well. It is certainly worthy of a trial.

One of the many pleasing, and most cheerful features from a floricultural standpoint, yea, and a soul-elevating standpoint, is the frequency with which window-gardening, so-called, is met with in the British Isles, as well as other European countries.

It is regrettable that there is so little attention paid to this branch of gardening on our side the Atlantic; there being plenty of material suitable for the purpose, looking at it from our climatic constitutions and environments, that would produce equally as fine and pleasing displays as our friends across the seas can accomplish, provided our Yankee proclivities take a hold.

Some of the prettiest plants used for the above window gardening on the other side, are the lobelias in variety, but in particular Crystal-Palace - Gem which has but few rivals as a frontal row in a window-box; occupying that position as it invariably did in the many fine displays observed, the effect was charming beyond words, and will ever remain vivid in my memory.

It was somewhat tantalizing to a New Englander to notice the frequency with which one of the noblest trees of his own country (by adoption) was met with, and the manner it flourished in the North of Scotland, especially so when reflecting on the fact that not a vestage of it can he recall seeing in any of the New England States. I refer to the giant red-cedar of California, Sequoin gigantea, commonly known also as Wellingtonia gigantea. It does splendidly in the North, and seems to be esteemed highly there as a specimen lawn tree; of course it is to be met with in more or less numbers throughout the British Isles, in all of which places it succeeds well. It makes one of the most distinct and pleasing evergreen specimens for the lawn; it is invariably strictly pyramidal in habit of growth, very feathery and graceful in outline even up to a large size; foliage light green.

Nature has evidently marked this tree out to withstand great wind pressure, as well as to attain a great height. It has, considering kindred conifers, an abnormally thick base which is quite conspicuous in the young stages and goes on apace, increasing in girth as the tree ascends in height.

There are some very fine specimens of this noble tree to be seen in the neighborhood of Strathpeffer, mentioned elsewhere in this note, 50 and 60 feet high and furnished down to the ground with feathery, light-green branches; there is one particularly large one on the grounds of Castle Leod, the property of the Countess of Bromarty I believe, and in the immediate vicinity of the *Mineral Wells* of the above mentioned place, but less well furnished at the butt-end; I should judge that this specimen was any way from 75 to 85 ft. in height. It would be interesting to know how far north and east in the United States this tree grows successfully.

One other American tree still more unique as far as general appearance goes, and which never fails of arresting attention, is the "Monkey-puzzle" Chilian Pine, (Araucaria imbricata). It also seems to be quite at home in the North of Scotland as evidenced by some very fine samples seen there, which in many cases were clothed to the ground with their singular branches. The sight of those grotesque and very tropical-looking forms, looming up in this landscape, constantly suggested to my mind that they might have gone astray and out of their proper latitudes, so uncommon they appeared from all other forest trees. Yet, there they were, apparently quite satisfied with the latitude they happened to be sojourners in, as clearly indicated by their vigor and luxuriance. There is a specimen 40 or 50 feet high, a little distance beyond the Spa-pump house door in Strathpeffer, and though bare of branches a little ways up the stem, otherwise it is strong and vigorous, yet it arises out of what may be termed the promenade ground, which is practically, or nearly as hard as the middle of the street. This would tend to indicate that those so very tropical looking subjects are not so delicate as they appear and are quite able to take care of themselves.

Immediately in front of one of the end doors leading into the fruit-houses of Mr. Fletcher Rose-Avoch, stands a very large specimen tree of the Chilian Pine, especially in spread of branches, the height being for some reason or another not commensurate; this particular individual three or four years ago produced a large quantity of good seeds, from which seeds plants have been raised; the same tree has borne more or less seeds each succeeding year since. This is somewhat uncommon, I believe, for trees of the above to do in the British Isles at least. Being dioecious, as the botanists have it, it requires one of each sex to be more or less in the immediate vicinity of each other to accomplish seed production, with probably a certain age limit and other favorable conditions thrown in.

Cedrus deodora, or Indian Cedar, is another conifer that is plentifully grown in Great Britain, and as seen there was exceedingly effective in this landscape. It much resembles the larch, or what is commonly called here "Hackmatack" in the foliage and other characteristics, but much more dense in growth and less rigid in outline, the branches arching and drooping gracefully earthward; it does famously in Great Britain in general, and attains large proportions there, but is most pleasing when in the medium size.

WHOLESALE CUT FLOWER MARKET REPORTS

Boston Wholesale Cut Flower Market

Three days before Christmas.

There is no surplus in sight at present writing, but probably history will repeat itself and the surplus may be trusted to emerge from its hiding place by Saturday morning. Just at present there is need for more stock in some lines than is forthcoming. Values on Wednesday and Thursday are undoubtedly better on many items than they will be a day or two later. The weather is favorable for a full production and good quality. The usual reluctance to pay advanced prices for Christmas is manifested by the local retailers who have been assiduously devoting their attention to plants and greens. The latter has been a good business this year for all. Holly enjoyed a healthy demand and there is now no overstock in evidence. Mistletoe came in rather poor order this year. Much of it appeared to have been gathered too early. All that arrived in good shape has been well sold.

Prices at middle of the week for immediate delivery are lower than those quoted in advance for Saturday delivery. American Beauty stands still at anything beyond $50, but Christmas deliveries are quoted at $100 for the best grade. From these figures they run down to $10 and even less on inferior stock. Bridesmaid is selling all the way from $3 to $16 for stock ranging from inferior up to standard quality, the Christmas quotations running about 20 per cent higher. Liberty fills the gap between these and the Beauties, being quoted as high as $50 for fine high-grade material. Carnations are somewhat of a puzzle. As high as $8 is being "asked" for some choice stock, but so far the sales at such a figure are few and good judges are skeptical of seeing them go beyond $5 to $6 on an average. Red will, of course, have a special value. Poinsettias are abundant at $25 to $50, according to size and finish. The demand for them is good.

Violets are showing evidences of strength, good flowers bringing at present writing from $1 to $1.50, with indications that by Sunday they may stiffen up still further, especially if the weather should be such that they can be worn outside.

All other flowers such as bulb stock, lily of the valley, etc., stands at the same figures as for several weeks past.

Chicago Cut Flower Market Reports

E. H. Hunt in a circular on the situation, issued one week in advance of Christmas, makes the following statements:

We have gone over the situation very carefully and this is our surmise: with any kind of weather, roses will be in fair supply, though not big; in carnations there will be a fair cut; violets, a good supply. The real shortage will be in Beauties, medium lengths. We also look for a shortage in Liberties and red carnations.

Beauties are short in supply and continue to run to long and short, quality fair. Brides and 'Maids about equal to supply and showing vast improvement. Liberty a little off crop, and while flower is good, stems continue short. Chatenay has taken a decided brace and much in demand.

Carnations in fair crop and quality good; at no time better. Enchantress seems to lead with Estelle a close second. Liluim Harrisii a little more plentiful though this is caused no doubt by lack of demand. Callas not as plentiful though there is ample to supply demand. Valley in good cut at present and quality very fine. Violets not any too plentiful and demand good.

Mr. Hunt's price quotations published as the market rates for flowers for week beginning Monday, December 19, 1904, include the following:

Roses, American Beauty, per dozen, 24 inch to 36 inch, stems $8 to $12; 15 inches to 20 inches, $4 to $6; 8 inches to 12 inches, $2 to $3. Brides, selected, per 100, $10 to $12; medium, $6 to $8; Bridesmaid, selected, $10 to $12; medium, $5 to $8; Liberty, $10 to $25; Perle, $4 to $6; Golden Gate, $6 to $10; Chatenay, $8 to $15.

Carnations, medium, per 100, $4 to $5; fancy and extra fancy, $5 to $8.

Miscellaneous, Callas, per dozen, $1.50 to $2; Harrisii, $2 to $2.50. Mignonette, per 100, $6 to $8. Paper Whites and Roman Hyacinths, $3 to $4. Valley, $4 to $5. Violets, single, $1 to $1.50; double, $2 to $2.50.

Chicago Wholesale Cut Flower Market

For week ending December 17.

The public's Christmas shopping has shortened the demand locally, and the call was mostly in the line of funeral work. Beauties are still in moderate supply and already command holiday prices. Bridesmaids and Brides are of fine quality and short sizes of these is below demand. Sales on carnations were on a weak basis, general demand continuing dull, but with the ending of the week everything was cleaned up. Receipts compared with corresponding time last week increased. The general demand for orchids is on the increase, and the indications point to a shortage in this line. Christmas prices went into effect Monday, December 20.

Latest Reports from Chicago

Are to the effect that American Beauty roses in medium lengths are at a premium. Liberty is also scarce. Beauty is quoted all the way from $20 to $100, and Liberty, from $12 up to $25. Bride and Bridesmaid of good quality are in fair supply, $15 being average price asked for good stock. Lawson and Enchantress carnations are held at $5 to $10 and violets are quoted all the way from $1.50 to $2 for single, and up to $3 for double. Retail dealers are rebelling against the system of putting holiday prices in effect nearly a week in advance of Christmas.

Louisville Market Report

Business conditions are particularly favorable for a successful Christmas business. Stock, with the exception of roses, will be somewhat scarce. Several large decorations will mean some good hustling. Carnations are of very good quality and are very scarce. Mignonette, violets, lilies of the valley, will average a good deal short in quantity, but the quality is very good.

The growers have been a little unfortunate as to bringing their crops in for the Christmas business, and will suffer quite a loss; however, the prospects for future crops are very good.

Joseph Coenen & Co. report a good run on ferns, but the sale of palms very discouraging. Schulz finds a big demand for Lorraine begonias.

Among the fine window decorations are those of Mrs. C. W. Reimers, who makes a great display of American Beauty roses that create no little sensation, and Mrs. C. B. Thompson, who has an arch in her window on Fourth avenue, supporting a lot of red goods.

Buffalo Wholeale Cut Flower Market

As Reported for December 20.

Indications show a shortage in supply of flowers this week. The retail demand is not yet very brisk, but anything that is really good is picked up at sight. Holly runs of rather poor quality and is selling slowly. Other Christmas greens go all right.

Buffalo Christmas Prices

As quoted in advance.

Roses, Beauty, extra, fancy and special, $25 to $150; Nos. 1 and 2, $20 to $25; Bride and 'Maid, special and fancy, $20 to $25; extra, $15 to $20; Nos. 1 and 2, $10 to $15; Liberty, special and fancy, $25 to $35; extra, $18 to $20; 1 and 2, $10 to $15; Golden Gate, special and fancy, $15 to $20; extra, $12 to $15; 1 and 2, $8 to $10. Carnations, Lawson, $3 to $6; Enchantress, $4 to $8; other sorts, $2 to $5. Lilies, $15 to $20. Violets, $1.25 to $2. Hyacinths, $3 to $4. Lily of the Valley, $3 to $5. Asparagus plumosus, $40 to $60; Sprengeri, per 100 bunches, $25 to $50. Smilax, $15.

There is only one kind of advertising that is wise. It's the kind that makes business. Cut out the rest. . . . .

ADVERTISE IN HORTICULTURE

Directory of Clubs and Societies

Secretaries are respectfully requested to promptly notify HORTICULTURE of any changes of officers of their respective societies.

CINCINNATI FLORIST SOCIETY, Cincinnati, Ohio. — Pres., Benjamin George; Vice-Pres., Gus Adrian; Sec'y, Geo. Murphy; Treas., J. W. Rodgers. Meetings second Saturday of each month, three exhibitions held each year.

CANADIAN HORTICULTURAL ASS'N. — Pres., G. A. Robinson; 1st Vice-Pres., W. Suckling; 2d Vice-Pres., C. G. Johnson; Treas., H. Simmers; Sec'y, A. H. Ewing. Next annual meeting in Montreal, probably in August.

COLORADO SOCIETY OF FLORICULTURISTS, Denver, Colo. — Pres., John Satterthwaite; Treas., Mrs. J. M. Johnson; Sec'y, J. A. Valentine. Annual meetings, third Thursday in January.

THE DETROIT FLORIST CLUB, Detroit, Mich. — Pres., Robert Watson; Vice-Pres., L. Bemb; Treas., Walter Taepke; Sec'y, J. F. Sullivan; Librarian, Norman Sullivan. Meetings first and third Wednesday of each month.

NEWS OF THE CLUBS AND SOCIETIES

The late C. E. French of Boston left a bequest of $8,000 for the Massachusetts Horticultural Society.

On pages 99 and 100 of the Proceedings at St. Louis, Mo., the remarks credited to Mr. William Dilger of Detroit, Mich., should have been credited to Mr. F. P. Dilger of Milwaukee, Wis.

WM. J. STEWART, *Sec'y.*

At a meeting held at Glen Cove, Long Island, on December 15, the Nassau County Horticultural Society was organized. Officers were elected as follows: president, Thomas Harrison; vice-president, James Halloway; treasurer, E. J. Brown; secretary, S. J. Trepass. The new society starts under very encouraging auspices.

Inoculating Soils with Bacteria to Increase Plant Production was the subject under discussion at the meeting of the Farmer's Club of the American Institute at New York on Wednesday, December 14. Papers were presented by Dr. George D. Moore, U. S. Department of Agriculture, and Prof. Willis G. Johnson, Managing Editor *American Agriculturist.*

The Kentucky Society of Florists met at F. Walker & Co.'s store with a rather small attendance. The election of officers resulted as follows: August R. Baumer, President; Anders Rasmussen, Vice-President; Fred L. Schulz, Recording Secretary; Joseph Coenen, Financial Secretary; C. H. Kunzman, Treasurer; Joseph Wettle, Sergeant-at-Arms; and Herbert G. Walker, Trustee for three years.

The Annual Meeting of the Connecticut Horticultural Society was held at Hartford, on December 14. It was voted to have a banquet in the near future. Officers were elected as follows:

President, A. C. Sternberg; vice-presidents, Theo. Wirth, G. X. Amrhyn, D. A. Lyman, Edward Hoyt, T. S. Gold, O. A. Leonard; treasurer, W. W. Hunt; secretary, L. H. Mead.

The annual banquet of the Lenox Horticultural Society was held on Saturday evening, December 17. Over one hundred members sat down to a beautifully decorated table. A. H. Wingett was a most efficient toast-master. The speakers included E. J. Norman, Frank Howard, H. A. Bunyard, William Sefton, A. McConnachie, Frank Butler, R. A. Stanley and J. M. Johnson.

The regular meeting of the society was held on the same evening. A diploma was awarded to Thomas Proctor, gardener for Mr. Patterson, for six spikes of Calanthe Veitchii. A. J. Loveless, E. R. Norman, and George Foulsham were the judges.

The approaching exhibition of the American Rose Society in connection with the spring show of the Massachusetts Horticultural Society at Boston is sure to be one of the most remarkable displays of roses ever seen in this country, for the exhibits will not be confined to any one section or class of roses, but will embrace them all as far as is possible in a winter show. Some phenomenal plants may be looked for, and those who will make the effort to come to Boston at that time to see or participate in the exhibition may depend upon it that the New England brethren will make good the promise given last year when the Rose Society accepted the invitation to come to the Hub. If you have anything worth showing in the line of roses, get ready to display them. This opportunity for publicity and honors will not be missed by sagacious growers.

GARDENERS' AND FLORISTS' CLUB OF BOSTON

The December meeting of this organization, held on 20th inst., was, like its immediate predecessors, a good evidence that an era of activity and usefulness is now on and that the club will become, once more, an influential factor in the horticultural life of Boston. About fifty gentlemen were present to listen to Mr. Lumsden's practical paper on ferns, which we present in another column. The exhibition tables were loaded with a display of novelties and other material, all evidencing superior cultural excellence. There were two big vases of splendid blooms of the new roses Richmond and Wellesley. The former had made the journey from its Indiana home in perfect order and showed up grandly, much better than it did at New York last week. Wellesley, with its silvery pink buds, made a fitting companion for the crimson visitor.

Two variegated Lawson carnations were shown, one by the Rockland Greenhouses and the other by H. A. Stevens. These are quite distinct, the latter being more heavily striped than the other and closely resembling Mrs. M. A. Patten in general tone. H. A. Stevens showed a dish of phenomenal mushrooms from "pure culture spawn," which he states he has found to be far superior to imported spawn, better results being obtained at a lower temperature and giving mushrooms of a heavier texture and better shipping qualities. The culture is so simple that failure is not likely, and he predicts that it will revolutionize the mushroom growing industry.

S. J. Goddard sent seedling carnation No. 19, light salmon, medium size and fine contour; also Helen Goddard, a big substantial looking cerise that all agreed has a bright future before it. Peter Fisher sent a splendid white, marked No. 401, large sized flower of chaste finish and very long stems; also 173, a pink seedling, Mrs. M. A. Patten, Flamingo and Nelson Fisher. M. A. Patten staged a seedling from Prosperity and Gov. Roosevelt, in which the parentage is well pronounced. William Nicholson had a large vase of the latest introductions, and Peter Murray sent a fine salmon pink named Winsor. W. N. Craig showed Lælia anceps, the type and six varieties, also L. Goldiana. Mr. Ogg brought one of his beautiful Lorraine begonias from the J. M. Sears conservatory. There was a vase of superb mignonette from William Nicholson, Euphorbia fulgens (Jacquiniæflora) from Robert Cameron, and a brilliant group of poinsettias from president-elect Wheeler. The exhibitors were called on severally to say something regarding their various exhibits. Mr. Montgomery's remarks concerning Wellesley were especially interesting. He said that it is not possible to judge of what a seedling rose may become before its third year and, in fact, it may keep on developing its character up to the seventh year. He believed that many a good rose had been thrown away because this fact was not sufficiently well recognized.

Mr. Nicholson explained that an exhibit of Fiancee and Cardinal had been expected from Joliet, Ill., but it had failed to arrive. He believed the custom of sending carnation novelties for exhibition one or two days' journey from their home is unfair to the varieties. Introducers should distribute some of the stock to be grown by approved representatives in different sections, so that the flowers could be always shown fresh and in best form. Fiancee he pronounced to be a wonder and in a class by itself.

Peter Fisher said of Flamingo, of which he showed a vase, that he had seen a marked improvement in it since he had raised the temperature a couple of degrees. The disposition to throw occasional semi-double blooms, he thought, might be eradicated by selection and the standard of quality thus greatly improved.

The committee on awards reported certificates of merit for Peter Fisher for 411, S. J. Goddard for Helen Goddard, M. A. Patten for Mikado, Alex. Montgomery for Wellesley, E. G. Hill Co., for Richmond, Rockland Greenhouses and H. A. Stevens, each for variegated Lawson, cultural certificates to H. A. Stevens for mushrooms, and Alex. Ogg for Lorraine begonia, and honorable mention for Peter Murray for carnation Winsor, Peter Fisher for No. 173, S. J. Goddard for No. 19, and William Nicholson for mignonette.

Mr. Duncan reported on the successful field day which the club enjoyed last Saturday, visiting Messrs. Nicholson and Goddard at Framingham. He mentioned especially the Prosperity Carnations at Mr. Nicholson's which that gentleman regarded as the best all around paying variety in the whole list. He had been particularly impressed with the good service Mr. Nicholson was getting from a Scotch marine internal fire-box boiler, a hot-water heater, using soft coal, economical and reliable.

Mr. Lumsden's paper gave much pleasure. In reply to questions, Mr. Lumsden said that he knows of no authenticated case of success in hybridizing ferns. Hybridization is supposed to occur at the time of germination.

Ten new members joined the club. The next meeting will be the inaugural for the new officers.

A PLEASANT OUTING

The members of the Gardeners' and Florists' Club of Boston, to the number of thirty-four, enjoyed a delightful visit to the greenhouses of William Nicholson and S. J. Goddard on Saturday, December 17. Mr. Nicholson's place was first visited and came in for sincere admiration for the excellent condition of the stock. Attention was called to two different lots of The Queen carnation planted at different seasons, in which the earlier planted showed a vast superiority. An innovation for Christmas was favorably commented upon —

ten-inch pans of geranium, West Brighton Gem, about seven or eight plants to the pan and all a sheet of bloom. Mr. Goddard's place was found to be a model. His carnations, including novelties, seedlings and standard varieties, were enthusiastically commended for their prosperous appearance. The visitors were entertained by a lunch at both places and the customary vote of thanks was given, with accompaniment of three cheers for their hosts.

PENNSYLVANIA FORESTRY ASSOCIATION

The annual meeting of the Pennsylvania Forestry Association was held December 14, at its rooms, No. 1012 Walnut Street, Phila., and all the officers were re-elected for the ensuing year. Reports were made by President John Brinkinbine, and the secretary, treasurer and recording secretary. In the president's report attention was called to the fact that at the session of the State Legislature next year the Forestry Department or the Governor will probably offer recommendations concerning the administration of the forest reserves of the State, with a view to making them profitable as well as ornamental. The treasurer's report showed the association to be in good financial condition.

In the report of the council of the association, made by recording Secretary F. L. Bitler, it was shown that at present Pennsylvania owns 700,000 acres of forest reserves, which are being added to from time to time when desirable lands can be obtained at reasonable figures. As far as the association is aware, Pennsylvania is the only State in the Union except New York which is pursuing a regular system of acquiring forest reserves. There are now 1624 members of the association.

THE AMERICAN CARNATION SOCIETY

REGISTRATION, —

Senator Crane. By Robert C. Pye, Nyack, N. Y. Light pink, three and one-half-inch flower, high built, of perfect form, and a non-bursting calyx; long, stiff stems; free and continuous bloomer. Parentage, Lawson & Bradt.

Uncle Peter. By D. C. Noble, Columbia City, Ind. Light pink (same shade as Enchantress), a sport from Lawson, with same quality and habit as that variety.

Vaughan's Seed Store and John C. Moninger of Chicago, Ill., are offering special prizes for the meeting in Chicago, Ill., January 25 and 26. In order to give everybody an opportunity to offer a prize that desires to, the premium list will not go to press until the 26th of December.

The Western Passenger Association has granted the rate of a fare and one-third for this meeting; this includes the whole state of Colorado and from that east and north.

THE MARKET GARDENER

The Boston Market Gardeners' Association celebrated by a banquet at the United States Hotel, Boston, on Thursday evening, December 15, the eighteenth anniversary of its organization, with president W. W. Rawson in the chair, also for the eighteenth time. There were about two hundred members and guests present, including many ladies. In his opening talk Mr. Rawson took occasion to voice the sentiments of the market gardeners as opposed to reciprocity with Canada or anything tending to a reduction of the tariff now protecting this industry. He said that high-priced labor is a boon to the market gardener.

O. B. Hadwen, president of the Worcester County Horticultural Society, spoke of the delights of the rural home and told of his seventy years of farm life and his life-long interest in trees. He was followed by secretary J. E. Ellsworth, of the State Board of Agriculture, who is also a trustee of the Massachusetts Agricultural College. Mr. Ellsworth spoke convincingly of the splendid opportunities offered now to young men to make profitable investments and adopt a delightful avocation by taking up the few abandoned farms that are yet to be had.

Senator Dallinger of Cambridge talked on his favorite subject, that of reclaiming, cultivating, and developing the salt marshes of which there are about 200,000 acres in the neighborhood of Boston. He explained how by a system of dyking and draining at an expenditure of not over ten dollars an acre, land now not worth over five dollars an acre may in three years be brought to a value of two hundred dollars an acre. He claimed that such land is more productive than any upland area, requires no fertilizer, and is unequalled for the production of hay and for market gardening.

Quaint and comical was the speech that next followed, by Mr. Holt. Then came a "pome" by Thos. L. Creely, a Belmont gentleman of a poetical turn of mind. Mr. Austin Simonds, president of the Boston Fruit and Produce Exchange, spoke eloquently of the development of fruit from a luxury to a necessity of life, and extended cordial greetings from the great and influential body he represented. Mr. Jere McCarthy, surveyor of the port of Boston, next told in a humorous vein of his early experience at farming, extending over one day and a half. The chaplain of the occasion then closed the exercises of this very enjoyable evening with some good stories, and reached the very heart of his audience when he prefaced the benediction with the assertion that "a man who can get a dollar for a cuke is a genius."

THE POTATO CROP

For the first time in some years it appears that the United States will supply enough potatoes for home consumption, the crop which was harvested this year being the largest ever known. It is estimated that the supply will furnish about three and one-half bushels to every man, woman, and child in the United States, which is a little more than the quantity ordinarily used. It is worthy of note, however, that the acreage remains about the same each year, and the difference in crop is due to a larger yield than usual, Maine leading with 200 bushels to the acre and New Hampshire coming second with 145 bushels to the acre. The potato crop forms a considerable item in Maine's wealth, and in that State there is a tendency to increase acreage. While the agriculture of New England has become to a large extent intensive, and the production of wheat and corn has gone to the Western States, it is a source of comfort to the New England farmer to know that on our stony soils are produced larger crops than can possibly be grown on the more fertile lands of the West, and the supremacy of the northeastern States as potato producers is not likely to be disputed. For the last few years potatoes have been imported to make up for deficiencies in the national supply, but this year's experience shows that we can grow all the potatoes we need at home. The prices are low at present, owing to the large supply, but potatoes can be produced with profit even if they are sold at a low price, and the farmers of New England should take advantage of this opportunity which nature has given them.

Boston Transcript.

CHARLES LA DOW, INVENTOR

Mr. Charles La Dow, a well-known inventor and manufacturer of agricultural implements, dropped dead in Albany, N. Y., on December 18. He was famous both for the large number of patents issued in his name by the United States Patent Office, being supposed to hold the record in that respect, and for the number of patent litigations in which he was for many years involved. He was about sixty-six years old.

Roses and Carnations A Specialty..... WHOLESALE GROWER of **CUT FLOWERS**

Philadelphia Wholesale Cut Flower Market

As Reported for December 20.

Roses are in supply rather in excess of the demand, but prices hold fairly on what sales are made. The poorer grades have been congested on account of the freezing weather which cut off the street outlet. Carnations are fairly plentiful and prices holding pretty good on first-class stock. Second grade slow. Violets rather abundant and not selling very well on account of the inclement weather. Plenty of cypripediums, but cattleyas scarce. Gardenias, scarce at $75 for good blooms. All other stock in normal supply and at usual values. Holly unsatisfactory. Not up to standard of quality and causing trouble for the distributors. Retailers feeling rather dejected over general business early in the week.

Philadelphia Wholesale Cut Flower Prices

As Reported December 19.

Roses: American Beauty, special and fancy, $40 to $50; extra, $25 to $30; Nos. 1 and 2, $15 to $20; Bride and Bridesmaid, special and fancy, $12 to $15; extra, $8 to $10; 1 and 2, $2 to $6; Liberty, special and fancy, $20 to $30; extra, $10 to $15; 1 and 2, $2 to $8; Golden Gate, special and fancy, $10 to $12; extra, $8 to $10; 1 and 2, $2 to $6. Carnations: Lawson, $4 to $6; Enchantress, $6 to $8; ordinary, $2 to $4. Violets, single, $.30 to $.75; double, $.50 to $1.50. Lilies, $15 to $20. Narcissi and Roman hyacinths, $2 to $3 Lily of the valley, $2 to $5. Asparagus, $25 to $50. Smilax, $12.50 to $15.

St. Louis Wholesale Prices

Stock good and scarce Christmas week. Trade quiet last week but prospects improving. Beauties, extra, fancy and special, are quoted at $75 to $100; lower grades, $15 to $50. Bride, Maid and Golden Gate, extra, fancy and special, $8 to $18; other grades, $5 to $6. Liberty, extra, fancy and special, $8 to $20; lower grades, $5 to $6. Carnations: Lawson, $4 to $6; Enchantress, $6 to $8; other varieties, $3 to $6. Lilies, $10 to $20, according to quality. Narcissi and Roman hyacinths, $2 to $4. Lily of the Valley, $3 to $5. Violets, single, $.75 to $1.50; double, $1.50 to $2.50. Asparagus plumosus, $35 to $75. Sprengeri, $1.50 to $4. Smilax, $12.50 to $15.

Baltimore Wholesale Cut Flower Market Report

Baltimore has had about four bright days in twenty. The effect of this on Christmas stock cannot be other than severe. There are indications that growers are holding back quantities of stock in the vain expectation of getting Christmas prices for it. Doubtless Friday will see heavy shipments of this pickled material. The garbage man has been notified.

Baltimore Wholesale Prices

As quoted December 22, for Christmas week.

Roses, Beauty, specialand fancy, $50; extra, $35; Nos. 1 and 2, $10 to $20, scarce; Bride and Bridesmaid, special and fancy, $15; extra, $12; 1 and 2, $6 to $8, not enough to supply demand; Golden Gate, special and fancy, $15; extra, $12; 1 and 2, $6 to $8; fairly good supply; Perle, $4 to $8; Ivory, $6 to $15, not enough to kill orders. Carnations, Lawson and Enchantress, $5 to $8, others $3 to $6. Lilies, $12.50 to $16. Roman hyacinths, $2 to $3. Paper White, $2.50 to $3. Lily of the Valley, $3 to $4. Violets, single and double, $1 to $1.50. Adiantum, $1. Asparagus plumosus, $25 to $50; Sprengeri, $25 to $50. Smilax, $15 to $25.

WANTED: Consignments of High Grade Carnations.

Florists' Topics

Current comment on carnation Robert Craig: "It will do."

Two "bread and butter" carnations: Mackinaw and Octoroon.

A handsome pure white sport has appeared in a house of carnation Robert Craig at Cottage Gardens, Queens, N. Y

Luther T. Seaver, the "Pansy King" who was a candidate for the mayoralty of Medford, Mass., on a self-made platform received 40 votes in the entire city out of a total of 2,950.

The florists' establishment of A. J. Taylor at Burlington, Vt., suffered quite a serious loss of stock from inundation due to the bursting of a large water main, on December 13.

The trade exhibition heretofore held each season at the Flower Market in Boston will be held this winter at Horticultural Hall, the invitation from the Massachusetts Horticultural Society to do so having been accepted by the managers of the market. A liberal contribution for prizes for this occasion has been made by both old and new flower markets. In addition, a special prize of $10 will be offered by HORTICULTURE, for the best vase of one hundred carnation blooms in not more than three colors, arranged with any kind of foliage, color scheme and artistic effect to be considered in making the award.

Chicago Christmas Greens Market

Owing to the ruling of the railroad companies all shipments of green goods must be prepaid from point of shipment and consequently less cars are shipped on speculation. This has developed a sharp upward move on prices and strengthened the entire Christmas green market. Best holly brings $5 to $6.

Business Changes and New Establishments

Mark Aitkin, Springfield, Mass., has opened a pretty store at 378 Main Street.

W. J. Halliday has opened a commodious store at 323 North Charles Street, Baltimore.

John Mutch, Newtonville, Mass., has filed a petition in bankruptcy; liabilities, $2,470.34; assets, $765.

NATICK, MASS. — William E. Glidden has opened a flower store at the pharmacy of P. H. McGrath & Co.

The greenhouses and business of George F. Sylvester at Hanover, Mass., have been sold to Stanley Baker.

W. E. Marshall & Co. have opened a seed, plant and bulb establishment at 146 West 23d Street, New York City.

The Bagler-Gober Nursery Company has been incorporated at Marietta, Ga. They own about 1,300 acres of land, and will plant about 2,000 trees this winter.

Catalogues Received

J. D. Thompson Carnation Company's Catalogue of rooted cuttings, Joliet, Ill. Handsomely printed and contains fine half-tone illustrations of popular varieties of this season's introduction.

Hoopes, Brother and Thomas, West Chester, Pa., "Handbook of Ornamental Trees and Plants." Profusely illustrated with fine half-tones of ornamental trees, flowering shrubs and climbing vines.

Reasoner Bros. Royal Palm Nurseries, Oneco, Fla. A list of plants principally tropical, very extensive, and so carefully edited as to serve for a useful reference book which every plantsman should keep on his desk.

Lord & Burnham Co., Irvington-on-Hudson, N. Y. A book of more than fifty rich half-tone views of private conservatories and commercial greenhouses, exterior or interior, designed and erected by this representative American firm.

Another Yarn

The anecdotes of the "Ginger Jar" man appear to have awakened a responsive echo in Milwaukee. This one comes from Mr. Will Currie.

MILWAUKEE, *Dec.* 12, '04.

"In reading Mr. Watson's 'Out of the Ginger Jar' in HORTICULTURE of Dec. 10, the story of the hen with a wooden leg reminded me of one I heard in Scotland this summer about Niagara Falls. A visitor from Straiton, Ayrshire, was doing the Falls and, like our Hawick friend, he was keeping his own counsel. Finally, after a time, he exclaimed *'Hoots! they're no half sae bonnie as Tairlaw Linn; there's nae hills aboot here!'* Tairlaw Linn is a very small affair in a wee burn; but is beautifully located among the hills."

This illustrates the fine discernment of the Ayrshire man, who realized that there are other elements besides mere bigness that go to the making of anything to be admired.

Ownroot. — Heerd 'bout Jim Green?
Grafty. — No, wot's happened?
Ownroot. — 'E 's drowned.
Grafty. —What? Jim Green drowned? Why, 'es got my buddin' knife!

We go to the best people in the profession. Advertising in HORTICULTURE pays.

84 Hawley St., BOSTON, MASS.

In writing above advertisers, kindly mention HORTICULTURE

Chicago Jottings

W. S. Rennison of Sioux City, Ia., was a visitor in town.

J. H. Curran has closed his store at Michigan Boulevard, and is now with Friedman.

A clerk employed by T. D. Masconesotes left suddenly, taking the day's receipts with him.

The Fleischman Floral Co. has added a large holiday plant room in the Railway Exchange building.

Louis Coatsworth has returned unscathed from his trip through the East and well-pleased with the interest manifested in the Benthey aster.

A bench of Crusader at Anton Then's leads everything in the carnation line as a money producer. This gentleman has a white seedling of Prosperity type, now in its second year, that is likely to be heard from later on. A Kroeschell boiler lately installed is doing good service.

The idea that up-to-date houses are essential to the production of good stock seems upset by the splendid condition of Lawson and other carnations at the old Jackson place now conducted by A. N. Swenson. Mr. Swenson's experience is that the indoor grown Lawsons produce the finest blooms, but that the award for quantity must be given to field grown stock.

HEARD AND RECEIVED

Mrs. Peter Murray of Fairhaven, Mass., is dangerously ill.

A. T. Boddington of New York visited Louisville, Ky., this week.

M. H. Norton has opened a flower store at No. 1A Park Street, Boston. We are glad to see Mr. Norton back in the business once more, and wish him abundant success. The location is one of the best in the city for a retail florist establishment.

Part I of the annual report of the Massachusetts Horticultural Society for 1904 is received. In addition to the transactions and lectures there are appended some notes on peony cultivation by Robert T. Jackson, also a paper on John Richardson, his house and garden, by the same author, illustrated with a number of interesting views.

Don't neglect your advertising. Let us follow it up for you while you are busy filling orders.

If you offer the right goods in the right way in these columns, you will not lack for customers.

"A long pull, a strong pull and a pull all together." — for advertiser, buyer and us, means success for all.

You / We \ want / \ orders. advertising.
Let us get together.
Right quality? Right price? Then advertise it in HORTICULTURE. That's the way to "get there."

Here are THREE WORTHIES worthy of your consideration:

Fiancee
The FINEST PINK

The Cardinal
The FINEST SCARLET

Fred Burki
The FINEST WHITE

Without exception, the best in their respective classes.

$12 per 100. $100 per 1000.

ROBERT SIMPSON - Clifton, N. J.

PIPE WROUGHT IRON vs. STEEL

The question is settled in favor of Wrought Iron for the florist; but the problem is: How to get wrought iron?

C. J. RAINEAR & CO.

Have proved their standing on this question by their record on "GUARANTEED" WROUGHT IRON PIPE. You get what you order with an absolute guarantee. You get it promptly and you get it at the lowest market rates. Our motto: "PROMPTNESS, LOW PRICES." Mention "Horticulture" when you write.

C. J. RAINEAR & CO., 518 ARCH STREET PHILADELPHIA

Postal Progress

Some months ago Mr. Herbert Myrick of the "Farm and Home," wrote a letter to Senator Lodge as to his attitude toward the Pope Parcels Post Bill, H. R. 7874 now before the House Postal Commitee with its rates:

3 oz. parcels . . .	1 c.
1 lb. parcels . . .	5 c.
2 lb. parcels . . .	25 c.

Mr. Lodge replied that he was in favor of a parcels post, but the deficiency in the postal revenues caused by the expenditures on the Free Rurul Service made it impracticable.

Postmaster General Wynne makes the deficiency for the past year	$10,000,000
1905	14,300,000
1906	13,000,000

The problem before the friends of an extended and cheap General Parcels Post, therefore, is how to put an end to this deficiency.

To accomplish this I propose a system of low local delivery rates like that of Germany and Switzerland: —

Local delivery rates of Germany, Switzerland and United States, in 1904.

LETTERS.

Germany	Switzerland	United States
City delivery, including neighboring places	Distances up to 6 miles	City and Rural delivery
	8 oz., 1c.	1 oz., 2c.
	Whole Country	
8 oz., 1c.	8 oz., 2c.	8 oz., 16c.

PARCELS OF MERCHANDISE.

Germany	Switzerland	United States
Distances up to 46 miles	General Rates	City and Rural Delivery
11 lbs., 6c.	1 lb., 3c.	1 lb., 16c.
12 lbs., 12c.	5 lbs., 5c.	2 lbs., 32c.
33 lbs., 18c.	11 lbs., 8c.	3 lbs., 48c.
44 lbs., 24c.	22 lbs., 17c.	4 lbs., 64c.
110 lbs., 60c.	33 lbs., 23c.	
	44 lbs., 33c.	

All Germany, including Austria-Hungary	Up to 62 miles
11 lbs., 12c.	110 lbs., 60c.

Swiss Library Post, to and from home and library.	United States
4 lbs., 3c.	4 lbs., $1.28

A German farmer, be he ever so humble, be he ever so far off the lines of general traffic, can send off his produce and secure his supplies at the rate of 11 lbs. for 6c., up to 46 miles, and 11 lbs. for 12c. within the limits of Germany and Austria. If an American would send off 11 lbs. of merchandise by post, he must divide it into three parcels and pay $1.76 for the service rendered.

In seventy-three thousand towns and villages the public fetch and carry all their mail to and from the post-office, notwitstanding the postage paid entitles them to free collection and delivery.

Where a city delivery service is organized, the work is done by walking postmen burdened like pack mules. On the other hand, the horse team of the Rural Posts, confined to letters, newspapers, magazines, 4 lbs. of merchandise parcels at 16c. a pound, carries loads hardly beyond the capacity of a wheelbarrow.

The teaspoon traffic of this horse-power machine makes it an expensive burden to the post-office and of comparatively little account to the public.

With the use of modern machinery — automobiles as well as horse teams — city and country — and with a system of low local delivery rates like that of Germany and Switzerland,

1 lb. parcels	1c.
10 lb. parcels	5c.
30 lb. parcels	10c.
50 lb. parcels	15c.
100 lb. parcels	25c.

we should have a free delivery service that would at least pay its way while it would be a source of infinite profit to the public.

Between the shoe towns of Massachusetts and Boston, boxes of shoes up to 50 or 60 pounds in weight are carried from the factory to the dealer in Boston, one box for 15c.; two boxes, 25c.; three or more boxes, 9c. per box; this including a trip of from ten to thirty miles. The local stage, Farmington, Conn., to Hartford, 9 miles way, carries laundry parcels, some of them 12 × 18 × 6 inches in bulk and close upon 25 pounds in weight, to and from the city laundry for 10c. The charge for carrying a 200-pound trunk from Eighty-fourth Street, New York City, to Park Row by express, is but 25c.

There can be no question that a system of local delivery rates such as we have suggested could be made to pay and pay well, this, too, with reasonable compensation for postmen.

A cheap local delivery service will at once make a cheap and extended General Parcels Post practicable.

This then is the suggestion I would make to the florists, the gardeners of the United States, and indeed to all of our people: Write to the candidates for the United States Senate in Massachusetts and throughout the country; write to the members of your different legislatures and to your Congressmen, asking them to secure for the United States a system of low, local delivery rates that will at once place the Free Rural service on a paying basis and prove of infinite value to the public.

Yes, and write to the President too, for I am sure that President Roosevelt is determined to place the Post-Office of the United States at the head of the civilized world.

And do not forget to write to the Secretary of the Postal Progress League and give him a bit of good cheer as he works for you. He cannot make bricks without straw and he cannot work for you successfully unless you provide him with fodder.

Sincerely yours,

JAMES L. COWLES, *Sec'y.*
THE POSTAL PROGRESS LEAGUE,

Please let us have adv. copy and cuts early. Monday if you can, but not later than Wednesday morning *Please.*

C. G. Pringle, the botanical explorer, has returned to the University of Vermont after a long trip through Mexico, bringing a collection of 25,000 specimens of some 600 species of the flora of that country.

"Smith's Chrysanthemum Annual," an 86 page pamphlet by Elmer D. Smith, should be on the desk of every chrysanthemum grower. Every operation and every contingency in chrysanthemum culture from the stock plant to the prize plant or bloom on the exhibition table is treated in a plain but comprehensive manner by a man who understands his subject and knows how to tell the story. Price, 25 cents.

Greenhouse Glass

We carry in stock a full assortment of the Best Pennsylvania Makes of Greenhouse Glass.

Special Prices for carload lots or for future delivery.

Standard Plate Glass Co., Boston, Mass.

26-30 Sudbury St. On the Corner 61-63 Portland St.

The Glass Situation

The following statement regarding the glass situation at present is taken from the circular of a leading agent. We have interviewed the representatives of other prominent houses and their views coincide with the views herein expressed.

"It has apparently very suddenly dawned upon a number of buyers, during the past ten days, that the demand for window and greenhouse glass is in excess of the actual production. In place of any let-up, orders have increased in size and volume. The number of jobbers and manufacturers who, in their anxiety to get business, have almost hopelessly oversold, is daily becoming better known. Buyers who bought glass for "quick shipment" in November, in many cases will not get it until 1905. Production in many factories is disappointing, both as to quality and amount. Confidence in a continued, good demand and better prices is noticeable in all recent trade reports, circulars, and correspondence.

"One quiet meeting of the more influential outside manufacturers has been held, and another large one is being arranged for the near future. It is believed that the conditions warrant a sharp, healthy advance, which will meet general and enthusiastic coöperation by manufacturers, whether in or out of the present combination. The machine scare has been overdone. Prices are the lowest for many years, with stocks admittedly lower. When this situation becomes better known, what is the natural result?

"In view of the conditions and general trend of the market, we feel justified for the first time in years, in advising buyers to anticipate their wants on the above basis — delay is now dangerous, to say the least. In January, 1901, the price of window-glass was advanced 28 per cent; in March of the same year, another advance of 25 per cent took place, making 53.6 per cent in less than 60 days. The mistaken policy of these advances will not be repeated."

List of Patents Issued Dec. 13, 1904.

777,419, dated December 13, 1904. Appliance for Floral Decorations. Frances M. Hoyt and Grace Hoyt, New York, N. Y.

The invention consists of an improved means for suspending vases to contain flowers or small plants for decorative purposes.

It embodies a plurality of vases with a short cross-bar, a cord for suspending said bar at a point between its ends, and cords of different lengths for suspending said vases from different parts of the cross-bar and at different distances from the cross-bar, the points of suspension of the vase-supportin gcords being a sufficient distance on opposite sides of the suspending cord of the cross-bar to maintain the latter in horizontal position, and so that the longer vase-suspension cord will not interfere with the upper vase.

777,127, Heating and Ventilating System, Preston K. McMinn, Chicago, Ill.

777,366, Shears, Charles O. Bergmark, Chisholm, Minn.

777,391, Hoe, Adolph Abraham, Janesville, Minn.

777,567, Pruning Shears, Thomas M. Taylor and Eric C. Boeck, Medford, Ore., said Boeck assignor to said Taylor.

777,572, Fruit Picker, James Utterback, Honeoye Falls, N. Y.

Copies of any of the above patents can be procured by sending ten cents in stamps to E. G. Siggers, patent lawyer, Station G., Washington, D. C., by mentioning HORTICULTURE.

The two best scores made by members of the New York Florists' Bowling Club, December 19, were as follows:

O'Mara	118	181
Burns	154	153
Guttman	175	127
Burns, Jr.	123	154
Shaw	126	148
Donlan	107	153
Siebrecht, Jr.	120	92
Siebrecht, Sr.	126	148
Holt	124	131
Bach	130	134
Sampson	157	118
Fenrich	143	142
Manda	150	171

Widespread publicity, incessantly followed up, is to-day essential to business prosperity. We invite the patronage of all having goods or business to advertise, whether large or small, in all horticultural lines. We will see to it that HORTICULTURE reaches the buyers.

The beauty and value of this new fern to be introduced Spring of 1905 can best be appreciated by seeing it. It is a sport from the Pierson Fern (Nephrolepis Piersoni), but it is very much more beautiful and of greater commercial value. It is as different from the Pierson Fern as that is from the Boston. The small side pinnae are again subdivided, producing an exquisite and beautiful effect, changing the entire character of the fronds, which measure less than half the length and about twice the breadth of the fronds of the Pierson Fern. The fronds also assume an entirely different form, the side pinnae standing at right angles to the mid-rib of the frond, on edge rather than flat, as is usual, making both sides of the frond equally beautiful—entirely different from any other fern.

The plant is very dwarf, only about half the height of the Pierson Fern, and of very much more compact habit. Taking it altogether, it makes one of the most exquisite plants and one of the most valuable for table and house decoration that has ever been introduced. The cut fronds, on account of their beauty, will be in great demand for table decoration, design work, and for use in boxes of loose flowers. Well-grown plants make most magnificent specimens. We think there is nothing in the fern line that is so handsome as this beautiful fern when well grown. It is a wonderful improvement over Nephrolepis Piersoni in every respect, both in regard to beauty and habit of growth.

PRICES:—2¼-inch pots, $9.00 per doz.; 50 plants at 60c. each, 100 at 50c. each, 500 at 45c. each, 1000 at 40c. each. LARGE PLANTS READY FOR IMMEDIATE USE—5-inch pots, $18.00 per dozen; 6-inch pots, $24.00 per dozen; 8-inch pots, $36.00 per dozen; 10-inch pots, $60.00 per dozen.

DECORATIVE ART

Several years ago we used these hats for bridesmaids. Now we use them only for "little flower girls" in a bridal party. I rather like the rough straw and the real hat better than some of the new things in this line. We generally tie a loop in the ribbon to hang on the child's arm, so that the hat will stay with her. The occasional dropping of a hat by a child is very disconcerting to a dignified bridal party.

M. H. Battles.

The Cultivation of Tomatoes Under Glass

Ripe tomatoes may be had any time of the year, if the cultivator allows between three and four months from the time of sowing the seed till the first fruits are required. Seed can be sown either in pots, pans, or flats, according to the quantity of plants required, filling them about one-third with broken pot shreds. Sift the loam through a fine screen, the rough portion of which can be put on top of the crocks, allowing room on top of that for about an inch and half of the finer soil, which should be mixed with about one-third of its bulk with fresh water sand. Fill the pot, pressing it moderately firm and making it as even as possible, to within about one-half an inch of the top. Water the same, giving it a good soaking, using a fine rose on the water pot. Sow the seed as evenly as possible and cover the same with about one-fourth inch of the fine soil place in a temperature of about 70°, and put a sheet of glass on top to keep it close and prevent evaporation. If it is in a house where it is exposed to the sun, a sheet of paper should be placed over the glass till the seedlings appear through the soil, which will be in a few days; then remove the paper and glass and expose them to the full light. Give water when necessary, by pouring it in gently on one side of the pot near the rim, filling it to the brim; this prevents knocking the young plants down and making the stems crooked, which if watered on top with a waterpot and rose it is sure to do. When the plants have got one rough leaf they should be potted singly into small thumb pots, using the same kind of soil as recommended for sowing. Give them a good watering and place them in a sunny position near the

glass, shading them for a few days until they are able to stand the full sun, when the shading must be removed. When they have filled these pots with roots they can be shifted into three inch; the soil this time can be a little coarser, without any sand, and using about one-sixth well rotted manure in the soil, and bury the stem of the young plants in this potting almost up to the seed leaf which helps to steady the plant and they will emit roots from the portion of stem buried into the soil. Give them plenty of room as they grow and when they have filled these pots with roots, they can be planted out in the benches eighteen inches apart, staking them at the same time and tying the top of the stake to the bottom wire of the trellis which should be about fifteen inches from the glass. Prepare the benches by placing a sod with the grass side down all over the bottom. Chop up your loam and mix the same with about one-fourth of well rotted manure, the latter from an old spent mushroom bed if it is procurable; if not, other manure will do, providing it is not too wet. Place this mixture on top of the sod, filling it to the top and about one-third the width of the bench; pound it down firm, which will then allow plenty of room for water without washing the soil over the sides of the benches. As the plants grow, keep them to one stem without stopping, right to the top of the house, taking out all the laterals or young growths as fast as they appear from the axels of the leaves. If this is neglected, the plants will soon smother one another and obstruct the light, consequently the fruit will be small, badly flavored and the ripening retarded. Going back to where I recommend filling the benches to one-third of their width, I have found that plan to answer well, for if they are filled to their fullest capacity when planting, it generally makes the vines grow too rank, consequently the fruit does not set so well. When the first portion of the soil is well filled with roots, a dressing of the same can be added from time to time until the benches are filled. After the plants have exhausted all the soil, they can be carried on for a considerable time in full bearing by watering them with liquid manure every time they require water, giving them sometimes a light top dressing of Clay's fertilizer and watering it well in, and also a weak solution of nitrate of soda, just for a change, which will help to swell the fruit.

Tomatoes should at all times have all the sun possible, for if grown in shady places the growths become long jointed and weak, and the fruit will not set. Air should be given in abundance on all favorable occasions; of course it depends on what season of the year they are being grown. If in the winter time, air must be given very judiciously and as much as is consistent with the outside temperature, but in the early summer it can be given very freely. They grow well in a night temperature of 65° and day temperature of 70° to 75°, with a proportionate rise according to the sun and outside temperature. When the glass reaches the latter figures, a little air should be given and increased by littles as the thermometer rises, being very careful with this in the winter time not to give too much when the weather outside is very cold, otherwise mildew and disease will soon follow. Never give front air in the winter time, but let it all be from the ventilators on the top of the house. In the summer time front and top air can be given freely. The foliage should never be wetted, but the plants should never suffer for water at the roots. Keep the floor of the house as dry as possible, especially in winter. This gives the pollen a better chance to distribute and set the fruit than if the air is charged with moisture. It is also not a bad plan to shake the plants a little every day in the morning when the sun is shining, for the same thing. If the foliage is very luxuriant, cut a few of the leaves in half near the bunches of fruit, to expose them to the sun, but do not carry this to excess.

It is hard to describe all the small details of the culture of anything on paper, as a man must work according to his conditions, using his judgment, which is only gained by experience and observation.

A Practical Help

We hope you will like HORTICULTURE and recommend it to your friends in the trade. Send in their subscription now to insure complete file from first number. We want to see on the list of subscribers every one identified with any horticultural industry. FERNS

[No. 2.]

Lomaria and Blechnum are often by error taken one for the other. They have their fructifications in a long line on both sides alongside the mid-rib of the pinnæ. In Blechnum these lines are covered by an indusium and the fertile fronds do not generally differ from the others; in Lomaria they are all covered by the leafy part of the fertile fronds, which is curled up and makes these fertile fronds look different from the others; they are generally erect, with the pinnæ very narrow, and grow out in the center of the plant. They are nearly all of great decorative value, and widely spread all over the globe, therefore they require various treatments; those from Central America and warm parts of the South Sea Islands have to be grown in hothouses; those from New Zealand, Australia, and the southern part of America require cool houses, and a few of the northern hemisphere natives are hardy.

Among those that grow in cool houses are some of great value for their decorative qualities in apartments; they do not like to be raised in too much heat. Where syringing is necessary, the water standing overhead damages the fronds and under the same conditions, growing without sprinkling, they are apt to be attacked by thrips and red-spiders. Therefore an ordinary greenhouse treatment, with plenty of water at the roots and none on the leaves, is the best to grow them successfully. Half leaf-mould and half fibrous loam with some sand for Lomaria, and peat, loam, and sand for Blechnum are the compost they like.

The best ten varieties for apartment growing are the following: Lomaria gibba, the best known and the most cultivated, is much liked for its symmetrical growth, and the glossy green and elegance of its fronds. The young plants have their fronds generally erect and can be used in jardinieres as substitutes for young palms, being much more effective; in other plants when the stem begins to show the fronds grow more numerous, reaching about two feet long by six inches broad, of somewhat drooping habit, making beautiful plants for exhibition and for parlor decoration. There are a few forms of Lomaria gibba that have been raised from spores or imported from their native country, not much seen yet in cultivation. Some have the pinnæ forked, as Lomaria gibba crispa; some are tasseled, as Lomaria gibba Bellii; others are of gigantic growth, as Lomaria gibba platyptera, or the young fronds pink colored as Lomaria gibba rosea, — the latter much resembling

Blechnum Braziliensis from which it may be a hybrid. Lomaria magellanica — Zamioides or Boryana, not much in cultivation, grows wild from the West Indies to the Magellan Straits. It is one of the most distinct of the genus. It produces a stout, massive trunk, about two feet high, covered with black scales. The fronds are from one to two feet long, with naked stems, not very numerous, but nicely set, having the appearance of a little Zamia, and are of a shining green on the surface and light bluish green underneath. There are some forms found in South Africa that are quite distinct: Lomaria ciliata, from New Caledonia, is a rapid grower and of compact and elegant habit, the fronds of a light green color, and the pinnæ finely dentated, much resembling Lomaria gibba. There is in cultivation a stronger growing form, Lomaria ciliata gigantea and major, very effective. Lomaria ciliata is very much averse to moisture on the fronds.

Lomaria discolor is a nice little tree fern from Australia and New Zealand. The trunk is short and woody, and the fronds are grown in a massive crown. They are about two feet long, of leathery texture, dark green on the upper part and light green beneath, and the pinnæ are deeply cut. Lomaria discolor bipinnatifida from South Australia has the same appearance, but is much more cut, especially at the tops of the fronds, where they are sometimes crisped; the pinnæ are set near together, overlaping each other, and give the whole frond a fringed appearance. The plant produces fertile fronds as do all the Lomarias of that section, but the spores generally do not grow and the plant has to be propagated by side shoots. Lomaria discolor nuda from Australia, is like Lomaria gibba, a good plant to be used when young for jardinieres and table decoration. When grown, it is of compact habit, resembling much the preceding in the cut of the pinnæ, but is of lighter green color and thinner texture. It is easily propagated from spores. Lomaria discolor and its forms like to be grown in a cool place. There are many more trunk-growing Lomarias, but those enumerated are the best for apartment decoration purposes.

Among the underground stem species, Lomaria procera and its forms have the most decorative qualities. It is native in the West Indies. The fronds are long-stalked, with the leafy part of a heavy texture and elegantly pendulous. The pinnæ are large and undulated. The fertile fronds are long and erect and have the pinnæ very narrow. Lomaria chilensis or procera chinensis, a native from Chili, is a very strong grower and of gigantic habit. The fronds are of very heavy parchment-like texture, arching and numerous, and the pinnæ are large and close set, the fertile fronds being short. It is a very hardy plant and does not like heat; with a little protection it can be grown outside. It is easily propagated from the side shoots that grow plentifully from the roots. There are some forms of Lomaria procera from South Africa and New Zealand, good plants but not much seen in cultivation.

Lomaria aspera from Chili is a curious, good hardy fern, valuable for hanging baskets. The spreading fronds are long and very narrow and proliferous, growing young plants at the end of the fronds. The pinnæ are small and nearly round, closely set along the stem. This fern may be more curious than ornamental, but makes its effect in the right places. Lomaria attenuata, found in the West Indies, Central America and the South Sea Islands, has a thin, creeping, branching stem and on the top of each shoot grows a bunch of fronds one to two feet long of a heavy dark green texture and of a rosy color when young. This is excellent for hanging baskets, and when young, well furnished with arching fronds, is of good use for jardinieres.

Lomaria spicant, vulgarly known as hard fern, is a native from the whole Northern Hemisphere and its numerous forms can be utilized to great advantage for decorative purposes. Although it is a hardy plant, and therefore disliking heat, it is grown easily in cool houses and makes nice bushy plants. The first fronds are spreading and grow more erect with age. The fertile fronds are much longer than the others. This fern is easily grown from spores and likes a compost of a mixture of loam and peat, leaf mould and sand, in equal parts. It will not grow when lime is in the soil or water.

Blechnum Braziliensis, from Brazil and Peru, is a strong-growing little tree fern, the stem or trunk not more than three feet high, slender and bearing a crown of abundant fronds two to three feet long and about one foot broad, of a light green color. It is quite hardy in apartments and when young, if not crowded with foliage like the older plants, is especially adapted for a center plant in a jardiniere. Blechnum Braziliensis Carcovadensis, a form closely resembling the type in way of growing, has the pinnæ undulated and the young fronds of a beautiful copper red color when growing out. Both grow best in a mixture of loam, peat and sand, and are easily propagated from spores.

Blechnum occidentale from West Indies is dwarf, the fronds about one foot long, arching, of a shining green and pink colored when young. It is of a spreading and creeping habit, making a good plant for basket work. Blechnum glandulosum and Blechnum polypodioides are two other good species for hanging baskets, the latter having young fronds of a beautiful pink color.

Amédée Hans

SOME NOVELTIES OF 1905

There are a number of really good new plants available to the trade for dissemination during the coming season. For once at least, there is no need to have recourse to the perennial novelty lists of those

Nicotiana Sanderæ

European growers, certain German houses standing at the top, who serve up year by year numerous forms of aster, chrysanthemum, dianthus, eschscholtzia, phlox, reseda, scabious, zinnia and other annuals, of such slight variation from standard forms and usually of no improvement — that the imagination is strained to find excuse for their introduction as novelties. By way of illustration, the well-known White Mignon Aster may be cited. A few years after the introduction of this splendid variety, a certain German grower discovered in his fields a plant of this variety in which the foliage was somewhat lanceolate. There was no improvement claimed beyond this peculiarity of foliage, otherwise the two forms were identical. However, the "Lady in White" was sent out and heralded as a splendid novelty; to-day it is not heard of, while the Mignon is still popular.

This year there are several valuable novelties, more in fact than for a decade, or perhaps two.

Those who have seen the beautiful Nicotiana Sanderæ, with its magnificent sprays of lustrous rosy-crimson flowers, forming a compact bush two feet in height and rivalling Salvia splendens as an autumnal bedding plant, will readily appreciate the value and possibilities of this new variety. It is a plant for professional gardener and for the amateur as well, just as Nicotiana affinis has been, and a popularity like that of the Shirley Poppy is confidently predicted for Nicotiana Sanderæ.

Quite as good a plant for American gardens will doubtless be found also in Lobelia Tennoir, a species resembling in the delicate formation of its stems and foliage the slender appearance of the dwarf bedding lobelias, but growing to a height of twelve or fifteen inches, of erect branching habit, the sprays slightly arching and bearing a profusion of bright cobalt-blue flowers about an inch in diameter. Imagine the effect of a bed of white Geranium La Favorite with a few plants of this brilliant blue, tall-growing lobelia interspersed.

The Parisian Annual Wallflower has become popular for winter forcing as well as for cutting during summer. For the latter purpose it has been grown extensively in Newport. A form of this is now offered with flowers of a rich blood-red color, blooming quite as early and as easily forced as the brownish yellow variety.

To Prof. Engler, director of the Berlin Botanical Garden, is due the credit of discovering in East Africa a valuable new Balsam, Impatiens Holstii. It forms elegant bushes one and a half to two feet in height, not unlike the popular Impatiens Sultani, but of more rapid growth and with larger and more brilliant flowers, which measure about an inch and half or over, in diameter, and are bright vermilion in color. It is an elegant plant for pot culture and as a Christmas plant should prove of great value to our florists; it is also valuable for bedding purposes, in moist or partially shaded situations.

A Bed of Impatients Holstii
New Balsam from East Africa

The greatest advance in the aster family is a very early form named Debutante, pure white and delicately feathered, resembling the Comet type, but from three to four weeks earlier. Debutante flowers about the same time as Queen of the Market. As yet there is but one color; pink and light blue will undoubtedly follow in a few years, for these are the colors most desired.

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

To him who has the best interests and future prosperity of the flower industry at heart, the news in our Christmas market reports to the effect that the practice of hoarding up flowers in the hope of forcing values up to a high figure for the holiday, seems to have been quite generally abandoned this year, comes as very pleasant reading. That we shall see no more of it is too good to be true, but it is evident that the worst is over and the flower growers themselves will be the greatest gainers.

We are always sorry when we see the florist or his calling vilified in the public press, but when the detraction emanates from one of the craft, it is doubly to be regretted. Granting to every man full freedom to pursue such business methods as he thinks will best promote his own interests, the line must be drawn at a just presentation of such facts as concern the welfare of others. We think we reflect the sentiments of all fair-minded people when we record our disapproval of the somewhat spectacular means adopted to advertise a recent venture in New York City. It seems to us that to use the columns of the daily papers for a public arraignment intended to prejudice the people against one's brother florists, and to seek to draw patronage by the report of a mythical organized movement on the part of one section of the business to put an end to the career of another department, is to go beyond the limits where any man can expect to retain the good-will or respect of his fellows.

The despotic power of the express companies is conspicuously manifested in the arbitrary rules enforced at the railroad stations, under dictation from the express people, whereby messengers bearing flower or plant packages are refused admission to trains. To insure their safety the florist is obliged, after sending valuable packages to the railroad station at his own expense, to provide a messenger to accompany them on the express car to their destination, and deliver them therefrom by private conveyance, but paying the same express charges as though the goods had been called for and delivered by the company in the ordinary manner, although to hand them over to the express for their handling and delivery would mean ruin to the goods and disaster to his business.

How long the influence of these corporations will suffice to prevent the adoption in this country of an efficient parcels post system such as is enjoyed abroad, remains to be seen. Foreign governments, which we like to speak of as inferior to our own, have given to their people systems of cheap parcel delivery that would be a great boon to the people of this country could we but have them. It is generally understood that the antagonism of the express companies is one of the main barriers to this reform. If this be the truth, it is time for the people to "get busy."

In our two preceding issues we recorded with much gratification, the fine exhibitions made on the occasion of the respective monthly meetings of the New York Florists' Club and the Gardeners' and Florists' Club of Boston. The many-sided value of such exhibitions does not appear to have been fully realized as yet, by the profession in this country. Abroad the exhibition idea has long been one of the bulwarks of progressive horticulture, and it is a promising augury that it now seems to be taking root here. These little semi-private affairs have a distinct value of their own as distinguished from the more pretentious public exhibitions which on not infrequent occasions have brought adversity to their supporters. There are none of the responsibilities and risks that attend the latter, but the advantages are equal or even greater. The interest engendered makes for the prosperity of the organization, the object lesson afforded by these demonstrations of what others can do is educational to the fullest degree, and the commercial advantage to the exhibitor who is in the market to sell, or to the visitor who wishes to buy intelligently, is very important, while the ambition to excel and the spirit of friendly emulation which is thus induced, furnishes the best sort of incentive to creditable and painstaking effort.

For a number of years our sense of color harmony has been somewhat jarred as we saw the pink azalea intrude itself among the scarlet trappings of the florists' Christmas window, but always with a feeling that the azalea was the aggressor, that it was usurping the place of something else and that its sense of propriety should have kept it in the background until after the Christmas festival, with its poinsettias, holly berries and scarlet carnations, had passed. But now comes the Lorraine begonia, equally incongruous in color, and takes possession of a large proportion of the florists' window. It is again pink and scarlet with their discordant effect, but with this difference — that the red seems the aggressor — and we find

House of Begonia Gloire de Lorraine

The illustration on this page affords a view in the house of Begonia Gloire de Lorraine, mentioned in our issue of last week, at the conservatories of Mr. J. Montgomery Sears at Southport, Mass., and our frontispiece shows a specimen plant from the collection. These plants have a circumference of 6 ft., 9 in., in the best developed specimens, and a height of 22 inches. Alexander Ogg, the gardener, is an expert plantsman and is a frequent contributor to the exhibitions of the Massachusetts Horticultural Society.

---

ourselves wishing some one would make off with the red tissue-paper bells, immortelle balls and such gewgaws, put the poinsettias in the background and leave the field in undisputed possession of the pink flowers and whatever may harmonize with them.

It is possible the public is just a little wearied of the everlasting scarlet of the past few years and is ready to welcome a change. Certain it is that, in the better class of stores in the large cities, the fashions of late years in this respect are on the wane. The tissue-paper bells are left to the huckster, to keep company with the immortelle-studded evergreen wreath of a former period, and the bunches and wreaths of native holly have given way to the more beautiful imported hollies in pots of various sizes. If our conclusions are correct, the way is opened for the use of a wider diversity of plants and flowers at the Christmas holidays and more satisfactory conditions, from the florists' point of view.

Each year sees an enormous increase in the production of American Beauty roses for the cut flower market. The amount of new glass specially erected for its cultivation, and the old glass diverted from other purposes for this variety annually, would probably astound the most optimistic were it practicable to keep a complete record. That this rose held its own at Christmas so well in the wholesale markets all over the country, notwithstanding the increased production, is a striking testimonial to its overwhelming popularity. It is also worthy of notice that, as the reports come in from various sections, they indicate almost invariably the preference of the general public to buy the medium and choicer grades and an indisposition to take the inferior grades at any price. Since American Beauty came on the scene several new-comers have sought to divide the honors with it. The best that can be said of them is, "They also ran." Of all the roses now generally grown for cut flowers, American Beauty will in all probability be the last to fall.

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

Dear Sir: — I am in receipt of several copies of HORTICULTURE, and think it is just what is wanted; it is crisp and bright in all its details. — E. H.

Let me congratulate you at this late date for your successful launch of HORTICULTURE; it is a clean cut, up-to-date, good print, and everything else that is good, and the making of a valuable addition to what is already published. — P. B.

At first I was doubtful about subscribing for HORTICULTURE, but I cannot resist doing so now, it is so bright, so attractive, and I have no doubt that I shall look for every number with pleasure as I do in other three trade papers. Put me down as a subscriber until death us do part, or that I haven't a dollar to a my subscription, and then I'll call on you for one. I sincerely hope that this, the first forthcoming New Year for HORTICULTURE, may prove a very successful one. — F. J. F.

After Adjournment

Happy New Year!

"May prosperity never make us arrogant, nor adversity mean."

We wish all who read these lines, uninterrupted prosperity for 1905.

Only one dollar for fifty-two numbers of HORTICULTURE. Little for you, but if you all come in, it means much for us. Let each one do his share, and the more there are, the better paper we can give you.

A Worcester, Mass., daily paper, in an article on Christmas plants and flowers, gets itself tangled up after the usual fashion with reporters who venture into the domain of floral description. It tells us that "There are also freak roses, one of these being known as the bride. It is the result of a grafting made by a Worcester florist, who has not only produced a novelty in coloring, but a bloom that suggests three or four floral species."

Compliments of the season to the Worcester florists, who always were great people.

A Christmas Conservatory

I would tell of the surprise experienced on a visit to Mr. George McWilliam, gardener on the estate of Mr. George M. Whitin, Whitinsville, Mass., who has arranged his plants in exhibition form, and they make a gorgeous display, once seen, never afterwards forgotten. Among them are over one thousand spikes of calanthe, varying from thirty to seventy-five blooms on each spike (a low average is forty-five blooms on each spike). This means at least forty-five thousand blooms, open, of this chaste and beautiful orchid, of which nine distinct varieties are displayed. They are artistically arranged so that the whitest varieties are along the lower part of the benches, the pink ones being raised at the rear, with their graceful arching spikes curving inward, producing a rich blending of brilliant colors. Of cypripediums there are over fifteen hundred blooms intermingled in the display, the general effect being heightened by large numbers of Dendrobium formosum giganteum, some having bulbs thirty inches long, crowned with a cluster of twelve blooms, a perfect bouquet in itself.

For many years it was the general opinion that this plant became exhausted in three years, never to bloom again, but Mr. McWilliam has by careful study of its nature so upset this theory that he points with a good degree of satisfaction to plants now as vigorous as ever, in full bloom, which have been under his culture nineteen years and that have never once missed blooming. Some Lælia anceps and other orchids in smaller numbers are also in full flower, and there are over two hundred poinsettias, many bearing heads eighteen inches in diameter, also great numbers of Luculia gratissima, its full, round clusters making a grand display, while its peculiar rose madder tint of pink gives it distinction even among thousands of other pink blooms. Many plants of Linum trigynum, with their pure yellow flowers are a splendid contrast, especially as they are grouped in large masses.

Out of the Bean Pod

"And better had they ne er been born,
Who read to doubt, or read to scorn."

A new store under the title of "La Fleuriste" has been opened at 565 Tremont Street, Boston.

Acacias, snap-dragons, corn flowers and sweet peas were all seen in the Boston Christmas windows. As for the Hub, it is always true that

"Age cannot wither her, nor custom stale
Her infinite variety."

"California's botanical wizard is too practical to waste time on blue roses. He has already produced many valuable varieties of fruit, and even hopes to improve on the Boston bean." — *St. Louis Globe-Democrat.*

He simply cawn't do it. — *Boston Transcript.*

"After the forever-and-forever daisy has become perfected and the plants become common, it may be one of the most cherished of heirlooms. The man of family tree may, in future years, point to his little plant with pride, as he would to an old painting or a suit of armor." — *Boston Journal.*

"A man out on the Pacific coast claims to have found a flower that will not fade. We hope he will keep it there, and not try to get it grown in the East. If flowers were fadeless, all poetry and romance would have to be rewritten. "The Last Rose of Summer," and hundreds of others — how could we get along without these? And the florists, what on earth would they do for a living? — *Boston Record.*

Visitors in Boston — Edward Kirk, Bar Harbor, Me., and Chas. Fohn, Hartford, Conn.

A Correction

Mr. Finlayson calls our attention to some typographical inaccuracies in his Random Notes as printed in our last issue. In describing Cotoneaster "baywood-like leaves" should read "boxwood-like leaves." Climatic constitutions" should be "climatic consdition," and the "Countess of Bromarty" should be "Countess of Cromarty."

Anemone Japonica

The varieties of Anemone Japonica are among the most desirable of our hardy perennial plants. Commencing to flower in August, they continue to increase in beauty until cut down by heavy frost late in the fall, frequently flowering as late as the middle of November. They delight in soil well-enriched, dug over at least from eighteen inches to two feet deep and well manured with rotten cow manure. They will thrive in any sandy loamy soil; in fact, they will succeed in almost any porous soil, and when once planted under such conditions they can remain for many years on the same place without disturbing. I have known one group planted at Lenox, Mass., to remain ten years without being transplanted and having flowered every year from August until cut down by frost. When these plants are transplanted they will bloom the first year fully three weeks later.

I have found that in our Eastern states the plants will do decidedly better where they are protected from north winds. As hardy as they have proven, they must have a protection of a good layer of leaves, with long manure or hemlock branches to keep the leaves in place. This is done as soon as the ground is frozen. The protection is removed in early spring as soon as there is no more danger of heavy frost. During the hot and dry summer they should be kept well watered.

There are at that season no flowers that will give more pleasure and satisfaction for cutting and general decoration than the many varieties with varied colors that the grand collections of the present time afford. It seems to me very strange that in this country these beautiful and useful flowers have not found a more extensive field among the growers for cut flowers. In former years, say ten years ago, we were limited to three or four varieties, all of which are still in great favor, and at this time the family has grown very numerous.

Anemone Japonica elegans is the oldest, with broad leaves and pale rose-colored flowers which are three inches across and attain a height of four feet. It is, in fact, the strongest grower and a very profuse bloomer. This is also called rosea hybrida, and is very rarely seen among collections here. A. J. alba, also called Honorine Jobert, is a splendid variety with a profusion of large pure white flowers. The flowers are from two to three inches across, with a dense center of lemon-colored stamens. It is an invaluable variety and will always be in great favor for its prolific blooms. Anemone J. elegans rubra is a semi-double red, which is a great contrast with the above one. It is also a profuse bloomer and attains, as the above one, three feet in height. The Whirlwind also, a semi-double variety, pure white, is a strong and profuse bloomer, four feet in height and one of the best.

Lady Ardilaun is a very exquisite white with a double series of petals, with a strong stiff flower stem, but fails in profuseness of flowers. Lord Ardilaun is another beautiful, large white flower; the foliage and bloom are larger than the above, but is a shy bloomer. A. J. rosea superba, a great improvement over the variety elegans, bears flowers much larger, and is a profuse bloomer, three feet in height. A. J. Coupe d'argent, has double white flowers with strong and robust growth, and is a very distinct variety. Queen Charlotte, is a large, semi-double rose flower, underside dark rose, and is a very strong and robust grower. This was introduced by Mr. Pfitzer of Stuttgart, Germany, only four years ago.

A. J. Collerette, is a double creamy white imbricated flower, medium growth, A. J. Profusion, is a dwarf, profuse bloomer, with large, beautiful rose flower and is fine for an outside border. A. J. elegantissima attains a height of three to four feet producing a quantity of flowers with two rows of petals of a beautiful silky rose. A. J. Beauté Parfaite, is a large pure white of great merit.

A. J. Mont-Rosa bears flowers attaining three to four inches in diameter, well formed, of more than a hundred undulated, cucullated petals in a more or less regular disposition of four to five rows of petals, color a tender rose with the points rose carmine. A. J. Prince Henri, is a double red flower, one of Pfitzer's, two feet high.

A. J. Rose d'Antonne, is a new one, flower large, double, formed of forty petals in four rows, well imbricated; color, rose-lilac, on the reverse rose-reddish. It is a very fine grower about two or three feet high. A. J. Vase d'argent, is a variety with erect stem, flower silvery white with rose reverse, very large, nearly double, having nearly the form of a cactus dahlia. A. J. Soir d'été bears flowers very large, nearly double, with five to six rows of petals well imbricated, of a tender rose in the interior and purplish at the exterior. This is a grand new one. Another good new one is A. J. Turban, flowers having three to four rows of petals, rose wine color. This is a vigorous, profuse flowering plant. A. J. Le Nain Rose bears a large double, flat flower, color rose-lilac, punctuated violet. The plant is quite dwarf, very robust and vigorous, forming large clumps covered with a profusion of flowers. This is a very unique, grand, new variety.

The above described varieties with the exception of the three original Japanese and two varieties introduced by Pfitzer of Stuttgart have been introduced by the celebrated and successful hybridizer, V. Lemoine of Nancy, France. To him we are indebted for the many varieties which have proven so valuable to horticulture.

I am adding every new variety that is introduced. The reproduction of this class is a very easy one by root cutting. The proper time is during the middle of November. The divisions are placed in flats or pans in deep frame or cool greenhouse, and planted out at the end of April or beginning of May.

J. F. Huss.

Business Changes

H. G. Maxiner has opened business at 345 Pine Street, Williamsport, Pa.

H. H. Berger & Co., 47 Barclay Street, New York, has been incorporated.

L. K. Peacock, Inc., has been incorporated at Atco, N. J. Capital stock, $50,000.

Lloyd Swarthout, Washington, Pa., has disposed of his business to Jos. Seaman & Co.

The Aurora Greenhouse Co. has opened business at Aurora, Ill., under favorable auspices.

William Clark of Colorado Springs, Colo., has sold out his business to his son-in-law, J. B. Braidwood.

The Planters' Seed Company has opened business at Springfield, Mo., with Frank W. Maas as manager.

John Westere has bought out the South Chicago establishment of L. Mosback. The latter continues business at Onarga.

Van Aken Bros., whose greenhouses are at Coldwater, have opened a store in Elkhart, Ind., with Miss Jessie Sweatland in charge.

Frank Hamilton, for several years superintendent of Bronx Park, New York, has entered the Cottage Gardens Company as manager of its landscape and nursery sales department, having purchased a substantial interest in the concern. Mr. Hamilton leaves his duties at the park with the highest esteem of the park authorities, as evidenced by the congratulations extended to Cottage Gardens on their good fortune in having secured the interest of so capable a manager. The department will be materially strengthened under Mr. Hamilton's direction.

Greenhouses Building or Projected

MANVILLE, R. I.— George H. Thayer, one house.

List of Patents Issued Dec. 20, 1904

777,897, Cotton-Picking Apparatus, Barnwell R. Heyward, Albany, N. Y.

777,963, Weeder. Elijah Link, Piqua, Ohio.

778,089, Shears. Walter E. Wahlin, Fairview, Utah.

Copies of any of the above patents can be procured by sending ten cents in stamps to E. G. Siggers, patent lawyer, Station G., Washington, D. C., by mentioning HORTICULTURE.

At the meeting of the Illinois State Horticultural Society on December 15, Leonard Vaughan of Chicago read a paper on Commercial Floriculture, and William Toole one on Pansy Culture, making a welcome relief from the monotony of fruit talk.

News Notes

John J. Doyle of the Portland (Me.) Floral Company, is reported dangerously ill.

A water tank at the establishment of E. G. Asmus' Sons, Closter, N. J., was burned on December 20.

A greenhouse belonging to Mrs. Ewing at Riverdale Ave. and 235th Street, Kingsbridge, N. Y., was burned on the morning of December 22d. Damage, $1,500.

The greenhouses of C. Peseneker & Son, Jersey City N. J., were entered and robbed of the carnation blooms on Friday night, December 23, a little before midnight.

Fiancee and Cardinal, intended for exhibition at the last meeting of the Gardeners' and Florists' Club of Boston, arrived one day late, but in splendid condition, and as seen in the refrigerator at the Flower Market were a feast for the eyes.

Among the victims of the conflagration that visited Columbus, O., on the morning of December 21st, were Groff Bros., the florists, whose loss on stock and fixtures is estimated at $1000. Only partially insured.

A public project of great magnitude is under consideration by the city government of Springfield, Mass., and the N. Y., N. H. & H. railroad officials, which will mean the expenditure of approximately $3,500,000 in civic improvement, including the development of a picturesque park and boulevard on the shores of the Connecticut river.

VARIEGATED LAWSON

The "Variegated Lawson" carnation which is herewith illustrated, originated with W. B. Arnold of the Rockland Greenhouses, and is to be introduced by that gentleman this season. Exhibited at the meeting of the Gardeners' and Florists' Club of Boston last week, it was much admired and received a certificate of merit. A short time ago the garden committee of the Massachusetts Horticultural Society visited Mr. Arnold's houses and made a very complimentary report on the variety as they found it under cultivation. It has all the good points of Lawson with more fragrance and has never been known to burst.

News of the Clubs and Societies

At the next meeting of the Pittsburg and Allegheny Florists' and Gardeners' Club, Jan. 3, 1905, nominations of officers will be held.

The inaugural meeting of the Massachusetts Horticultural Society for the year 1905 will be held at noon on Saturday, January 7, at Horticultural Hall, Boston.

At the meeting of the Rhode Island Horticultural Society on December 21, Prof. F. W. Card gave a lecture on the San Jose scale and other insects injurious to fruit culture.

J. A. Newsham gave a talk on the new introduction in chrysanthemums at the December meeting of the New Orleans Horticultural Society. A handsome specimen of Adiantum hybridum was shown by C. W. Eichling.

The New Haven County (Conn.) Horticultural Society listened to a talk on hardy perennial plants by Charles Kern, assistant superintendent of parks, at its meeting on December 20. The report of the recent exhibition was presented and showed a balance to the good, which was very satisfactory. Election of officers takes place on the first Tuesday in January.

The program of lectures and discussions to be held at Horticultural Hall, Boston, during the season of 1905:

January 14. — "Some Recently Introduced Weeds." By Merritt L. Fernald, Cambridge.

January 21. — "Forest Planting for Profit in Massachusetts." By Theodore F. Borst, Boston.

January 28. — "General Discussion on Fruit." To be opened by E. W. Wood, West Newton.

February 4. — "Findings of an Orchard Survey in Western New York," with stereopticon illustrations. By Prof. John Craig, Ithaca, N. Y.

February 11. — "Dwarf Fruit Trees: their Uses, Propagation and Management." By Prof. F. A. Waugh, Amherst.

February 18. — "Bacteria as Fertilizers," with stereopticon illustrations. By Dr. George T. Moore, Washington.

February 25. — "General Discussion on Flowers." To be opened by J. Woodward Manning, Reading.

March 4. — "Some Aspects of Hardy Flower Culture." By A. Herrington, Madison, N. J.

March 11. — "The Return to Nature." By Miss Maud Summers, Cambridge.

March 18. — "General Discussion on Vegetables." To be opened by W. W. Rawson, Arlington.

The following are the awards made by the Garden Committee of the Massachusetts Horticultural Society for the season of 1904:

House of chrysanthemums arranged for effect with other plants — First prize, Mrs. C. C. Converse and Mrs. Lester Leland, Malden (David F. Roy, superintendant), $40; second prize, H. H. Rogers' estate, Fairhaven (James Garthley, gardener), $20.

House of chrysanthemums grown on benches — First prize, M. F. Plant estate, Groton, Conn. (Thomas W. Head, superintendent), $40; second prize, Mrs. C. C. Converse and Mrs. Lester Leland, Malden, $20.

House of palms and foliage plants — First prize, Joseph H. White estate, Brookline (James Wheeler, gardener), $30; second prize, Mrs. John L. Gardner estate, Brookline (William Thatcher, gardener), $20.

House of carnations — First prize, M. F. Plant estate, $30; second prize, Edward A. Clark estate, Jamaica Plain (William A. Riggs, gardener), $20.

House of roses — First prize, M. F. Plant estate, $30; second prize, Joseph H. White estate, $20.

In addition, gratuities of $10 each are awarded to W. G. Winsor, Brockton, for a dahlia garden; N. B. White, Norwood, for efforts in hybridizing and improving the grape; H. A. Stevens Company, Islington, for mushroom house, and T. D. Hatfield, Wellesley, for superior care in maintaining the standard of the Hunnewell estate.

Honorable mention is voted to Charles W. Parker for his estate at Marblehead Neck, and the Mrs. J. L. Gardner estate at Brookline is reported favorably on its first year's entry for the Hunnewell triennial premium.

The garden committee for 1905 has been appointed by the board of trustees, as follows: Oakes Ames, chairman; Charles W. Parker, Arthur H. Fewkes, John A. Pettigrew, Henry P. Walcott, William N. Craig, William P. Rich, George Barker.

Widespread and incessant publicity is to-day essential to success. Look well to your advertising.

SEEDLING ROSE

Raised by Peter Bisset

The seedling rose, herewith illustrated, is a cross of Liberty on Mme. Abel Chatenay raised at Twin Oaks, Washington, D. C., by Peter Bisset. The flower is a fine deep pink of unusual shade and is a good keeper. Mr. Bisset expresses the opinion that it will prove a good commercial cut flower variety, being a very free bloomer.

CHRISTMAS MARKET REPORTS

Holly, smilax, mistletoe,
Decorations, up they go!
Leave your irritation where
'Twill be comrade for your care;
Into trouble's ample pouch
Stow away your ugly grouch;
Leave behind your frown and scowl;
Put away each sneer and growl,
Angry fling and fretful word,
Put them where they won't be heard.
Holly, smilax, mistletoe,
Decorations, up they go!
No one wants amid such scenes,
Vinegar on Christmas greens.
—*Indianapolis News.*

Christmas in Boston

The demand for holly, laurel, pine and wild smilax and other kinds of Christmas greens was remarkable, far surpassing that of previous years. As in other markets, the average grade of holly was not up to grade, but the curtailment of the supply due to the demands of the railroads for advance guarantee of transportation charges left less opportunity for choosing, this year, and the stock was nicely sold at good figures. Considerable holly arrived too late also, and thus lost its market. This was due to the interruption of through New England traffic by the action of the Pennsylvania railroad. The Merchants and Miners proved to be the most reliable route for freight from the South.

In flowers the high-colored goods were, as usual, most in demand at the wholesale markets. The highest price obtained in Boston for American Beauty roses was $100 per hundred. From this they graded down to as low as $8 a hundred for inferior stock. Liberty was a fine seller, and while $50 a hundred was a good price for prime flowers, yet a few of the top-notch grade brought double this figure. Meteor and Queen of Edgely shared in the prosperity that came to colored material. Bridesmaid sold all the way from $3 to $25 a hundred, the best call being for the medium classes usually graded as extra and No. 1. The smaller stock, short stemmed, off-color or unfresh, was immovable; nobody wanted it at any figure. In fact, the choice grades had the call uniformly all through the cut flower list, even among the ordidary classes of buyers.

In carnations, the brisk demand extended over the entire week from Monday until Saturday. Lawson, all scarlets and dark reds had the preference at from $4 to $6 per hundred, and Enchantress and Fair Maid brought about the same prices although with less alacrity. White varieties moved slowly at $3 to $4 per hundred. The demand for violets kept well up with the supply all through the week, single having the call over the double varieties, the latter selling at from $1.25 to $1.50, while the former brought $1.50 to $2. Poinsettias as cut flowers were practically a failure. These are wanted only in growing form.

The usual stagnation existed in the bulb stock sale. Roman hyacinth had a feeble sale at $1.20 to $1.50 per hundred, with a few choice lots at $2, and paper white narcissi went about the same. Lily of the valley was not used to the extent of former years. The price ranged from $3 to $5. A few lots of yellow narcissi appeared in the market at the end of the week and were sold at $4 and $5. Smilax was not especially called for, neither did asparagus experience anything beyond the ordinary demand.

The above remarks, while applying primarily to the wholesale markets, about size up the situation from the standpoint of the retail stores, also. As heretofore, the flower sales were rather insignificant in advance, most of the activity being in the line of plants. White flowers were, as a rule, unsalable, lilies, hyacinths and white carnations being thoroughly stranded. Lily of the valley was the only white bloom that received any encouragement. The sale of violets was immense. These, with American Beauty roses led everything else in the popular estimation. The plant sales were larger than ever at Christmas, but the line was drawn at palms or other flowerless plants. Azaleas — the colored varieties — Lorraine begonias, ardisias and cyclamens had the lead. Poinsettias fell off considerably from their record and from the preparations made for them. Jerusalem cherries, which sold very well last year, fell behind-hand and the white azaleas, of which a few were used for the sake of contrast still remain in the store windows bearing mute witness to the public's prejudice against anything white at Christmas.

The weather was steadily cold and clear. "For this relief, much thanks."

Philadelphia Christmas Report

Beauty roses were in fine demand and 25 to 50 per cent better in price than last Christmas; quality very good; supply under the normal on account of some of our larger growers being off crop. Liberty was in equally good demand, and, like all red flowers, brought prices above the normal; many orders had to be cut 25 to 50 per cent and some late ones turned down entirely. Quality good; some extra fine ones brought $9 a dozen. Bridesmaids sold very well all through — much better than Brides did. Quality good, although not as good as in former years; I think these two roses must be deteriorating and that there will be need of new blood here soon; prices were about as good as usual. Golden Gate was in good shape and not over-plentiful and sold well at about the usual Christmas prices. There was very little salted stock among these or among any other varieties of roses. Pity the same cannot be said of the carnation market.

Red carnations were in great demand and very scarce; brought big money. Stroud's Flamingo were very fine and brought as high as $2 per dozen; other good sellers were Prosperity, Enchantress, Genevieve Lord, Lawson, and Harry Fenn. Fenn is a rattling good keeper and has become a great favorite among the retailers here; it is a trifle smaller than Lawson or Harlowarden, but is very bright, lively crimson and a steady bloomer. Whites hung fire, and were hard to move. Pinks went better. Some of the growers allowed the flowers to stay on the plants too long and they were soft when they got in. This is not "salting," but just as bad — perhaps worse. It would be far better to run short than to ship stuff to customers in that soft state — they look all right when delivered, but will probably be all asleep by morning. Now, with salting you can cut a green carnation and salt it away and it may open up all right and harden so that it will really keep better when delivered than the soft stock newly cut. This refers more especially to whites this year and only touches a few of the growers. Both sugaring and salting are bad practices that ought to be prohibited!

Lilies, only a few and all sold in advance; many more could have been sold. Roman hyacinths and narcissi went fairly well, but no advance in prices. Lily of the valley was fine and in good demand at normal prices. Violets nothing wonderful. Saturday was a bad day and nearly ruined the sale of violets; hurt them more than any other flowers. Cypripediums were in fair supply and demand; cattleyas, scarce and in good demand. Greens normal. Gardenias scarce; many orders remained unfilled.

Christmas Prices at Philadelphia

Roses: American Beauty, fancy and special, $75 to $125; extra, $50 to $75; Nos. 1 and 2, $25 to $40; Bride and Bridesmaid, extra, fancy and special, $15 to $25; 1 and 2, $3 to $10; Liberty, fancy and special, $60 to $75; extra, $20 to $40; 1 and 2, $8 to $15; Golden Gate, fancy and special, $20 to $25; extra, $10 to $15; 1 and 2, $4 to $8. Carnations: Lawson, $6 to $10; Enchantress, $10 to $12; other varieties, $4, $6, $8, $10, $12. Violets, $.75 to $2. Lilies, $20. Narcissi and hyacinths, $2 to $3. Lily of the valley, $3 to $6. Smilax, $15. Asparagus, $35 to $50.

Pittsburg Wholesale Cut Flower Market

Christmas Report

Everybody seems more than satisfied with the results of Christmas week's business. The sale of cut flowers was heavier than last year and all plantsmen and florists who handled plants report that plants sold very well and at better prices than previous years. The wholesalers feel elated over business in general. The weather Friday and Saturday was most disagreeable.

In cut flowers fancy stock was not plentiful, and as usual not near enough red of any sort of cut flowers to go around. The home product of roses and carnations was never better; stock came in fresh and of good color. The prevailing prices of Friday and Saturday on roses were: American Beauties, special and fancy, $75 to $100; extra, $60 to $70; firsts, $30 to $45; seconds, $15 to $20. Brides and Bridesmaids, special and fancy, $18 to $25; extras and firsts, $12 to $15; seconds, $6 to $8; culls, $3 to $4. Liberty, specials, $30 to $40; extras, $20 to $25; firsts and seconds, $10 to $15.

Carnations, Enchantress and fancy red, $10 to $12, Lawson, $6 to $10, lower grades, according to quality, $3 to $6; culls, no demand at any price. Violets, $2 to $3; single violets, $1 to $1.25. The only stock on which there was a glut was Roman hyacinths and the lower grades of the poorer varieties of white carnations.

The market on holly and trees was poor. On Friday and Saturday holly of fair quality was sold as low as $.65 per case, and trees 3 for $.25.

CHRISTMAS MARKET REPORTS

Christmas at Baltimore

Good roses of all kinds were scarce. There was an abundance of carnations of all colors except red; these were of insufficient supply. Notwithstanding the extremely bad weather, Baltimore florists assert that they experienced the best average business they ever had. Monday and Tuesday of this week sees a continued scarcity of all cut flower stock, due to the continued rainy weather. Christmas prices were as follows: —

Roses: Beauty, fancy and special, $75; extra, $50; Nos. 1 and 2, $15 to $25; supply short; Bride and Bridesmaid, $6 to $15; Golden Gate and Ivory, $6 to $15; Perle, $4 to $8. Carnations: Lawson, $5 to $8; Enchantress, $6 to $8; others, $3 to $6. Violets, single or double, $1 to $1.50. Lilies, $10 to $18. Narcissi, $2 to $3. Roman hyacinths, $2.50 to $3. Lily of the valley, $3 to $4. Smilax, $15 to $25. Asparagus, $25 to $50.

Buffalo Christmas Market Report

Christmas trade as a whole was satisfactory. Good pink, white and red roses, and same in carnations were short in supply. American Beauties and Violets moved slow. Bulbous stock cleaned up fairly well, and other miscellaneous flowers sold at fair prices.

There was an over-supply of holly, roping and loose
and also Christmas trees. Ground-pine — roping and loose — also laurel roping, sold fairly well.

The plant report from the retailers seems to be very encouraging. They claim that cut flowers are too high, that the public takes more to plants, and you can't blame them, when you see some of the pickled stock that comes in, in the line of carnations and other flowers.

Buffalo Wholesale Cut Flower Prices

Buffalo Christmas prices were as follows: Roses: Beauty, fancy and special, $75; to $100 extra, $50 to $60; Nos. 1 and 2, $25 to $30; plenty of them; Bridesmaid and Bride, fancy and special, $15 to $18; extra, $10 to $12; 1 and 2, $6 to $8; Liberty, fancy and special, $20 to $25; extra, $15 to $18; 1 and 2, $10 to $12; Golden Gate and other varieties, $6 to $15, according to grade. Carnations: Lawson, $4 to $8. Enchantress, $6 to $8; others, $3 to $5; Violets, $1 to $2. Lilies, $10 to $15. Narcissi and hyacinths, $2 to $4. Lily of the valley, $3 to $5. Smilax, $15.

Louisville's Christmas

The week past was one very satisfactory in every particular, Christmas trade being up to expectations. Carnations of extra quality were in evidence, but only in fair quantities. Roses of choice quality were easy to get, and sold satisfactorily. Violets were of good quality, but being in poor condition, of course did not sell very well. Hyacinths and narcissus sold very well in large quantities, the quality having been very good. Lily of the valley and mignonette were also heavily demanded. Some Lorraine begonias, cyclamens, azaleas, etc., were selling very well. Christmas greens were fairly demanded, and there was no trouble in getting satisfactory quantities.

The Society of Kentucky Florists will hold its regular meeting the night of January the third. It was suggested that a Bowling Club be formed, and this will be considered at this meeting. New officers will be installed, and a large attendance is hoped for. The meeting will probably be held at one of the stores.

There is only one kind of advertising that is wise. It's the kind that makes business. Cut out the rest. . . . .

NEW YORK'S CHRISTMAS FLOWER TRADE

The week previous to Christmas saw a very light traffic and, as the shipping trade is practically dead in this center, no incentive to any material advance in values was given until Saturday, when, towards evening, things began to wake up. At the finish the market was cleaned up in good shape and, although there was a certain amount of stock left unsold, yet there was no cause for fault-finding on the part of growers or wholesalers, and so far as the retailers were concerned, they took good care not to overload on anything that could be supplied at short notice from the wholesaler's lockers. One of the causes contributing to the generally satisfactory result was the fact that but little "pickling" was practiced, the shippers sending in their crop in fair quality right along as it became ready. This commendable purpose not to either overload or strip the market at any period. During the day of the 24th, no unusual demand was apparent, and a large quantity of stock was disposed of at moderate figures and a rather quiet air pervaded the entire wholesale district; but the fact of all this stock having been cleaned up helped to ensure a good market for the evening shipments. It was then seen that prime Bridesmaid and Liberty roses would be readily disposed of and these, as well as American Beauty, cleaned up splendidly. Beauty had been selling cheaper than was the case one year ago, but considering the prices that prevailed previous to Christmas, the final result ought to be very pleasing to the growers of this rose. Carnations were in very heavy crop all through the week and it was impossible for the wholesalers to reach the prices of 1903 on any line, but at the close only the white ones and a few odd varieties were left over to prove that everything will not go — even for a holiday.

Color was wanted. Bride roses consequently hung fire as did also Paper White narcissi and Roman hyacinths. Other than the demand for color it cannot be said that any unusual tendency manifested itself toward anything in particular. The great leader in the cut

WANTED: Consignments of High Grade Carnations.

flower procession was, as usual, the American Beauty rose, Bridesmaid and Liberty following. And it is not too much to say that carnations and violets held their own. Lily of the valley did fairly well, but much of it was rather soft and had to be unloaded cheap.

Among the mentionable things seen on "the street" were some fine Lilium lancifolium rubrum at Raynor's, said to have been grown by Louis Schmutz, also H. A. Spavins' scarlet seedling carnation "Mrs Wood," carnation Estella at J. K. Allen's, which proved itself to be a model Christmas scarlet, Ulrich Brunner roses at Traendly & Schenck's, fancy carnations as big as dahlias at John Young's, and some remarkable phalænopses at W. S. Allen's. The prevalent prosperity extended as well over the 29th St. and 30th St. wholesale marts and in the other direction to the 26th Street markets, where in the early morning hours an old-fashioned rush was experienced. And so, for once, a merry Christmas came to all.

The Christmas Plant Trade in New York

Superlative language would be required to adequately describe the Christmas plant trade of the great metropolis for 1904. A peculiar and very satisfactory feature of the business was the way in which it was distributed over several days instead of coming in all at once as on some past occasions. The quality of plants was excellent on every side. So good were they that, by common accord, as it were, the store florists refrained from any effort to improve them by the addition of trimmings; using only the piece of ribbon so dear to the heart of femininity, to suggest the holiday idea. As to receptacles, the variety of styles and material was very limited, especially in the high-class stores. There were some natural twig baskets and boxes in which little orange trees, Primula obconica, and some other things looked most charming, "Russian" boxes made of rough, gray material in imitation of weather-stained wood, in which mixed plants appeared quite at home and, among the unusual things, there were blooming cattleyas in regulation orchid baskets. But the main receptacle used was a pot basket of either red or green straw braid. Of crepe paper, mats and similar pot-covering material very little was in evidence. Bells and other artificial things were also in noticeably small use in the fashionable sections of the city

The variety of plants offered was not different, materially, from that of one year ago, except that the proportion of Lorraine begonias was much larger. The other leading staples were poinsettias (in pans) of varying heights, azaleas (mostly pink or red) in various sizes, Erica melanthera, ardisias, oranges, primulas and orchids. The latter were represented by calanthes, cypripediums and cattleyas mainly. A good many plants dependent upon their foliage for their beauty were used, particularly in the mixed baskets as shown by those enterprising firms, McConnell, Dards and Stumpp, who set the fashions for the swell up-town folks. Among these were dracænas, pandanuses, small palms, ferns, etc. Touched up with a plant or two of cypripedium insigne or Spicerianum, a few holly twigs, and a dash of red ribbon, they were all right. Imported hollies were seen in great abundance.

CHICAGO CHRISTMAS MARKET REPORTS

Christmas Greens

Bouquet green in bulk was ample for the demand and prices ruled generally steady. Wreathing was all used. Mistletoe found a fairly ready sale, although the medium quality, of which there was a good deal, dragged and many barrels had to be sold below the cost of freight. The holly business proved to be a holly famine. Those who counted on seeing big consignments of this material about the markets, as had been the case in recent years, were left out in the cold. The shortage on holly was more keenly felt than any other feature of the holiday business. Prices jumped from $6 up to $9 a case on Saturday, but it could not be supplied at any price.

Holiday Plants

As expected, Chicago's holiday plant trade was extremely large. Many more and better grown plants were seen than ever before. Large azaleas, largely Vervæaneana and Simon Mardner, were offered in fair quantity, and the retailers report not one left over. Heather was also in good supply and found ready buyers. Other plants furnished in greater or less numbers were cyclamens, poinsettias, primulas, ardisias, crotons, dracænas and Gloire de Lorraine begonias, the latter in much better quality than last year. An increased demand for plant arrangements is reported by the retail stores, also a preference for the larger sizes of plants.

Cut Flowers

Receipts of cut flowers were generally light. The out-of-town demand was about the same as last year. Local demand was never better. The best grades in every line were called for. On American Beauty roses, the supply was considerably below the call. Fancy grades of the tea varieties received also a heavy call and some orders had to be refused. Liberty was the scarcest item in the cut flower list. Violets were never better in quality and the supply was heavy. On Saturday afternoon prices dropped to $1 per hundred for the best double, and on Monday they could not be moved. Carnations experienced a very heavy demand, and the retailers found no fault with the prices asked for the select grades. A remarkable feature of the late market was the rally on white carnations, whereby stocks were completely cleaned up. The demand for any kind of carnations was so great on Monday morning that it had the effect of developing the highest prices of the season. Orchids commanded an increased call. Lateness of delivery at McKellar's, the leading orchid house, caused a considerable shortage and many more could have been sold had they been received on time. Poinsettias found a ready sale. There was some superb stock received, bracts measuring from eighteen to twenty-four inches in diameter, on stems five to eight feet long. Tulips are appearing in this market and are quickly picked up. Muir had some fine Yellow Prince with perfect flowers and fair stems, grown at his 35th Street place. A large local tulip forcer reports that La Reine is forcing very slow this season, coming without flowers. There was the usual disposition to pickle stock but, despite the depleted market and brisk demand, buyers refused to take old stuff, and consequently it found its last resting place in the garbage barrel.

Chicago Wholesale Cut Flower Prices

For Christmas Week, Dec. 19 to 26.

Roses: American Beauty, fancy and special, $80 to $100, enough to fill all orders; extra, $75 to $90, scarce; Nos. 1 and 2, $40 to $65; Bride and Bridesmaid, best, $15 to $25; medium, $8 to $12; lower grades, $4 to $6, all cleaned up; Liberty, best, $20 to $25; medium, $15 to $18; lower grades, $8 to $12, no picked stock of this item; Meteor, Golden Gate and Chatenay, best, $15 to $18; medium, $8 to $12; lower grades, $4 to $6; Chatenay in great demand.

Carnations: Lawson, $4 to $10; Enchantress, $6 to $10; other varieties, $3 to $8. Lilies scarce at $16. Narcissi, $3 to $4. Roman hyacinths, $2 to $3. Lily of the valley, $3 to $5. La Reine tulips, No. 1, $6; No. 2, $3. Mignonette $4 to $12, splendid quality. Violets, single, $.50 to $2; double, $1 to $3. Adiantum, $.75 to $1.25. Asparagus plumosa, $35 to $50. Smilax, $12 to $16. Cattleyas, $50 to $100. Cypripediums, $15 to $20. Poinsettias, special, $50; extra, $30 to $40; short stem, $12 to $25.

In writing above advertisers, kindly mention HORTICULTURE

Rose Killarney

Dr. Robert Huey, who is one of the best amateur rosarians in this country, states that Killarney is the finest ever-blooming outdoor rose we have to-day. This variety was sent out by Alexander Dicksen & Sons in 1898, and is described by them as follows: —

"A charming rose of robust growth, and free branching habit; the blooms are large, the buds very long and pointed, petals very large and of great substance; color, flesh, shaded white suffused with pale pink; a lovely and distinct rose of great merit."

Dr. Huey says that last summer with ordinary attention in the open ground he could gather some roses from Killarney every day during the summer. A. B. Scott, of Robert Scott & Son, thinks this is the best rose for the amateur that we thus far have. It is reported that Messrs. Dreer are to make a specialty of it the coming season.

Benjamin Dorrance of Wilkesbarre has quite an extensive lot of it under cultivation for cut blooms, and ships heavily to the New York market, where the variety has a good standing and is freely handled by the leading retailers.

Advertising costs good money. We are doing our best to make it remunerative to our patrons.

There is only one kind of advertising that is wise. It's the kind that makes business. Cut out the rest.

Please send us the names of your Friends who might be interested in

Horticulture

and we will Send to Each a Sample Copy

WANTS

Advertisements in this column one cent a word. Initials count as words. Cash with order. One insertion free to any gardener or florist seeking a situation.

FOR SALE—One of longest established rose-growing establishments within five miles of Boston. For particulars, inquire at office of HORTICULTURE, 11 Hamilton Place, Boston.

WANTED—Good photographs of Park, Garden or Conservatory planting, interior or exterior of greenhouses or salesrooms, new or well-grown plants, novelties in flowers, floral decorations, etc., etc.

Address HORTICULTURE,
11 Hamilton Place, Boston.

ASTERS

The Two New Varieties :

Benthey's White **Benthey's Pink**

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite asters in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever.

PRICE LIST:

Trade Package, white or pink, $1.00 — 1-4 oz. white or pink, $2.50
1-2 oz., white or pink, . . 4.50 — 1 oz., " " " 8.00

NEW DAISY

Queen Alexandra

We are now booking orders for delivery during the latter part of February for this charming new form of Chrysanthemum Frutescens or Paris Daisy, an introduction from South Africa, and a plant which should prove desirable both as a cut flower as well as a pot plant.

The illustration shows three forms of flowers which appear on the same plant. The double and semi-double form are not unlike an Anemone-flowered Chrysanthemum.

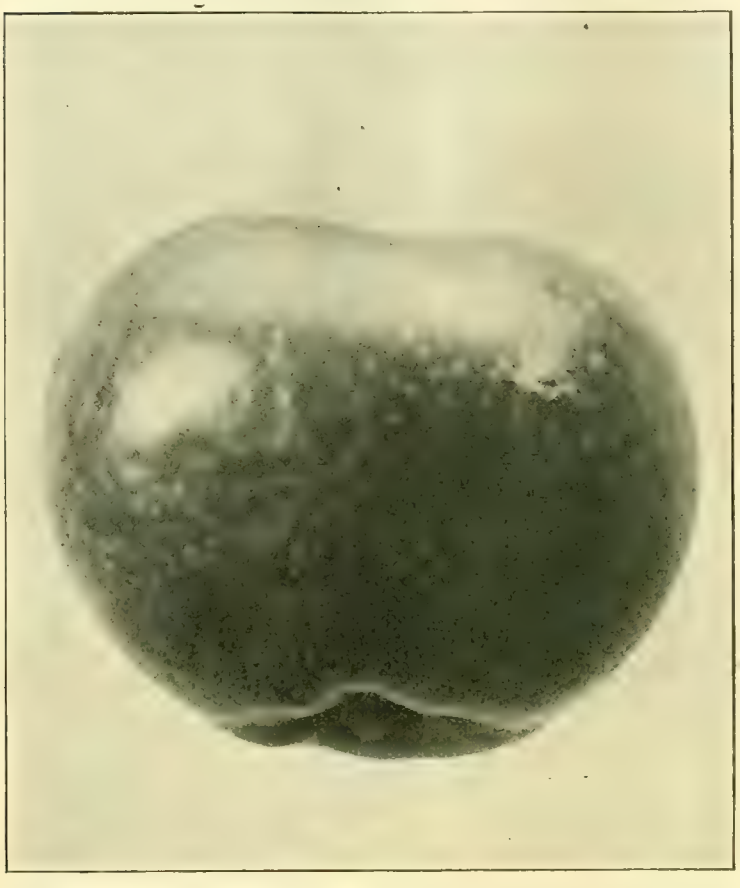
VARIEGATED LAWSON



A Sport from Mrs. Thos. Lawson, awarded First-class Certificate of Merit by the Massachusetts Horticultural Society.

The fall shows proved the Lawson blood still ahead. You need this one. The best variegated on the market. Color, snow white, striped carmine, very distinct. Calyx much better than its parent. Very fragrant. Fine seller. Has very pleasing color effect. Free grower and bloomer, like its parent. House in full crop 10 weeks after planting. Cuttings guaranteed first-class. Prices: $2.00 per doz.; $10.00 per 100; $80.00 per 1000. 50 at 100 rate and 250 at 1000 rate. Delivery in rotation, beginning at once.

First-class Certificate, Boston Gardeners' and Florists' Club.
Cultural Certificate, Massachusetts Horticultural Society.

ROCKLAND, MASS.

An Experiment with One Thousand Seedling Apple Trees

Some fifteen or twenty years ago, the writer purchased one thousand two-year-old seedling apple trees, for the purpose of budding them, and when the budding season came around I was too busy to do it, and the next season it was the same, and after that they had become so large I thought I would let them grow up and fruit and see what the result would be.

The result was as follows: — some commenced to bear at eight years old, others one and two years later. As they came into bearing I was surprised to find that three-fourths of them were sweet and that a large majority of them were yellow striped with red, mainly of medium size, but a few were large and from the one thousand trees tested, I was able to select five that are large and of very good quality and worthy of cultivation. They cover all of the seasons: summer, fall, winter, and spring, of both sweet and sour apples.

The accompanying life-size photo is of one that I have named "Winter Gravenstein," as it very much resembles the "Fall Gravenstein" in color, size, and quality, but is a long-keeping apple. The tree is exceptionally hardy and vigorous. I have one tree budded from it that is five years old, from the bud, that stands fifteen feet high and is twelve feet broad; the trunk is five inches in diameter near the ground. This tree has borne fruit two years, commencing to bear at three years from the bud.

When I read that a California nursery company tested sixty thousand apple seedlings and failed to get one tree worthy of cultivation, I feel that I have been quite successful.

R. B. White

Mr. White has no trees for sale.

The apple shipments from Boston for the past week aggregated 12,316 barrels, taken out by the steamers Cymric and Columbian. For the corresponding week last year the shipments aggregated 18,542 barrels.

Beautiful Grounds

An Illustrated Manual containing suggestions on Lawn Making, Planting and care of Shrubs and Trees, with names and descriptions of varieties hardy and of merit. Also information regarding Landscape Plans, Topographical Surveys, etc.

A book you will often refer to. Send for it to-day. Free on application.

PETERSON NURSERY
No. 501 W. Peterson Ave., Chicago, Ill.

Outdoor Art and Craft

It is said that Charles M. Schwab contemplates turning over to the Board of Education of Staten Island some one hundred and fifty acres of land to be used for open-air playgrounds for New York and Brooklyn schoolboys and girls, for whom steamers will be furnished to transport them. $250,000 will be expended on improvements by Mr. Schwab, and the city is expected to also expend a substantial sum.

Pine Banks Park, a beautiful tract of pine woodland comprising about seven hundred acres, in Malden and Melrose, Mass., which was owned by the late E. S. Converse, has been presented by the Converse heirs to the two towns for perpetual park use, on condition that they assume jointly the expense of its care. It will make one of the finest parks in the state. During Mr. Converse's life he spent a fortune on it in road building and maintenance and it was always open to the public for any reasonable pleasure. It is understood that the gift now made is in accordance with his wishes.

The proposed metropolitan park system for Providence, Pawtucket and the Blackstone valley, in Rhode Island, is a very comprehensive scheme whereby much of the natural beauty still remaining in this densely populated district will be preserved, and accessible recreation spots be provided at various points connected by parkways in a manner similar to the metropolitan reservations about Boston and upon plans following in a general way that of the Boston Metropolitan System. The territory thus provided for covers an area of about eleven miles by seven, in which are the valleys of nine rivers, the shores of Narragansett Bay, and some twenty ponds and lakes, the population being at the present time 350,000 people.

Colorado Springs has taken a stand against the Christmas tree, which should interest the whole world. At the present time the United States government, through the forestry department, is replanting the entire southern slope at Pike's Peak with native trees. Statistics gathered by the chamber of commerce of Colorado Springs showed that over 100,000 evergreen trees were used yearly in the state of Colorado for the Yuletide celebration, and 5000 in the city. The age of the tree cut for use all over the world varies from 15 to 25 years.

The effect of the annual removal of 100,000 young trees, or the covering of 500 acres, is of vast importance to the water supply. It is more than probable that the removal of these 100,000 trees means an annual reduction of from seven to ten cubic feet of the conserved water supply, which, from a commercial standpoint, is worth much more than the selling value of the trees.

The campaign started, resulted in numerous families sending East for artificially manufactured trees. The small forests close to the city of Colorado Springs were afforded police protection before Christmas. — *Boston Herald.*

Hot-House Grape Vines

ALICANTE, berries large, round, large bunch. Late keeping.

APPLEY TOWERS, fine black sort, following Black Hamburg. Excellent flavor.

BLACK HAMBURG, the most popular grape in cultivation. Berries large, roundish-oval, juicy and rich.

GROS COLMAN, monstrous, round berries, juicy and sweet. Not good until fully ripe in late autumn.

GROS GUILLAUME. Barbarossa. Berries large, and round, juicy and sweet but rather flat flavor. Very late.

MADRESFIELD COURT, berries very large; of true muscat flavor. Rich and excellent.

LADY DOWNE'S SEEDLING, large oval berries of rich aromatic flavor. Dark purple. One of the best late sorts.

MRS. PEARSON, large oval berries, transparent golden color. Luscious and juicy.

MUSCAT OF ALEXANDRIA, generally esteemed the best white grape. Berries large, amber yellow. Delicious flavor.

Strong Planting Canes; each $3.50

Lily of the Valley

ASTERS

The Two New Varieties:

Benthey's White

Benthey's Pink

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite asters in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever.

PRICE LIST:

Trade Package, white or pink, $1.00 **1-4 oz. white or pink, $2.50**
1-2 oz., white or pink, . . 4.50 **1 oz., " " " 8.00**

THE BEGINNINGS OF HORTICULTURE

Ancient picture of a garden. From a tomb at El Bersheh, of the early time of the Osirtasens of the twelfth dynasty, about 4,000 years ago.

In these modern days, all the nations, even the half-civilized ones, are devoting themselves to horticulture. Yet there must have been a time when this science was not known, when mankind was satisfied with such flowers or fruits as nature gave without cultivation, when even the simplest methods of growing were not understood. In searching among the records of antiquity the writer of this article has become convinced that to ancient Egypt the world owes a great debt for its establishment of scientific methods of flower and fruit growing, for its foundation of horticulture among the sciences of the world.

The antiquarian might suspect the fondness of the Egyptian, five thousand years ago, for flowers, since he could find them used as architectural devices on some of the oldest temple buildings. On some of these the capitals of the columns are bell-shaped representations of the head of the full-blown papyrus, while others are ornamented with figures that picture the buds of certain water-plants.

This index of the Egyptian's inclination towards flowers is a true one. Just as at present no banquet is considered complete without its floral decorations, so in ancient Egypt the dinners were enhanced with many flowers. And they gave very respectable dinners, those dwellers on the banks of the Nile, five thousand years ago! Music, dancing, rich perfumes, wines, jugglers and entertainers, and flowers, were there. When the guest arrived (the dinner was generally given at midday) he received lotos-flowers and garlands for his head and neck, his head was bathed in perfumed ointments, and he was given wine in a silver cup. When the guests were assembled the host and hostess took their places at the head of the room, seated in a large double-chair. The Egyptians did not recline at their banquets, as the ancient Romans and Grecians did, nor did they sit on the ground as many Orientals do to-day, but they sat in chairs exactly as Europeans do at present. If any of the guests had walked to the house, their feet were bathed in perfumed water and rubbed with ointments, which were brought in silver or even golden basins. All the guests washed their hands before sitting down to the banquet.

And now the garden furnished its store of treasures Maid-servants came to each guest, just before the meal, bringing fresh-cut flowers; and this proceeding was repeated at the end of the dinner. The garden was also drawn upon for a variety of vegetables, for the ancient Egyptians had many dishes of vegetables, both with and without meat, at their banquets. Even the poor enjoyed many varieties of vegetables cooked in various ways.

And now let us study something of the methods of horticulture and agriculture, fifty centuries ago. The plough was not unlike the implements used to-day, and it was sometimes drawn by slaves, although more frequently by oxen. The furrow was probably a shallow one, as the soil was very rich and received a top-dressing every year in the fertilizing mud left by the annual inundation of the Nile. Yet the old Egyptians occasionally used nitre or the excrement of the pigeon-house when they grew watermelons. Sometimes the plough was dispensed with altogether and the wet mud scratched with bushes, which were drawn over it before throwing in the seed.

Their grain was threshed by oxen, driven over the corn, which was spread out on a hard floor; and as the

beasts trod it out, the laborers all sang a working-song (the Egyptian was always singing) which ran, —

"Thresh for yourselves, oh oxen!
Measures for your masters,
Measures for yourselves!"

Many of the priests, who were generally rich, had costly villas, and they entered into mundane pleasures with considerable zest; in fact, they formed the upper circles of Egyptian "society." They often had large and beautiful gardens, laid out with considerable taste and at great expense. There were large avenues of trees and reservoirs of water at convenient intervals. Although channels conducted the water to many parts of the estate, the flower-garden was watered by slaves who carried primitive watering-pots or jars, as is seen in the picture given herewith.

The picture is taken from a very ancient tomb at El Bersheh, and is probably over 4,000 years old. From it we learn the manner of strewing the seed and the trimming of plants. We see also that there were flower-pots almost exactly like our own, forty centuries ago. In the upper right hand corner we find a variety of vegetables or fruits, one specimen of which looks very like a pineapple.

The flower-beds were generally laid out in squares and the greatest care was lavished upon their cultivation. The Egyptians had a great reputation for skill in floriculture before the Christian era. Even after this time they maintained their supremacy in this field, for Athenæus, who probably wrote in the second century, A.D., says, —

"While other countries only produced them in small quantities at any season, Egypt had at all times of the year the greatest abundance of roses and violets, and many flowers were obtainable there even in the midst of winter."

The vineyards were trellised very much as they are in Italy to-day. There were olive, pomegranate, fig, date, and other fruit trees in the orchard.

There was one very odd custom in gathering the figs from high trees; boys were sent to the topmost branches, and these were often assisted by *monkeys*. The ancient Egyptians were noted for their skill in training animals, but perhaps the most startling instance of this is found in their training monkeys to do a practical manual labor such as gathering figs. The fruit, when gathered, was placed in baskets of exactly the same flat shape that is used for the better varieties of figs to-day.

Every morning the owner of the estate would walk in the garden, with his guests, and the flower-beds were always placed near the house, that they might be easily accessible to such visitors. The master generally had a dog with him in his promenades, if the ancient pictures tell a faithful story, — and their veracity has never been impugned.

All in all, the ancient Egyptian seems to have been the chief florist of the ancient world, and it is not improbable that he was the very first scientific gardener that the world possessed, although ancient China also had some skill in this domain. Yet the Chinese never seem to have attained the variety of growths achieved by the Egyptians, and certainly never made such copious use of flowers as was constantly done by the wealthy, on the banks of the Nile, ages ago. From all of which we believe that the reader will conclude, as the author has done, that horticulture began in ancient Egypt.

Louis C Elson

FERNS

PTERIS SERRULATA CHILDSII

PTERIS SERRULATA WINSETTII

PETRIS SERRULATA CRISTATA

FORMS OF PTERIS TREMULA

The genus Pteris contains many good and hardy decorative plants. It is the only one where true silvery white variegation can be found; all these variegated and glossy-leaved species show much better their color when grown in the shade. In other respects the most are of easy culture and require no special treatment.

In general, the fruiting fronds do not differ much from the others. They are sometimes longer, more erect and the leafy part more narrow on account of the edge being curled up as the indusium so covers the spore cases which are disposed in a long line at the edge of the pinnæ or pinnules.

All the Pteris are easily grown from spores. Pteris serrulata and its many forms are the best known and the most used. It is a native of China, but naturalized in many places. P. s. angustifolia, P. s. corumbifera, P. s. cristata, P. s. compacta, P. s. gloriosa, P. s. polydactyla, etc., are all forked and tasselled forms. If the spores of a few of these ferns are seeded together, there is much chance to have lots of different forms in one seed pan.

PTERIS STRAMINEA (CRISPA)

P. s. gracilis and P. s. tenuifolia have the leaflets narrower than the type and are of very elegant habit. P. s. Winsettii is a very interesting form with the fronds irregularly cut and dentated and crested. P. s. Childsii is the best of all, I think. It is one of Veitch's introductions and has its fronds larger than any others They are deeply dentated and undulated, with the top slightly crested and make beautiful big plants. I have never seen any fertile fronds and it has to be propagated by division. Pteris cretica and its forms are much used, also, and liked for their abundant shining green foliage. It is a native of the Mediterranean coasts, of South Africa and Central Asia, and is found in different other places.

P. c. Ouvardii or major is a very distinct form, of great decorative value. The fronds are erect and much bigger, undulated and on long stems.

P. c. albo-lineata, from Japan, which is so attractive with the silvery white center of its leaflets, has many digitated and crested forms which when seeded together give a lot of abnormal forms.

Pteris quadriaurita, found all over the tropics, is the green form of the more popular P. q. argyrea which was introduced from India. Its decorative qualities need not to be praised as they are well enough known.

Pteris longifolia, another popular fern that grows wild all over the semi-tropical world, is very decorative with its long simply-pinnate fronds. P. l. nobilis is a gigantic form that comes from the South Sea Islands. The fronds are of the same form, but much longer and broader. P. l. Mariesii, from Asia, is a very nice bushy plant, smaller, and the pinnæ narrow, a little undulated, of a light green color and of drooping habit, but not so hardy.

Pteris ensiformis or crenata, from Asia, is of erect habit, very hardy, but not as decorative as its variegated form, P. e. Victoria, which is very attractive. Its barren fronds are short and prostrate and larger than the fertile ones which are erect and much longer than in this type. They are nicely variegated with creamy white in the center of the fronds.

Pteris tremula, from New Zealand, is another popular and much-used fern. There are a few forms from it in cultivation; P. t. flacida with narrower leaflets, P. t. foliosa with larger leaflets. There are some with branching and tasseled fronds, the most popular of these being P. t. Smithii with compact and crispy fronds; when propagated from spores, gives often different forms. I have raised a dwarf one that looks like a bunch of parsley.

PTERIS PODOPHYLLA

P. t. densa is a new form of erect habit. The fronds are very crispy and heavily crested. A very distinct and attractive plant.

Pteris straminea or crispa, from Chili, is a good hardy, decorative fern of an erect habit. The stem is of yellowish color and long; the leafy part grows upwards, twice divided and dentated, and has a crispy appearance.

Pteris aspericaulis, from India, resembles much P. quadriaurita in the form of the fronds but they are shorter and of more compact habit. The young fronds are of claret-red color and turn bronze before they take on their bright green color. Pteris tricolor (P. aspericaulis tricolor) is regarded as a form from it. It was imported from Malaysia and is without question the jewel of the Pteris family. It likes to be grown in a stove house to show its bright colors. The young fronds are of a bright rose or purplish-red color; when old, the outside fronds are dark green with the center silver gray and the ribs purple. It is really a beautiful plant, but it fades in apartments.

Pteris scaberula from New Zealand, is a very nice hardy little fern, about twelve inches high. The fronds are finely cut and grow from a creeping thin rootstock. It looks like a davalia. It grows well in hanging baskets as in pots, preferring a cool and somewhat dry situation.

Pteris arguta and Pteris flabellata look much alike. The first is from West African Islands, the other from South Africa. The fronds are about two feet long of soft thin texture and a light green color.

Pteris Moluccana, from Malaysia, is a very tall-growing and ornamental fern. The fronds are cut in long, narrow strips of bright green leathery substance.

Pteris umbrosa, from Australia, has fronds two to three feet long, of a drooping habit, of dark green and strong texture.

Pteris laciniata, from West Indies, is quite distinct in appearance with its fleshy and very heavy stems. The leafy part is thin and covered on both sides with hair and is of a very light-green color.

Pteris Wallichiana from Japan and Himalaya is a robust growing species, the leafy part on top of a long stem divided in three big pinnæ, the two lower of which are divided once more, giving the frond a star-shaped appearance. Pteris podophylla, from West Indies, is cut the same way as T. Wallichiana, but the texture is stronger and the rootstock is erect, while in the other it is creeping. Both are large growers, the fronds two to three feet long and very ornamental.

Pteris hastata and Pteris adiantifolia, which are correctly Pellæs, are natives of South Africa. They are well known and used too. Their fronds, with large adiantum-like pinnæ are of good effect for decorations.

There certainly are many more Pteris. The list would be too long to enumerate here. The section Doryopteris ludens, nobilis, sagittifolia, palmata, etc., are very interesting and decorative for stove houses, but of little durability for decorative purposes.

Amedee Hans

Hybridizing the Native Grapes

"The grape, the longest known, the earliest cultivated of all fruits, when and where did it originate? 'Neath what suns did the first grape-tendril twine into rich luxuriance? What hands gathered its first luscious berries? Who can tell?

"Long before research folded back the curtains of time, long before the breath of history crystallized incident and event, the 'amethyst clusters' of the grape ripened under sunny skies. Veiled in myth, clothed in the shades of the past, gleaming from legend and fable, it comes to us breathing suggestions of sylvan deities, Greek festivals, and Egyptian rites. Biblical figures rise before us as we ponder on its origin, and kings, whose very names are now forgotten, crowd by on time's remotest blue."

The earliest account of grapes being found in this country is from the Ancient Northmen, who came to this country about the year 1000 and found so many grapes that they filled their long boats with them and named the place Vineland, which place is supposed to be Massachusetts and Rhode Island. The next is from the early settlers. The Pilgrim Fathers saw vines in abundance at Plymouth. "Here are grapes, white and red, and very sweet and strong also," wrote James Eward Winslow in 1621. Rev. Fr. Higginson, writing in 1629 from the Massachusetts Colony says, "Excellent vines are here, up and down in the woods!" But as the country became settled more, many of the settlers who had been accustomed to eating the foreign grapes (Vitis vinifera) were not satisfied with the native species, and attempted to substitute the vinifera species.

In 1630, a London company sent French vignerons into the Virginian Colony to plant grape vines which they had imported for the purpose; the poor vignerons were unjustly blamed for their failure.

In 1633, William Penn vainly tried to introduce and cultivate European varieties in Pennsylvania. In 1790, a Swiss Colony, grape growers from Lake Geneva, tried to raise grapes and to make wine in Jessamine County, Ky., but their hopes were soon blasted; their labor and fund $10,000 were lost; and only when they commenced to cultivate an indigenous grape, they had somewhat better success. About twenty years later (1820) the "Catawba" and "Isabella" were introduced, and supposed to be pure native grapes of Labrusca species. These two varieties may be considered the principal pioneers of American grape culture; but although excellent in quality and successfully grown at that time in many localities, they did not satisfy those who were acquainted with the superior quality of the European grape and did not fully meet the demands of refined taste. Hence the introduction and planting of foreign grapes was still looked for; the attempt with German, French, and Spanish vines made again and again, proved failures. Hundreds of thousands of the best European vines were imported, but they all perished. Thousands of failures are recorded and not one of success, and grape-growing on a large scale east of the Rocky Mountains was abandoned until the advent of the Concord grape about 1850. A grape of fine appearance and of fairly good quality, hardy and prolific, and to-day is planted over a greater extent of territory than any other grape in the world. More widely disseminated than any one variety ever should be, there is no one variety that will succeed everywhere, and the Concord when planted in the South and Southwest fails to give satisfaction.

The Concord is a pure Vitis Labrusca, a northern species that is limited to a comparative small extent of territory. This limitation to the successful culture of different species had not been recognized by grape growers until the dissemination of the Concord. A fact that should have been learned from France, where there are some fifteen hundred varieties grown and only about a dozen grown in the same locality. The knowledge of this fact has led experimenters to improve the native grapes in different parts of the country by crossing and hybridizing, which method has been attended with marked improvement. A combination of our native grapes with a slight infusion of vinifera (European) blood is giving us grapes that are better for the table than any of the best California productions, and as large and beautiful in cluster as the accompanying photograph is evidence.

R. B. White

A good advertising medium is an indispensable commodity. We hope to attain that distinction.

"A long pull, a strong pull and a pull all together," —for advertiser, buyer and us, means success for all.

GRAPES UNDER GLASS

Grape-growing indoors will not be practised to such an extent perhaps in this country as in the old country, on account of so much fruit being available from outdoor cultivation, and improved facilities for keeping the same. Yet there is quite a demand for the better kinds of grapes, shown by the willingness of a certain part of the public to pay from $1.50 to $2 per pound for them.

The fact that graperies are the exception rather than the rule, gives the impression to some that there are great difficulties in grape-growing under glass, and as a fact, generally speaking, only gardeners who have had an old-country training know much about this branch of the work, yet there are few things which better repay the care and attention bestowed on them.

On getting a grapery the first thought is, I must import canes. Yet if one can get vine eyes of the varieties he wants, nothing is easier to grow, and a cutting inserted in bottom heat in January will be ready to plant in the border by May, and will grow fully better than a cut-back imported cane which ofttimes gets started into growth on the way over.

I select good, firm wood and cut about ¾ inch above eyes and 1 inch below, inserted in thumb pots with a soil nearly all sand, plunged in a good brisk bottom heat, but the tops should be as cool as possible with the idea of keeping them from starting into growth before rooting. When rooted they grow rapidly, and good fibrous loam with plenty of bone meal they revel in.

Vine borders are best with concrete bottoms and good drainage and the border should be all inside, as they can be better controlled as to moisture at all times. Outside borders in this extreme cold climate are expensive, a great care, and not necessary. Much has been written on formation of borders that it is unnecessary to say more than that it cannot be made too good, but only part at a time, thereby ensuring fresh feed for the growing vine. A word here as to depth of border: generally they are made 3 feet deep, yet with a good width 2½ feet would be ample, and with a very retentive soil perhaps less. The idea that with good drainage you cannot over-water a vine border is very erroneous; in fact, the principle is the same as with a pot; first ascertain if it needs it, then give sufficient. I always try with a fork to see the condition of the border before watering. A good watering before starting should carry them until growth has well started.

As to manures for grapes there are many, but if I was tied to one it would be Thompson's vine manure. I like some variety and I think dried blood, bone, and cow manure, with perhaps a little nitrate of soda, just when finishing swelling to give extra size, will cover the ground pretty well. I have heard, too, of very good results from Brazillian plant food but have not used it.

Blood and bone is very safe to use and gives fine color to foliage and fruit, and with a fine grade of bone is very available.

A liberal manuring with the annual top dressing and some at every watering up to coloring, after they have set, is none too much, as the vine is a gross feeder. As soon as they start coloring it should be stopped.

As to varieties, the most popular is, without doubt, Muscat of Alexandria; next is Black Hamburg, and the later varieties, though better keepers, are not so good flavored, though Gros Colman is a great favorite with gentlemen.

The frontispiece illustration is a bunch of Black Alicante which weighed nearly six pounds and some of the shoulders were taken off at thinning time to make the bunch more symmetrical. This grape is a good keeper, a fine showy bunch, but not so well liked as Lady Downes or Gros Colman, the latter a fine grape when well finished, but requires a long season.

The pests of the grape are mealy bug and red spider. The first with the hydrocyanide fumigation should be easily subdued, and the latter with a good force of water should be easy to handle.

Perhaps a word as to setting the fruit. I find that with a free circulation of air and not too high temperature, I never had any trouble with setting the fruit, even Muscats. I sooner lower the temperature during setting than raise it, and all I ever did besides tapping the vines daily, was during a fine, bright day, to just draw my hand over the bunches, and give a fine, sharp dash with the syringe.

W. DOWNS.

TELEPHONE, OXFORD 292.

Cypripedium Insigne

Our method of culture of this old time favorite is as follows: Our plants are grown on the north side of the cool house the year round, underground glass, and are only shaded about three hours each day by a large tree growing near the houses. The temperature in winter is about 45 degrees at night. For potting we take rough peat and a little loam and charcoal, using pans for the larger plants and pots up to six inches. During the growing season abundance of water is given with the hose every day, but after the flower spikes are well advanced the quantity is much reduced, and after the flowers are open the plants are kept quite dry till about the end of January. We then repot the plants that require it and give more water as the days get warmer.

For feeding we use Clay's Fertilizer about once a week, diluting one 3-inch pot of the fertilizer with two gallons of water. We have had plants in 5-inch pots with seven flowers, and 6-inch pots with ten flowers, but the best specimen we have ever grown was exhibited at the December meeting of the Pennsylvania Horticultural Society. It was grown in a 12-inch pan and bore thirty-one flowers.

The main points in the culture of cypripediums is good drainage, keeping dry during the winter months, and the free use of the hose and a liberal amount of feeding during the growing season. JNO. THATCHER.

Luculia Gratissima

This beautiful flowering plant is one of the most useful subjects we have at the Christmas holidays. Their color and fragrance make them in much demand for house decoration. Under artificial light they show at their best. Their culture is as follows: When the plants are through flowering they are pruned hard back and the prunings used for cuttings, after which the plants are then stood in a cool, light place and syringed daily until about the first of June, when they are planted out-of-doors. Land well-manured for vegetables is a good place to plant them in. The cuttings will have been rooted and in small pots ready to plant out with the old plants. If they grow well, they need pinching about twice.

The plants should be lifted about the last of August or the first of September and potted in rather small pots. Soil mixed for carnations with a little sand added suits them well. After potting they should be kept in a moist close frame or house and given water freely. With a light shading for a few days they soon take root in the new soil, after which they are hardened off gradually to about 50 degrees at night. When the flower buds are set, the temperature is raised 5 or 10 degrees at night. The pots are well filled with roots by this time and then they should get weak liquid manner at each watering until the flowers expand. The plants should be put in a cool greenhouse a few days before using for dwelling-house decoration, using water freely. When in the dwelling-house they require frequent and copious waterings.

The general effect of the plant in bloom is that of a rich pink hydrangea, but the individual flowers are longer tubed, much more graceful, and the fragrance is rivalled by but few flowers.

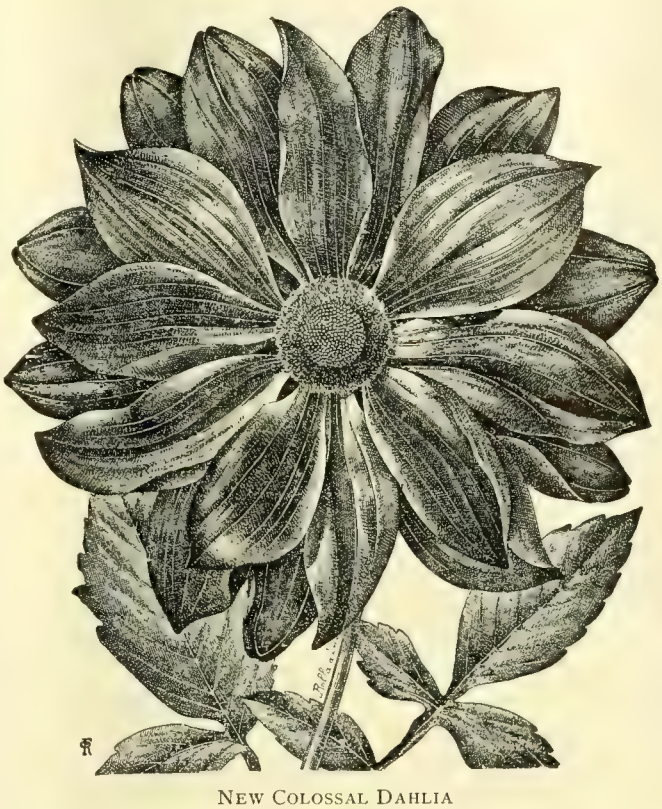
The Editor Has His Say

Simultaneously with the good news that violets made a grand Christmas record, comes the story that a number of the Rhinebeck growers are preparing to build additional violet houses in the spring. Rhinebeck evidently sleeps with one eye open.

Belated holiday reports from various points confirm the conclusions drawn from those earlier received, that, while under a suddenly augmented demand, certain varieties may run a little short, yet no pronounced scarcity in cut flowers is possible under present conditions of production.

Read our advertising columns. The list of sterling novelties offered in this issue should interest deeply any florist or gardener who expects to shine in his profession. It is many years since two such worthy forcing roses as Richmond and Wellesley have been placed before the growers. The latter is advertised herein for the first time but, like the first-named, it has passed the scrutiny of good judges and is booked as a winner in the commercial class. In ordering, you can help HORTICULTURE by saying that you saw the advertisement in its columns.

It is evident from the recent decision of the Agricultural Department at Washington, that the recently organized Massachusetts Association for the Suppression of the Gypsy and Browntail Moths will have to assume practically the whole burden of fighting these pests for the coming season, at least. With a general and hearty coöperation on the part of the people they should accomplish much, but, unless we are much mistaken as to the gravity of the situation, the national government will be compelled to tackle the problem eventually, and the longer it is deferred the bigger the job will be.



That the poinsettia is destined to lose its popularity as a Christmas specialty, as suggested in the holiday reports from some sections, seems very unlikely. Local conditions, such as the quantity grown or the quality or price of the goods, may bring temporary fluctuations, but a subject so bright and appropriate for the holiday season is not likely to go into permanent retirement. Pressed for an explanation of the poinsettia's decadence, they tell us that it "does not keep," or "the foliage drops." Undoubtedly the true reason, and directly traceable to unwise treatment by the grower or its subsequent owner in every instance, for if properly grown and intelligently cared for after delivery, neither of the above-mentioned troubles may be looked for. Doubtless, in the case of growing plants in pans, which have become so popular within a few years, the relapse is often due to disturbance of the roots at too late a date. Transplanting should always be done a sufficient length of time ahead to give the roots opportunity to get well-established.

On another page of this issue we present a view of the Auditorium in Chicago, where the American Carnation Society will hold its meetings and exhibition on January 25th and 26th. The effect of the change of date from March to January on the attendance and the exhibits will be watched with interest. The higher value of cut blooms in the market at the earlier date will make the cost to the exhibitor greater, but the benefit to the dealer in rooted cuttings will be considerable. As to the weather and risks of delay in transportation from distant points these cannot possibly be much worse than they have been in the past. The Carnation Society has been singularly unfortunate in that respect. All will wish it better success this time, and no grower who aims to advance should stay away from this meeting.

If the old saying is true that "God helps those who help themselves," then there would seem to be a fair prospect for Divine assistance in the work of saving the trees of New England from destruction by the moth pests, for there is a very evident determination on the part of the cities and towns in the infested districts to "help themselves." Undismayed by the refusal of the agricultural department at Washington to help fight the foes of the trees, nature's most beautiful adornment, the various communities of Eastern Massachusetts have taken up the work energetically, and liberal appropriations are made with that resolute unanimity so characteristic of the native of that section when he gets aroused. The devastation that can be wrought by the brown-tail and gypsy moth pests needs to be seen to be realized. Words are inadequate to tell the full story.

SOME NOVELTIES OF 1905

So many new sweet peas have appeared of late years that we have become shy of them. Eckford's yearly half-dozen has attracted attention and has usually contained one or two improvements. Of these, King Edward VII, bright crimson, and Dorothy Eckford, pure white, are recent acquisitions, thriving well in this country, while coccinea, the nearest approach to scarlet in sweet peas, and of most charming color, is ruined by sun-burning. Gladys Unwin, a strong growing sort of English origin, with pale rosy pink blossoms, usually four on a stem, is likely to meet with favor. It is of the lovely shade of pink so much in demand, and its vigorous constitution is likely to stand by it here.

NEW COLOSSAL DAHLIA

Begonia Bedding King is a new variety of the gracilis type from France, growing ten to twelve inches high, very similar in habit to Begonia Erfordii, with small round greenish-brown leaves, and densely covered with delicate pure white flowers. In France it is considered the best white sort for bedding.

There is also a new red-flowered form of Begonia Erfordii.

It is rather surprising to find the functionaries of a botanical garden engaged in producing variations of popular florists' flowers; nevertheless, to those of the municipal botanic garden of Lyons, the beautiful Parc de la Tete-d'Or, must be given the credit of the two latest forms of dahlia. Four or five years ago, the Collarette class, of which President Viger was the forerunner, appeared; now comes a race called "Colossal" because of the enormous size of the single and semi-double flowers, some of which have reached the size of 8¾ inches in diameter. The petals are remarkably wide, giving the flower the appearance of single or semi-double Chinese pæonies. When we recall the many new varieties of roses, carnations, cannas, and other florists' plants for which we are indebted to the enthusiastic and skillful horticulturists of Lyons, it is not to be wondered that even the botanical gardener catches the spirit of experiment so dominant in his locality and keeps a wonderful collection of what are termed florists' plants for purposes of hybridization.

Among the less important introductions may be mentioned Campanula persicifolia Pfitzeri, a double or semi-double form after the style of C. Moerheimi, in blue; Calliopsis grandiflora, Golden Fleece, in the flowers of which five or six strap-like petals appear in the center, giving a fleecy appearance; Centaurea Imperialis gigantea, a giant Sweet Sultan from Italy, with large white flowers on stems two and one-half feet in length; Dianthus laciniatus mirabilis, a German variation of single fringed Japan Pink; Helianthus cucumerifolius albus, said to be pure white; Salpiglossis Emperor, yellow, forming a large bushy top on a single stem, and Schizanthus hybridus grandiflorus, a dwarf-growing form of this now popular annual, with large orchid-like flowers almost two inches in diameter, and likely to prove useful for pot culture during winter.

Agents for HORTICULTURE are wanted in every community. Liberal commissions to active workers. Write for information.

Treat Your Trees Now

Now that the trees are bare there is an excellent opportunity to treat them (especially fruit trees and shrubbery) for that most pernicious of pests, the San José scale. There are thousands of people who are careless of their trees and fail to examine them — the result being an almost certain death to their property unless treated in time. H. A. Surface, the Economic Zoölogist for the State of Pennsylvania, strongly recommends the lime-sulphur-salt wash in a recent bulletin, and gives the following as a reliable formula for this remedy:

Salt, 15 lbs.
Sulphur Flowers, 20 lbs.
Lime unslaked, 30 lbs.
Water, 30 gallons.

These ingredients are boiled together in enough water to keep them boiling for at least three-quarters of an hour, and then enough water added to make the mixture equal to sixty gallons. Mr. Pease, the California scale inspector, says it must be cooked at least three hours and that the more cooking the better.

Another remedy is the lime-sulphur-soda wash, which is a little more expensive, but less troublesome to prepare, as it requires no boiling. Caustic soda of at least 86 per cent strength is necessary. Jacob Rife, West Fair View, Pa., has had excellent results with the following formula:

Caustic Soda, 4 1-4 lbs.
Sulphur Flowers, 17 lbs.
Lime unslaked, 33 lbs.
Water, 50 gallons.

Some authorities are of the opinion that good whale-oil-soap properly applied is still a good remedy, although it has been to some extent lost sight of during the exciting hunt for new cures. If we remember correctly, Dr. Van Fleet is an advocate of this soap and he is a close and reliable observer. One thing is sure in the latter connection: the caustic element in whale-oil-soap will dissolve the scale under which the insect lives, and a subsequent application of some active insecticide would then become effective. It is the hard outer shell that makes all kinds of scale insects so difficult to reach.

Municipal Improvement

In looking through the "Proceedings of the Twentieth Annual Convention of the Society of American Florists and Ornamental Horticulturists," I find several things of considerable interest, among which I may specially remark the paper by Mr. J. A. Pettigrew of the Boston park system, on "Home and Municipal Improvements." Mr. Pettigrew there touches one of the problems which is profoundly agitating the larger municipalities of this country. It is one, too, in which Washington, though perhaps considerably behind some of her neighbors, has at least taken a very decided and very gratifying action.

The thought of "beautiful Washington" has taken deep root in the minds and hearts of many who are officially concerned with the growth and welfare of the city. Your readers are doubtless familiar with the plans which have been made to encircle the present city with an immense park system. Some of these plans may possibly never materialize, and in any event their consummation will be a matter of many years; but it shows the trend of public opinion here as elsewhere on the immense public benefits that accrue from a well-developed park system.

The question of playgrounds for children has been taken up for the past two or three years in a decidedly earnest and effective way by a public playgrounds committee composed of private citizens organizing of their own volition. A number of playgrounds have been successfully established, and the matter is being brought to the attention of our District commissioners and to members of Congress who compose the committees on the District of Columbia.

School gardens have also been established, both in a private and in a semi-public way, and the gardening features of children's education have been brought forward through other mediums than schools. Vegetables, flowers, and ornamentals, as vines, etc., have been successfully and happily grown by a large number of children. I have had a very strong personal interest and connection with this movement, and feel that we have seen the successful beginning of what will eventually become a great movement in this city.

In view of these facts it is especially gratifying to note that the Society of American Florists and Ornamental Horticulturists will meet this year in Washington. We feel that the presence of this very influential organization will give an added impetus to the good work which is being done here, and for that reason as well as for many others we shall be glad to give them a hearty welcome.

Carleton R. Ball

Asst. Agrostologist.

Poppy or French Anemones

ANEMONE CORONARIA — THE BRIDE

A few years ago an enterprising Boylston Street (Boston) florist created quite a demand for these charming spring flowers. His method of cultivation was to insert the hard, corkey tubers imported from Europe for the purpose, between the plants in his violet houses during November and December, and by the time the violets became exhausted the anemones were in full bloom. The second crop came along without detriment or interference to the violets and afforded the florist a unique line which charmed his customers and gave him good return in cash.

It does not seem to be generally understood how easily the anemones can be bloomed out of doors in the early summer. For this purpose they should be planted in a well-manured bed, early in April. The best situation is one exposed to the morning sun only — they should not have the sun after ten o'clock. They should be watered freely until they have stopped blooming, when no more water need be given. By the end of August or September the tubers will have made their growth and may be dug up, dried, and stored away for replanting the following spring. They do not survive the winter if left in the ground in our climate. For florists' use or forcing, it is better to get the tubers in separate colors, white, blue and scarlet; the single are less expensive than the double sorts and are really to be preferred. A very interesting race of Poppy Anemone is the St. Brigid strain with large semi-double flowers. It originated in Ireland and is largely grown to cut for the London market. A singular characteristic of the Poppy Anemone is that the tubers when properly ripened and dried retain their vitality for several years.

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

HORTICULTURE has certainly improved with each issue and everyone bespeaks praise for it. — W. W. L.

I have received HORTICULTURE, and find it a most creditable publication, which should and doubtless will receive the hearty support of the seed trade. I think it will compare most favorably with any of the older publications devoted to similar industries. — W. C. L.

DUBLIN, IRELAND. — I have very great pleasure in sending you inclosure for one year's subscription to your beautiful paper. It is everything that a high class trade journal should be and deserves success. It is full of the go and life of things American, and I hope to be a life-long subscriber. — W. C.

After Adjournment

What is the difference between a beautiful city and the "city beautiful?" Our civic improvement friends seem to have a special proprietorship in the latter. The former is good enough for us.

Worcester, Mass., florists are still flirting with the reporters, judging from the statement in the *Worcester Telegram* that "The poinsettia, a plant not known in Worcester a week ago, has had a big call, 5000 plants having been sold within the past five days."

On the day following our publication of the picture and advertisement of Mr. Arnold's "Variegated Lawson," F. R. Pierson Co. purchased the entire stock. We modestly refrain from making any claims, but — advertise that new carnation of yours also in HORTICULTURE and see what will happen.

We learn from our Denver, Colo., correspondent that "as all work and no play makes Jack a dull boy," the boys will likely turn their attention to bowling now in their *spare* moments, as a four-team league is in progress and some nice prizes are offered. Mr. Mahan with his old war-horses may not, however, have everything their own way.

Two calendars have reached our office this week, either of which "Might shake the saintship of an anchorite." The first, from the Leo Niessen Co., is an American Beauty with a Philadelphia poise.

"Her face so fair
Stirred with her dreams, as rose-leaves with the air."

The second, from George E. Dickinson Co., is a whole bunch of American Beauties, each a "special" of choicest New York grade,

"A beautiful thought, and softly bodied forth."

Personal

Mr. J. N. May is reported as again very ill, at his home in Summit, N. J.

Hugh Roak, son of George M. Roak of Auburn, Me., was married on December 28, to Miss Helen M. Dingley.

John Spalding, the veteran florist of New London, Conn., observed his ninetieth birthday anniversary on Christmas.

President A. F. Estabrook of the Massachusetts Horticultural Society is about to start for Porto Rico for a two months' absence.

Miss Edith Adams has taken the place recently vacated by Miss Viola Smith in A. N. Squire's flower store at Naugatuck, Conn.

Friends of Mr. William Scott of Buffalo, will be pleased to hear that he is recovering from his recent illness, and is able to leave his room.

Harry A. Bunyard, the popular veteran on the road, has accepted a position as travelling salesman for A. T. Boddington. "Children, get busy."

Among the Boston people reported seriously sick during the past week are W. F. Molloy, salesman for the Budlong Company, and Barney McIntee of the Montrose Greenhouses.

William A. Black of Boston, Mass., who made many friends and much renown last season as a decorator, with Foster & Foster, at the Royal Poinciana, Palm Beach, Fla., has returned there for the present season.

W. P. R. Pember, landscape architect, was married to Miss Amy G. Hewett at Highlandville, Mass., on January 2. Mr. Pember is a graduate from the Massachusetts Institute of Technology and the office of Guy Lowell. He goes to take charge of the landscape department of Green & Weeks, Buffalo, N. Y.

Our Buffalo correspondent reports that since September they have had but little rain. The streams are low, and farmers are having difficulty in getting sufficient water for their stock. This unfortunate lack of soil moisture is liable to seriously damage the ornamental evergreens about the city parks, etc., though the thaw now promised may bring relief, as the ground is but slightly frozen.

Agents for HORTICULTURE are wanted in every community. Liberal commissions to active workers. Write for information.

Outdoor Art and Craft

Waltham, Mass., has appropriated the sum of $300 for the purpose of moth destruction.

$30,000 is the amount asked for by the Park Commissioners of Worcester, Mass., for park maintenance for 1905.

The sum of $500 has been appropriated by the aldermen of the city of Lowell, Mass., for the use of the park commission in fighting the brown-tail tohm.

$27,809.96 is the amount paid up to date by the commission for land for the Mt. Tom Park Reservation in Hampshire and Hampden Counties, Mass. This represents an average cost of $20.70 per acre.

The Massachusetts Association for the Suppression of the Gypsy and Brown-tail Moth has begun business in a very practical way by undertaking to make every member of the legislature a member of the association.

The park commission of Holyoke, Mass., in its annual report complains of lack of funds for park work of pressing importance, and recommends appropriations for the coming year amounting to $66,000. Last year's appropriation was $7,400.

Business Changes and New Establishments

G. G. Roth has closed up his greenhouses at Chatham, N. J.

A. B. Lewis has opened a new store at 78 North Saginaw Street, Pontiac, Mich.

A new flower store at 239 O'Farrell Street, San Francisco, Cal., by the Misses Kretman.

The business conducted heretofore by the Brooks sisters, Sorrento, Fla., will be carried on hereafter by Miss Ada J. Brooks.

L. A. Spoden, Erie, Pa., has removed to the new greenhouse built on the Mrs. W. Niemeyer property, 23d Street and Parade.

E. J. Bush, formerly of Charlotte, N. C., is now manager of the Riverside Park Nursery recently started at Morganton, N. C.

J. H. Williams, a well-known New York rose grower, has gone to Kalamazoo, Mich., to take charge of the Dunkley greenhouses.

H. A. Cook, of Shrewsbury, Mass., has taken his son Morris E. Cook, into partnership, and the firm name will now be H. A. Cook & Son. Young Mr. Cook is a graduate from the Massachusetts Agricultural College.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

G. H. Hunkel will open a seed store at 327 Chestnut Street, Milwaukee.

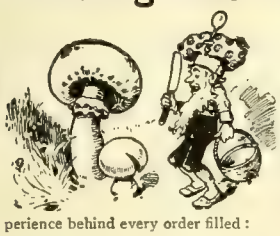
The executive committee of the American Seed Trade Association will meet in Cincinnati, O., on Tuesday, January 10.

W. Atlee Burpee has gone on a trip to Mexico, to rest and recuperate after the strain of getting out the season's catalogue.

W. C. Rickerts, Thorburn & Co.'s popular representative, is booked for an extended trip through Long Island territory, early in the season.

FINE CINERARIAS

It is not often one sees good cinerarias nowadays, but that they are still grown and well grown, was made pleasantly manifest to us the other day on visiting the greenhouses of Mrs. C. Vanderbilt at Newport. Mr. Pow has a hundred or more of as fine plants in six and eight inch pots as we have seen in a long time, and what seems surprising in the growing of these plants is that the greenhouse without shade was their only habitation from the time the seed was sown until flowering, whereas in days gone by it was considered imperative in order to have good cinerarias that they should be grown in cold frames with the sashes sloping to the north. Cinerarias, like most other things, to do them well, need constant attention, but if results like that attained by Mr. Pow are not worth some little trouble, we know not what is.



Catalogues Received

T. S. Hubbard Company, Fredonia, N. Y. Illustrated list of Grape Vines and Small Fruits. Several pages are devoted to valuable instructions in the planting and culture of hardy grapes.

Burpee's Farm Annual for 1905. Up-to-date as ever. Three colored plates that make one long for seed-sowing time to come, also a series of interesting views in the offices and work rooms of the Largest Mail Order Seed House in the World.

Julius Roehrs, Rutherford, N. J. A descriptive list of orchids, stove and greenhouse plants, exotic and tree ferns, palms, azaleas, boxwood, bay trees and flowering shrubs. The list of orchids for commercial purposes is particularly complete. Illustrations and press work are far above the average of commercial catalogues.

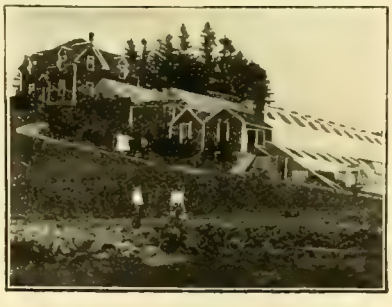
Pansies in Winter

It is an uncommon experience among those who grow flowers commercially, to raise the same flower year after year, to repeatedly increase the glass



area and the product, to do this at a profit and still remain the virtually exclusive grower of the flower in question. Such, however, is the experience of W. C. Ward of Wollaston, Mass., whose range of houses together with the interior of a house appear in the accompanying cuts. Twenty-one years ago, when Mr. Ward grew his first pansies with heat, for cut blooms, a house 50 × 10 was large enough. He has now three 100 × 20 span-roof houses and a lean-to 50 × 10 filled with pansies for forcing, and was unable to cut flowers enough to fully meet the demands of his Christmas trade.

Two cold houses and a number of sashes bring his total output up to nearly twenty times that of his first year. It takes about twelve thousand plants to fill the houses. Particular attention is necessarily given to the selection of varieties possessing the qualities essential to the commercial cut flower, *i.e.*, length of stem size and markings of bloom. Great care is also taken in the selection of self-colored varieties, the demand of the trade being for comparatively distinct colors bunched separately; white, yellow, purple, blue and lavendar are put up and sold in bunches by themselves.

"I find that although there are not enough pansies brought in by other growers to materially affect the market, I am obliged to constantly improve upon my own efforts along these lines," was a statement made by Mr. Ward to the writer. The remark brought with it the suggestion that if one wishes to hear the band play, he must keep up with the procession, and this was a fact realized and made use of by the speaker.

When pansies can be picked from frames, the supply, of course, eoes not come exclusively from any one grower, but during tee forcing season there are few brought to Boston except those bo Mr. Ward. By close observation of cultural necessities as well as of the conditions and demands of the market, he has been able to keep the supply up to the demand, especially towards spring. He has had a good deal of

stem rot this season and many plants have had to be replaced, but the houses at the present time are in a generally healthy condition with the prospect of an ordinarily prosperous season and the inevitable new house in the near future.

NEWS OF THE CLUBS AND SOCIETIES

The Hartford Florists' Club presented Theodore Wirth with a handsome desk chair at its last meeting.

The New York State Fruit Growers' Association will hold its annual meeting at Geneva on January 10th and 11th.

The Western Association of Wholesale Nurserymen has changed its title to The Western Nurserymen's Association.

The annual dinner of the Florists' and Gardeners' Club of Rhode Island will take place at Providence on January 12th.

The next meeting of the New York Florists' Club will be held on Monday evening, January 9th. Officers will be installed and other exercises of more than ordinary interest are in store. Don't miss it.

Installation of officers will be in order at the inaugural meeting of the Gardeners' and Florists' Club of Boston, 17th inst. President-elect Wheeler is entitled to a rousing reception and will get it, beyond a doubt.

Visitors at the December meeting of the Horticultural Club of Boston were A. Montgomery, Jr., and R. J. Montgomery of Natick, Mass.; Thomas Roland, Nahant; Edward Kirk, Bar Harbor, Me.; C. U. Fohn, Hartford, Conn.

Bulletin No. 2 of the publications of the Municipal Art Society of Hartford, Conn., is received. It is devoted to the subject of the Grouping of Public Buildings, on which twelve papers by eminent writers are given. A number of views and diagrams illustrate the text.

The first annual banquet of the Monmouth County Horticultural Society was held at the Sheridan Hotel, Red Bank, N. J., on Thursday evening, Dec. 22. Patrick O'Mara was toastmaster. The toasts and speakers were as follows: "The Incoming President," George H. Hale; "The Outgoing President," William Turner; "The Secretary," Harry A. Kettel; "The Financial Secretary," George R. Kuhn; "The Treasurer," Wellington W. Kennedy.

Thomas W. Head was re-elected president of the New London-Groton, Con., Horticultural Society at the annual meeting, December 26. The president will deliver a lecture on the Cultivation and Diseases of the Pear at the next meeting. At the following meeting the San José Scale will be the subject for discussion. Much interest is evinced in Norwich in the work of this society and a considerable accession to the membership is looked for from that city.

All the horticultural and agricultural societies in the state of Rhode Island are about to unite in one grand federation.

This movement was inaugurated some little time ago by the Rhode Island Horticultural Society in Providence, and afterwards eagerly taken up by all the kindred societies in the state.

That the contemplated union will be of much benefit to all concerned is freely admitted; with this feeling dominant more cordial relations may also be expected, and if ever again some ruthless invader in the guise of a friend, and enjoying our hospitality, after a not too hurried retreat, slyly attacks any of us, our resentment will be mutual, and if means of retaliation be not within the reach of one, they may be within the reach of the other. Foreigners nor yet greenhorns should not make what they term 'subsidized societies' their butt of attack until they have made themselves familiar with the ways of the country.

That there should exist in nearly, if not in every, state in the Union an agricultural college or experiment station is not at all surprising, but it is a matter of surprise that in the equipment of many of these colleges very little provision is made for the furthering of the interests of horticulture or farming under glass.

As an instance of this neglect we can refer to the Agricultural Experiment Station at Kingston, R. I., where despite petition after petition to the Legislature to provide a suitable greenhouse, there is only what we may call a shanty, a disgrace to the state.

In order, if possible, to remedy this state of affairs, the Newport Horticultural Society is this year taking the lead in a supreme effort to impress upon the Legislature the needs of the college in the way of glass; that this movement will bear fruit will be earnestly hoped by many interested in this work, not only in this state, but throughout the country.

The program of the winter meetings of the Worcester County Horticultural Society is as follows:

Thursday, Jan. 5. — Annual Address. O. B. Hadwen, President. A Trip to St. Louis. J. W. Stockwell, Sutton.

Thursday, Jan. 12. — A Trip in the Far East. Miss Frances C. Morse.

Thursday, Jan. 19. — New Hampshire Out of Doors. Illustrated by Stereopticon. George H. Moses, Concord, N. H.

Thursday, Jan. 26. — Boys' Education by Doing. Frank L. Johnson, Oakdale.

Thursday, Feb. 2. — Fertilizers. W. W. Rawson, Arlington.

Thursday, Feb. 9. — Birds. Mrs. Amy Barnes Maynard, Northboro.

Thursday, Feb. 16. — Subject and speaker to be announced.

Thursday, Feb. 23. — Horticultural Specialties. Edward O. Orpet, South Lancaster.

Thursday, Mar. 2. — The Missouri Botanical Garden and its Work. Illustrated by stereopticon. Edmund A. Engler.

Wednesday, Mar. 8. — Annual Reunion.

Wednesday and Thursday, Mar. 8 and 9. — Massachusetts Fruit Growers' Convention.

Thursday, Mar. 9. — The Apple, the King of Fruits. W. D. Baker, Quincy, N. H.

American Carnation Society

The next meeting of this Society will be in Chicago, Ill., January 25 and 26, and growers of novelties should get the premium list and exhibit their flowers if possible. Premium lists and any information will be cheerfully furnished by the secretary.

Carnations Registered

By Baur & Smith, Indianapolis, Ind.

Beatrice, —This might be called a light pink Dorothy, except that the blooms come much larger. Habit of growth, length of stem and form of flower resembles that variety closely. The color is a beautiful shade of daybreak pink, a full shade lighter than that variety. Strong growth and never bursts.

Flambeau, — Large round blooms on strong stems. Strong growth and free bloomer. Stands hot weather best of any scarlet we have ever grown. Color a shade deeper than Crane.

NOTICE. — Parties having new carnations should submit the name intended for use to the Carnation Society before having it printed in any shape, so as to avoid duplication as far as practicable.

ALBERT M. HERR, *Secretary.*

Society of American Florists and Ornamental Horticulturists

Department of Plant Registration

W. L. Lewis, Marlboro, Mass., submits for registration seedling carnation Mrs. W. L. Lewis (Flora Hill × Mary Wood). Color snow white, flower three inches across, well-built, with long and stiff stem. A burst calyx has never yet been seen on it. The bloom is a good keeper.

WM. J. STEWART, *Secretary.*

H. D. Seele, Elkhart, Ind., submits for registration the following new cannas: —

HON. W. R. HEARST, scarlet, mottled and edged with golden yellow; outside of petals almost pure yellow.

SENATOR HANNA, pure orange, tinged with golden yellow.

MRS. JOHN A. LOGAN, scarlet, with broad yellow golden border; resembles Queen Charlotte.

WILLIAM J. STEWART, *Secretary.*

NEW YORK CUT FLOWER MARKETS

As Reported January 3

It is pleasant to be able to report that New York's New Year's trade was fully up to that of recent years, if not a little better. American Beauty roses again led in the demand and a light supply helped to a realization of good prices and a satisfactory clearing out of the stock in wholesalers' hands. Good Bridesmaids were again brisk sellers although the demand was not as keen as it was for Christmas. All red flowers were favorites. Red carnations, poinsettias, Liberty roses, etc., were gathered up in the liveliest manner.

Carnations held their own at fair figures and were generally cleaned up, white alone excepted. The supply of violets was larger than at Christmas and consequently these suffered in price. The quality was not as good either, a considerable proportion having short stems and smaller flowers. Orchids received their share of attention; also lily of the valley.

THE NEW YORK WAY

It is always an occasion for surprise to the New Yorker who, visiting the Boston flower markets for the first time, learns that no commission man is permitted to hold space therein. He recalls how, in the New York markets, the man who represents growers who do not personally market their own goods is given the same recognition as those that do, and listens with some amusement as he learns of the peculiar local prejudice against the commission wholesaler which is an inborn trait of the average Boston stall-holder.

For many years Frank Millang has conducted a commission business in the New York flower market. So harmonious have the relations been at all times that it would undoubtedly be looked upon as a misfortune to the market should Frank ever desert it. His services in providing an outlet for their product are often availed of by stall holders who appreciate the value of his alert business instincts acquired in the strenuous training that every wholesale flower dealer must undergo in the making.

Adjoining Mr. Millang's headquarters are those of Charles Smith and Bonnot Bros., both of whom also find in the flower market a profitable field for the commission business.

INDIANAPOLIS CHRISTMAS REPORT

Despite the rainy weather preceding and on Christmas day the holiday trade was the liveliest in years. The supply was all that could be wished for. A feature of this holiday business was the almost exclusive call for the best grades in every line. The prices did not seem to enter into consideration with the buyer, who asked for the best the market afforded. As usual, the sale of blooming plants was very heavy, but taste counted for more than liberal display in made-up baskets and plant combinations.

DENVER CHRISTMAS REPORT

The Christmas rush is over and apparently everybody is happy and thankful. At least the retailers ought to be thankful, to the weather man, for he furnished the kind that made wrapping for plants almost unnecessary, and the stores could keep the doors wide open without risking freezing up — quite an advantage when every available space is taken up on the inside. The long-looked-for snowstorm arrived, however, about 6 P.M. Christmas day, and it was a beauty, but too late to do any harm to the trade. Reports from the different stores indicate that business was good in all departments, some beter than a year ago. Green and holly sold well, some of the stores being sold out of these two Christmas staples earlier than was desirable, and no more to buy at wholesale, although the hucksters on the street-corners seemed to have enough for everybody.

Among plants the poinsettia led by quite a margin, the pans of low-grown plants selling especially well. We hear every year somebody making a gloomy forecast about the popularity of the poinsettia dying out, but the popularity comes back to life next year with renewed vigor, and there is no denying that for effect in a store and in a window it is a winner. Azaleas, in the cheaper sizes, sold all right, but the high priced ones did not take as well. Some very fine cyclamens were seen around and some of them sold for what may be termed fancy prices. Take it all through, all kinds of seasonable plants sold well, one good feature of the trade being that it started earlier than usual and kept right on till the snow Sunday night put an end to it for the day.

As for cut flowers they more than held their own. American Beauties and violets seemed to be scarce in some of the stores; prices about the same as a year ago. One noticeable feature, and a very encouraging one at that, was the absence of pickled stuff. Some made its appearance, but the bulk was a good fresh article.

The Park Floral Company had the walls completely covered with holly, and the store of Scott Floral Company presented a magnificent wealth of color, with electric lights colored and dimmed to match.

Boston Notes

The week started off with an excellent demand for the general line of cut flowers. New Year's Day is not a holiday in Boston, and is not observed locally enough to make any impress on the flower market, but there are always a few people who wish to remember their friends in other places where the holiday does count for something, and these made a little life for both retail and wholesale people. The principal call was, of course, for roses, carnations and violets. The latter are more plentiful, and did not reach Christmas prices, but the sale was very satisfactory. On the other hand, bulbous material of all kinds has dragged badly. Most of the out-of-town florists grow their own supply of these things, or obtain it locally, and the shipping demand amounts to little in this line. White flowers are inclined to accumulate, but the severe storm of Wednesday has shortened up the supply in general, and no immediate stagnation is anticipated. On roses there is a disposition to ease off from the established values of the very high grades, but for the medium classes the prices are expected to remain fairly steady for the present. Carnations average very fine in quality generally.

BALTIMORE WHOLESALE FLOWER MARKETS

The week and the new year opened up with a fairly good demand all along the line and with a good supply of material with which to fill the demand. New Year's day has never been of any special account here in the cut flower trade and it is gratifying to be able to report that business was much better than had been expected.

WHOLESALE DEALER IN GALAX LEAVES

Very best galax leaves gathered fresh from the woods — can supply 1,000 or 1,000,000, green or bronze. It will pay you to write me. Good stock, low prices, quick shipments. Telegraph orders a specialty. Wholesale trade supplied, but if your wholesaler does not handle my stock, write direct to me and get fresh galax, large or small leaves, the genuine waxy gloss color that makes galax leaves beautiful and which cannot be obtained except on fresh leaves just picked from the native woods. I can compete with any one on earth. Cold storage orders booked now for future delivery. Let me have your orders for immediate use now and you will start the NEW YEAR RIGHT.

WHOLESALE FLORISTS

PHILADELPHIA WHOLESALE FLOWER MARKETS

As reported January 3, 1905

Week after Christmas business was unusually good and prices held up well on all lines, especially roses and carnations. On the whole, a very satisfactory New Year's trade. Also Beauties are not nearly so plentiful and have kept up wonderfully well in price. Quality nothing extra. Liberties went well, as did almost everything in red during the week. Brides and other whites moved slow, but Bridesmaids were in better demand and at fairly good prices, although Philadelphia was away behind New York as to prices on these

Carnations went very well all the week, except the white ones, which are not in demand for New Year's any more than for Christmas. Anything that looked like red sold on sight.

Violets sold fairly well, but the market was not as lively as it should have been. Good singles and Lady Campbells went best. There were a few white violets around which were in demand for special occasions.

Orchids, a little more plentiful and sold rather slowly. Price about normal. Lilies of the valley moved well with prices about as usual and quality good. Roman hyacinths and paper white narcissi, slow. Asparagus and other greens in good demand, rather better even than before Christmas, there being a good deal of decorating work around.

CHICAGO FLOWER MARKET

Report for week ending Jan. 2, 1905

As predicted a week ago, there has been an increase of stock in all kinds, even carnations. We have had a spell of balmy breezes accompanied by an unusual lot of sunshine, and consequently there was a heavier supply than was anticipated. Prices held remarkably well. Retailers turned the tables on the commission men this week. The bright weather and limited orders on long Beauties enabled them to dictate prices on this item, the best grades of which can now be had for $6 per dozen. The call for teas (extra quality) is phenomenal, the demand far exceeding the supply, and these are holding at steady prices. There are some very fine carnations seen here. Enchantress, Estelle, Mrs. Patten, Nelson Fisher and Harlowarden, are the most popular, with white as a second choice.

Violet receipts the past week were spasmodic. At one time this week there was a shortage and with the ending of same the eastern growers unloaded big shipments in anticipation of heavy New Year's day demand. Local inquiry was far below expectation, however, and the heavy consignments Saturday, Sunday, and Monday proved far too much above the needs of the trade. There was a brisk call for smilax and short-cut asparagus. Also a rally on bulbous stock. Callas have declined to $1.50 per dozen.

CHICAGO NEWS ITEMS.

C. M. Dickinson of E. H. Hunt's is around again after a serious illness. — Wife of William Schreiber, 221 Garfield Ave., died this week. Funeral Sunday, January 8. — Flint Kennicott is laid up with bronchitis.

HOLIDAY REPORT FROM NEWPORT, R. I.

The florists of Newport have nothing to complain of in regard to the amount or the nature of the business transacted during the Christmas and New Year holidays.

In most lines the demand far exceeded the supply. This was the case especially with roses, and in a lesser degree with carnations and violets. All of these brought better prices and readier sales than last year.

What contributed somewhat to the abnormal demand, was that during Christmas week there were some very heavy funeral orders, in the filling of which stock was used that might otherwise be pickled, if we may use that term still. Plants found a ready sale, especially Lorraine Begonias, Poinsettias, and the various types of Nephrolepis, but N. Scotti seemed to be a prime favorite with the Christmas buyer.

Taken all in all, Newport florists have had a fair share of the wave of prosperity that has swept over the country.

NEW DAISY

Queen Alexandra

We are now booking orders for delivery during the latter part of February for this charming new form of Chrysanthemum Frutescens or Paris Daisy, an introduction from South Africa, and a plant which should prove desirable both as a cut flower as well as a pot plant.

The illustration shows three forms of flowers which appear on the same plant. The double and semi-double form are not unlike an Anemone-flowered Chrysanthemum.

PRICE:

20c. each, $2 per doz., $15 per 100

LIST OF PATENTS

Issued December 27, 1904

778,786, Clip for Flower-Pots. Judson A. Kramer. Marion, Ia.

778,294, Hand Plow. Thomas L. Wilcox, Clarion, Ia.

778,688, Plant-protector. Cyrus Marsh, Ashland, Va., assignor of one-half to Burrell H. Marsh, Winston, N.C.

712,297, Fruit-Grader. Robert Strain, Fullerton, Cal., assignor to Fred Stebler and Austin A. Gamble, Riverside, Cal.

778,690. Fertilizer-Distributor. Martin H. Meyer, Pender, Neb.

Copies of any of the above patents can be procured by sending ten cents in stamps to E. G. Siggers, patent lawyer, Station G, Washington, D. C., by mentioning HORTICULTURE.

Greenhouses Building or Projected

PONTIAC, MICH. — A. B. Lewis, rose house.

WEST HOBOKEN, N. J. — John Birnie, houses 28 × 120, and one 10 × 50.

LEHIGHTON, PA. — Paul Niehoff, house 30 × 75.

Chester F. Brainard, who for the past six years has been in the employ of his brother D. William Brainard, Thompsonville, Conn., has purchased from F. N. Allen a tract of about ten acres of land known as the J. B. Allen Farm. The land is on the main trolley line between Hartford and Springfield in the north end of the village of Thompsonville.

Mr. Brainard expects to start into the nursery, plant, and bulb business this coming spring, and plans to work into the wholesale florist business as well. Operations will be commenced as soon as possible in the spring and some building will be done this coming season.

THE PIERSON-SEFTON CO.
Horticultural Architects and Builders
West Side Ave., JERSEY CITY, N. J.

We manufacture and erect every type of Greenhouse

THE GALVANIZED "U" BAR TYPE
THE FLAT IRON RAFTER TYPE
THE SASH BAR TYPE

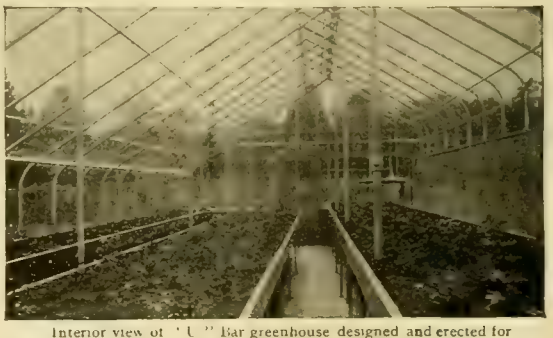
We make each type in several styles. We also furnish any of the constructions in the ridge and furrow type in any width of span.

"PIERSON" BOILERS

For Steam and Water

have more direct fire surface than any other horticultural boiler on the market, and this together with ample flue surface and area is the reason for the economical results obtained.

We will be pleased to tell you more fully as to their merits and also to send you letters of testimonials from those who have used them.



WE ALSO MANUFACTURE

Self-locking vent-opening apparatus, both the standard and self-oiling type. Wood and iron frame benches and tables. Hot-bed sash and frames. Special hand-made greenhouse putty.

ESTIMATES FURNISHED FOR COMPLETE STRUCTURES OR MATERIAL READY TO ERECT.

Exterior view of "U" Bar greenhouse designed and erected for Mrs. A. A. Anderson, Greenwich, Ct.

Interior view of "U" Bar greenhouse designed and erected for Mrs. A. A. Anderson, Greenwich, Ct.

And Numerous Diplomas and Certificates of Merit.

The beauty and value of this new fern to be introduced Spring of 1905 can best be appreciated by seeing it. It is a sport from the Pierson Fern (Nephrolepis Piersoni), but it is very much more beautiful and of greater commercial value. It is as different from the Pierson Fern as that is from the Boston. The small side pinnae are again subdivided, producing an exquisite and beautiful effect, changing the entire character of the fronds, which measure less than half the length and about twice the breadth of the fronds of the Pierson Fern. The fronds also assume an entirely different form, the side pinnae standing at right angles to the mid-rib of the frond, on edge rather than flat, as is usual, making both sides of the frond equally beautiful—entirely different from any other fern.

The plant is very dwarf, only about half the height of the Pierson Fern, and of very much more compact habit. Taking it altogether, it makes one of the most exquisite plants and one of the most valuable for table and house decoration that has ever been introduced. The cut fronds, on account of their beauty, will be in great demand for table decoration, design work, and for use in boxes of loose flowers. Well-grown plants make most magnificent specimens. We think there is nothing in the fern line that is so handsome as this beautiful fern when well grown. It is a wonderful improvement over Nephrolepis Piersoni in every respect, both in regard to beauty and habit of growth.

PRICES:—2¼-inch pots, $9.00 per doz.; 50 plants at 60c. each, 100 at 50c. each, 500 at 45c. each, 1000 at 40c. each. LARGE PLANTS READY FOR IMMEDIATE USE—5-inch pots, $18.00 per dozen; 6-inch pots, $24.00 per dozen; 8-inch pots, $36.00 per dozen 10-inch pots, $60.00 per dozen.

In writing to advertisers, kindly mention HORTICULTURE

Hot-House Grape Vines

ALICANTE, berries large, round, large bunch. Late keeping.

APPLEY TOWERS, fine black sort, following Black Hamburg. Excellent flavor.

BLACK HAMBURG, the most popular grape in cultivation. Berries large, roundish-oval, juicy and rich.

GROS COLMAN, monstrous, round berries, juicy and sweet. Not good until fully ripe in late autumn.

GROS GUILLAUME, Barbarossa. Berries large, and round, juicy and sweet but rather flat flavor. Very late.

MADRESFIELD COURT, berries very large; of true muscat flavor. Rich and excellent.

LADY DOWNE'S SEEDLING, large oval berries of rich aromatic flavor. Dark purple. One of the best late sorts.

MRS. PEARSON, large oval berries, transparent golden color. Luscious and juicy.

MUSCAT OF ALEXANDRIA, generally esteemed the best white grape. Berries large, amber yellow. Delicious flavor.

Strong Planting Canes; each $3.50

Lily of the Valley
Selected Berlin Pips

Per 100, $2.00; per 1000, $17.50;
per case, 2000, $32.50

GRAPE-GROWING UNDER GLASS

I have known people who would be glad to change a greenhouse into a grapery were it not that they hesitated because of what is sometimes erroneously supposed that in order to ensure any reasonable degree of success, it is absolutely necessary to have a border outside whereinto the vines can extend their roots. That such a border is not necessary I know by my own experience, the results of which may in some measure interest others.

Sixteen years ago I planted a house with Muscat of Alexandria and Black Hamburg, and because of the existence of insurmountable obstacles in the shape of a path which was indispensable, and underneath which was a sewer equally if not more indispensable, it will be seen that it was not from choice but from necessity I had to do without an outside border.

I planted good, strong, two-year-old canes, and from the second year after planting never experienced a failure, but on the contrary, year after year the vines carried such a crop that gave rise to periodical fears lest each year's crop, by reason of its size and by the absence of what was supposed to be the necessary sustaining power of an outside border, should be the last for some time. Recognizing the fact, which is of course always admitted, that the temperature and other conditions of the environment of each component part of nearly if not of every tree or plant should be uniform, perhaps the want of a place where the roots of the vines must go to be drenched and chilled in season and out of season, whether the gardener wills it or not, need not be considered a matter of so much regret after all.

It may be conceded that an outside border adds to the resources of the vines, but if it is always carefully seen to that each season the top and spent soil is removed from the roots, not by means of a spade, fork, or hoe, but first loosened with a wooden peg and then gathered with the hands and removed, the while taking great care that none of the fibrous roots get broken or bruised, this being done a rich compost is laid on and among the roots to the depth of at least three inches. The compost for a grapery border, especially where the only sphere of activity of the roots is inside, should of course contain everything necessary for the roots to feed on, or, as we are being taught now-a-days, for the microbes to feed the roots on. For such a compost the following three component parts are perhaps indispensable: cow manure, good sod (not much rotted either) and bone meal. Many persons leave the cow manure out of the compost, instead using it as a mulch for the surface, which when watered heavily constitutes a liquid manuring. This, too, seems quite reasonable, but it has also been found to be very beneficial to use some cow manure with the loam and bone meal — its existence there may help to sustain the microbes we have before referred to if for nothing else. Seriously, however, cow manure in the soil beneath the surface may be considered a necessity for grapevines, the roots of which are confined indoors, because it retains a certain amount of moisture at all times, even if the surface is quite dry, which it sometimes must needs be.

The purpose of this article is not to endeavor to show that it is under ordinary circumstances preferable to confine the roots of grapevines indoors, but to show by the writer's own experience that should obstacles such as he had to contend with present themselves to any one else, there need be no hesitation in going ahead and be reasonably sure of equally satisfactory results in the shape of good berries, good bunches, and good crops for fourteen years, with promise of like results to come, as this year's wood is as strong and as well matured as that of any former year.

That where very early grapes are required, a positive advantage may be found in an exclusively inside border, is not to be scoffed at for various obvious reasons, chiefly that the agency by which an artificial season is created is confined in its operations by reason of a part of that object for which this agency is employed, although not detached, is yet disadvantageously located from the other.

After writing the article of which these lines form a part, I received my weekly copy of HORTICULTURE, and about the first thing therein that attracted my attention was an able contribution from Mr. W. Downs on the cultivation of grapes under glass. My first thoughts then were that Mr. Downs, in his article, had covered the whole ground, and hence the probable uselessness (for publication at least) of what I had written. If both articles had been written on the same distinct lines and with the same end in view, then, comparatively speaking, there would still seem to be but little need of what I attempted.

Mr. Downs, in his article, however, treats, and that ably, of the cultivation of the grape, I may say, from start to finish, while I, on the other hand, only attempt to tell what has been my actual experience in the growing of grapes under conditions popularly supposed to be unfavorable, and if the results of this experience as related will have any effect in removing what is only supposition and nothing more, then what I have already written may be of some use.

David McIntosh.

What Our Successors Are Doing

Not for a long time have I seen in any of our papers anything relating to the many young men who are now engaged in following and preparing themselves to ultimately fill some responsible position in some of the branches of our loved profession.

Young men who are just launching out, need all the encouragement and instruction that can be given to them, let it be in whatever branch they may have selected. The young men of to-day have immensely greater facilities to learn than I had when I started, over fifty years since. At that time there were but few books and still fewer periodicals that boys and young men could even look at, much more possess. Whoever selects any of the branches of horticulture to follow as a livelihood must have a love for it or else get away from it. Now, what I want to say is that we men of experience should take hold of the young fellows and push them along as if they were our own children. Get them interested in every phase that bears on their future development; let them understand that what shall be done must be done in the best manner; interest them with discussions and encourage them to make experiments.

The young men, on their part, should intelligently study any and all subjects relating to the pursuit, even though some of the matters may be remote. Don't stop at being a good carnation grower or a good rose grower; delve wider into the field. A short time since a young man who is an excellent grower of chrysanthemums called on me and we went to Washington Park. In the conservatory were several plants of Begonia incana, which we know has very heavy wooly leaves. This young man said, "I don't see why they want that old coltsfoot in a place like this." I need hardly say how sorry I felt for him.

In looking carefully over the horticultural field and at what will surely happen in the future, and that at a not very far distance of time, it is evident that the demand for thorough gardeners — men who can grow and produce fruits, flowers, and vegetables of whatever kind — will be such that it will be difficult to find men to fill such situations. Surely the time is passing when we should have to go to Europe for nine-tenths of the men for such positions.

Boys, I want to ask you whether there is any profession that affords as much respect and true pleasurable life as that of a gardener? I wish you would start right now and map a pathway leading to the front which you can follow and obtain by persistent application.

John Thorpe

Violets in Cold Frames vs. Greenhouses

I would like to give my experience with violets for the past fourteen years. I know it will not be of much importance to the specialist, but to anyone circumstanced as I am, I hope it may be of some benefit.

We started with cold frames, growing such varieties as Marie Louise and Swanley White, both varieties doing well. The Farquhar and Campbell were tried when they came out, with excellent results, the former with large blooms on long stems and a fine dark color. But the trouble with the frame culture came with the severe weather. We could not open them for a week at a time. When that kind of weather came often, it meant a lot of mildewed, rotten leaves and flowers. Then we built a sash house (lean-to style) against the south side of rose house, about 7 feet wide by 5½ feet high at back, with a bench on south side and path on north side. The height of bench brought the front row of plants about a foot from the glass. The varieties planted were Campbell, the Farquhar, and Princess of Wales. They did not do as well as I thought they should; more or less disease would get in somehow, although there was ventilation left on until hard, freezing weather. It seemed to me as if there was not volume enough of air, so on the 14th of last October we tied down our grapevines and planted a bench in the grapery, mostly Princess of Wales, a few Campbells, and Marie Louise. A month later, after we had the single-stem chrysanthemum benches emptied, we planted one bench with Princess of Wales, and this is what I wanted to tell you about. What a success they are! Both benches in grapery and greenhouse are, at this date, a mass of bloom and fine healthy foliage. The plants in grapery are much stronger with longer flower stems than those in greenhouse, I suppose owing to being planted a month earlier, but the greenhouse ones seem more prolific. The temperature for both houses is 40° to 45° at night, according to the weather; day temperature about 60°. The Campbell and Marie Louise have not done as well accordingly as I expected; perhaps it was owing to the late planting and low temperature. However, I intend to give them a better test next year.

The success of Princess of Wales in the greenhouse and grapery — against the two years' trial in low sash house in front of rose house, seemed to substantiate my theory that a large house with a greater volume of air was necessary for success with the violet. I would like to hear from some others on this subject.

V.

Luculia Gratissima and Calanthe

I was much interested in Mr. Storer's description of the display of calanthe put up by the veteran George McWilliam. I seemed to be transported by the narrative to the scene and to enjoy the display nearly as much as if I was actually on the spot, for I have vivid recollections of seeing a similar exhibit put up by Mr. McWilliam a few years ago. I also recall the pleasure it gave all present on that occasion, of which there were a goodly number. The whole party was right royally entertained at a substantial repast by the Whitin family, and their gracious manner and the evident pleasure it gave them to entertain the company will, I am sure, always remain engraved on the hearts of all the members present; for not only did the members of the family go to considerable trouble in providing the repast, but, constituting themselves our waiters and waitresses, minutely looked after each one's wants, inspiring thus a "home-and-at-ease" feeling that made a lasting impression.

Returning to calanthe, undoubtedly as Mr. McWilliam grows them they constitute a bulwark for conservatory decoration at this dull season of the year. They are also useful for cutflower purposes, as they last a long time; albeit they are the ugliest of orchids when in flower and standing alone, as they are then devoid of foliage, or should be if properly handled. Yet in combination with light-green foliaged plants, such as ferns, the smaller and more graceful types of palms and dracænas, they make a splendid show, which has the merit of being lasting as well as brilliant.

I was particularly interested in the mention of that good old Nepaulese plant introduced in 1823, and yet scarcely known here, Luculia gratissima. I imagined myself as I was perusing this part of Mr. Storer's story, that I was inhaling the delicious fragrance characteristic of the flowers of this plant. As to the color of the flowers, Mr. Storer has described it professionally, as a "rose madder tint of pink"; to most of us fellows who cannot grasp the technicalities of color combinations as do Mr. Storer and his professional ilks, I would plainly and off-hand say it is a pleasing rose-pink when the flowers unfold at first, fading with age to a lighter pink.

I am pleased to be reminded by the existence of this plant and similar old favorites of by-gone days, to be found under the charge of Mr. McWilliam, that Mr. McWilliam is one of the too few relics of the old school of gardeners who likes to cling to good old plants, requiring somewhat more painstaking care than the softer-wooded and more rapid-growing kinds of plants that the average present-day gardener seems to pin his reputation to. I hope that George will not take offence at the word "relic," for it is intended to be complimentary, and I intended to also add (and not patronizingly either) that he is equally capable of upholding his end in the methods and with the plants in vogue to-day with the next one, as any one who may visit the place under his charge can ascertain for himself. There! I think that will smoothen matters somewhat.

Luculia gratissima is not a particularly difficult plant to grow, as some think it is. It is comparatively easy to propagate from cuttings, only requiring, like all hard-wooded and semi-hard-wooded plants, a longer time to root than the softer kinds, which is simply a characteristic and not necessarily a difficulty. Plants in four and five inch pots, which can be obtained within a twelve-month, with a single tolerably large hydrangea-like head of flowers, are a nice and serviceable size, especially when they are grown in quantity. Larger plants can be had by keeping them from year to year, and pruning them well back, giving the necessary care in syringing in season, and other details bearing on their welfare. They thus make large bushy plants, and, if well flowered, are exceedingly effective thus treated.

A warm greenhouse is best suited for them, such as will suit carnations. In the early part of the season, when they are breaking and starting to grow, they may be introduced to a temperature a few degrees higher than a carnation-house temperature. It is unquestionably easier to manage planted out in an inside border in the proper greenhouse, and is then seen to much better advantage.

As I write this I am reminded of some statements regarding this plant that I came across a few years ago in the English Garden periodical, and at a time that I was interested in the growing of this plant myself on a small scale, that made me fairly envious. For the benefit of your readers I have located the particular reference in vol. xxx, and page 559 of the above paper. A Mr. William Culverwell, writing about this plant, says; "Our old plant here is in great beauty; the blooms on it were counted on Dec. 1, 1886, and they numbered 480 heads open and unopened. We once had 672 heads of bloom on it; but it has been considerably reduced of late, as it overgrew everything near it. It was planted in a small border, fifteen inches wide, thirty-five years ago, and it has never been disturbed since. It is top-dressed every season, and is given a little weak guano water when making its growth."

By the above it will be seen that this plant, planted out in a proper place, is not of the difficult kind some would make it out to be. A plant that stood for thirty-five years in a small border of fifteen inches wide, with simply a top-dessing yearly, giving off of its beautiful pink and exquisitely fragrant flowers in abundance during that time, cannot be regarded as especially stubborn to handle. And just think of 672 flowers at once on this plant! Talk about orchids, they would be simply nowhere, against an array of such glorious beauty as was thus presented on one plant.

N. Finlayson

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

Our Pittsburg correspondent very appropriately reminds our readers of the approach of McKinley Day, January 29th, and the commendable custom, advocated by the Carnation League, of commemorating the day and the man by wearing a carnation. Florists everywhere should encourage the beautiful sentiment.

We are often told that careful accounting and accepted business methods are conspicuously absent in the management of a large proportion of our floricultural establishments. Unquestionably there is some foundation for the criticism. In these days of unrelenting rivalry, neglect in this direction is too great a risk. Watch the profit and loss account.

Despatches from Trenton, N. J., where the New Jersey State Horticultural Society has been holding its annual meeting, inform us that the Society decided because of hostile public sentiment, to abandon its proposed demand for a law permitting the killing of robins on account of their destruction of small fruit. Let us hope that public sentiment may continue to assert itself zealously in so good a cause.

The article on florists' palms, reprinted from the *Journal of Horticulture*, in this issue, strikes a responsive chord on this side of the Atlantic. It would seem that the time is now ripe for our commercial decorative plant growers to enlarge upon the meager list of palms offered for general use. There is a good field for a wider variety and there are many easily-grown and beautiful subjects that need but to be known to become popular.

In the training of a broad-gauge, useful florist, probably no one factor counts for so much as association with his fellow-florists. Intelligence and capability grow by contact. For this reason, if for no other, every one interested in carnation culture should attend the approaching meeting at Chicago. A man who shuts himself out from the great intellectual and material advantages offered by these recurring meetings and conventions does himself a great and lasting injury.

We are told by those who are in a position to make a wise forecast that "flush times" are coming. Perhaps this is the best news that the incoming New Year brings us. But flush times are not without their dangers, and while we make hopeful preparation to enjoy whatever good fortune they may bring us, it will not be amiss if we do so with a reasonable amount of conservative caution and with a determination to keep always on the watch against any temptations to recklessness.

Undisciplined prosperity sometimes turns out to have been a misfortune. We are apt to lose sight of the fact that the tide will turn again and the time then come when we will look back and wish we had built less extravagantly, given credit less freely, and followed more closely those business principles that served us so well in adverse times. Of the loose methods that appertain to the business management of the average florist, one of the most common is credit-giving to an extent greatly disproportionate to the amount of business done. The willingness to take chances beyond what ordinary prudence would sanction is probably due largely to the transitory nature of the goods handled which, especially in periods of abundance, we naturally regard as better sold to a risky customer than not sold at all. Be that as it may, it is an undeniable fact that the majority of florists, — growers, wholesalers, and retailers, — have on their books to-day an excessively large amount of credit of which a goodly percentage must eventually find its final resting-place on the bad side of the profit-and-loss account. And it is, as a matter of course, true that this condition is sure to be aggravated in "flush times." It would be a great blessing to the trade if a closer accounting all along the line could be brought about, and anything that we can do individually or collectively toward this end should be done. It would mean a long step forward in the elevation of our profession to a higher plane and a better standing in the business community.

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

I am glad to inform you that the florists bringing flowers to the market are all pleased with HORTICULTURE because it is filled with good, useful reading. — N. F. C.

It gives me great pleasure to receive HORTICULTURE. It is pithy and to the point; a journal that every one in the profession ought to read. Please find check for $1. — W. W.

HORTICULTURE is full of good instruction, with many elegant half-tone engravings. This journal gives promise of a successful career, because practical and well prepared. We welcome it as an exchange. — *Arboriculture.*

Allow me to congratulate you on the appearance of the first few numbers of HORTICULTURE; it is a success from the beginning. Anything I can possible do for you, you may depend on me. Will have some advertising later on. Yours in the faith. J. A. P.

After Adjournment

Don't be in too great a hurry in forcing those tulips. Give them time.

The violet market seems to have taken a precipitate tumble in most of the eastern markets. Inclement weather such as has been experienced of late is fatal to the transient city demand for violets, but the violets themselves appear to like it and bloom bountifully.

Slowly but surely we see the list of varieties in florists' regular cut flower stock increasing. Daisies, snap-dragons, sweet peas, primroses, corn flowers, forget-me-nots and wall-flowers are every-day material now throughout the season in the show windows of most of the city florists.

To the Editor of HORTICULTURE.

Dear Sir: — I would like to read Mr. A. Ogg's management of Gloire de Lorraine Begonia, as I cannot seem to do much with it, and I think there are others in the same boat.

Yours truly,
W. W.

Mr. Ogg will oblige. — ED.

Hardly a fair deal, that of holding the Morris County Gardeners' and Florists' and the Tarrytown Horticultural Societies' annual dinner on the same evening. More conducive to the desired "feast of reason and flow of soul" to mix up. Wednesday evening, January 11th, was the date of the dual event. Thursday evening, 12th inst., was similarly celebrated at Providence by the Rhode Island Club. We know they all had a good time. Full account of all three in next issue.

Decorative Palms

Recently a writer in an American contemporary observed that many very beautiful and distinct palms are not taken up commercially on account of their spiny habit, a very spiny palm being somewhat of a nuisance to the decorator and also to his patrons, as anyone who has handled such a palm as Acanthorhiza stauracantha, with its network of long and branched spines around the stem, can fully testify.

But there will be an awakening in the direction of something more than the ever-present Kentia some time in the future, for as the taste for horticulture grows, and grow it does and will, there will come a demand for greater variety than the market now affords, and it is therefore well to bring these plants that are outside of the ordinary run into notice from time to time. Acanthophœnix, Martinezia, Bactris, Thrinax, Welfia, Geonoma, Pinanga, these and a host of others suggest themselves, either for their graceful habit, singular form, abundant spines, or varied coloring of the young and immature leaves; those of the Welfia, for example, being of a bright reddish chocolate as they first expand, finally changing to dark green. And this is a slender growing, unarmed palm that might well find a place among the available trade species even though it may not be just as hardy as a Rhapis or a Chamærops.

Several of the Geonomas also show some very distinct coloring in the young foliage, and as this is a dwarf race of palms, there is no danger of most of the species of this genus outgrowing the average greenhouse of the amateur plant-grower for some years, besides being of very graceful habit and reasonably rapid growth. There are numerous palms that one cannot safely recommend to those customers having only a small greenhouse in which to keep their palms, for such species would outgrow their quarters before showing their true character, and thus prove a great disappointment to the customer, and among those that readily suggest themselves are some of the Cocoses, Oreodoxas, and Euterpes, to which we may refer in a future issue. — *Journal of Horticulture.*

E. Hippard of Youngstown, O., recently shipped the material for ventilating and partly building a range of ten greenhouses for Alfred Dorner in Germany.

Out of the Bean Pod

"And better had they ne'er been born,
Who read to doubt, or read to scorn."

A coincidence worthy of note is that the greenhouse prizes of the Massachusetts Horticultural Society went to the Plant estate. — *Natick, Mass., Bulletin.*

What flowers are you sending Her to-day — violets or carnations? Perhaps you have been led by a story going the rounds saying pinks will push the purple flowers from favor, and betrayed into sending carnations. If you have been she may and she may not let you know the mistake you have made; it all depends upon the stage of intimacy you have reached. But if you get no hint from her, you may assure yourself just the same that you have erred and next week you must rectify it by sending an extra large bunch of violets. For, as a girl said the other day as she poised a second in front of a florists' window on Boylston Street, "girls admire and respect all flowers, but they love — they adore violets." Or send carnations and orchids and roses as you like, but send violets, too. Don't forget that. And if you would do the very latest thing in flower-giving, you will have a basket made of pussy-willows imported from the South to contain your offering. — *Boston Transcript.*

The violet men seem to have been getting their second wind all over the country. The carnation men should "see" the *Transcript* man.

THE PATH OF PROGRESS

The horseless carriage whizzes by
With puff and dash and slam;
Through every breath of ours may fly
A wireless telegram;
The seedless raisin on the plate
We joyfully devour;
Things are perfected while we wait —
Here comes the fadeless flower.

The coreless apple is announced;
The whipless school is here —
No scholar any more is trounced
By teacher kind and dear;
The scentless onion now is grown —
Improvement every hour
Into the scheme of things is thrown;
Behold the fadeless flower!

The jokeless comedy we see;
The tailless horse we drive;
The honey served to you and me
Comes from a beeless hive;
Buckwheatless buckwheat cakes we eat,
And gather strengthless power;
Some new thing every day we greet —
Observe the fadeless flower.

O, would they freeze some meltless ice,
Or make some footless gas,
Or furnish coal without a price —
Fate is unkind, alas!
Henceforth the maiden fair to see
Will grow reserved and sour,
And say: "Bring withered blooms to me,
No cheap old fadeless flower!!"

— *Chicago Tribune.*

Violet-Growing

A Paper Read at the Last Meeting of the Suffolk Co. Horticultural Association by William Wincott, Babylon, N. Y.

GENTLEMEN:

I have been asked to give you a little talk on the "Cultivation and General Care of the Violet," and to the best of my ability I will gladly give you my experience with this ever-popular flower. According to history there are upwards of 100 distinct species, and they can be found in Europe, Asia, and America. As I have learned they are the oldest favorites in existence, but the ones most under cultivation are: Marie Louise, Lady Hume Campbell, Neapolitan, California, Princess DeGalles, La France, and Princess of Wales. The present extent of their culture is something enormous when we are informed that Greater New York alone receives shipments of this little beauty at the rate of 300,000 to 1,000,000 per day during the flowering season, which is from November 1 to the middle of May, the prices ranging from $1.50 per 100 blooms down to 20 cents per 100 for the poorest ones. I believe that Poughkeepsie, the Highlands and Rhinebeck alone have over 100 establishments that grow from three to twenty thousand plants, which average from fifty to seventy flowers per plant. The finest flowers in the country come from these sections.

The propagation is done either by division of the old plants or by runners. I prefer the latter if they can be obtained, as they are not so old and hard. The time I take my cuttings is about the middle of March or first of April. If runners are not available, I divide the plants, taking them, if possible, with a heel; but I never use the center crown. If runners or divisions, they are ready, when trimmed, to either be put in a cold frame or house and, with a slight shading and kept a little close, should be ready in about three or four weeks to put in the garden, where they can remain till about the middle of August, care being taken to keep all runners trimmed off with a good, sharp knife; but they should never be pulled off, as they are very apt to bleed badly, and that will cause collar rot.

Some growers lift violets with a ball of dirt, but I always shake the dirt off clean, and as I plant them give each one a thorough watering and shade at once. I make a frame five feet long and about three feet eight inches wide, using plaster lath, which I tack to the rafters. This makes an excellent shading and it can be left there until the middle of September or first of October. The laths should be about the width of a lath apart.

When violets are established in new quarters they should be kept a little on the dry side. That helps to ripen the wood and they are not so apt to get diseased. The watering should be done in the afternoon, after 3 o'clock, from May 1 to the middle of August, also the syringing. But after that in the morning, BETWEEN the plants only, on bright days if possible: never in the afternoon, as the whole secret of the disease, in my experience, is that it is caused by the dampness at night through the fall and winter months. I have found that a dusting with Portland cement or fresh slacked lime is a good remedy for the disease, but I think it is easier to prevent than to cure, and if the watering is carefully attended to, you will not have much trouble.

I have failed to find a grower that has not had a little disease, sometime or other, but as soon as it makes its appearance pick it off and let them dry out for a week or two and it won't bother you much. Never wet the foliage in the winter unless you have to, which might happen in a case where there were red spiders; then go for them with a good force of water, either through a hose or syringe.

I find the violet likes a good, rich soil, and I use sod cut from the pasture lot about two months before using. With this I use one good cart load of rotten cow manure to three cart loads of sod and half a bushel of slaked lime; mixed and well broken up, it makes a good compost. In planting a solid bed I take out about four inches of the old soil and fill in with the fresh compost, and then dig the whole bed thoroughly. For a top dressing I use ground bone or sheep manure. For a bench the same compost will be all right, but the watering must be done with greater care, for if they ever get over-watered you may throw them out at once. Keep them well on the dry side and they will do the rest.

For violets to be grown in a cold frame, first select a good southern exposure — say on the south side of a barn or front of a good hedge, — then place your frame so that you can work all around it, and after the bed is ready, put in the plants and shade with lath frames and ventilate from the back by blocking. It is better not to push the sash up or down after the first of October, as I think cold draughts do not help them. I always place a thermometer in the frame and face it to the north, and when it registers 45 degrees I put on a little air to let out the dampness. The proper temperature for a violet house is 45 degrees at night and 60 in the day, but never hotter, if avoidable, as a higher degree causes the flowers to run small and the plants to grow too fast, which will make the flowering season much shorter. Of course a frame cannot be kept at these degrees, but if well covered at night with good salt hay, with shutters or mats over it, they can be grown with good success, and to prove this assertion, will read a little article written in the papers of my own success with a few plants:

"BABYLON, L. I., Jan. 22, 1891
"*The American Florist*,

"Gentlemen: — I have forwarded by mail a small box of violets with foliage, which I hope will reach you in good shape. I have picked thousands this winter just as good as I send you and I have picked quite a number that were as big as a fifty-cent piece, which I thought was remarkable."

Answer: — "The violets arrived in excellent order and were beautiful specimens of the flower, which is such a popular favorite for winter forcing."

For fumigating a house or frame I have found nicotine the safest and most satisfactory. I use one tablespoonful to one and one-half pints of water, at the rate of four pans to a house seventy-five feet by eleven feet. They are evaporated with a small shovel of red-hot coals, starting at the extreme end of house and walking back towards the door, dropping a few lumps into each pan. You can use pieces of iron or sash weights, but care should be taken that they fit in the pans before heating them. For another insecticide I use ivory soap, five-cent cake to five gallons of water. The soap should be thoroughly dissolved by boiling in a little water and the balance added and applied while warm, either with a syringe or a bulb sprayer. If this does not kill the black fly, repeat. I use this insecticide when I cannot shut down house or frame through summer and spring.

The time of planting varies under different conditions. For cold frames or house on small scale, they should be planted about the middle of August If left later in the fields, they might get blighted, the cause of which is the night fogs and hot sun. For a commercial place or on a large scale the cuttings can remain in cold frames or end of house until the first or middle of July, when they should be planted in the positions where they are to remain. I plant my violets 8 by 8 inches; but if plenty of room 9 by 9 is better.

Now, gentlemen, if I have omitted anything you would like to know as to my methods, etc., I will gladly tell you if it is within my power. The only parts of these remarks that I would like to impress upon the minds of those amongst us who would like success with violets are these:

1. Time of planting under different conditions.
2. Note change of time between summer and winter watering.
3. Temperature.
4. Keep plants clean from diseased leaves, weeds, red spiders and black flies, not forgetting to thoroughly cultivate until flowers stop. You also cut off all runners until after middle of November.
5. Last, but not least, don't forget that eternal vigilance should be the motto of every violet grower.

Catalogues Received

Frank Elmer Conine, Stratford, Conn. List of hardy roses, conifers and ornamental deciduous trees and shrubs.

Gustav & J. W. Ludwig, Allegheny, Pa., have issued an illustrated catalogue of floral design work covering a wide range of subjects.

John Lewis Childs, Floral Park, N. Y., issues his thirtieth annual catalogue, full of tempting pictures. The subject of the colored title page is Calla Elliottiana, yellow, and Calla Rhemanni, pink.

Andorra Nurseries, Chestnut Hill, Pa., have issued an elaborate and beautiful series of illustrations of symmetrical specimens of conifers and other ornamental trees and shrubs in their new catalogue for 1905.

William Elliott & Sons' 1905 seed catalogue comes in a cover of beautiful and artistic design and coloring. An old mill and brook in springtime and apple trees all pink with bloom is the subject of the design. Send to 54 Dey Street, New York, for a copy.

Peter Henderson & Co.'s "Everything for the Garden" has a novel proscenium arrangement in the cover, disclosing a glimpse of the sweetness and light within. There are several colored plates of melting vegetables, irresistible roses, giant sweet peas, artistic dahlias, and ever-blooming hollyhocks.

GOOD MEN

When you need good men, skilled or unskilled, write:

THOS. H. BAMBRICK

34 South 7th St., Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

SITUATION WANTED — By first-class Carnation Grower, willing and able to fill position of responsibility. Address "W. J."
Care HORTICULTURE,
11 Hamilton Place, Boston.

SITUATION WANTED — By young man, good experience with all kinds of plants, flowers and hothouse fruits. Good references, private or commercial. Address "A," Care HORTICULTURE,
11 Hamilton Place, Boston.

SITUATION WANTED — As first assistant on first-class, private place where orchids, palms and roses are grown. Single, 28. Experience practical and theoretical in general stock. Address, "E. L. R."
Care HORTICULTURE,
11 Hamilton Place, Boston.

SITUATION WANTED — By Young Man, age 25, English, good all-round experience in greenhouse work, designs, etc. Good references. State wages. Address "D.," care of HORTICULTURE.
11 Hamilton Place, Boston.

Swainsona Osborni

(Reproduced from Journal of Horticulture.)

One of the best known members of this genus is the old S. galegifolia, which at one time often appeared as an exhibition plant, but is now rarely seen, except in gardens where these old favorites are prized. A charming variety of it is, however, more commonly shown now — viz., S. galegifolia albiflora. The flowers of this form are pure white, and contrast finely with the fresh green foliage. S. Osborni, of which a vigorous shoot and large raceme are shown in the woodcut, is also regarded by some as a variety of the above species, but it is practically quite distinct, and is undoubtedly the finest of all those in cultivation. When thoroughly well grown, this is one of the most handsome plants for the roof of a greenhouse or conservatory that can be had, its long racemes of rich purplish flowers being produced very freely, and if the shoots are not too rigidly secured to the rafters, but allowed a little freedom, the effect is much better. Good turfy loam and peat suit it well as a compost, an occasional supply of very weak liquid manure increasing the vigor of the plant considerably. It requires little care, and is deserving of more popular attention than it receives at present. — *C. in Journal of Horticulture.*

CATCH HIM

Charles E. Simmons, employed by Emslie & Broadfoot of Montpelier, Vt., has left that city and the firm would welcome any information as to his whereabouts. Soon after Alderman Broadfoot purchased an interest in the business a cash register was installed, and Simmons was transferred from the office to the hothouse, but irregularities in regard to the payment of bills continued to come to their notice, and the firm decided recently that it would be best for him to sever his connection with them. They were not prepared, however, for his hasty exit on Saturday last. They allege that his plan has been to collect bills due the firm, exchange receipts and pay his personabills with them. He left the greenhouse on Saturday to deliver plants, and not returning, the firm became anxious and notified the police. Upon investigation it was found that he had taken the train for Boston, after securing a loan of $250 on his household goods.

There is only one kind of advertising that is wise. It's the kind that makes business. Cut out the rest.

BOUNCING THE RUBBER

Mr. Crimsonbeak — Is that a rubber plant you've got there in the window?

Mrs. Crimsonbeak — Yes, dear.

"Well, don't you think it about time we bounced it. — *Yonkers Statesman.*

Plant your advertisements here. It is good ground and will yield famously.

NEWS OF THE CLUBS AND SOCIETIES

The Tennessee Horticultural Society was organized January 2, at Nashville. Charles R. Keffer, professor of horticulture at the University of Tennessee, was elected president, and Prof. George W. Martin, state entomologist, secretary-treasurer.

The new schedule of premiums offered by the Worcester County (Mass.) Horticultural Society for 1905, appropriates $1,000 for flower and plant prizes, $850 for fruits, and $650 for vegetables. The first exhibition of the society will be on Wednesday, March 1st. The judges for 1905 are George McWilliam, Henry E. Rich and Charles Greenwood.

At the regular meeting of the New Haven County (Conn.) Horticultural Society, the following officers were elected: — Pres., Robert Pryde; Vice-Pres., John Murray; Sec., Thomas Pettit; Board of Managers, Robert Patten Richard Bell, Frank Duffey, W. Simons and Charles Keane. A very interesting paper was read by Charles Keane on general horticultural topics.

At the last meeting of the Pittsburg and Allegheny Florists' and Gardeners' Club the following officers were nominated for the ensuing year. As William Falconer, who has been president of this club for the past four years, had declined to allow his name to be used again, T. P. Langhans, Secretary of the Pittsburg Cut Flower Co., was nominated as president, together with the officers of the previous year, namely, E. C. Reineman, vice-president; H. P. Joslin, secretary; E. C. Ludwig, assistant secretary; Fredrick Burki, treasurer; P. S. Randolph, John Bader, and Fredrick Burki, executive committee.

The secretary's report showed the club to be in a prosperous condition, with 147 members and a good cash balance in the treasury. The topic for the next meeting, February 7th, will be "Carnations."

NASSAU COUNTY HORTICULTURAL SOCIETY

The Nassau County Horticultural Society held the second of its regular monthly meetings on Wednesday, January 4, on the premises of Felix Mense, florist, Glen Cove, who, through his generosity, has granted this as a place of meeting till a permanent one be decided upon.

Notwithstanding the inclemency of the weather at that time, there was a good attendance of members which would seem thus to augur well for a successful career to this newly organized society.

President Harrison occupied the chair. The chief business at the meeting was the adoption of by-laws for the society submitted by the executive committee. Some lively discussions followed.

J. F. JOHNSTON.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

Department of Plant Registration

Conard & Jones Co., West Grove, Pa., submit for registration pillar rose Garden's Glory (Pink Mme. Plantier) a seedling from Dawson crossed with Clotilde Soupert. Flowers large, double, rose pink, fragrant, in large clusters. Plant, strong grower, hardy, almost thornless. Resembles Mme. Plantier in habit and abundance of bloom.

Patten & Co., Tewksbury, Mass., submit for registration the following carnations: Mikado, a variegated seedling of 1902 (Gov. Roosevelt × Prosperity); style of growth similar to Gov. Roosevelt; color, white overlaid with crimson; size of blooms, 3 to 3½ inches.

Pink Patten, a sport from Mrs. M. A. Patten; color, clear, dark pink.

WM. J. STEWART, *Secretary.*

CLUBS AND SOCIETIES

Massachusetts Horticultural Society

The annual meeting of the Massachusetts Society was held at Horticultural Hall, Boston, on Saturday, January 7. President A. F. Estabrook having been obliged to go to Porto Rico on account of poor health, Vice-president Walter Hunnewell officiated as presiding officer. Reports of trustees and other officials was the principal business transacted.

Treasurer C. E. Richardson gave the total assets of the society as $831,298.66, and the liabilities (of a fiduciary character) $49,768.63, leaving a balance of $781,530.03. There had been paid out during the year $21,995.60, and received, $18,853.37. The present membership is 847.

John Farquhar, chairman of the Committee of Arrangements, urged that more attention be given to the matter of prizes for fine shrubbery and plants.

The report of the committee on gardens, by Charles W. Parker, chairman, was read by Secretary Rich. It alluded to the gypsy and brown-tail moths, and to meetings which had been held to consider ways and means to fight the pests. Prof. A. H. Kirkland was praised for his efforts.

An interesting feature of the report of the Garden Committee, was a description of the mushroom cellar of H. A. Stevens at Islington. It occupies the entire space of a barn cellar, about 40 x 60 feet, with close-laid stone and brick walls. A dish of splendid mushrooms was shown by Mr. Stevens.

AMERICAN CARNATION SOCIETY

Carnations Registered

By W. L. Lewis, Marlboro, Mass.

"Mrs. W. L. Lewis." — Color, pure snow white, flower well built on a long stiff stem, and will produce more flowers per square foot than any other white in existence to-day. The flowers measure three inches, are good keepers and shippers and a burst calyx is something that has never been seen to exist since its origin.

By Baur & Smith, Indianapolis, Ind.

"Beatrice." — In registering this variety last week the color was described as lighter than Daybreak; it should have read "brighter than Daybreak."

The premium lists for the Chicago meeting, January 25th and 26th, of The American Carnation Society have been sent out this week to every member of the Society. If yours has not reached you, it has miscarried and you should notify the Secretary at once. If you are not a member and want one, they can be had on application.

Messrs. H. Weber & Sons of Oakland, Md., desire to have it announced that the premiums they offer in the Premium List of the Carnation Society for the vase each of Norway, Gov. Lowndes and G. Lord scoring the highest number of points, will be awarded to a vase in any of the classes calling for fifty or more blooms, and need not be made a separate entry. — ALBERT M. HERR, Sec'y, Lancaster, Pa.

The following premiums are offered for competition at the 14th annual meeting to be held in Chicago, Ill., on Wednesday and Thursday, January 25th and 26th, 1905.

CLASS A. Open to all varieties, Seedlings or Standard Sorts.

No.		First Prize.	Second Prize.
1	Best vase 100 blooms White	$10.00	$6.00
2	Best vase 100 blooms Daybreak shade of Pink	10.00	6.00
3	Best vase 100 blooms Lawson shade of Pink	10.00	6.00
4	Best vase 100 blooms Scott shade of Pink	10.00	6.00
5	Best vase 100 blooms Scarlet	10.00	6.00
6	Best vase 100 blooms Crimson	10.00	6.00
7	Best vase 100 blooms Yellow Variegated	10.00	6.00
8	Best vases 100 blooms White Variegated	10.00	6.00
9	Best vases 100 blooms. Any other color	10.00	6.00

CLASS B. Open to all varieties disseminated prior to July 1st, 1903.

1	Best vase 50 blooms White	5.00	3.00

No.		First Prize.	Second Prize.
2	Best vase 50 blooms Daybreak shade of Pink	$5.00	$3.00
3	Best vase 50 blooms Lawson shade of Pink	5.00	3.00
4	Best vase 50 blooms Scott shade of Pink	5.00	3.00
5	Best vase 50 blooms Scarlet	5.00	3.00
6	Best vase 50 blooms Crimson	5.00	3.00
7	Best vase 50 blooms Yellow Variegated	5.00	3.00
8	Best vase 50 blooms White Variegated	5.00	3.00
9	Best vase 50 blooms. Any other color	5.00	3.00

CLASS C. Open to all varieties disseminated prior to July 1st, 1902.

No.		First Prize.	Second Prize.
1	Best vase 25 blooms White	$3.00	$1.50
2	Best vase 25 blooms Daybreak shade of Pink	3.00	1.50
3	Best vase 25 blooms Lawson shade of Pink	3.00	1.50
4	Best vase 25 blooms Scott shade of Pink	3.00	1.50
5	Best vase 25 blooms Scarlet	3.00	1.50
6	Best vase 25 blooms Crimson	3.00	1.50
7	Best vase 25 blooms Yellow Variegated	3.00	1.50
8	Best vase 25 blooms White Variegated	3.00	1.50
9	Best vase 25 blooms. Any other color	3.00	1.50

CLASS D. Wm. Scott prize, 50 blooms Scarlet, no more nor less.

All varieties admissible that have not been disseminated prior to November 4, 1904.

Vases competing for this prize are not allowed to compete in other classes, excepting for Certificate of Merit.

First prize, $15.00 cash; Second prize, $10.00 cash.

CLASS E. E. G. Gillett prize, best vase of 50 blooms in the hall; said vase can be exhibited in any of the other classes. One prize, $5.00 in cash.

CLASS F. E. G. Hill Co. prizes, best 100 blooms of Adonis, $10.00 cash. Best 50 blooms of Adonis, $5.00 cash.

These vases can be exhibited in Classes A and B.

CLASS G. H. Weber Sons' prizes, vase of Gov. Lowndes scoring the highest number of points, $10.00 cash.

Vase of Genevieve Lord scoring the highest number of points, $10.00 cash.

Vase of Norway scoring the highest number of points, $10.00 cash.

CLASS H. James Hartshorne prize, best vase of 50 blooms Crusader, $10.00 cash. Same vase may be exhibited in other classes.

The Lawson Medal.

CLASS I. A Gold Medal will be given for the best vase of 100 blooms, any variety, any color.

A Silver Medal will be given for the second best vase of 100 blooms, any variety, any color.

A Bronze Medal will be given for the third best vase of 100 blooms, any variety, any color.

Special Medals of the Society of American Florists.

Class J. A Silver Medal will be awarded for the best vase of 50 blooms of Carnations not yet disseminated.

A Bronze Medal will be given for the second best vase of 50 blooms of Carnations not yet disseminated.

The variety to be in all cases of American origin.

Judges are to reserve awards in this class if in their opinion the exhibits are not worthy of the medals.

SWEEPSTAKE. $15.00 in cash to best vase in Class A.

$10.00 in cash to best vase in Class B.

CLASS K. Silver Cup to value of $25.00 offered by Vaughan's Seed Store, Chicago, Ill., for the best 50 blooms of an undisseminated variegated Carnation — any color.

CLASS L. $5.00 in cash offered by A. Dietsch & Co., Chicago, Ill., for the best undisseminated seedling Carnation from the State of Illinois, not less than 12 blooms to a vase.

CLASS M. $10.00 cash offered by Baur & Smith, Indianapolis, Ind., for the best 50 blooms of Carnation Indianapolis — this vase not to be in Class B.

CLASS N. John C. Moninger Co., Chicago, Ill., offers as follows:

50 Crimson — First prize, $5.00; second prize, $3.00.

50 Yellow — First prize, $5.00; second prize, $3.00.

These vases not to be exhibited in Class B.

CLASS O. Silver Cup to value of $25.00 offered by the Foley Manufacturing Company, Chicago, Ill., for the best vase of 100 blooms, arranged for effect; foliage of any kind allowed, but no flowers excepting Carnations. Open only to retail florists.

RULES GOVERNING THE AWARD OF CERTIFICATES OF MERIT

A variety must have been bloomed not less than three years; not less than fifty blooms must be shown, and an entrance fee of $5.00 is charged for each variety. The variety must be properly labeled with the Society's card.

PRELIMINARY CERTIFICATE

This can be competed for by two-year-old seedlings, twelve blooms or more to be shown, and an entrance fee of $2.00 paid for each variety.

News Notes

Jacob Rohr & Son, Naperville, Ill., lost the contents of three houses on the night of December 27, by frost due to their steam boiler giving out.

A slight fire occurred in one of the greenhouses at Evergreen Lodge, Clarksville, Tenn., on the morning of December 28. The principal damage to the contents was by smoke.

Fire started by the explosion of a lantern, burned the barn of the Riverside Greenhouse Company at Gardner, Mass., on January 2, and destroyed a quantity of farming and greenhouse tools, the whole loss amounting to about $3,000, on which there was partial insurance.

What amount do you propose to spend in advertising this year? Perhaps we can make it cover the entire ground for you and get your results beyond expectation.

Notes on Market Varieties of Chrysanthemums

It was a happy thought on the part of the National Chrysanthemum Society when it decided to hold an exhibition of market blooms in the vicinity of Covent Garden, and the organizers must have felt gratified at the display made, for although the huge mops were missing, the varieties displayed gave one an idea of the best decorative sorts for Christmas work. Most of the classes were well filled, and quality first-rate throughout. Few plants were staged, but they were a credit to Mr. Milton Hutchings, most being in 6-in. pots and carrying from six to eighteen blooms each, with the foliage down to the pot. The chief varieties were W. H. Lincoln, A. J. Balfour, and Guy Hamilton. The best novelties were Golden Standard, already described in these pages, and Hilda Tully, a crimson sport from Mrs. Herman Kloss. This will make a fine variety, but it is not yet in commerce. The general run of varieties in each stand were very much the same throughout the show. Allman's Yellow was well staged by the raisers, though not seen much elsewhere. Mrs. Herman Kloss was the chief bronze variety, while in *whites* were Mdlle. Thérèse Panckoucke, Madame R. Cadbury, Princess Victoria, Letrier, Souvenir d'une Petite Amie, Madame Philipe Rivoire, and Mrs. J. Thompson. In *yellows* the best were W. H. Lincoln, W. H. Reiman, King of Plumes, Yellow Princess Victoria (some strains of this variety are much better than others, being richer in coloring), Negoya, Mabel Morgan, and Mrs. Greenfield. The *pinks* were not so numerous; they included Framfield Pink, A. J. Balfour, Madame Louise Charvet, Pink Princess Victoria, and Mrs. Barkley. In the *bronzes*, Mrs. A. Tate, Mrs. Herman Kloss, Tuxedo, and Lord Brooke were best. The *crimsons* were really beautiful for the late season, most of them old varieties, such as Cullingfordi, Putney George, Red Canning, Mrs. S. J. Cooper, and the newer variety Violet Lady Beaumont were observed. Other good varieties in different colors were Matthew Hodgson, Mafeking Hero, Papa Veillard, and Madame E. Roger. The classes for packing were well patronized, and in the majority of cases could hardly be surpassed. — *J. B. R. in Journal of Horticulture.*

Street traffic was blocked, and wild excitement prevailed for several minutes on Broadway, New York, opposite Warendorff's flower store, on the afternoon of January 3, all resulting from the explosion of a little bottle of metal polish which a peddler was endeavoring to sell to Mr. Warendorff. No serious damage resulted.

GREAT NEW POTATO, NOROTON BEAUTY

The most valuable ever introduced. Full description and the opinions of eminent authorities who have tested it are given in our catalogue.

J. M. THORBURN & CO.

Seed Growers and Merchants

36 Cortlandt St. NEW YORK

Over 100 years in the business

In writing to advertisers, kindly mention HORTICULTURE

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

All of the fancy large podded varieties of peas are in short supply.

The seed bean crop of 1904 promises to be one of the shortest on record.

Although late varieties of sugar corn, excepting Country Gentleman, are said to be abundant, some early sorts are in rather short supply.

George A. Burnett, thirteen years in the employ of Weeber & Don, New York, has opened a seed store at 1951 Boulevard, Jersey City, N. J.

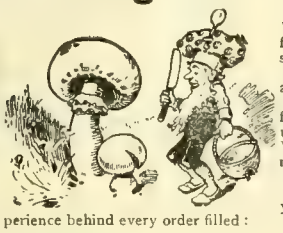
George A. Bennett, for thirteen years with Weeber & Don, has severed his connection with that firm, and will now paddle his own canoe. There is an opening there for a young man with a good practical knowledge of the business and the necessary ability and push.

Many market gardeners in all parts of the East are said to have saved their own seed beans the past summer. This is due mainly to the fact that green beans at times did not bring cost of picking and were allowed to ripen. This will help out the short crop of seed beans.

The Long Island Seed Co. of Mattituck, L. I., have completed their new warehouse at that place. It is a fine structure and admirably designed for their business. W. C. Langbridge, representing Jerome B. Rice Seed Co., was snowbound there from Tuesday until Thursday afternoon.

A SEEDSMAN BANQUETED

This is the season of the year when the seedsmen come around and claim our attention, and of late years their visits have been looked forward to with much less of alarm and concern than formerly.



Mr. John Beaton, representing R. & J. Farquhar of Boston, was in Newport last week, and in connection with Mr. Beaton's visit we may say that on one particular evening he would have given all he possessed to be anywhere else but in Newport; not that at any time there existed a likelihood of anything ill happening to Mr. Beaton. On the contrary, the star of John's popularity which was always on the ascendancy, as viewed by the gardeners of Newport was extremely so since a delegation from here visited Boston on the occasion of the recent chrysanthemum ex-

hibition. He looked after the boys then all right. For this, and by reason of John's aptitude for making friends everywhere, he was given the reception which to him was most surprising in that it was really a surprise. And it overcame him — made him wonder what he had done and wish he could escape, but escape was cut off.

Mr. Beaton put up at the United States Hotel as has been his custom, but on the night selected by the conspirators, under pretext that at the Perry House a new customer awaited him with a large order for seeds, he was lured there and met on his arrival, which was hurried (John only hurries when he sees or imagines he sees business ahead) — not a new customer, but instead the arch conspirator Daniel Coughlin, who parleyed a little with John until the arrival of reinforcements, when he was laid siege to and carried — where? — into the best appointed dining-room of the Perry House, and there, greeting the bewildered gaze of John, was a table covered with the best and choicest viands and other things that could be produced, the whole constituting a grand banquet in the honor of Mr. John Beaton.

It is only a mild way of putting it when we say the victim was overcome with emotion, but he was so to so great an extent that his tongue failed to give utterance to the words of gratitude he fain would utter. About eighteen gardeners sat at the table, and after cigars were lighted, each had words of compliment to say of the guest of the evening. When all had said enough and what Mr. Beaton thought more than enough, he (Mr Beaton) thanked his hosts, as he said, not only for their hospitality but for an honor he would always proudly think of. D. M.

GEORGE C. WATSON

HORTICULTURE is the only paper of its class in America.

THE PRODUCTS OF BURPEE'S SEEDS

BESIDES WINNING

Several Gold Medals,

WERE AWARDED A

Grand Prize

For Display of VEGETABLES

AT THE 1904

St. Louis World's Fair!

Mr. C. W. Holley, of Glens Falls, N. Y. won **A GRAND PRIZE and GOLD MEDAL** at the World's Fair with vegetables grown from Burpee's Seeds. This was the supreme award. Other stocks got Gold Medal, but Burpee's was the only **GRAND PRIZE**. See also photograph of his exhibit which won first prize at the great *New York State Fair*,—as shown on **page 175** of Burpee's Farm Annual for 1905.

☞The winnings at the various fairs for the season entitled Mr. Holley to Burpee Premiums as follows: Seven County Fairs at $5.00 each; one State Fair, with photograph, $21.00; and the National Extra Price of $100.00. In addition we sent our check also for an "honorarium" of $100.00 in appreciation of the magnificent results that Mr. Holley, *at his own expense*, attained at St. Louis. ☞Thus Mr. Holley won the past fall, a total of **thirteen hundred and twenty-five dollars and fifty cents in cash prizes for the products of BURPEE'S "Best Seeds that grow."**

In Iowa, as usual, the first prize at State Fair was won by Mr. L. G. Clute,—exclusively with the products of Burpee's Seeds. Mr. Clute was made Superintendent of Iowa's Agricultural Exhibit at the World's Fair. He wrote us from St. Louis, November 21, 1904, that in this great Iowa Exhibit, which was awarded **a GOLD MEDAL and also the GRAND PRIZE**, *all the vegetables were grown from* Burpee's Seeds; also the Sweet Corn, Pop Corn, and Potatoes, *all grown from* Burpee's Seeds!

The Results at the State Fair of **Minnesota, Wisconsin** and **Kansas** are announced on **page 19** of Burpee's Farm Annual. Other States did equally as well, and we shall publish several more photographs of State Fair Exhibits in our New Prize Supplement for 1905. We are *justly proud* of all prizes won by our customers, as also of the *Two Gold Medals* and *Two Silver Medals* (including **the only GOLD MEDAL on Lawn Grass**) awarded directly to us for our own *Growing Exhibits* at the St. Louis Exposition. Although our business is not yet "thirty years old," no other seeds have ever had such universal endorsement at State and County Fairs!

☞If you are interested to know more about the *Unequaled Record* made throughout America,—at State and County Fairs,—by the popular prize-winning products of Burpee's Seeds, you have only to ask, *with your order*, for a copy of our Prize Supplement for 1905.

Unlike most "seedsmen," we are **actual GROWERS of Seeds**, having our own farms in Pennsylvania and New Jersey, supplemented by private contracts throughout America and Europe, subject also to our personal inspection. We have no branch establishments, and all orders must be addressed to

Philadelphia, Pa.

W. Atlee Burpee & Co.

WANTED: Consignments of High Grade Carnations

LOUISVILLE WHOLESALE FLOWER MARKETS

Business conditions were particularly favorable last week, many decorations and funeral designs being demanded. Carnations are of very good quality, but are still very scarce. Sweet peas, violets, and lilies of the valley are all very good quality, but with the exception of the lilies of the valley, are not in sufficient supply for the demand. Roses can be had in better quantities. Demand good.

NEW YORK FLOWER MARKETS

A pronounced depression and accompanying downfall in values in the cut flower market in the early part of January is no novelty. The stagnation following the holidays has been variously explained, but the fact is very apparent every year, and explanations do not modify it in the least. The present year is no exception to the rule. Those who feel it most keenly are, however, buoyed up by the confidence that the part of the season yet to come will also prove no exception to the well-established rule that, following the dullness of January's first two weeks, big business is soon due and may be reasonably expected to stay with us until Ash Wednesday interferes.

New Year's Day had hardly passed when signs of trouble began to appear. It needed but a day to bring demoralization, and since that time the wholesale end of the flower traffic has been "infernally bad," as one dealer aptly puts it. The topple included about everything in the list, from American Beauty roses down to Stevia. Probably the violets have been the worst sufferers. Cold and rain have kept the street dealer out of commission, and his assistance, so serviceable in the event of a glut, has not been available to help unload the stock that has been coming in so freely. Lilies and bulb flowers are all plentiful. So are carnations, and the quality is good, but values rule very low for the season. Next week we hope to be able to announce a revival.

PITTSBURG MARKET REPORT

Weather conditions had much to do with the "Ups and Downs" on prices for the first week in the New Year. All stock, except roses, was more than plentiful. The demand was only ordinary. Roses of good quality still remain scarce. The poorer are plentiful, but holding their own pretty well in price.

Last year President Roosevelt and the Cabinet set the example by wearing a carnation in the lapel on January 29th, the anniversary of McKinley's birthday. At the Capitol on that day the pages went around the House and Senate chambers with great boxes of carnations and every Senator and Representative, Democrat and Republican, pinned a carnation upon his lapel. Following the good example thus set, this tribute was paid by citizens of Pittsburg generally, and among the throngs on the street, carnations were everywhere observed. At our larger hotels and cafés, tables were decorated with carnations and the patrons were permitted to take them away. To keep this lovely tribute in vogue will only require the mentioning of the fact to your local papers.

Obituaries

J. M. Kimberlin, the seed grower of Santa Clara, Cal., died of paralysis, on December 26.

John Fallon, for many years a leading florist of Staunton, Va., died on December 27, aged 72 years.

F. Thom, 1259 Milwaukee Ave., Chicago, died December 31. He has been in failing health for a long time. He leaves a widow and children.

C. B. Derthick, manager of the Ionia Pottery Co., died at Ionia, Mich., on December 23, from a stroke of paralysis. He was a member of the S. A. F.

Charles H. Souther, whose conservatories have furnished many beautiful displays of plants and flowers for the exhibitions of the Massachusetts Horticultural Society, died on January 4, at his home in Jamaica Plain, Mass.

Karl Müller, 66th and Elmwood Ave., Philadelphia, Jan. 6th; aged 91; such was the brief announcement that came as a reminder to the craft that one of the oldest florists in the country had finally passed away. Mr. Müller was well known and highly respected, and while retired from active business, he kept his faculties to the last and up to within a week of his death was sitting around making cuttings, etc. His son, August Müller, has been running the establishment for some years.

NEW YORK FLORISTS' CLUB

The first meeting of the new year was a very fraternal and happy occasion, about sixty members present. President Traendly signalized the beginning of his second term of office by the presentation of a concise and practical address, which we publish in full in another column of this issue. He was followed by Vice-President Shaw who also read a paper referring appreciatively to his fifteen years' association with the organization and indicating in a pleasant vein how he expected the club to progress during the year to come and bespeaking earnest individual effort towards greater efficiency on all lines. The other officers, on assuming their duties for the year, also briefly expressed their acknowledgments and good intentions and the various committees rendered their reports.

Mr. Sheridan, for the dinner committee, announced Saturday, February 4, as the date and the St. Denis Hotel the location of this interesting annual event, and urged a large participation by the members. Mr. Nugent, for the house committee, reported a year's acceptable entertainment at a moderate cost, and was rewarded with a vote of thanks and an appropriation for the coming year, including assistance in the peculiar duties of this committee at the regular meetings. The board of trustees presented its report, showing an increased balance in the treasury, and recommending that the secretary attend to the sending out of due bills and receipting for dues paid on and after July 1st, and this recommendation was adopted by the club. The secretary's report showed that the average attendance at the meetings of 1904 had been 78. It was voted that an outing be arranged for the coming summer as in past years, and a committee was appointed with full power to arrange therefor. Other committees were appointed, with chairmen as follows: legislative, J. N. May; essay and entertainment, J. B. Nugent, Jr.; awards, Patrick O'Mara. It was voted that the February meeting be Ladies' Night, and that a special exhibition of carnations be arranged for that date.

A letter was received from Prof. W. G. Johnson, expressing gratitude for the kind interest evinced by the club in that gentleman's candidacy for the position of assistant secretary of agriculture at Washington.

A communication was presented from the secretary of the anti-trust league asking the club's endorsement of the W. R. Hearst bill for the regulation of railroad matters, and same was referred to the trustees. Mr. Wallace asked for a good attendance at the carnation meeting in Chicago, and suggested that all try to go together in one party. From the Morris County Gardeners' and Florists' Club came a cordial invitation, through Mr. Duckham, for the members to attend the annual smoker of that society at Madison, N. J., on Wednesday evening, January 11.

Annual Address of President F. H. Traendly

Gentlemen of the New York Florists' Club: — I thank you heartily for the mark of confidence you have shown me by re-electing me to the office of president for the ensuing year. Well attended meetings, a liberal response to our invitations to all who might have something to show on the nights set apart for special exhibits; good work by the different committees — all these have contributed to make the past year successful. That the same favorable conditions may be with us during the year to come is my earnest hope.

The Club is in a flourishing condition, and the treasurer's report will show a growing surplus, as the following extract proves: —

Cash balance January 1, 1904, $ 911.63
Cash balance January 1, 1905, 1226.52

The membership is at present about 200, of which 147 are in good standing; 32 owe one year's dues and 18 have received a final notice to make good their indebtedness at once. These figures may seem to compare unfavorably with last year's report, but the list of delinquents has been gone over by the Board of Trustees and a good deal of deadwood dropped from the roll.

It is proper at this time to say to proposers of new members that the initiation fee of $3.00 must be handed in to the Secretary with every proposition before a name can be presented to the Club.

I recommend a repetition of last year's program to arrange for special exhibitions on stated nights during the year, beginning with Carnations at the February meeting. It would tend to increase interest and make these nights still more attractive if we could have a paper read by a specialist on the principal exhibit of the evening.

I hesitate to refer to a revision of the rules governing the Committee on Award, but I have heard suggestions that the rules might be improved; I think, however, that matter may safely be left with the committee and if it sees fit to make recommendations, the Club will consider them.

The House Committee seems to have made itself indispensable and a fair appropriation for this year is advisable. I recommend that the Committee make arrangements for a Ladies' Night for the February meeting and provide proper entertainment. If agreeable to the Club, I would suggest that we entertain the ladies again towards the close of the year.

One or two illustrated lectures might be arranged for by the Essay and Entertainment Committee during the year.

This is an opportune time to consider the subject of the Club's Annual Outing and to invite suggestions as to the place where we are to go.

As a member of the Second Outing Committee, with some of its members we visited all places near the city and found most of them undesirable or inaccessible, Wetzel Point Grove being more attractive than any. This Committee should be appointed at once, with instructions to make arrangements with the management of the place determined upon at this meeting.

The bowling contingent is reminded that it is time to get to work, enlist recruits, and try to make a record for New York. We are not handicapped by distance to be traveled this year, and a good team ought to be got together and give a good account of itself in Washington this summer.

Concluding, I want to testify to the warm support given me by the officers of the Club during the past year. The Secretary has done his good share, and how much that amounts to is not generally appreciated by the majority of members. His work has been most valuable towards the Club's welfare.

The Treasurer has seen to it that the Club's funds have not been idle, and the fact that all but a couple of hundred dollars are drawing interest, which amounts to enough to pay two-thirds of our rent, shows with what zeal he cares for our financial wellfare. With the continued assistance of these, the other officers, committees and members, I hope to be able to serve you acceptably during the coming year.

Personal

Mr. and Mrs. R. Hunnick of Newport, R. I., will celebrate their silver wedding on Monday evening, January 30.

J. N. May of Summit, N. J., has been critically ill for three weeks. Although now somewhat improved, he is still very sick.

President Goodell of Amherst Agricultural College, has been given a leave of absence of six months on account of ill health.

Julius Roehrs of Rutherford, N. J., who has been seriously ill with pneumonia, went outdoors for the first time this week. A host of friends will be glad to learn the good news.

Roses and Carnations A Specialty..... WHOLESALE GROWER of **CUT FLOWERS**

BOSTON FLOWER MARKETS

The overstock in all lines of cut bloom which is reported generally from other localities exists in Boston to an exasperating degree. All grades are in heavier supply than the demand can care for, and the weather is such that the curbstone merchant cannot take advantage of the situation. Country shipping trade has fallen off seriously during the past week. This especially affects the carnation market, as carnations are the standard stock in trade of the country florist, and the product is accumulating in wholesalers' hands. Lawson, Enchantress, and other aristocratic members of the family are in the same boat with the more plebeian stock and are offered freely at figures not usually applicable to these grades. In roses, as usual in a time of plenty, the lower grades are the worst sufferers, as the best are demanded at low figures, and the ordinary stock is sidetracked for the time being. Violets have been very risky property during the past few days, and it is evident that other markets are in a similar condition, as many violets have been shipped in here during the week, from remote localities not often heard from in Boston and popularly regarded as exclusively interested in markets elsewhere. Smilax begins to show signs of a stiffening up in the near future.

PHILADELPHIA FLOWER MARKET REPORT

The last week closed with American Beauty and Liberty roses moving very slowly; Teas going fairly well. Carnations badly overstocked and prices away down. Bad weather all the week and no street trade in consequence caused the accumulation. Violets shared in this misfortune. Orchids have been doing well, there being more cattleyas sold last week than at Christmas and cypripediums enjoying a regular demand. White lilac is coming in freely but moves slowly and trade in all bulbous stock is stagnant.

CHICAGO FLOWER MARKET

The first week of 1905 was marked by a sharp contraction in demand. The receipts at Chicago compared with those of the same period last year are about even. Moderate offerings on long-stemmed Beauties met with ready sale, although the medium lengths enjoyed the best call. Good teas were again in light supply and anything of 30-inch stem brought easily $20 per 100. Teas of second size grades which sell from $6 to $10, were in comparatively good supply, and it was on these grades the most sales were made. An irregular market prevailed in carnations and the changes were all on the side of reductions in prices and the general tone of the market was such as would give satisfaction to the street venders generally. Quality showed some improvement, but even with this as an aid, sellers were unable to prevent or even postpone the time for decline. Fresh arrivals' prospects were not rosy for a good clearance. The violet situation is no better. Lily of the valley is plentiful. Roman hyacinths are a drug. Mignonette is meeting with ready sale. Some fine white lilac is arriving. The green goods are in ample supply. Shipping trade is nominally steady, but the local demand is marked by great unevenness. The orchid market was lightly supplied and is steady.

BERGER BROTHERS **Roses, Carnations**

1220 Filbert Street BELL and KEYSTONE TELEPHONES PHILADELPHIA

CHICAGO JOTTINGS

Visitors, G. F. Crabb and C. R. Hills, Grand Rapids, Mich.

Fred Sperry of Vaughan & Sperry and W. N. Rudd are among the recent victims of the grippe.

Peter Reinberg filled an order received from an eastern store this week for 1,000 American Beauties. It is not so long since Chicago was a good customer for the eastern growers.

E. G. Hill was in town last week and exhibited his red rose Richmond at the Benthey-Coatsworth salesroom, where it was an object of much admiration. Over 30,000 of this rose have been ordered by five local growers.

At the Theodore Thomas funeral, notwithstanding the request "Please omit flowers," many flowers were called for. E. Wienhoeber Co. had charge of the floral decorations. One of their largest pieces was a laurel wreath, six feet in diameter, on an easel with a cluster of long-stemmed American Beauties arranged in the center. A handsome oval wreath of leucothoe foliage was much admired. There were many arrangements of violets.

The Chicago Flower Growers' Market held their annual meeting January 3, 1905, and the following officers were elected: Emil Buettner, President; William Tonner, Vice-President; F. R. Hills, Treasurer; A. Henderson, Recording Secretary; Percy Jones, Financial Secretary and Manager. Board of Directors for 1905: Emil Buettner, F. R. Hills, A. Henderson, Walter Tonner, John Sinner. The management was congratulated upon the excellent showing made.

At John C. Ure's place, 2843 Evanston Ave., they are very enthusiastic on the merits of Impatiens Sultana as a winter bloomer. Cuttings planted out last May have grown to enormous sized plants in 8-in pots, measuring four feet in diameter. From the large blocks of this stock in propagating benches it seems they anticipate a large demand for this old-time favorite. I also noticed an interesting collection of scented geraniums, ten varieties which will be offered to the trade at the opening of the cutting season.

ASTERS

The Two New Varieties:

Benthey's White

Benthey's Pink

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite asters in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever.

PRICE LIST:

Trade Package, white or pink, $1.00 **1-4 oz. white or pink, $2.50**
1-2 oz., white or pink, . . 4.50 **1 oz., " " " 8.00**

In writing to advertisers, mention HORTICULTURE

Outdoor Art and Craft

The controller and mayor of Greater New York have announced their willingness to favor an appropriation of $4,000,000 for small park purposes during 1905.

The park commissioners of Hartford, Conn., have voted to continue this year the spraying of trees and shrubs to exterminate the San José scale, and the sum of $350 will be devoted to this purpose.

The town of Stoneham, Mass., has appropriated the sum of $1,000 toward the suppression of brown-tail and gypsy moth pests, and the money will be expended under the direction of tree warden W. H. George.

We are duly gratified to Mr. Robert Aul, park commissioner of St. Louis, Mo., for a copy of his annual report. It is an album of handsome half-tone views in the parks of St. Louis, and the text contains much interesting information.

It is now proposed to dam the Mystic River at Craddock bridge in Medford, Mass. The report by Engineer Freeman to the Metropolitan Park Commission recommends this improvement as not only desirable as a park feature, but one that is absolutely necessary as a sanitary measure.

The Mayor of Lowell, Mass., in his annual address, gives particular attention to the question of park improvement, and recommends appropriation by the city to enable the Park Commission to install athletic apparatus, and for other accommodations for the young people's enjoyment in the public grounds.

Prof. A. B. Kirkland delivered a lecture at Melrose, Mass., on January 5, his subject being "The Best Means of Destroying the Brown-Tail and Gypsy Moth." Large delegations from the Tree Protection Associations in the neighborhood were present. Prof. Kirkland is probably the best informed man on this subject in this country.

The mayor of Malden, Mass., in his inaugural address recommends a petition to the General Court asking for special legislation empowering the city to accept the gift of Pine Banks from the Converse estate, and a joint arrangement for the assumption of the maintenance of the park by the two cities of Malden and Melrose, as provided for in the bequest.

THE MOTH PROBLEM

Secretary Wilson of the Department of Agriculture declines to consider the gypsy moth and the brown-tail moth of Massachusetts as interstate problems, and he asserts that they are for Massachusetts alone to take care of. Mr. Wilson has been responsive enough in the past to appeals from other sections of the country for help in the suppression of insect pests, and he may yet listen to the cry that is sure to come up from New England, and probably from other sections, for aid in stemming the ravages of the bugs. It is clear enough that both species of moth are finding their way into the adjoining states, and that it is only a matter of time when all parts of the country will be more or less infested with their presence. The national Department of agriculture ought to take as much interest in them as it does in other enemies of the agricultural industries, though we think the main reliance in keeping them down should be the efforts of the farmers themselves. An investigation by the department's experts might help in the discovery of means of cure or prevention — certainly of restriction — and this, it seems to us, is due to the whole country, leaving out the peculiar interest of New England at the moment in the matter. — *New Bedford* (Mass.) *Standard.*

Business Changes

M. S. Good is starting a nursery business in Hitt, Mo.

Culligan & Co. succeed the Art Floral Co. in San Francisco, Cal.

The Shelly Floral Co. has been incorporated in New York with $5,000 capital.

August Ellwood has opened a new flower store at 640 Madison Ave., New York City.

Robert Symmons, formerly with George Wittbold Co., has started a retail business in Morris, Ill.

The Metairie Ridge Nursery Co., Ltd., of New Orleans, La., has been incorporated. Harry Papworth is president and general manager of the new company.

Murray & Keene, Flushing, N. Y., have sold their nursery property for building purposes. They have eighteen months in which to get the trees and other property removed.

The American Horticultural and Distributing Co., has been incorporated to do business in Martinsburg, W. Va., manufacturing and dealing in horticultural and agricultural implements and chemicals. Capital, $25,000.

Greenhouses Building or Projected

ORMOND, FLA. — H. V. Betts, one house.

BRANDYWINE, DEL. — N. L. Talley five houses.

MILTON, MASS. — N. T. Kidder, plant house, 20.Æ150. By Hitchings & Co.

Metairie Ridge Nursery Co., Ltd., New Orleans, La. Range of greenhouses.

The General Assembly of the State of Rhode Island has been asked to appropriate $15,000 for a greenhouse at the Rhode Island College of Agriculture and Mechanical Arts at Kingston.

At the annual meeting of the board of managers of the New York Botanical Garden, Dr. Britton called attention to the rapidly filling greenhouses and the advisability of planning for the construction of another range of houses, which should have a floor area of at least, as great at the present range, to be erected to the eastward of the Bronx River.

The report of President H. H. Goodell to the trustees of Amherst Agricultural College recommends the addition of a number of horticultural buildings, and it is understood that the trustees will recommend to the Legislature immediate permanent improvements at a cost of over $100,000. This includes $3,200 for an addition to the greenhouse of the entomological department; $39,500 for erecting and equipping a new building, and $14,600 for a new greenhouse in the horticultural department; $35,900 for a new building in the botanical department; and enough additional money to connect the botanical and horticultural buildings with the heating plant.

"Waterbury would do well to follow the example of Springfield in the matter of civic pride, which is a little lacking here. In Springfield private citizens have contributed money enough to buy two whole city blocks to make into a park, and now they are thinking of taking the whole river front for a popular drive. If such a scheme were even suggested in Waterbury, which is richer by far in proportion, we could see the awful fuss that would be made. Wake up, Waterburians, and take a little pride in your city." — *Waterbury* (Conn.) *Telegram.*

We execute all our correspondents' orders with greatest care and at lowest rates. Trade courtesies extended.

Decorative Art

This basket pleased me about as much as anything we have done this season. It was made for one of our most artistic patrons, who wished something Japanese. It was sent with possibly twenty bouquets to a debutante. The color combination was simply one of *browns* and *greens*; seed pods, rushes, grasses and Cypripediums in a brown basket on a white porcelain tray, and a spray of evergreen in a little bronze vase.

H. H. Battles.

Selecting Cuttings

There are not many subjects more important than the above to the successful grower. If you observe any specially good plant or good flower, have a label and mark the plant. This is particularly true of carnations. There are carnation plants every shoot of which will throw up a flower without any surplus grassy growth, while others will be full of shoots that are so vigorous and so good-looking that when the time comes to propagate they are the ones to catch the eye and, if careful attention has not been paid to mark the free-flowering plants, they are the cuttings that are taken, to the sorrow the following year. I once saw as fine looking a lot of Mrs. Thomas W. Lawsons as any one would wish to look at; they were the picture of health in February, and so they ought to be for they had given hardly a flower. On others taken from the right stock every growth had a bud or a growth that would flower.

Avoid taking cuttings from any split-flowering shoot or those that show any kind of disease or weakness in any way and you will raise the standard of your blooms and quantity next season if you will carefully select your plants, taking the cuttings only from the flowering stems. When I take carnation cuttings I look for the buds that have color showing, and take the cuttings from the stem. They are then ripe and in proper condition to root freely, and every one will be ready to take from the propagating bed at the same time. Do not try to put in all you want at one time without any regard to the proper cutting, for if you do, those that were not ripe will not be ready to take from the bed and if put back in the sand they never make good plants.

James Wheeler

Culture of Gloire de Lorraine

Regarding my method of culture of Begonia Glorie de Lorraine that has been requested for HORTICULTURE, I have grown them this year three different ways. The first I carried over old plants from last year, which I don't think I will do again. The flowers were smaller and light in color and did not last like those on the young stock. The second I rooted in March and flowered them in 8-in. pans. The third I rooted in September, 1903, and planted them around the edge of a carnation bench for the winter and potted them up in May, 1904, in 9-inch pans. The flowers were as dark in color as the ones rooted in spring, but will not last so long, as they are so thick that when it is dull weather and they have to be watered, they damp off.

I gave them the last shift about the first of July and used one part good soil, one part leaf mould, and one part rotted manure. I then placed them on shelves in rose-house near the glass till October, and afterwards hung them in a greenhouse with Krick's pot-hangers, about eighteen inches from the glass at a night temperature from 50° to 55°. I find that growing them near the glass and with plenty of sun I get stronger growth. They break better and when they flower they have better color and last much longer than if grown in the shade. They look a little yellow in the summer, but when they begin to flower in the fall and the days get short, that soon wears off.

ALEXANDER OGG.

Stroud and his Methods

That there's always room at the top was well exemplified in our visit the other day to the Strafford Carnation farm, where we had the pleasure of seeing one of the most up-to-date establishments devoted exclusively to growing the Divine Flower it has ever been our privilege to experience.

The Stroud may be classed as a prototype of the seven wise men: he studied the situation and experimented for nine years before he invested much; but having once made up his mind, he went in on a large scale and now has a fifty-thousand-dollar carnation plant that is making them all hustle to keep pace with the quality of its products. This plant is undoubtedly the peer of any in this part of the country. We all admit that, and extend our interest and admiration to Mr. Stroud. But beyond this comes the question: What can we learn? Has Mr. Stroud developed some special point that we may do well to take a note of?

He has. He has developed the fact that there was no establishment doing the carnation as it ought to be done for this market, and he has further emphasized the fact that the highest blood and breeding bring the best returns. This latter important point came out on our asking him which had proved his best money-getters during the past two seasons. His answer in effect was this:

(1) Enchantress; (2) Alpine Glow; (3) Lawson; (4) May Naylor; (5) Harry Fenn. Estimate based on cut from January 1, 1904, to July 1, 1904.

The importance of this statement will be more apparent on perusing the following list of varieties which Mr. Stroud has been pitting against the above mentioned and keeping careful tab on returns: —

Crane, Mackinac, Governor Bliss, Adonis, Joost, Genevieve Lord, Mrs. M. A. Patten, Prosperity, Ethel Ward, Judge Hinsdale, Flamingo, and a number of others in smaller quantity.

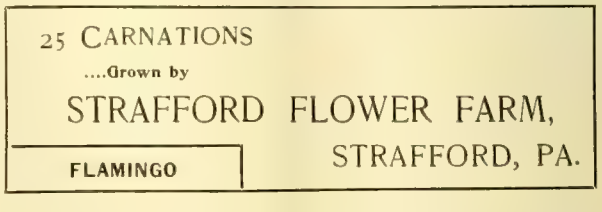
Not that many of these latter are wanting in merit and are in fact quite indispensable for various reasons, but that the first five money-getters stood at the top of the heap, and all others so far as we can figure at the present moment are to be considered as subsidiary and supplementary. The verdict is not final of course, but is valuable so far as it goes.

Alpine Glow is Enchantress as to color, only smaller. Its great merits are perfection of shade and form and grand cropping qualities.

May Naylor is one of the best whites to date; fine, big pure white; good stem; good cropper; away ahead of Flora Hill.

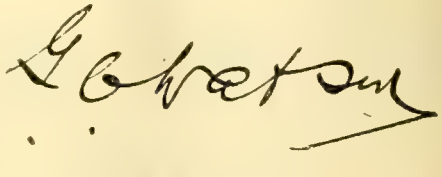
Harry Fenn has come prominently to the front as a fine bright crimson this season and has developed great keeping qualities. While not extra large, it is a money-maker and very satisfactory both to the grower and retailer. There was no blaze of trumpets for the Fenn advent, and yet here it is a magnificent thing and this pointer is worth dollars and dollars to you if you are reading HORTICULTURE as you ought to, from cover to cover. All the retailers want Harry Fenn, because it keeps well and does not go to sleep.

Adonis, apparently on its last legs. What a pity! In its glory what can equal this for bright, glowing red, size and form, and all the good qualities?



Joost; still a good one in a limited way; must not be dropped yet.

Genevieve Lord; has its place too and is still in the ring.



Prosperity; big and fine, but not enough; must have it of course for quality and variety; it's a magnificent carnation all right.

Flamingo; after Crane this one is a dandy — with merits all its own too.

The Strafford establishment showed fine cultural management, and a word of praise is due to Mr. Beattie who has been a faithful henchman of Mr. Stroud's for the past nine years. The location and arrangements are ideal. The buildings and fittings are all the latest Hitchings' construction, and are as near perfection as modern brains and enterprize can make them. The boys from far and near have been trooping to see the place of late, and from all accounts Mr. Stroud takes their innocent interest and homage in the most genial and good-humored spirit — busy man though he be. He told your scribe that some day when he gets better acquainted with them he is going to have a delegation up to the old farmhouse and treat them to a good pot-pie dinner. Take a note of that, ye bon-vivants of the Florists' Club and see that E. S. S. doesn't forget it.

We give a facsimile of the tag Mr. Stroud puts on each bunch. This educates the commission man and his retainers, the retailer and his assistants, and of course through the latter finally reaches the public. We think it a good idea. People will soon come to know and ask for Enchantress, Harry Fenn, just as they ask for Beauty and Bridesmaid, and be willing to pay extra because they will expect to get extra quality. We think all growers ought to use the tag until the varieties get so well known as to make it unnecessary.

Growing Specimen Chrysanthemum Plants

We might say that we begin to lay the foundation for our plants when we select the stock from which we are to propagate. We find that which has not been forced the previous year the best for this purpose. For plants that are to be flowered in 12-in. pots we propagate during the early part of January; those for 7-in. are propagated in March; otherwise the treatment is the same.

When the cuttings are well rooted they are potted in 2-in. pots and placed near the glass in a cool house. When well rooted in these pots (not pot bound) they are shifted to larger as they require. At each potting a stronger soil is given, using a mixture of well rotted fibrous loam, old manure, and a sprinkling of bone meal. As the soil is very light in this locality, with the late potting I add some clay which makes the soil hold the moisture better. I think the plants do better in a moderately heavy soil.

We begin pinching when the plants are about 4-in. high, which is continued until about the first of August according to the varieties; late flowering kinds we stop ten days earlier. The final potting is given about the middle of June, giving plenty of drainage and firming the soil well around the plants. No stimulant is given as long as the plants are making a healthy growth, but just as soon as the foliage shows that more food is needed, we commence by using cow, horse, and sheep manure in liquid form, changing each week with soot and Clay's Fertilizer,

ANEMONE-FLOWERED CHRYSANTHEMUM GARZA
GROWN BY D. F. ROY

CHRYSANTHEMUM HOUSE AT MALDEN, MASS.

D. F. ROY, GARDENER

in doses according to the strength of the plant, a weak growing variety requiring less than those of stronger growth, nor will red and pink flowered kinds stand as much as the lighter colored varieties.

We disbud all with the exception of the Pompon and Anemone flowered; these we consider much better by letting all the buds blossom, while with the others we leave the terminal bud. When the plant is finished all flowers should nearly touch each other.

When the buds begin to show color we do the staking, giving the plants the desired form and keeping the flowers in position.

Our plants were grown outside from June to August, syringed twice a day in bright weather, leaving space between each plant for the circulation of air, also to give us a better chance to see their enemies, of which they have not a few. But with a little watchfulness and care they can be held in check, and we are well repaid for our labor when the Queen of Autumn appears in all her glory.

David F. Roy

We shall be glad to receive from our readers communications on topics of interest, and our columns are at all times open for short and practical comment or discussion of timely subjects. Photographs always welcome, if suitable for meritorious half-tone reproduction.

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

The Carnation League of America is a striking example of what may be accomplished by consistent and incessant effort on a single line by advocates whose whole heart is in the work.

We have felt compelled, on sundry occasions in the past, to criticise the daily newspapers for their readiness to give currency to sensational and ridiculous narratives regarding the florist and his profession. We are glad now to find occasion to commend and to thank the newspapers of New Jersey for their steadfast defence of our American robin and the successful fight they have waged, on behalf of the people, against the bill permitting the slaughter of the birds. And the worst feature of the iniquitous scheme, which the public press did so much to overthrow, is that it was prosecuted in the name of horticulture.

"To what base uses we may return, Horatio!"

Schedules for the chrysanthemum shows of 1905 should be prepared at once, if not already attended to. There is little doubt that more consideration in the prize lists for the single and pompon-flowered varieties and of the decorative possibilities with these neglected subjects, would bring out results distinctly to the advantage of the exhibitions. The artistic qualities which peculiarly belong to the small flowered section seem to have been completely lost sight of by those who have assumed the duty of making out the prize schedules. It is admitted that the pompons shown in little handfulls stuck in vases, make a sorry showing on the tables alongside the big Japs, but there are ways in which they can be displayed to great advantage, and any competent committee should have no trouble in making proper provision therefor.

Each year sees the orchid gain a firmer footing as a standard cut flower for general use. Many of us can recall the time when a rose-bud held the same relation as to rarity that the cattleya does at present in the ordinary florists' stock. But in the markets of the larger cities not only cattleyas in many species, but dendrobiums, lælias, vandas, oncidiums, and of course, cypripediums are required for regular daily consumption and are really indispensable for regular use. The small florist who grows his own stock should take heed to this and make preparations for supplying the call that is sure to come his way eventually. The notion that orchids as a class are especially difficult of culture no longer obtains, and enterprising importers now advertise the most useful commercial sorts in any quantity at prices within the reach of all.

HORTICULTURE extends to the carnationists its best wishes for good weather, a large attendance, a record-breaking exhibition, and a good time all around. We hope all the trains will be on time, that every exhibit will be staged in time for the judges, that every flower will stay awake until after the show, and that every grower will go home satisfied that his pet varieties obtained due recognition and with his order-book filled from cover to cover. We have thought the occasion sufficiently important to warrant the issuance of a special Chicago supplement, showing a few of the noted and enterprising establishments which the visitors should visit while there, and portraits of some of the bright men in the profession who are unselfishly working for the success of the event. We hope the visitors will not fail to turn in some good orders to our friends, HORTICULTURE's advertisers.

Originality is at a premium now-a-days in all horticultural industries, as elsewhere. He who breaks loose from the monotony of custom is sure to attract attention, and if his innovation has merit he is assured of due recognition. There is abundant reward in store for the man who has the brains and the courage to break into untried fields in carnation, rose, or other hybridization, and an equal renown and profit for the store florist who will not be afraid to risk something on the products of such enterprise.

The sentiment on this subject seems to have undergone a radical change of late. It is not very long since it was the avowed policy of many leading retail florists to discountenance the introduction and hamper the dissemination of new varieties because such multiplication would call upon them for a larger investment for the daily stock in trade. To-day we see all the prominent dealers on the alert eagerly seeking to obtain these novelties and ready to make sensational displays of such. The immediate future unquestionably holds limitless possibilities for the exercise of initiative genius, and he who can only imitate must expect to be distanced.

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

HORTICULTURE published in Boston, and only a month old, is full of advertisements, although there are half a dozen good papers in the United States. 'Tis but another proof that our United States cousins better know the value of advertising than we do. — *Canadian Florist.*

We note the appearance from Boston, Mass., of a new gardening publication entitled HORTICULTURE. It is "devoted to the florist, plantsman, landscape gardener, and kindred interests," and contains plenty of helpful articles and notes with illustrations. We hope the venture will prove a successful one, as the editor, Mr. William Stewart, is evidently doing his best in the matter. — *Gardeners' Chronicle.*

We have received a copy of the latest addition to horticultural weekly papers. Of course, the American journals have but a meager vogue in the United Kingdom, yet the fact of an addition being made to the trade journals of the United States just after the dissolution of *American Gardening* (which circulated among private gardeners) would seem to show the tendency of gardening there. One feature of our contemporary is, at least, novel. The autograph signatures of most of the contributors are given. There are many good and useful articles. — *Journal of Horticulture.*

After Adjournment

Tuesday, January 17th, was the second anniversary of the S. A. F. meeting in Boston to take action on behalf of the cut-flower industry against the oppressive advance in express rates. The trade papers of the period, as well as the daily mail of the active workers in the protest, were well-supplied with lamentations from victims all over the country who would be willing to show all sorts of gratitude if only something could be done for their relief. The boon was secured for them, but the membership roll of the Society that made it possible bears no indication that their gratitude(?) had any perceptible value.

HOW MANY?

Will some of your practical readers kindly inform a subscriber to your valuable journal, how many scions a man ought to be able to graft in a day on the Manettii stock. "BARRYMORE."

DO IT NOW

The Florists' McKinley Memorial Fund Committee would respectfully call the attention of the trade to the near presence of January 29, 1905, popularly known as "Carnation Day," or "McKinley Day," set apart for the observance of a memorial to our late President.

The committee has at different times and divers places, detailed the objects of the Carnation League of America, and the benefits already derived, and to be derived from the popular movement, by our profession, and it now feels that the time has come for prompt attention.

The committee has expended considerable effort to place this question before the trade; a fair number have subscribed to the fund; a greater number have pledged themselves; but the greatest number have failed to respond.

To those who have paid, the committee heastily thanks; to those who have subscribed, but not paid, the committee would urge prompt payment so that they may receive their certificate before January 29, and to the great number who have failed to respond, either through carelessness, neglect or indifference, the committee would urge your prompt action.

The grower and the wholesaler are equally interested and benefitted with the retailer; they must depend upon each other; the more successful the retailer, the greater demand upon the grower and the whole saler. Therefor it behooves all, from the employee to the proprietor, to have a part in a general movement, that will bring manifold good to our profession.

A generous response will easily attain our object, and obtain for our profession a fund for the National McKinley Memorial that will prove a lasting monument to the florists' profession, and that will bring back to us many times the amount invested.

Any donations (the committee terms it "investment") of $1 or more entitles the member to a handsome steel engraved certificate, fit to be framed, and when displayed in your place of business, it will prove a lasting appeal to the sentiment and patriotism of your customers, and an indication of your own loyalty to, and your interest in, our Great Republic.

Hang your certificate of subscription in a conspicuous place. Spread the fact that President McKinley had no particular choice of color. He wore from white to the deepest scarlet.

Cater to the children. High prices will force the use of a tissue paper substitute, in many cases.

Do not overcharge. Ask a moderate price, thereby showing your participation in the day.

Send your remittance to the undersigned. "Do it now."

H. M. ALTICK, *Chairman*,
Dayton, O

The Logic of Phil

Our dear friend, Jno. Welsh Young, who contributes copiously to the gaiety of nations through the pages of a contemporary, over the signature of "Phil," has "been and gone and done it again." This time not content with the humdrum and ineffective prose of ordinary times, he has lifted up his voice into song and warbles a roundelay so tuneful and stirring as might jimmy-coggle the heart of the toughest old bachelor in Christendom. Personally the writer of this was duly jimmy-coggled as he was referred to in the following mystical terms: —

THE SOLUTION

"In 1905 how would it do
To fix one price the whole year thro;
Abstain from salt and sugar. You
Might send the fakirs to Timbuctoo.
G. C. says, G. C. says."

That is not only mystical but even has a touch of the mysterious and stamps Phil a true poet as any disciple of Robert Browning will promptly tell you. After deep searching, your humble servant opines that Jno. Welsh heard of the grouch of John Jones against the fakirs which G. C. raised as a topic for discussion at the December meeting of the Philadelphia Florists' Club. But there is no evidence that it was G. C.'s opinion that the fakirs should be sent to Timbuctoo. On the contrary, he made it abundantly evident in the report of the incident which he wrote for HORTICULTURE that he favored the humble street merchants as pioneers and feeders to the more advanced distributors of the florists' products. Because he brought up John Jones's grouch for discussion, John Jones not having the courage to do it himself, according to Phil's logic, was the same as making G. C. the author of the grouch and the remedy, which is about as logical as to say that Tenterden Steeple was the father of the Goodwin Sands, or that the William Penn statue was the cause of the mud in the Delaware. But what is the use of expecting sense or logic from a poet when he has the frenzy on him? And to send the poor street merchants to Timbuctoo, —

"Once there was a missionary
On the plains of Timbuctoo,
Past there came a cassawary
And ate him up and his hymnbook too."

So you see what might happen down there. Perish the thought! Dear John, you are forgiven this time, but don't do it again right away until we have recovered from the shock of your latest effort. G. C. WATSON.

NEWS OF THE CLUBS AND SOCIETIES

The January meeting of the Gardeners' and Florists' Club of Boston, at Horticultural Hall, was marked by a rousing attendance and much enthusiasm, there being about eighty members present. The retiring president, J. A. Pettigrew, thanked the Club for its support during the past year and a committee having escorted the new officers to their seats, President James Wheeler proceeded to read the address which appears herewith, which was received with due applause. Secretary's and treasurer's report followed, treasurer Ed. Hatch treating his hearers to a little interlude on the subject of finance, frenzied and otherwise. A communication, thanking the members for their subscriptions to the Vilmorin memorial, was received from Theodore Wirth.

Mr. John Farquhar introduced a resolve looking to a change in the phraseology of the awards made to plants and flowers exhibited before the Club, whereby possible confusion with the certificates issued by the Massachusetts Horticultural Society might be avoided, and a method adopted whereby full reports setting forth merits and qualities in detail could be given to exhibitors, thus insuring a distinct and peculiar value to these documents. The matter was discussed by many members and then laid on the table to be taken up as a special order of business at the February meeting. Fifteen names were added to the membership list.

JAMES WHEELER
President of Gardeners' and Florists' Club of Boston

On the exhibition tables were some superb displays of flowers. The usual committee, Peter Fisher serving as chairman, made examination and report on the various entries, subject to final adjustment as to the form of award after the consideration of this question at the next meeting. An award of the second grade was made to Guttman & Weber for carnation Victory. Mr. Guttman, who was present, gave an account of the origin and history of this fine scarlet up to date and invited visitors to go and see it growing. To Cottage Gardens, awards of third grade for Robert Craig, scarlet, Ethel Ward, pink, Lieut. Peary, white, and President, crimson. Mr. Hamilton was present as representing Cottage Gardens and briefly recounted the good qualities of these varieties. Similar awards were made to Begonia Turnford Hall shown by Charles Sander, Carnation Red Lawson, from W. J. Palmer & Son, and an award of second grade was given to E. O. Orpet's sensational hybrid cattleya Suzanne. Mr. Orpet had a very interesting collection of his hybrids on exhibition. Other exhibits that received complimentary notice were some promising seedling carnations from Thomas Waldie, Ernest A. Wild, Backer & Co., and others; sweet peas from William Sim and lilies from Alexander Ogg. The latter were very remarkable. Mr. Ogg remarked that the bulbs, purchased from Farquhar, had been planted in September in 7-inch pots, and under no special care had averaged from eleven to fifteen flowers each spike, from which he had been cutting freely since January 1.

J. Woodward Manning then entertained the audience with a talk on Landscape Art, which we hope to publish in full, illustrated with a series of impressive stereopticon views, for which an enthusiastic vote of thanks was given.

It was voted that the Club extend an invitation to the American Carnation Society to meet in Boston in 1906.

Inaugural Address

In accepting gratefully the high honor which this Club has conferred upon me, I feel that if I can fill the position half as well as our retiring president has done, I shall have done well. When this Club had got into a condition where we could hardly call it a Club, when it seemed almost impossible to get a quorum at our meetings and our work had been practically dsicontinued, we elected J. A. Pettigrew as president. Our wisdom was soon apparent. By his wise leadership and untiring efforts he rallied what forces were left and brought in new recruits, and by his faithfulness and perseverence brought the Club up to its present efficient standard. I know I express the sentiment of this Club when I say we have not only learned to trust and respect him, but to love him. We all feel indebted to him for all he has done. As I look forward into the future there seems to be the promise of a very prosperous year. There is a very wide and useful field for us to work in, and if we will all stand together and fulfill the object of our charter, "to unite the individual interests of horticulture that they may better lift up and carry forward all that tends to advance the interests of its members," our Club is bound to prosper. We each want to feel that the future prosperity of this organization rests upon our own individual efforts. If you want to know

anything about our profession ask, or if you know, tell it. We ought to endeavor to increase the funds in our treasury. We can each do that by bringing in a new member and paying our own dues promptly, and help to make our meetings so interesting and attractive that no florist or gardener or anyone interested in floriculture can afford to remain absent.

I feel in awarding prizes we should have a different form of awards from those of the Mass. Hort. Society, so that growers and exhibitors would desire the awards of both societies, and that we should make our award so valuable that they will be sought after by all. We ought to have good exhibits here at every meeting. Each member should bring in something each time if possible.

I thank you, gentlemen, for the honor you have done me, and I hope you will never regret your choice. I again ask the hearty coöperation of every member, all working together to make this the banner year of our Club.

HORTICULTURAL SOCIETY OF NEW YORK

The Horticultural Society of New York met in the rooms of the American Institute on Wednesday night, January 11, to listen to a most instructive address by Dr. D. T. Macdougal on the subject of "The Origin of Species by Sports and Mutations." There was good attendance, but an extraordinary absence of those who are practically interested in the business of plant production. Doctor Macdougal has followed up the work of Prof. De Vries of Amsterdam who originated the theory of the mutation of species, and on Wednesday night he told the audience just what it meant, how it was to be observed, and pointed out the practical value in the production of new plants.

It was in 1590 that in a garden at Heidelberg a sport of the Celandine occurred which had cut leaves and otherwise differed from the ordinary plant. This plant had never been known to appear again except as a seedling from the original one. It was something quite distinct and quite permanent, coming true from seed. That was the first record of the mutation of species. Darwin had his attention attracted to the interesting phenomena of the sporting of plants, and wondered whether in some way that was not connected with the production of new species. He was put off the track of this idea by the persuasions of his friends, especially by Wallace, and further investigation was abandoned along these lines. It was about 1865 that Mendel made public the results of his work on the peas. Then followed the pangenesis theory of Darwin that each organ of the plant as it would finally develop was represented in the seed by a special cell or rather a gemmule — each leaf, each twig, each separate part was the product of a certain special division of the seed. The speaker paid a high tribute to the methods and to the honest investigations of Darwin. So great was the interest in Darwin and his work that from that time until recently, people ceased to study the problems of organic evolution and discussed Darwinism itself; they wrote books about Darwin, and later other books on the books about Darwin. It was in 1880 to 1890 that De Vries became interested in the problems that were before the world. He reasoned that the principle of natural selection was too slow to account for the development of new species. His first step was to take 100 plants, native and cultivated, and

MARCELLUS A. PATTEN
Vice-president Gardeners' and Florists' Club of Boston

watch to see what happened. Out of these it was observed that Oenothera Lamarckiana did not come true from seed. In 1887 he saw some plants of this in a potato field — thousands of them — some of which were unlike their parents. He gathered seed and sowed it, so the next year he had 50,000 seedlings out of which 334 did not agree with the parents and even differed among themselves. They belonged to ten or twelve types, however, and continuing the work he had some sixteen types after three or four years. By a reference to the plants which Dr. Macdougal had brought with him, he illustrated the appearance of fourteen distinct types in his own seedlings raised at the New York Botanical Garden. These were very distinct and varied in form of leaf, in size, and otherwise. Some of these had been identified as species.

There were no gradations among them. They did not show connecting links. Out of one hundred seedlings, three to five were mutants. The essential points of the mutation were these: that they come off without any connecting types. That they are, so to speak, side steps and not progressive developments from the parent. The third point — and it was a puzzle to the botanists — were the mutants going to exterminate the parent? It was hardly likely if we considered the small proportion of new forms. Ninety-five per cent came true. Figure that the species grows on year by year. O. Lamarckiana would yield, say, 200,000 seeds. Only five per cent are of new forms and they may not be adapted to the conditions. So it must take the new plant a very long time to get ahead. That species were developed by this sudden method was pretty clear if we thought of the age of the earth. It is not old enough to have allowed the development of all the species now found upon it by the slow method of natural selection. But natural selection accompanied the saltatory origin of species. New forms were developed, but only such as best fitted the situa ions survived. The others die off.

One must not think that Oenothera is the only plant showing mutations. Discontinuous variation appeared elsewhere, as in monstrous flowers, also the doubling of florists flowers and the singling of those that were double offered evidence of discontinuous variation. If it were wanted to see if a plant were mutating, get a pure species, get pure soil — he used steam sterilized soil — and grow the seedlings where they can remain undisturbed. Look carefully at the young plants and preserve every "unlike" form; weed out duplicates only, to avoid the charge of destroying the connecting links. This is, of course, the exact reverse of the garden culture practices. Dr. Macdougal exhibited also a mutant form of the native evening primrose (O. biennis); he had recognized one out of several thousand seedlings saved from the wild plants in the garden — but then, perhaps he was not keen enough to recognize all the variations. The mutants vary in succeeding generations but do not vary towards the parent, and the variation s greater in them than in the old species. In reply to a question the lecturer stated most positively that no permanent alteration in a plant had ever been brought about by conditions of cultivation. That new developments under cultivation were mutant forms and must be so accorded.

LEONARD BARRON

ANNUAL DINNER OF THE TARRYTOWN HORTICULTURAL SOCIETY

Sixty-three of the members and friends of the Tarrytown Horticultural Society sat down to dinner in the Florence Hotel, Tarrytown, on Wednesday, January 11. This is the sixth annual occasion of the kind held by the society, and the way the food disappeared, and the general expressions of approval, left no doubt that this was the crowning success. When the tables were cleared, President Francis Gibson introduced as toastmaster Ex-District Attorney Geo. C. Andrews, who in turn introduced the speakers of the evening in his usual happy mood. Among the principal speakers were Major Bright, Ex-Senator Charles P. McClelland, Councilor W. H. H. Ely, Councilor Charles V. Millard and F. R. Pierson. These gentlemen, all eminent horticulturists (for the time being at least), discussed horticulture from a flowery point of view until all present must have thought they had been reared in a veritable garden of Eden. The local press was well represented, and among the representatives of the horticultural press were Alexr. Wallace, J. Austin Shaw and J. H. Pepper. The Monmouth County, N. J., Horticultural Society sent a very able representation in Messrs. William Turner, Harry Kettle and George Yomans. The Dutchess County, N. Y., Horticultural Society was also ably represented by John Galvin and G. H. Haworth. Songs were rendered by Mr. John Whyte, and Mr. Alfred Greis of Brooklyn, N. Y., entertained the company by cracking jokes and giving several amusing recitations. Altogether a very pleasant evening was spent, and shortly after the hand of the clock had pointed the midnight hour, the company joined in the singing of "Auld Lang Syne."

Then each took off his several way,
Resolved to meet another day.

——— WM. SCOTT.

THE MADISON SMOKER

The annual smoker of the Morris County Gardeners' and Florists' Society, held on January 11, at Madison, N. J., was a great success in every way and marked another red-letter night in the history of its organization. Owing to an unfortunate confusion of dates, the out-of-town contingent was not numerous, as most of the New Yorkers had already promised to attend the Tarrytown Society's dinner which was held on the same night. The reason they went to Tarrytown was because that society is strictly temperance and so many of the "bunch" had gone on the "water-wagon" with the new year that they were evidently afraid to go out and tackle the Madison punch which, famed in song and story, was on hand as usual, seductive as ever and warranted to cure the blues. The "Three Musketeers," Messrs. Herrington, Totty, and Duckham to whom is entrusted every year the brewing of this weird and far-reaching compound, covered themselves with glory and were voted the Club certificate for their services.

Previous to the entertainment a short business session was held, when the newly elected officers took their stations as follows: President, John Heeremans; Vice-President, M. McNulty; Secretary, Edward Ryan; Treasurer, William Charlton. The treasurer's report showed a most encouraging state of affairs financially, no debts, and a substantial balance in the treasury.

A first-class vaudeville entertainment was provided, with loads of refreshments, liquid and solid, and the man that could not enjoy himself at that meeting must have lost all interest in life. The E. G. Hill Co. had kindly sent on a vase of their Richmond rose and also Rosalind Orr English. The first named was best liked and many were the words of praise bestowed on it. The flowers had travelled perfectly and, as shown at Madison, Richmond is stronger in growth than Liberty, with apparently every desirable attribute in a red rose. Fiancee was also shown splendidly by the Chicago Carnation Co., and as this variety is now so well known, there is little to tell about it.

Both the Richmond rose and the Fiancee carnation were awarded the society certificate, and Rosalind Orr English was highly commended.

It was after midnight when the meeting broke up and it closed with a hope that everyone would be on hand next year to again participate in the reunion. ——— T.

FLORISTS' AND GARDENERS' CLUB OF R. I.

On Thursday evening, January 12, at the Hotel Newman, Providence, R. I., a party of forty substantially-built and prosperous-looking gentlemen sat around the festive board and partook of a well-served and bountiful repast. The occasion was the ninth annual banquet of the Florists' and Gardeners' Club of Rhode Island and it was carried out in a style most creditable to the committee in charge and to the Hotel Newman.

Among the faces around the table appeared many that were familiarly reminiscent of the time, eight years ago, when this little body of whole-souled hospitable men acquitted themselves so well as hosts of the Society of American Florists. Providence has dealt kindly with these boys of Providence, for they look scarce a day older than they did that August evening when we sang with them and their guests from far and near, "Should auld acquaintance be forgot?" They are yet as they were then, "Jolly good fellows."

W. E. Chappell was introduced by President J. F. Schellinger as toastmaster, and he filled the difficult position with graceful ease. Everybody was called upon to speak and all gladly accepted the admonition of the toastmaster to "be brief." Among the visitors were Prof. Card of the Kingston Agricultural College, who being called upon, applauded the spirit of fellowship over all; Secretary Charles W. Smith of the R. I. Horticultural Society, who told a story, Thomas J. Grey of Boston, who gave a toast, Prof. Wheeler of Kingston, who regaled his audience with a comical tale of woe, and W. J. Stewart of Boston who spoke approvingly of the proposed Metropolitan Park System for Providence and advised that the Club should endeavor to have a practical horticulturist appointed on the commission.

Of the local speakers, M. Sweeney proved most dignified, T. J. Johnston most facetious, Charles S. Macnair most sympathetic, Farquhar Macrae most eloquent, James Hockey most comprehensive, William Appleton most persuasive, A. M. Rennie most appealing, J. D. Fitts most pointed, and James Dillon most concise. A silver gavel was presented to the retiring president, John Macrae, who responded in fitting words of acknowledgment. All agreed to repeat the experience next year.

NEW BEDFORD HORTICULTURAL SOCIETY

The second annual meeting of the New Bedford (Mass.) Horticultural society was held on January 10, and the reports of the officers showed that the society is in a prosperous condition, with a bright outlook for the year 1905. There are now more than 100 members, the number having doubled during the past twelve months. The financial report showed that the sum of $125 had been added to the treasury during the year 1904.

The members decided to have the annual supper on Tuesday evening, February 28.

The following officers were elected:
President — William Keith.
Vice-president — Frank C. Barrows.
Treasurer — William A. Gibbs.
Secretary — Joseph C. Forbes.
Assistant secretary — George Woods.
Executive Committee — Dennis Shea, James Garthly, H. August Jahn, Andrew J. Fish, George N. Borden.

LENOX HORTICULTURAL SOCIETY

The annual ball of the Lenox (Mass.) Horticultural Society will be held in the town hall on the evening of January 31. The committee in charge consists of F. Heermans, A. J. Loveless, William Woods, S. Carlquist, and Frank Butler. On the following evening Prof. Waugh of the Amherst Agricultural College, will deliver a lecture.

"You have waked me too soon, I must slumber again."

ST. LOUIS FLORISTS' CLUB

At the Club meeting last Thursday afternoon the members who attended spent a very pleasant afternoon relating holiday experiences, before the meeting opened. President Juengel, who was unable to attend the last meeting, was present, and twenty members attended, Vice-President Pilcher being the only officer absent. A committee consisting of Otto Koenig, Emil Schray, and Fred Meinhardt was appointed to revise the Constitution and by-laws and to report at the next meeting. A committee was also appointed to take charge of the annual carnation exhibition at the club-rooms on February 9 at 2 P.M., and the Club voted $50 in prizes for this exhibition. The committee, composed of J. J. Beneke, Fred Meinhardt, and Emil Schray is to have full charge. All blooms from outside of the city should be sent in care of C. A. Kuehn, 1122 Pine Street. The third committee is given a hard proposition, *i.e.*, to look into and advise as to the best plan to build a club-house to be used for meetings, exhibitions and entertainments for the families of Club members. It is suggested that one hundred members subscribe $100 each, and that a good location be looked for in the West End.

The fare to Chicago for the Carnation Society meeting will be $10 for the round trip on the certificate plan. Members who are going should report promptly to Mr. Beneke. A special sleeper has been provided for the members.

There are many delinquent members, and those who are not paid up by the next meeting will be dropped from the roll.

The trustees are requested to report at the next meeting the advisability of holding a chrysanthemum show next fall.

AMERICAN CARNATION SOCIETY

The meeting and exhibition of this society will be held in the Auditorium Hotel, Chicago, Ill., January 25 and 26.

Every one interested in Carnations is invited to come and meet with us.

Special rates of a fare and one-third, on the Certificate Plan, (which will be explained you by any ticket agent) has been granted from all points east of and including Denver.

The small sum of $2 makes you a member of the Society and pays one year's dues. This entitles you to exhibit any new or old carnation you may have to show.

The Auditorium Hotel can take care of fully 200 members at reasonable rates, and especially so where two will occupy the same room; this puts all under one roof — lodging, the meeting, and exhibition, and weather need not be taken into account.

SPECIAL NOTICE. — There are so many sports of Lawson coming into the field, that this Society would like, for the sake of uniformity and to avoid the introduction of the same variety under different names, to have every carnation grower who has a sport from Lawson, of any color, to exhibit the same at this meeting, and especially so if he intends placing it on the market.

Where the grower does not accompany the box, it should be marked as follows: "The American Carnation Society, Chicago, Ill. Care of P. J. Hauswirth, Auditorium Hotel."

A. HERR.

REPORT OF REGISTRATION

By Patten & Co., Tewksbury, Mass.

"Mikado" — Color, white overlaid with crimson, a seedling of 1902, cross of Gov. Roosevelt and Prosperity, style of growth like Gov. Roosevelt, size of blooms, three to three and one-half inches.

"Pink Patten" — Color, clear dark pink, a sport from Mrs. M. A. Patten.

ALBERT M. HERR, *Secretary,*
Lancaster, Pa.

The Boston contingent for the carnation meeting will leave over the Boston & Maine and Nickel Plate route on Monday afternoon, January 23. Mr. William Nicholson of Framingham, Mass., the pilot of the party has been confined to his home with a severe attack of grippe, but is rapidly recovering and has no doubt of his ability to make the trip at the time arranged for. He would like to hear from any New Englanders who would like to accompany the delegation and will be pleased to relieve them of all trouble regarding the procuring of certificates, etc., for reduced fare. The rate for the round trip from Boston to Chicago and return will be $27.35, exclusive of sleeping car accommodations. This rate allows of no stop off in either direction.

GREENHOUSES BUILDING OR PROJECTED

BRISTOL, R. I. — Samuel Kinder, four houses.

LAWRENCE, MASS. — A. H. Wagland, one house.

BIDDEFORD, ME. — James H. Robbins, house 20 × 100.

WHITMAN, MASS. — R. E. Moir, two houses, each 20 × 300.

WESTVILLE, CONN. — A. N. Farnham, house 150 feet long.

PARK RIDGE, ILL. — Emil Buettner. three houses, each 29 × 125 By Moninger.

HINSDALE, ILL. — Bassett and Washburn, six houses, each 28 × 575. By Moninger.

No less than fifteen new violet houses are projected in Rhinebeck, N. Y., for the coming spring.

Please send us the names of your Friends who might be interested in

Horti-culture

and we will Send to Each a Sample Copy

N. F. McCarthy and W. H. Elliott of Boston have gone on a cruise to Porto Rico and other southern points on the line of the Plant Line steamers. They expect to be absent about a month.

From a notice received this (Monday) morning it appears that the St. Louis Club is to have opposition. A meeting has been called by F. W. Ude, Jr., William Winter, E. H. Michel and E. G. Eggeling to growers only, for the purpose of organizing a Growers' Florist Club. This meeting is to take place on Thursday night, January 19. The circular reads that all retailers and wholesalers are barred from becoming members.

Experiments Made in Austria-Hungary, Italy, and Switzerland to Prevent the Formation of Hail

LOADING GUN

For the last few years there have appeared in European newspapers and agricultural publications occasional reports about experiments made, first on a small and then on a larger scale, to prevent the formation of hail by means of heavy shooting; and while in Switzerland this past fall I had occasion to inquire into the results of these experiments and to gather some information and printed reports, the perusal of which proved very interesting.

The belief that human ingenuity would be able to interfere with the creating capacities of destructive elements was shared by few, and ridiculed not only by the public in general, but even by scientists of high standing. Nevertheless, it is a proven fact that such a belief already existed centuries ago, for there are many old church bells in existence to-day which bear the inscription, "Fulgura frango" ("I scatter storm"), and the ringing of those bells producing sound-waves was credited with the power of preventing the formation of hailstorms.

The celebrated astronomer Arago reports that already in 1680 cannons were used to dispel hailstorms, and a century or so later a French marine officer, the Marquis de Chevriers, cannonaded approaching storms, as he was convinced from experiments made while in active service that cannonading would dispel storms and hail. He therefore kept some cannons for weather shooting on his estate in Maconnais, and after his death the people of that community kept it up, evidently believing in the effectiveness of the work, and in 1806 there were more than a dozen towns in that vicinity that followed his example.

The origin of hail is still obscure, but the scientists seem to agree that same is formed by certain sudden and intense atmospheric changes of temperature and through the existence of certain electrical conditions. It has been observed by all who have made this subject a study that seemingly a very strong local accumulation of electricity takes place previous to a hailstorm, which is discharged during the storm, but immediately before the hail begins to fall there is always a certain dull calm in the air, which bodes danger. This apparent stillness of the atmosphere represents according to the latest scientific findings, the epoch of hail formation. It is claimed that the crystallization of the damp atmosphere can only take place during a period of absolute calmness in the air. This seems to have been fully demonstrated through an experiment made by Professor Dr. Kreuschner in Darmstadt. He arranged two pole wires of a strong electrical current so that one entered a basin of water from below, reaching within near the surface of the water while the other was brought from above near said surface, without, however, touching same. Upon application of a strong current, which in order to complete the circuit had to span the short circuit, the water surface between the two wire ends began to recede, forming a small funnel out of which first small drops of water, and after a short time small hailstones, were thrown with great force. The least disturbance of the air, however, the moving of a hand, or even heavy breathing would at once stop the process of crystallization, and in place of hailstones he got rain drops. Similar conditions it is claimed exist a few minutes before the breaking of a hailstorm, only with the difference that the water is not below, but above, and that same is not present as a fluid, but as a vapor in a condition very close to condensation.

Assuming that these theories are correct, it becomes at once evident thas to disturb the calmness of the air preceding the breaking of a storm meant the prevention of the process of crystallization, the formation of hail, and this seems to have been accomplished quite successfully in several localities through cannonading with cannons especially constructed for this purpose. The honor to have modernized the old style of weather shooting, bringing it to the present state of usefulness and efficiency, belongs to Mr. Albert Stiger, Mayor of the small town of Windisch-Feistritz in Austria. The town is located between hills, the slopes of which are exclusively covered with vineyards, which represent the prosperity of the farming population in that vicinity. For years and years in succession this locality was visited by periodical hailstorms, which often destroyed everything. The good mayor set to work and succeeded in establishing a system of hail weather protection, which kept the territory over which he distributed his artillery free from hail for five years in succession, while the surrounding unprotected territory was visited as formerly by regular hailstorms. It seems that his fellow-citizens thought him a fit subject for an asylum for insane when he first started to introduce his artillery, and later on, neighbors outside the protected district wanted to sue him for driving all the hail over the line into their vineyards.

DISCHARGING GUN

Mr. Stiger started his experiments about 1895 and since then the system has been adopted in numerous localities in Austria-Hungary, Italy, and Switzerland, especially where vine culture is the principal farming industry, and the results have been more or less satisfactory. It is easily understood that each locality has its own peculiar weather conditions, which must be studied. The matter of protecting the crops of highly cultivated lands which form the main income of the population against destructive pests or elements possible to control, is clearly a partial duty of the government, for the prosperity of the people represents the prosperity of the nation. The governments of the different countries mentioned above have interested themselves in this matter and are assiting in the experiments and developments in this seemingly very promising field. It is not the purpose of this paper to go into a description of the construction of the cannons used for this purpose or the manner of handling them. There are several different kinds of cannons and they all have a funnel as shown in accompanying illustration. The main object of this funnel is to provide a vortex which will produce a cyclonic wave action of great intensity when the cannon is discharged. This artificially created wave rising to a great height creates a disturbing element which breaks the calmness of the atmosphere and so prevents the formation of hail. The cannons, as

they are called, are of different sizes, the size giving the best so far achieved results having a funnel of 13 feet in height and taking a charge of 120 grams, or about ½ lb. of powder. It is calculated that a cannon of this size will cover a territory of about one square kilometer (250 acres), or in other words, cannons of that size can be placed 3,200 feet apart. It is evident that one cannon alone will not be effective, but that there must be a number of stations of one cannon each established over a large territory, and they must be well served under a systematic and practical management, for it requires united action at the proper time to achieve the desired results. The cost for one cannon with complete outfit, including building, is about 400 francs ($80.00).

It is interesting to compare the cost of insurance against hail damage with the cost of protection. A farmer in a district known to be apt to be visited by hailstorms has to pay from 40–70 francs ($8.00–14.00) on 1000 francs ($200.00) hail insurance, while the cost of protection against hail by the herein described methods will not average more than 5 francs ($1.00).

In order to give this subject the attention which it seemingly deserves, it would require a much more exhaustive and detailed description than herein given. While the experiments have been generally successful, the matter must still be considered to be in an experimental stage, but the theories upon which they are based and the favorable results obtained seem to be of sufficient value to attract the attention of authorities and individuals interested in agricultural and horticultural pursuits. I for one would like to see the national government use part of the money wasted on free seed distribution on such experiments. We have right here in the Connecticut valley large risks in the tobacco culture, which would warrant them to be made on an extensive scale.

A Cordial Invitation to Call and Inspect their Establishments is Extended to the Visiting Brethren by All the Florists of Chicago.

The Gardener and Landscape Gardening

Read before the Gardeners' and Florists Club of Boston by J. Woodward Manning

There is a feeling among gardeners that landscape gardeners, landscape architects or landscape designers (as the various titles may be applied) are terms for a profession that is in a sense a rival to the work the gardener feels is his own. It is natural that such a feeling exists, but one must recognize that a landscape architect is not necessarily a gardener or that a gardener can of necessity have a training that will make him a landscape architect. Many gardeners do have so general a knowledge of plants, their uses, and capabilities that they are better adapted to handle the purely gardening features of the problems they may be in touch with, than many of the younger landscape architects whose knowledge may be more theoretical than practical, but such knowledge is not necessarily enough to meet the requirements of a landscape architect.

The landscape architect, in the fullest sense of the word, knows gardening and plants as one of the foundations of his art, but beyond this he must be familiar with engineering problems, such as road building, questions of drainage and sewerage, forestry problems, both from the point of view of landscape forestry as well as that of commercial forestry, grading problems in all phases; not, however, that he may be an expert in each and every one of these lines, but that he must know enough of their principles to be able to take advantage of adapting them to a finished design and to so combine them that there may be a harmonious application, and thus prevent the necessity of doing over twice what might be accomplished in one general operation. He must have a thorough knowledge of design based on theory and practice and broadened by extensive travel, to examine the best examples here and abroad. He should know enough of architecture to be able to judge of good taste and to know how to accent important architectural features or to be able to advise as to styles to be recommended; must familiarize himself with the requirements that must rule the proper placing of buildings, must be prepared to meet the problem of economy, and his practical experience should be broad enough to meet the problems of varied climatic conditions. These and many other questions that he must be prepared to meet promptly and efficiently involve problems which the gardener cannot have had practice enough in to make him fully efficient.

I can fully realize that a gardener may look with some disdain on the landscape architect who may recommend groupings of plants that do not group, kinds that will not succeed, and designs that fail utterly of their objects, and under such conditions his criticisms would be well founded. But this is due to the unfortunate selection of a bad advisor; on the other hand, it is well to beware of a too early criticism of the results of a good advisor; because his design is different from old established methods, it does not follow it may not be better than anything yet produced; because he uses common things, even wild natives from the woods, it does not follow that they may not be in better harmony and better adapted for their purpose than the use of more expensive exotic nursery stock; the late Frederick Law Olmstead was probably more responsible for the introduction of our common native shrubs and trees than any other man, and you all know how harmoniously he could group them and how well they fitted their purposes. Because the landscape architect does not make a perfectly straight avenue may be for the reason of gaining better grades or the saving of needless expense; because the avenue is direct rather than roundabout may be for the reason of no object being gained otherwise; that lawns may be restricted may be for your own indirect advantage in lessening the labor of their maintenance, but particularly because there may be distant views or naturally picturesque conditions more important than a lawn whose size could not counterbalance or attract the attention from these more important features; again, there may be good reason for making the lawn as large as possible even with its added first cost and later maintenance, because the breadth thus produced may be the only means of giving a proper feeling of extent to the grounds. An example of the principle of a small lawn in good keeping on a large estate is that of the grounds of General Weld at Dedham, Mass., where a very effective distant view in one direction is more important than any result that could be produced by making a lawn in the foreground. Examples of the broad lawn to give a feeling of size on a small place are common, yet sometimes this is carried to an excess, and border plantations may be out of scale. Where it is evident that such problems are being seriously studied by the landscape architect, the gardener cannot do better than to seek in every way possible to get into close understanding of that which the advisor intends, and strive to aid.

(To be continued next week)

A FIELD OF THE BENTHEY-COATSWORTH ASTER IN 1904

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

The U. S. Department of Agriculture is out with a circular letter to the leading seedsmen, asking for lists of surplus stocks with prices.

John Clark of Boston has succeeded M. B. Faxon as manager of the seed department of the George A. Weaver Co., Newport, R. I.

The annual convention of the American Packers' Canned Goods Association popularly known as the "Canners' Convention," is to be held at Columbus, O., again this year. It opens officially February 7, and closes on the 10th.

Many seedsmen do a large amount of business with the packers, and their representatives are much in evidence.

Catalogues Received

"Guide to Pansy Culture." William Toole, Pansy Heights. Baraboo, Wis. An interesting pamphlet.

Dreer's Garden Book, Philadelphia, Pa. Overflowing with good things, new and old. Four colored plates, one of which is a strikingly accurate representation of Rose Killarney at its best.

J. M. Thorburn & Co., New York. 104th Annual Catalogue of High Class seeds. Typographically worthy of the seeds and the house. The cover is a new departure, a masterpiece of elegant taste.

"Beautiful Grounds." Peterson Nursery Company, Chicago. Text and illustrations are full of inspiration for anyone who loves the garden, trees, flowering shrubs, and herbaceous plants. Send for a copy.

V. Lemoine et Fils, Nancy, France. Catalogue and price list for 1904–1905. Contains the usual number of interesting novelties sent out annually by this noted establishment. Plates of Deutzia myriantha (D. corymbiflora × D. parviflora), D. Vilmorinæ and Sander's Chrysanthemum frutescens Queen Alexandra. It is significant that names of Russian celebrities in the present war are perpetuated by being given to new varieties of Gladiolus hybridus Nanceianus, but no mention is made of the Japs.

Obituary

W. F. Will, foreman of the floral department of the Nunnally Company at Atlanta, Ga., died suddenly from heart failure on January 6.

Philadelphia Flower Market Report

Very little change is to be reported from conditions prevailing last week. Not quite so much stock being received and a slight improvement in prices, but business does not have the "snap" it should have at this season. Carnations move slowly, Roses fairly well, especially the better grades of Teas, long Beauties not going as freely as the medium grades. Liberty of excellent quality generally and selling well, Violets very sluggish and prices very low. White Violets hold their own, however, at $2.00 per 100. Orchids are doing fairly well, Cattleyas bringing reduced prices, Lily of the Valley fair, Paper White and Roman Hyacinths slow, Daffodils brisk, Callas not over-plentiful, Mignonette and other miscellaneous stock fairly abundant and going at normal rates, and White Lilac more plentiful and having a good demand.

BOSTON MARKET REPORT

The present week sees a general shortening up of the rose receipts and the increase in carnation product which is to be expected at this date. Violets are still refractory and move unwillingly, although the quality of those offered is very good. American Beauty roses are not up to the standard of quality. Yellow narcissi of very good grade are now coming in, and the first tulips are also in evidence, but in very limited quantity so far. The best that can be said of business in general is, that it is not above the normal.

CHICAGO MARKET REPORT

The recent cold snap has shortened up the supply somewhat. We are enjoying an old-fashioned winter here, several nights recently having registered in the neighborhood of the zero mark. Still the days are bright and sunny and the receipts have not diminished sufficiently to establish any advance in values. Long-stemmed Beauties are still in supply, exceeding the call. Choice teas, especially white, are the premium item. Carnations arrive in large quantities each day, with prices less firm than heretofore. A good demand is experienced for the white varieties. At present writing a good city trade is had for the light, fresh supply, but a considerable holdover stock awaits the clearing-up process each evening. A good demand for orchids was created by the Charity Ball. Lily of the valley and violets also participated in this, but only the best grades of the latter were wanted and the larger bulk continues on the anxious seat. Tulips are more abundant and of better quality, and there is some fine white lilac in market. Lilies clean up, but callas are in over-supply. Ferns have advanced to $2.50 per 1,000, and all other greens sell well.

CHICAGO JOTTINGS

J. P. Degnan is laid up with the grippe.

Benthey-Coatsworth Co. have increased their office space at their salesrooms.

Deuson Bros., Galwood, Ill., have opened a stand on the Growers' Market 60 Wabash Ave., Chicago.

Michael Winandy, contractor and cut flower grower, has been forced by creditors into receivership. The liabilities are much over the assets. The largest claims are for lumber and glass.

At the meeting of the Chicago Florists' Club, H. M. Altick of Dayton, O., was the speaker of the evening. His address was in the interest of the Florists' McKinley Memorial Fund. This was well received. The Club resolved that all growers, retailers, and wholesalers contribute 20 per cent, 15 per cent, and 5 per cent, respectively, on all carnation sales towards above fund. An agreement was signed to this effect.

NEW YORK MARKET REPORT

At present writing roses are selling well and carnations are doing better than last week. Violets are still abundant and surplus stock is moved only at low figures. Bulbous stock is in greater supply than can be absorbed at regular rates and concessions have to be made to clear up.

The general tone of the market is improved.

BUFFALO MARKET REPORT

Business in general is very quiet.

Carnations, roses, and violets very plentiful, and sell at very low prices at times in order to move the stock from the market, and at that there is a good deal of waste at present.

Ever since New Year's business has been very quiet; more flowers of all descriptions than buyers.

LOUISVILLE MARKET REPORT

Business conditions last week were a little disappointing, but next week a few good orders will be realized. The weather has been very cold, thus keeping a good many people in. The supply of carnations is about equal to the demand. They are of very good quality, however the demand is a little slow. Roses are of good quality, and can be had in unusually good quantity. The demand is satisfactory. Mignonette, lilies of the valley, violets, sweet peas, etc., are coming in in fair quantities, the demand and quality both being about satisfactory.

The preliminary premium list of the Kentucky Society of Florists' Chrysanthemum Show is nearly ready. It is thought that a bowling club will be formed in the local society, the plans being nearly completed.

There will probably not be over four members to visit the carnation meeting.

Mr. Ralph M. Ward of New York was a recent caller.

NEWPORT MARKET REPORT

The demand for flowers has been light for the past week as might be expected, considering the abnormal business of the holidays and adding thereto the absence of any notable event. The dealers are not complaining, however; they have based their call pretty accurately on what the demand has been, and by so doing very little stock has been wasted and good prices have been maintained. The number of plants unsold during the holidays is much smaller than usual. This is very gratifying. There are not many violets grown here now, hence fewer are sold than usual.

THE CRAIG PROPOSITION

The meeting of the creditors of Robert Craig & Son, on January 12, to consider the firm's offer of a composition, was a harmonious one and indicated a desire to grant anything in reason to enable the Craigs to continue the business with a clean slate. About 65 per cent of the business indebtedness appeared to be represented, and the feeling was unanimous that the fifty per cent offered was the most that could be expected under any circumstances and probably more than would be realized under a forced liquidation. The assignee was not present at the meeting, and his good judgment in that respect is commendable, as it was entirely a matter for the Messrs. Craig and their creditors, and did not affect the court mandate under which Mr. Burton acts as trustee for the creditors.

F. R. Pierson was one of the strongest advocates among the large creditors for an acceptance of the composition. Most of the smaller holders from $100 to $1,000 each quickly followed his lead and a resolution pledging support of the idea was unanimously passed, as was one urging all unpledged creditors to follow suit on or before February 1st, notice to be sent informing them of the general feeling. The resources to ensure the payment of the composition are to come from cash in bank and good book accounts and the earnings between now and June 15 next, with the addition of the price of the plant as a going concern to be sold to a corporation to be known as the Robert Craig Company. A number of lawyers were present representing various interests, and most of them had a try at picking holes in the proposition; but notwithstanding this array of legal talent, no better scheme for securing the creditors was developed and no flaw was found in the terms of the Craig offer.

Daniel C. Donoghue acted as counsel for Messrs. Craig and bore the brunt of explaining the numerous fine points brought up by the opposing attorneys. He took the manly ground of at once admitting all the weak points of the situation, glossing nothing, and talking straight out, which in a meeting of keen business men is always the best policy.

WHOLESALE DEALER IN GALAX LEAVES

Very best galax leaves gathered fresh from the woods — can supply 1,000 or 1,000,000, green or bronze. It will pay you to write me. Good stock, low prices, quick shipments. Telegraph orders a specialty. Wholesale trade supplied, but if your wholesaler does not handle my stock, write direct to me and get fresh galax, large or small leaves, the genuine waxy gloss color that makes galax leaves beautiful and which cannot be obtained except on fresh leaves just picked from the native woods. I can compete with any one on earth. Cold storage orders booked now for future delivery. Let me have your orders for immediate use now and you will start the NEW YEAR RIGHT.

FLATBUSH IN FRAY, FROLIC, AND FEAST

In accordance with time-honored custom, the ornamental bowlers of Flatbush assembled at the alleys on Thursday evening, January 12th, each with a bulky package under his arm, to participate in the annual bowling for choice of unseen prizes. The fact that the bowlers numbered thirteen did not in any way affect the hilarity of the occasion, and it was far into the night before the diversified pastimes of this merry event came to a reluctant close.

The scoreboard showed the following figures when they got through: —

Siebrecht	145	164	159
Zeller	146	115	123
P. Dailledouze	98	136	159
H. Dailledouze	149	166	165
Schmutz	147	141	188
Morrison	97	108	77
Mellis	189	169	180
Bennett	76	100	110
Shaw	110	150	126
Butterfield	128	117	157
Riley	157	135	196
Scott	132	—	175
Wocker	161	—	133

The onslaught on the prize box followed in order of merit, and when the wrappings had been removed, trophies were disclosed as follows: —

Riley, a stag-horn smoking set; Schmutz, three bottles of lemonade; Mellis, silver smoking-set; Scott, oak smoking-set; H. Dailledouze, stein; Siebrecht, briar pipe; P. Dailledouze, stein; Butterfield, box of cigars; Wocker, vase; Shaw, a bottle of (not milk); Zeller, muffler; Morrison, walnut smoking-set; Bennett, box of cigars.

"Oft expectation fails, and most oft there
Where most it promises."

NEW YORK VS. HOBOKEN

The New York Florists' Club bowlers had a set-to over at Hoboken with the sports of that thrifty neighborhood. Nearly thirty were present. A good dinner was put out of sight and all had a glorious time. Scores were recorded as follows:

New York Regulars

Traendly	156	130	154

PERSONAL

W. N. Crane of Rhinebeck, N. Y., was married to Miss E. A. Shaffer on January 14.

Alexander Mead of Greenwich, Conn., has been critically ill, but is now on the way to recovery.

Roland Messenger, for seven years with G. R. Simonds of Barre, Vt., has resigned to take a position in charge of a floral establishment in New Bedford, Mass.

George Melrose of North Bellingham, Mass., was badly injured in a collision between an electric car and a wagon he was driving on January 6. The horse was killed.

Visiting Boston this week. Mr. and Mrs. Harry Bayersdorfer, Philadelphia, Pa.; R. E. Hannaford, Portsmouth, N. H.; E. J. Fancourt, representing S. S. Pennock, Philadelphia, Pa.

Special Cheap Offer of Florists' Orchids

We want room for large importations

CYPRIPEDIUM INSIGNE: 5000 established unflowered growths, $8 per 100; $75 per 1000.

CYPRIPEDIUM CALLOSUM: 1000 established unflowered growths, $20 per 100.

CYPRIPEDIUM LAWRENCEANUM: 1500 established unflowered growths, $25 per 100.

DENDROBIUM FORMOSUM GIGANTEUM: The florist's white orchid. Established plants, 8 to 10 bulbs, $9 per 12; $70 per 100.

VANDA CŒRULEA. The florist's blue orchid. A rare opportunity. Established plants, 10 to 12 leaves, $15 per 12; 14 to 18 leaves, $22 per 12. All clean, healthy, perfect plants.

For other quotations, see our catalogue; to be had from

Julius Roehrs' Exotic Nurseries, Rutherford, N. J.

Among the little-known plants worthy of more general cultivation is Pandanus pacifica, which should make a durable and popular house plant. The foliage is short and broad, in the way of Dracæna fragrans, and of a dark polished green. It produces offsets abundantly and is a ready propagator.

ORCHIDS

We are headquarters for Orchids in the United States If you want Orchids for pleasure or profit, we respectfully solicit your orders. Catalogue on Application.

NEW DAISY

Queen Alexandra

We are now booking orders for delivery during the latter part of February for this charming new form of Chrysanthemum Frutescens or Paris Daisy, an introduction from South Africa, and a plant which should prove desirable both as a cut flower as well as a pot plant.

The illustration shows three forms of flowers which appear on the same plant. The double and semi-double form are not unlike an Anemone-flowered Chrysanthemum.

PRICE:

20c. each, $2 per doz., $15 per 100

OUTDOOR ART AND CRAFT

John Thorpe has submitted plans to the park commissioners of La Crosse, Wis., for the improvement of Myrick Park. They have been accepted with much favorable comment.

State Nursery Inspector Fernald has reported to the Massachusetts Board of Agriculture, at the annual meeting, that the gypsy and brown-tail moths are extremely abundant in several nurseries. He said: "It is certain that at some time an egg mass will be overlooked and this pest be sent out on stock unless fumigation to all stock in nurseries where the gypsy moth is found be made compulsory. The brown-tail moth is almost as dangerous a pest as the gypsy moth; is present in many more of the nurseries, and during the earlier part of the inspection season is harder to find."

A bill has been introduced in the Massachusetts legislature, on the petition of Mayor Eastham of Lynn, to authorize and empower that city to enter upon private land and clear all trees and shrubs thereon of the brown-tail and gypsy moth, or other tree or shrub-destroying pests, and charge the same to the owner of the land, provided, however, that that city shall first give notice in writing to the owner that he must, within a reasonable time, clear his land himself, and provided further, that the act shall not apply to owners of single parcels of unoccupied land of more than one acre in extent. The act is to take effect upon its passage.

The proposed encroachment on the parks of New York City by the construction of an extension of the elevated railroad in Bronx Park was brought before the regular meeting of the Horticultural Society of New York at its regular meeting held in the rooms of the American Institute on Wednesday night, and the following resolutions were unanimously adopted.

RESOLVED — That the Horticultural Society of New York hereby records its emphatic protest against the invasion of Bronx Park by any railroad on or above its natural surface, and calls on all who are sincerely in earnest for the preservation of parks for the people to oppose the plans now being considered by the Rapid Transit Commission.

RESOLVED, — That inasmuch as it is understood that the act of vandalism contemplated by the engineers of the Rapid Transit Commission can not be accomplished without further legislation, a committee be appointed with power to oppose such legislation, in case the Rapid Transit Commission seeks to obtain the authority to carry out this indefensible project.

Mr. Frank Hamilton, whose portrait appears herewith, is a man who has solely by his own industry and application worked himself up to a high place in the estimation of all with whom he has been associated. His first experience, horticulturally, was as a boy in the employ of Mr. F. R. Pierson

FRANK HAMILTON

at Tarrytown, N. Y. He had there an extended training in the rose-houses and the nursery and as a travelling salesman. Afterwards he was connected with the park department of New York City for seven years, and for the past three years has been head gardener of Bronx Park, a position for which he proved himself by his comprehensive knowledge of gardening, his earnestness energy, and geniality, to be eminently fitted. He had here charge of the planting as well as the construction work, with 800 men under his charge, and built ten miles of roads and walks in one year, besides doing an immense amount of work in clearing up old land and improving small parks. As noted in a previous issue of HORTICULTURE, Mr. Hamilton has resigned from his position to take up the management of the nursery department of Cottage Gardens. He goes with the best wishes of the park authorities and a host of friends.

Greenhouse Glass Prices are Advancing

Call at our store, or send us a small sample order, to see the superior makes of glass we sell at Lowest Prices

STANDARD PLATE GLASS CO., Boston, Mass.
26-30 Sudbury St. On the Corner 61-63 Portland St.

The Glass Situation

One of the leading glass concerns in the country reports the glass situation at the present time is in such shape that it is certainly desirable for every one contemplating building this spring to get their orders in very shortly. Never in the history of the business in this country have inquiries been so numerous for glass as they have the past few weeks. Stocks all over the country have been lower than at any time for the past ten or twelve years, and with the large amount of building all over the country and the greatly increased consumption of glass for greenhouses and other purposes, there is every indication that the supply made by the manufacturers throughout the country this year will hardly be equal to the actual demand.

At a meeting of the Executive Board of American Window Glass Manufacturers' and Jobbers' Association on the 11th of this month, an advance was made which will be followed undoubtedly by a further advance within the next month, and everything considered, we feel perfectly safe in advising our patrons that they can make no possible mistake in covering on their spring requirements soon.

HORTICULTURE is the only paper of its class in America.

Business Changes

Lawrence Fortman and William F. Behring have leased the greenhouses of H. B. Campbell, at Davenport, Ia.

The Frank S. Platt Company at New Haven, Conn., have purchased a large building at 352–356 State Street, the price paid being given as $50,000.

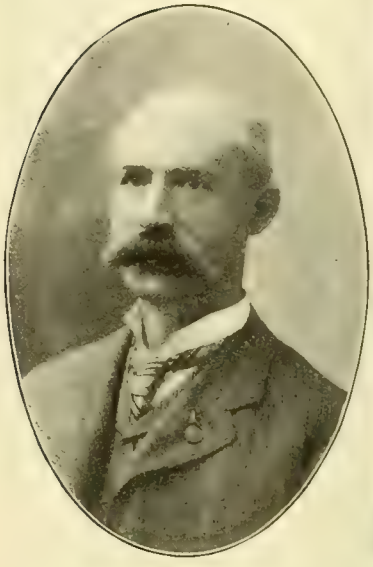
WHOLESALE FLORISTS

AMERICAN CARNATION SOCIETY

JAMES HARTSHORNE
President American Carnation Society

As the time approaches for the annual exhibition of the above Society, those most interested are wondering what kind of weather we are to have. Until last year we have generally been unfortunate in having a blizzard come up just about the time the distant exhibitors had started their exhibits on the journey. After so many sad experiences of this nature, it was the consensus of opinion that if the date of meeting was changed from March to February, we would be more likely to miss the blizzards and strike a time when trains would be running on time, hence the change of date of last year's meeting to March, which worked all right except that it was too late for practical purposes. It was pointed out that florists who buy new carnations had already made up their minds what varieties were the best and had placed their orders a month or two in advance of the exhibition, only to be disappointed in some cases when they saw these varieties on exhibition, but declared they could not wait until the middle of March before placing their order, for it would be April or May before they could get their goods. Therefore all looked back to the old date, and upon reflection thought best to try January 25th and 26th as an experiment. So here we are, and regardless of weather there will be an exhibition. There are enough carnation growers from Ohio, Indiana Michigan, and Illinois to make one of the grandest exhibitions we have ever had, but what we want is to show from the whole of the United States, and we'll have it, weather permitting. It, however, behooves every exhibitor to ship on time; rather twelve hours ahead than twelve minutes late on arrival. One of the successful exhibits the writer made, was at the Philadelphia meeting. I arrived there with my blooms at 8 P.M the day before the show, in a terrible snowstorm and several hours late.

I listened to the advice of several old stagers, and did not unpack my flowers, as I had intended doing, but left them in the boxes all night. That made fifty-two hours for them out of water until the time of judging. Some growers not more than one or two hundred miles from Philadelphia never got their flowers judged at all, owing to their being several hours late. It is the rule now to bar every exhibitor from competition who does not have his flowers staged promptly on time. That rule is enforced to the letter, and the time this year is 1 P.M. January 25th. This rule does not apply to varieties entered for the Certificate of Merit, nor does it interfere with blooms staged and labeled "Not for competition." Everyone having the interest of the exhibition at heart hopes to see all exhibitors on time and no one disappointed. So say we all of us.



If you have not received the premium list, send to Albert M. Herr, Lancaster, Pa. He will send you one by return mail. You will find many classes that will interest you. There is a chance for everyone to win a prize of some sort; any variety can compete in the hundreds. Varieties introduced prior to July 1st, 1903, can compete in fifties, and varieties introduced prior to same date 1902 can compete in the twenty-fives. Then there is the usual number of special prizes. These few remarks are intended for the new exhibitors and a reminder only for those who are already aware of the facts. You do not necessarily have to be a member of the Society in order to exhibit, but I believe the entry fee charged for exhibits amounts to more than the membership, which is $2.00.

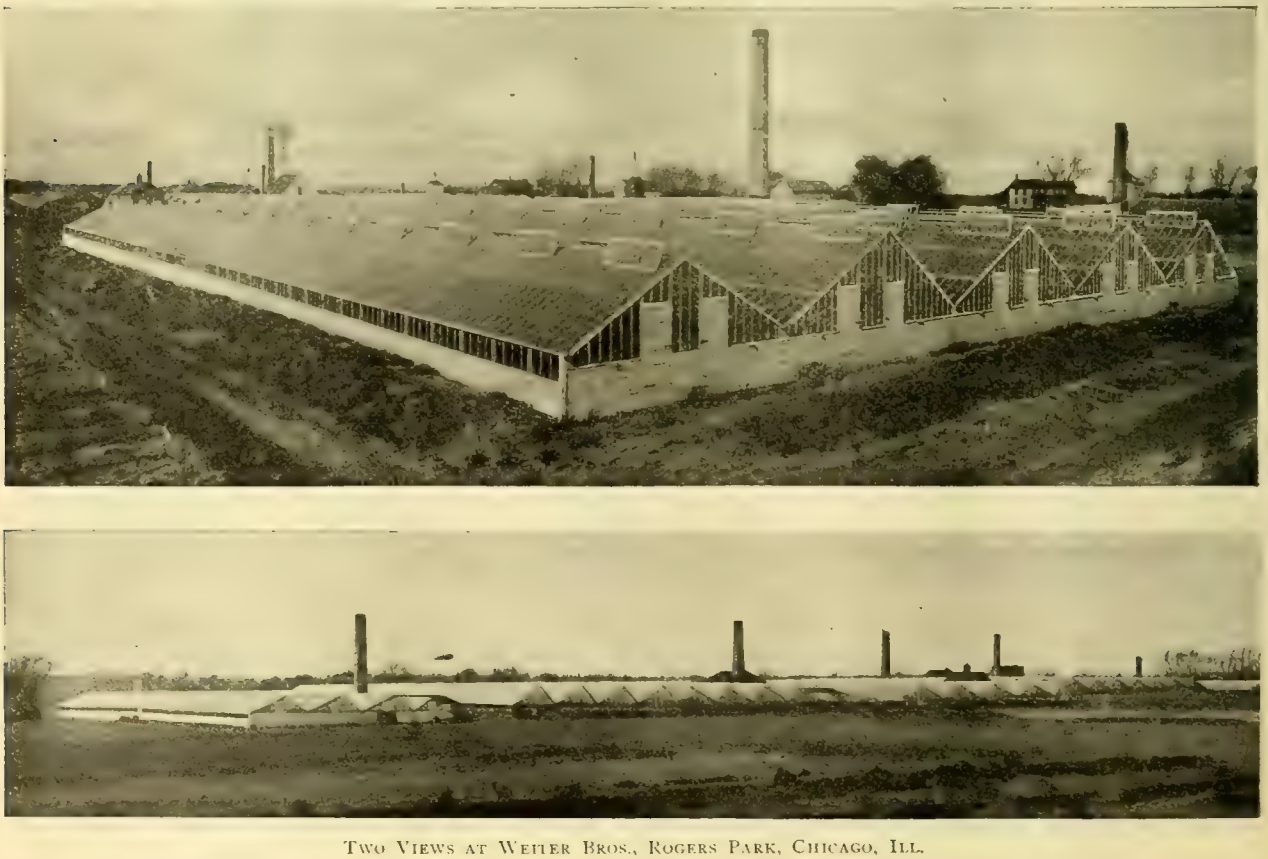
POINTS OF INTEREST FOR VISITORS

CHICAGO CARNATION COMPANY

We take much pleasure in presenting herewith views of a number of Chicago's most notable floral establishments, and portraits of some of their enterprising owners will be found among the pictures of officials taking a prominent part in the work connected with the great carnation event of next week. The Chicago Carnation Company at Joliet, Ill., besides furnishing the president of the American Carnation Society, will send many of the entries that are to participate in the big prizes at the exhibition. Fiancee is a favorite for the gold medal. Cardinal, their new scarlet, is now in splendid shape and the color is absolutely even from one end of the house to the other. Everybody should go out to see it. Flamingo is too slow here to be regarded as a success. A promising red seedling by W. N. Rudd is ideal in color and habit. It is of Estelle color with four-foot stems. In whites, Lady Bountiful and White Lawson are promising candidates for honors. Crusader, introduced in 1903,

WHITE LAWSON AT CHICAGO CARNATION COMPANY'S
Planted Aug. 10th; photo. Jan. 12th



EMIL BUETTNER, PARK RIDGE, ILL.

J. D. THOMPSON CARNATION CO., JOLIET, ILL.

keeps well in the front, but The Belle will be discarded. Enchantress, Dorothy Whitney, and Lawson are all in training for place in the big race. Frank Friedly, the foreman, a graduate from the E. G. Hill Co., is probably the youngest foreman in charge of such a responsibility, being but 23 years of age.

The J. D. Thompson Carnation Co. of Joliet, has received much favorable comment for its recent action in withdrawing Gibson Beauty from sale, after orders for 90,000 had been booked, because it did not come up to expected standard of quality. Among the fine things seen at this place are Nelson Fisher, a variety far ahead of Lawson in many respects, Gov. Wolcott, Boston Market, and the famous Enchantress which was introduced by this company. Estelle and Robert Craig, also. No visitor should fail to see the latter. In every point it is ahead of anything in its line thus far and

TWO VIEWS AT WEILER BROS., ROGERS PARK, CHICAGO, ILL.

PARTIAL VIEW OF PETER REINBERG'S (ROSE HILL), CHICAGO, ILL.
1,000,000 sq. ft. of glass

orders for 250,000 have been booked already. The propagating houses are fairly teeming with the President, the Belle, Mrs. M. A. Patten, Mrs. Nelson, and other notables, and there are 10,000 Robert Craig established in 2-inch pots.

To visit the above described Joliet establishments will require a whole day. The most convenient trains are via the C., R. I., & Pac. R. R. Trains leave station at Van Buren and La Salle Streets at 8, 10, 11.45 A.M. Returning, leave Joliet 12.20, 2.30, 4.30, and 6.25 P.M.

There are many large establishments at Morton Grove. The most prominent is the extensive range of Poehlman Bros. Trains leave Union Station C., M. & St. P. R. R. at 9.30 A.M., 1.26, 2.10 P.M. Returning, leave Morton Grove at 4.06, 5.20, and 5.40 P.M.

A Lincoln Ave. electric car at Court House on Clark Street and Dearborn, will take the visitor to the extensive range of J. A. Budlong, one block east of the terminus of the line. This

FRED LAUTENSCHLAGER
Our Chicago Representative

place is a quarter mile northwest of the Reinberg's. For direct trip to Reinberg's, take Lincoln Ave. electric and transfer to N. Robey at Irving Park boulevard. This car passes the million square feet place of Peter Reinberg.

A visit to Wietor Bros. at Rogers Park will surely repay the visitor on sight-seeing trip. Take No. Clark Street cable car and transfer to No. Clark Street electric, and ride to end of line. Six blocks west on Devon Ave. brings us to the entrance of the great plant of this progressive firm.

Either of the last-mentioned trips can be made Friday morning, insuring return for a trip to the specialists at Hinsdale, Western Springs, Morton Grove, or Joliet. The trips to Hinsdale and Western Springs can be easily combined by starting at 8.40 A.M. or 11 A.M., which will give sufficient time at Western Springs and allow of a trip by train or drive to Bassett & Washburn at Hinsdale. Trains return from Hinsdale at 5.05, 5.54, and 7.05 P.M.

Pecky Cypress

To a large number of florists it may be interesting to know that a new wood has been but recently appropriated and already extensively used for the construction of greenhouse benches, which bids fair to usurp the time-honored places of hemlock and pine.

The problem that greenhouse builders have always had to confront, was, the question of the most durable wood. In this particular, hemlock has given the most satisfaction in the past. Ordinarily it lasts from three to five years for this purpose, and it has been the aim of the florist to replace it with a more durable wood. Pecky cypress has been conclusively proven to fill the want. It boasts all the qualities of cypress, which, from time immemorial, has been known for its extreme durability. Growing as it does in marshy, watered soil, it is perfectly adapted to excessively moist conditions. It is used with equal results in dry temperature, or under the most adverse climatic conditions. Cypress lumber has not been generally utilized in the past for bench lumber, for the reason that it has been manufactured only in select and clear grades, the prices of which have precluded the florist from using it. Pecky cypress, however, has overcome this difficulty and can now be marketed for nearly the price of its former competitors. It is not prepossessing in appearance, the peck greatly resembling rot in pine. It has been a question of much speculation what the cause of peck in cypress is assignable to. Cavities which form near the top of the tree are filled with a dustlike substance, which is termed peck. Some have attributed this peculiarity to the action of vermin, while others have maintained that it is a consequence of defective nourishment. Whatever the reason may be, the presence of peck in cypress does not in any manner impair its effectiveness as a durable wood. It has no other defects and it can be safely augured that it will be permanently used by the progressive florist until something is discovered of superior merit.

Fred. Lautens Mgr.

Establishment of Nic Zweifel, Milwaukee, Wis.

Questions are often asked as to the relative merits of hot water and steam heat for greenhouse purposes. This seems to be often a matter of choice.

Mr. Nic Zweifel of Milwaukee, cut of whose range, heated by hot water, will be noted above, writes as follows:

"I have four houses, each 28 x 200 ft., with a total of 27,000 square feet of glass. I can get all pipes warm in 30 minutes, and one No. 13 Kroeschell boiler does the entire work."

IF YOU ARE IN NEED OF

Good Stock

We are fully confident that we are in a position to fill your wants

Why? Because we carry the kind of stock that you are looking for, as we make a specialty of producing high grade stock of all kinds, being strong in

Roses and Carnations

In addition to the cutting of a choice line of stock from our own large greenhouses, a partial view of which is given in this issue, we also handle the production of a number of the best growers in this city, thereby placing us in a position to fill all orders in a very satisfactory manner, as a trial order will convince you.

So if you wish to avoid disappointments and want your orders filled satisfactorily, just give us a call and you will be more than pleased that you called upon us.

J. A. BUDLONG

ASTERS

The Two New Varieties:

Benthey's White | Benthey's Pink

¶These two varieties will produce more first class salable flowers than any aster now in commerce. ¶They are branching varieties, producing flowers from three to five inches in diameter on fine, stiff stems from thirty to forty inches in length, with extra heavy foliage. ¶They are pronounced by both grower and consumer the finest asters ever seen in Chicago, and were the favorite asters in the Chicago and St. Louis markets the past season, and wherever shown they were termed the best ever. SEE CUT ON PAGE 266.

CARNATIONS

Novelties of the Season

Variegated Lawson

This variety, introduced by us this season, is sure to meet with popular favor. It is a sport from Mrs. THOS. W. LAWSON, pure ivory white, with delicate carmine pencilings. Mr. W. N. Craig, an authority on everything pertaining to horticulture, states that he believes this will outbloom the favorite Mrs. M. A. PATTEN two to one. For some reason or other, the stem seems to be longer than that of Mrs. THOS. W. LAWSON, and the flowers are less inclined to burst. It is a beautiful variegated variety, and one that is sure to be in demand on account of its delicate pencilings. It is superb in every respect. Our exclusive purchase of this variety has created a sensation in the daily press of the country.

$12.00 per 100. $100.00 per 1000

Fiancee

THE QUEEN OF PINK CARNATIONS. In a class by itself. Magnificent flowers. Strictly fancy in every respect.

$12.00 per 100. $100.00 per 1000

Cardinal

Bright cardinal, or crimson scarlet. **$12.00 per 100. $100.00 per 1000**

Fred Burki

Recommended as an extra free-blooming white variety, and a claimant for popular favor.

$12.00 per 100. $100.00 per 1000

THE BEST OF LAST SEASON'S NOVELTIES AND OLDER STANDARD SORTS

White Lawson

We consider this variety, which we introduced last season, the Finest White Carnation ever sent out. It has given great satisfaction, When left on the plants until fully developed, the flowers are much larger than Mrs. THOS. W. LAWSON. Nothing excels it for freedom of bloom, fine keeping qualities, and general all-round value. We believe that this will occupy among white carnations the same place that Mrs. THOS. W. LAWSON does among pinks. *Remember that we are headquarters for it.* Splendid stock ready for immediate delivery.

$7.00 per 100. $60.00 per 1000

Daheim

A fine crimson, introduced by us last year, with the style and habit of Mrs. THOS. W. LAWSON; might be called a *Crimson Lawson*, as it has all the characteristics of that variety as far as freedom of flowering, habit of growth, etc., are concerned. It has grand, stiff stems, calyx never bursts, and it is a free and abundant bloomer, developing very quickly. We believe this to be the Best All-round Crimson Carnation.

$6.00 per 100. $50.00 per 1000

Mrs. M. A. Patten

This grand variegated Carnation has given splendid satisfaction, **$6.00 per 100. $50.00 per 1000**

Lady Bountiful

A magnificent White of last season's introduction. **$6.00 per 100. $50.00 per 1000**

Enchantress

This magnificent Carnation is unequalled for size, beautiful color—light, silvery pink—and freedom of bloom. It brings the very highest market prices, and is in great demand. **$4.00 per 100. $35.00 per 1000**

Mrs. Thos. W. Lawson

The Standard Dark Pink. **$3.00 per 100 $25.00 per 1000**

Prosperity

A magnificent fancy sort, entirely distinct from others. A sterling variety. **$3.00 per 100. $25.00 per 1000**

We are also pleased to announce that we have been appointed distributing agents for the sale of

Victory

and that all orders for this variety should be sent direct to us. We are now prepared to book orders for this variety **FOR DELIVERY SPRING 1906.**

We have watched this Carnation for some time, and believe that it is the best scarlet ever offered, with good stems, flowers of the largest size. A magnificent keeper and shipper, and an exceedingly free and early bloomer. While the flowers of this variety are of the largest size, and it will rank in the fancy class, its freedom of bloom and general good qualities will make it a "bread-and-butter" scarlet. There is a great demand for a good scarlet at the holiday time, and the flowers of this variety brought 25 cents each last Christmas, which is an indication of its popularity.

Strong-rooted Cuttings delivery next season. $12.00 per 100. $100.00 per 1000

Cymbidium Sanderæ

One of the finest introductions of 1904 which Messrs. Sander & Sons, St. Albans, received from their collector, Mecholitz. The photograph shows the first plant that flowered in Europe from an undeveloped imported spike. It was exhibited before the Royal Horticultural Society in London, and was awarded a First Class Certificate. The flowers are as large as

the beautiful C. eburneum, of excellent shape, having sepals and petals pure ivory white, broad and of remarkable texture; the labellum is blotched with glowing crimson purple, and the combination of coloring is most pleasing. The plant appears very free growing, and is the most desirable new species imported last year.

Imported Cattleyas

The season for collecting cattleyas is of vital importance to nurserymen, whose business it is to distribute these plants.

Many make two growths each year in the tropics, consequently two resting seasons occur at which time they should be gathered. Importers in this country endeavor to avoid the winter transportation as much as possible, although, in some varieties, this is almost unavoidable owing to the collecting period being just at the wrong time when they would finally reach New York in the frosty weather. Fifteen and twenty years ago they were sent north, irrespective of weather conditions, and many thousands suffered before they were safely housed; latterly, however, C. Trianæ (one of the most popular of them all), have been sent to New York during the summer months and if not too late in arriving, still have an opportunity to make up a new bulb during the warm autumn days.

In Europe they arrive in February and March where the opportunity for transportation is safer. This is essential in England also, — as the light and heat is lacking in autumn, and the spring and summer give them an opportunity of completing their growth ready for winter flowering. Various methods of treatment after arrival have been resorted to, every care being exercised for the preservation of the foliage; although many thousands sometimes come devoid of leaves, fortunately the bulbs may have survived.

Immediately after unpacking, the plants should be thoroughly cleaned, washing them with a weak solution of tobacco water, and decayed bulbs cut away, then suspended, foliage downwards, and syringed daily; a shady place (under the stage is preferable) away from the pipes; in this way water does not remain too long about the plant to create rot. After a week or two they should begin to recover and may be potted, selecting the most plump looking plants first.

Another method is by placing them after cleaning, upright on the stage, on a thin layer of sphagnum moss, placing sticks crosswise between the leaves to allow the air to circulate and prevent decay before root action commences, gradually potting them up, as the small white roots begin to show at the base of the last new bulb. They must be kept shaded for the first few days and sprayed with care.

If, however, the plants are in excellent condition upon arrival and very fresh and plump, they could be immediately cleaned and potted, and kept shaded and cool for the first few days, using water sparingly during this period.

We have been successful with the above methods. The former applies to plants that may have suffered somewhat in transit.

In some varieties circulation of sap after the journey is not rapid, and before it can occur, the foliage which arrived with a deep green hue, rapidly turns yellow. This applies especially to C. gigas and its varieties We have seen them arrive with thousands of perfect leaves, which if not carefully handled, in a few days suffer as described. Many plants are lost through immediately placing them in great heat, and bright light, as soon as they are taken from the cases.

The following varieties of cattleyas for trade uses are recommended.

C. Trianæ flowers in January, February, March.
C. Mossiæ flowers in March, April, May.
C. Gaskelliana flowers in May, June.
C. gigas flowers in June, July, August.
C. labiata flowers in September, October, November.
C. Percivaliana flowers in November, December.
C. Trianæ flowers in December.

This will give a succession throughout the year. Although there are many others useful, the above are preferable.

A. Dennmoek

Cypripedium Insigne

If one were asked to name the most serviceable florists' orchid, the subject of this note would have to take front place.

Its good qualities are many as are the varietal forms that command, some of them, very high prices; but these are all of recent introduction and may be classed with the section of C. insigne, known as "montanum" which has produced all the yellow varieties as well as most of the choice spotted and large flowered forms. Indeed, there is good reason to believe that most, if not all, the yellow or albino varieties came in one single importation. A florist once purchased at a nominal figure the refuse of the auction rooms, and, if my memory serves, out of the lot he flowered fourteen yellow varieties. They were certainly a fine lot of plants when established — and he fortunately knew their value.

The "montanum section" as it has become known among growers, requires different treatment to the older varieties. They are more susceptible to cold if of long duration, which would indicate that they come from a lower elevation. Certain it is that they are not happy in a temperature less than 50 degrees, neither do they enjoy the high temperatures we experience in summer, and it is not wise to attempt growing them in loam as the roots need a compost that is porous and well aerated. We have tried them both ways and conclude that moss and fern fiber with a portion of fibrous loam is the best suited to them.

It is not intended here to speak of varieties of the montanum type, for if once commenced one could not tell where to stop. Moreover, when buying newly imported plants no two individuals prove to be alike so that there is great interest in watching them flower for the first time. We flowered some really fine ones from a lot of thirty-five plants, also some of the poorest which were speedily destroyed. We were led to expect yellow ones, but they did not materialize. The investment, however, was on the whole, a good one — the best varieties invariably having long, broad foliage, the poor ones being easily separated by their smaller growth.

By far the major portion of C. insigne seen to-day in florists' establishments are of the older varieties, and for commercial use are undoubtedly the best suited, as the plants are more vigorous, less fastidious, keep longer on the plants or when cut, and a good stock is easily obtained by division. There are three well marked types even among the old original — first, the common, then maximum, and lastly the Chantinii or Maulei. Their two names are not synonyms but are often transposed. All however, are easily cultivated with very little care. After blooming they may be stored under the benches where light is available, and after the propagating season is past, will thrive admirably for the summer in the structure used for this purpose. Soon after blooming is the time to repot or divide, securing ample drainage and potting in fibrous loam — pans are preferable to pots, If large specimens are desired, they are easily obtained by planting several pieces in the pan according to size. Root action becomes active about April, and disturbance after this is not wise. When the pots are filled with roots it is wise to feed the plants when watering; the plants being terrestrial, will take kindly any attention in this respect. Indeed, the idea that orchids will not take feeding is especially fallacious, but when we come to apply stimulus to the epiphytes one has to be circumspect; this, however, "is another story."

E. O. Orpet

Solanum Pseudo-capsicum, or Jerusalem Cherry

These plants are, if well-grown, the prettiest red-berry plants we have for the holidays. A leading florist of this city said, when seeing our plants: "I could easily get four dollars apiece for them at Christmas." It takes about eighteen months to grow these plants in order to get them well furnished with berries.

I sow the seed or strike cuttings about the first of March. Have them in four-inch pots by the time they are planted out in the field. It is a good practice to pot firmly and the pot should be well filled with roots; it will help to hold the ball together when lifting in the fall. Let the plants grow unhindered, only put a stake by each plant to tie the top to.

Pot them in six-inch pots in the fall, and after that the plants are well established, they may be placed under the benches in the cold house for the winter, keeping them moderately dry.

They may lose most of the leaves and the few berries they had on, but it does not matter as the plants will be pruned when planted out in the spring. The shape of the plant may be regulated by the pruning to either dwarf or high stem, round or pyramid top. Pinching will be necessary a few times. The plants are potted during the early part of September in any good compost, using eight and nine inch pots.

Shading and watering must be attended to with greatest care, as these plants don't lift very well and must not suffer for want of water. The leaves will then surely turn yellow and fall off. Some might have success with growing these plants in pots all summer, but I could never get anything but poor stunted growth on them and very few berries. I have at present two or three plants left that are full of berries. Most of these berries were red in September and are still on, though a little shrivelled.

FERNS FOR EVERYDAY USE

The polystichums are easily recognized among ferns by their bristly nature and the firm texture of the fronds. The pinnæ, and generally all the segments of the more or less dentated divisions, are terminated by a long or short spine-like appendage. The stipes are all more or less clothed with from light brown to nearly black scales, especially at the base. Prickly Shield fern is the common name by which they are known, and they are a section of the genus aspidium; the spore masses are round and covered by a round-shaped indusium set on each side of the midribs. They are all of robust constitution, easy to grow in a compost of fibrous loam, peat or leaf mould and sand, like plenty of water, make much better foliage when well-shaded during the growing period, and are all good decorative plants. They are propagated mostly by spores, which are plentiful.

The hardy polystichums that grow wild in the northern hemisphere and stand our winter out of doors, some with a little protection or in good sheltered positions are the gems of our hardy fernery. They nevertheless make fine pot plants. Naturally, if grown too warm they will be attacked by thrips.

Polystichum acrostichoides is our well-known Christmas fern. Everybody knows how to use them. They are not much grown as pot plants. P. a. incisum, a fern that is often found growing with the other, makes beautiful plants of a more robust and erect habit; the pinnæ are deeply dentated.

Polystichum munitum from California and Oregon, is the Western Christmas fern. It makes very nice plants too. The fronds look more like a lomaria and grow in round crowns like it. There is a good dentated form from it in cultivation and also growing wild.

Polystichum aculeatum, the true prickly shield fern which grows wild all over Europe, where it is common, has long, quite narrow twice-divided fronds of a dark-green shining color and of strong texture. There are some ferns which do not differ in a horticultural way, much from the type, like argutum Braunii and lobatum; others that are more interesting for us are crested, tasseled, or finely and diversely cut, and resemble much the forms of Polystichum angulare which is said to be itself a form of aculeatum. Soft Prickly Shield fern, is its common name. It

has a great quantity of forms. Lowe, in his book on British ferns, describes more than 350. They are crested, crisped, cruciated, tasseled, dissected, etc. I think the nicest are the acutilobum divisilobum and plumosum section, P. ang. proliterum and Wollastonii are used some. Like all the species rich in forms, when the spores from different well-selected of those forms are seeded together there is much surprise in store for the careful watcher.

Polystichum lonchitis, the holly fern from Europe and Canada, where it grows in high altitudes. It is of erect habit, the fronds from one to one and a half feet long, narrow, simply pinnate, each pinnæ resembling a small holly leaf, very glossy. They require cool and damp atmosphere.

Polystichum aristatum from Japan, grown generally under the name of Lastrea aristata, is the green form of the better-known P. arist. variegatum, quite a favorite. The fronds are largely marble white, greenish in the center. They want to be grown warm and shady to look perfect.

Among the greenhouse species are: Polystichum capense or coriaceam, the most robust grower of all the species; from a big, scaly, creeping root stock, grow long arching dentated dark green fronds; the stalk of dark color, is as long as the leafy part.

Polystichum tsussimense from China, is said to be a dense form of aculeatum, but more likely it is a dwarf form of capense, which it resembles in all its habits, except the size. It is a very hardy plant and much used.

Polystichum falcinellum from Madeira has fronds of a bright green leathery texture from one to one and a half feet long, spear-shaped in form, about five inches broad in the center. The pinnæ are finely dentated and the spore masses very apparent.

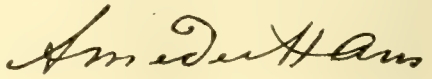
Polystichum frondosum from Madeira, makes nice, bushy plants. It has fronds of a thin texture, light green in color; the stipe as long as the leafy part which is triangular in form, from one to two feet long and half as broad. The pinnæ and pinnules are deeply cut, but the sections near together.

Polystichum mucronatum is a holly fern from Jamaica which resembles much P. lonchitis, a little bigger in dimension and its fronds recurved at the top.

Polystichum triangulum from West Indies, is another holly fern in appearance; the fronds are long and narrower in proportion, the pinnæ, which are very bristly, are not closely set. This species varies very much and there are a few very distinct forms in cultivation. Xyphioides is one of the best. The fronds are long and very narrow, and the pinnæ are richly bordered with spines.

Polystichum maurigianum from Jamaica, has long not large bipinnate fronds, spear-shaped and arching; the pinnæ are spread and give the plant a lofty appearance.

Polystichum pungens from South Africa, forms a creeping underground rhizome. The fronds, about two feet long, are triangular in shape, bipinnate, the pinnules deeply dentated.



Polystichum proliferum from Australia, resembles much G. aculeatum. The pinnæ are further apart and the divisions more narrow and of a more erect habit.

Polystichum viviparum or trapezoides from the West Indies. The fronds are one foot long, narrow, spear-shaped, are growing numerous in a crown shape; they are of very strong texture, dark, shining green and the pinnæ are deeply lobed.

Polystichum venustum from New Zealand, is a dwarf-growing, very distinct species. The frond is spear-head shaped, all covered with scales and twice divided; the pinnules are small and dentated. There is a form Pol. vestitum venustum with smaller divisions, more crowded, and glaucus on the under side.

Polystichum lepidocaulon from Japan, differs entirely from all the Polystichums, having nothing like them except the way the spores are set. The plant looks more like a Cyrtomium; the pinnæ are sickle-shaped, of a light-green leathery texture; the fronds are arching, terminated by a long tail-like appendage, which grows a young plant at the end like the walking fern. It is a nice bushy plant, good for hanging baskets.

Polystichum auriculatum from India, P. falcinellum from Madeira, P. denticulatum from Jamaica, P. lentum from West Indies, P. polyblepharum from Japan, P. tripterum from Japan, and many others are all good, hardy ferns to use for decorative work.

For Proceedings of the American Carnation Society List of Awards, etc., at Chicago, see Supplement with this issue

Chrysanthemums for Exhibition

The time is now almost here when those who grow blooms for exhibition should see to their stock plants (if they have not already done so), that they are in a proper condition to get good cuttings from, for if we don't begin right we can't expect to finish right, and therefore good, strong cuttings are essential.

The first of February is none too early to get some of the varieties into the sand. Such varieties as Merza, Mary Inglis, Lord Salisbury, W. R. Church, Lady Roberts, and Mrs. E. Thirkell, that require a long season's growth, should be in the sand now.

An ideal place to root chrysanthemums is on a bench in a house with a northern aspect, the bench to contain about four inches of clean, sharp sand, free from clay or any other such substance, and with a gentle bottom heat of about 56 degrees and 50 degrees over head. Having these conditions, chrysanthemums will root nicely in from fourteen to sixteen days. As soon as their roots get to be an inch long they should be taken from the sand and potted firmly into 3-inch pots and placed in a light, airy, cool house, keeping them as near the glass as possible with a temperature of 40 to 45 degrees at night, and a rise during the day time of 10 to 15 degrees.

Do not pot in a rich soil for first potting, as a rich soil tends to give them a soft and rapid growth which should be avoided. A light sandy soil is much to be preferred to start with, the idea being to have them dwarf and stocky and have a good foundation to build on as we go along. As soon as they are well rooted in 3-in. pots they should be shifted into 4½ or 5-in. pots and never allowed to become pot-bound until put into bench or flowering pot, for if the wood gets hard and wiry when in a young state, no amount of coaxing will bring them back to where they should have been, and disappointment is sure to follow.

The introduction of so many meritorious varieties of the last few years has almost caused a revolution among the older sorts, and to discard some of those that have been at the top of the ladder for so many years is like parting with dear old friends. We have so many good varieties now of every hue and color, that to say which we ought to grow and which we should discard is a pretty hard question to decide, and should be left largely to the individual to decide for himself. In the pink section there is probably more progress made than in any other. Viviand-Morel, that has held her own against all comers for the last eight or more years and won many a hard fight for supremacy, must now give way to that grand variety William Duckham, and also Leila Filkins. Kate Broomhead in the "any other" or bronze section has to do the same thing to Donald McLeod, Harrison Dick and Ethel Fitzroy. W. R. Church, although not a bronze, fits well in the "any other" class. In yellows, Col. D. Appleton has for quite a long time held the honor berth, but is sure to be succeeded by Mrs. William Duckham who will be as well known by the 31st of December, 1905, as the president of the Chrysanthemum Society is to-day. Cheltoni is another variety that will be in the front ranks as a yellow.

In whites, Merza still holds her own and is a very formidable opponent for any other white that comes up against her for size, stem, and foliage, also texture. In reds we have two grand varieties in Maynel and Harry Barnes for the small vase, to be shown in collections, but they have both of them very long necks which would be sure to tell very much against them in a class calling for long stems, and it is doubtful if they could hold their own with John Shrimpton and H. J. Jones in the long-stemmed class, although for size, Shrimpton cannot be compared with Maynel.

The list of forty-two varieties appended may not include all of the best there are, and while there may be some varieties omitted that are equal to those mentioned, I think this is a set when well done that does not leave out much that is desirable in a chrysanthemum.

A LIST OF VARIETIES FOR EXHIBITION

WHITE

Mme. Carnot, Merza, Ben Wells, Guy Hamilton, Mrs. D. V. West, Mrs. Weeks, Mutual Friend, Timothy Eaton, Nellie Pockett.

YELLOW

F. S. Valis, Col. D. Appleton, Mrs. Trainor Park, Mrs. E. Thirkell, Gen. Hutton, Yellow Eaton, Cheltoni, Mrs. T. W. Pockett.

PINK

William Duckham, Leila Filkins, W. A. Etherington, F. A. Cobold, Durban's Pride, Mrs. George Mileham.

PURPLE SHADE

Mrs. Carrington, Australia, Charles Longley.

RED

Maynel, H. Barnes, H. J. Jones, John Shrimpton, S. F. Wright, M. Tucker, Lady Roberts, Lord Hopetown, W. R. Church.

BRONZE

Mary Inglis, Donald McLeod, Lord Salisbury, Ethel Fitzroy, Rustique.

TERRA COTTA

Mrs. J. A. Miller, J. H. Doyle.

W. N. Riggo

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

We earnestly hope that those of our readers who are citizens of Massachusetts will interest themselves in the well-prepared measure, now before the legislature, for the suppression of the moth pests, and do all in their power to influence their respective representatives to favor its passage.

Concerning the proposition to secure an appropriation by the Connecticut legislature for the purpose of buying shore lands for public parks, the *Norwich Bulletin* remarks that "it is no part of the state's business to preserve sections of the coast or shore for the use of the people." Happily, in Massachusetts, we think differently.

The daily newspapers of the country, particularly those of the "yellow" class in New York and Boston, have once more made themselves ridiculous by their "frenzied" nonsense about the sale of a "pink" for $20,000 to a "millionaire florist." We all hope that Mr. Pierson may yet be a millionaire, if that be his ambition, but these exaggerations do floriculture no good and we are glad to know that neither Mr. Pierson nor Mr. Arnold were in any way responsible for this one.

By the time this paper reaches its readers the carnation meeting at Chicago will have passed into history, let us hope, with great and lasting benefit to the "divine flower" and her enthusiastic followers. Now let us give our attention to the rose "Resplendent Rose! the flower of flowers" and spare no effort to make the meeting and exhibition of the Rose Society at Boston next March a notable occasion. Unusual preparations are being made by the Massachusetts Horticultural Society and the enterprising growers around Boston to assure an exhibition such as has never been seen on this continent. Rose growers all over the country should follow the example of their carnation brethren and make it their business to be present at this feast of roses and do their share to make the occasion worthy of the rose and the rose-growing industry.

President James Hartshorne's address to the American Carnation Society impresses us as a business-like document, admirable not for its frills, but for its sound and practical views, plainly expressed. His recommendation that carnation raisers be given more frequent opportunities to display their novelties before expert judges and in several localities, seems particularly timely, considering the acknowledged disadvantage to the remote grower under the present system, a disadvantage so serious that growers hesitate about submitting their seedlings to the test of comparison, after many hundred miles journey, with varieties grown on the spot. There seems but one alternative and that one with several obvious drawbacks — the distribution of small blocks of the stock of new varieties among competent and trustworthy growers in the different sections of the country. Distances are so great and travel at this inclement season of the year so devoid of attractiveness that good cause for a localized attendance at these conventions is easily apparent. President Hartshorne's suggestion that the S. A. F. might find a way in which to coöperate and lend its help towards some feasible plan for a fall exhibition is a most excellent one and should find a willing response on the part of the S. A. F. should the carnation society see fit to endorse its president's views.

The American Carnation Society, in selecting Peter Fisher as its chief executive officer for the coming year, has honored itself in equal degree. This is a case of "the office seeking the man," for one of Mr. Fisher's most pronounced traits is his "backwardness in coming forward," and, as in most instances where the office seeks the man, the Society gets an executive whom all can honor and is assured of a year's faithful service on broad and impersonal lines.

Peter Fisher came from Scotland to Boston about twenty-six years ago and was quickly recognized as a gardener of practical experience and attainments far beyond the ordinary. His retiring disposition, however, kept him in from the glare of publicity beyond his immediate environs until his phenomenal production — the Mrs. T. W. Lawson Carnation — turned the calcium light on the man and his work, since which time Peter Fisher has done little that the horticultural world — particularly the carnation section of it — has not promptly taken cognizance of. In short, it may safely be asserted that were Peter Fisher and his carnation work, direct and indirect, cut out of the great exhibition just closed, it would leave a tremendous gap. We congratulate the Society and we congratulate Mr. Fisher. A glorious meeting is assured for 1906 and HORTICULTURE will join in the welcome to the host of distinguished visitors that the event will bring to the Hub.

What They Say of Us

"The love of praise, howe'er conceaied by art
Reigns more or less, and glows in every heart."

It's a great paper this week, is HORTICULTURE. I congratulate you. —J. A.

It's a gem, sparkling with news; keep it up, old boy, and there is plenty of room for a paper that is full of snap and vigor like HORTICULTURE. — O. G. K.

I inclose one dollar for subscription to HORTICULTURE. Your paper is all right and a little "Yankee ingenuity" will, we know, stimulate the craft in general. — J. W. D.

I did not congratulate you upon your first number because I think it was policy to see two or three and then average them. You are doing great things. Hope your energies will never cease. — A. D.

Inclosed find one dollar for HORTICULTURE. I am well pleased with the journal. It is well got up, up-to-date, deserves a liberal patronage, and should have the united support of the Florists and Gardeners of the country to a man. Wishing you unlimited success in your new venture. — H. D. S.

After Adjournment

January is treating the carnationists very gallantly as to weather. If anybody should be too late for the judging this year he must find some other excuse than stormy weather.

We read in a Bangor paper that Carl Beers has made a big anchor for a funeral this week which he declares is the "handsomest he has ever built." Sorry to see so good a man going a-gley.

Glad to note that our friend Arnold of Rockland has the good sense to come forward and puncture the newspaper yarns about the price paid to him for the Variegated Lawson. There are people who would have revelled in the opportunity to get notoriety through this means.

A WORD FOR ADONIS

MR. EDITOR.

Dear Sir: I want you to give G. C. Watson a word or two of encouragement and tell him not to lose heart in Adonis. She is not on her last legs by any way. I had great hopes in her last season and this season she is 50 to 75 per cent better, and next season I expect to see her in all her brilliancy, size, form, and good qualities. I have flowers 3–3½ inches across, plants vigorous, healthy, and far superior to Flamingo. I pin my faith to Adonis.

WM. TRICKER.

Out of the Ginger Jar

A tour among the seed stores at this season finds all hands busily engaged mailing catalogues. The catalogue is the big job of the year and entails endless detail and worry to the heads of departments. When it comes to mailing, everything is plain sailing and a cheerful air is apparent from the boss down to the errand boy.

Appropriate names are not as easily hit on as people think. Burpee is usually happy in that line, but what are we to think of Howling Mob Sweet Corn? Oh Jonadab! If it's a good thing, prithee most noble and puissant monarch, give it a fair show on its start in life. There's an eighteen-year-old girl on our street. She weighs 200 pounds at least. Violet's her name. Suffering Cæsar, why couldn't they have made it Mary. Poor little sweet violet! What a handicap. Then there's Uncle Gideon's new potato "Quick Lunch;" that's far too sensational and doesn't really convey any meaning. Take the long white radish Burpee sent out some years ago, "White Icicles," what could be more appropriate? That was fine, but "Howling Mob" 's a crime on an unoffending public.

Henderson's people skate on thin ice when they call their new tomato "Tenderloin." A great many will think of the slums of New York at mention of that name, and that will suggest cheap restaurants instead of the extra fine quality which the introducers doubtless intend to convey by the word. Again, in their new pea "Melting Marrow," is it quite appropriate to speak of a green wrinkled pea as a "marrow?" We have always understood that the word marrow was used to designate white-seeded, large-podded peas. There seems to be no special reason why it should not be applied to others except that people would be apt to misunderstand, and clearness is a great merit in nomenclature.

The early tomato dance goes merrily on. Burpee says: —"*Spark's Earliana is undoubtedly the earliest smooth, bright red tomato of good size.*" To which solemn and emphatic statement we find Maule asservating from the experience of his customers that "*Spark's Earliana, while a good tomato, Maule's earliest of all was not only just as early, but in many cases, five or six days earlier,*" and further caps the climax by claiming "100 *per cent ahead in quality.*" The chances are that both authorities will sell all the seed they have of both varieties and that all who buy will be thoroughly satisfied, so no one need lose any sleep in trying to figure out who's what in this matter. But it shows how keen the tomato growers are after the slightest advantage and how manfully the seed houses hustle to give them what they want. That's genuine progress in Horticulture, and is the mother force that has given us most of the improved forms of the present day. In this connection you are specially requested to forbear from making any reflections or comments on Washington, D. C., and the graybeards up there who are revolutionizing in their minds and following about five years in the wake of the Burpees, and Maules, and other wide-awake seedsmen who are the real pioneers.

W. J. Sherry of Johnson & Stokes, thinks his firm has a winner this season in a new cabbage which they have given the taking name of "Quick Cash." It is of the flat Dutch type, and is claimed to be the earliest *large* cabbage to date. J. & S. were the introducers of Spark's Earliana tomato and they smile indulgently when they hear other seedsmen bragging about their choice stocks of that variety. Mr. Sherry is modest about it, but one can see he thinks their Frisbie stock of Earliana is the only only.

"What is your most important novelty for 1905?" we asked Mr. Burpee.

He considered considerable and finally said, "We have so many fine new things this year that it is difficult to give any one the premier position, but from its importance to the canning industry and the country generally, I am inclined to give it to a new bean which we are sending out this season. Up to date the Davis White wax has been in a class by itself alone and unrivalled and the stand-by of the commercial growers. But we have at last succeeded in getting one that will beat it and I predict that will supplant the Davis as soon as sufficient seed can be got. We call it Burpee's White Wax. The seed is so scarce that we are sending it out by the packet only this year. No bulk seed will be distributed."

The blackboard is a useful thing in a store. Mr. Muth of the Cut Flower Co. has this legend staring customers in the face as they enter: "*It seems to me there was something I wanted in supplies. Was it ribbon, foil, letters, doves, toothpicks, tissue paper, chenille, fancy cord, wheat sheaves, or fancy paper?* REMEMBER: *we can supply all these right and save you time.*" Good business.

S. S. Pennock and Leo Niessen Co. are also in the supply business more or less, and are reaching out for all the trade. The Bayersdorfer outfit does not seem to grow any less, however, and so far as one can see are not losing any sleep over this competition. Mr. Berkowitz says it takes their house four weeks now to do the annual stock-taking. Ten years ago they could start on Monday and finish by Thursday.

A happy advertising phrase was adopted by the Bowker people: "*For*

the land's sake! use Bowker Fertilizers." I suggested a modfiication of this to Edward Reid whose slogan is "*good stock, good treatment, good packing.*" Said I, why not put it this way: "*For goodness sake! use Reid's Flowers.*" But he couldn't see it. Another case of budding genius crushed!

The Dingee & Conard Co. have a color plate of Baby Rambler Rose on the front page cover of their catalogue. A good piece of work and a money bringer sure. P. J. Lynch is apparently the author of the introductory this year if one may judge from the heartfelt and eloquent phrases. A model. Look out William Henry Maule. This is certainly a great rose catalogue and should be studied by all lovers of the queen of flowers. About 1,000 varieties are listed and most of them described.

Burbank's new Crimson Winter Rhubarb is being offered in several English catalogues this season. The demand for seeds and roots of this variety in the United States has been ahead of the supply. Prices still rule high, considering that this was offered two years ago.

At Michell's they swear by their new matchless Lettuce and new Sugar Loaf Corn, the latter of which they color plate. Their new pink Dahlia, Mrs. Roosevelt, has proved a winner and is again one of their leaders. Mr. Freud says this is the finest dahlia in the world. It belongs to the decorative type and is very large and has long stems.

The Pansy as a cut flower is not an important staple perhaps, but still a good deal of business is done in it. The Niessens handle as fine a strain of this as could be wished; extra quality mostly of the Bugnot type, large flowering, blotched and stained, and with some very fine yellow and white selfs among them. They are put up in nice little bunches and sell well.

G. C. WATSON.

The Massachusetts Association for the Suppression of the Gypsy and Brown-tail Moths is showing a most business-like activity in the work for which it was organized. Its committee on legislation has a well-considered bill already before the legislature — a measure which has been formulated after the fullest investigation by competent experts. The bill provides for an appropriation extending over a number of years, and limits the amount to be spent in any one year to $250,000. Those in a position to know, are satisfied that no half-way measures will be of any value.

Florists' Topics

Arnold and Johnson of Randolph, Mass., have taken the florists' business of Ryan Bros. on Hancock St., Quincy. Mr Arnold reports that the conditions promise a satisfactory development. Since the Fore River Ship and Engine Building Co. has established itself in Quincy, the center has grown rapidly as a shopping district, and a prosperous florists' establishment would naturally seem to have a place with other interests.

A feature of Mann Bros.' plant, at Randolph, Mass., is a block of short, roof-connected houses to be used for storage and growing of imported bulbs and plants. The houses are piped and a temperature of fifty-five degrees is possible. Evidently Mann Bros. are making a commercial success of forcing foreign stock, as the glass used for this purpose and their imports are being constantly increased. Holly in pots for Christmas was to them a very satisfactory feature of this season's business.

Herman Waldecker of Braintree, Mass., cut 126 dozen bunches from his bench of mignonette, during Christmas week. He used liquid manure, using a barrel and water pot, and doing the work by hand. He was so well pleased with the result obtained that he will build a tank and set up an engine, and use his water-pipes, hydrants, and hose in order that other parts of his plant may be reached in an available way. As his Christmas cutting of mignonette is only the first installment of his crop, it would appear that he was justified in extending the liquid-manure treatment in the manner proposed.

Business Changes

S. Morehead has opened a retail flower store on Main Street, Cincinnati.

T. J. Leyden, 117 W. Water Street, Elmira, N. Y., has sold out to F. S. LaFrance.

The Callander Cactus Co. was incorporated at Springfield, O., last week, with a capital of $5,000.

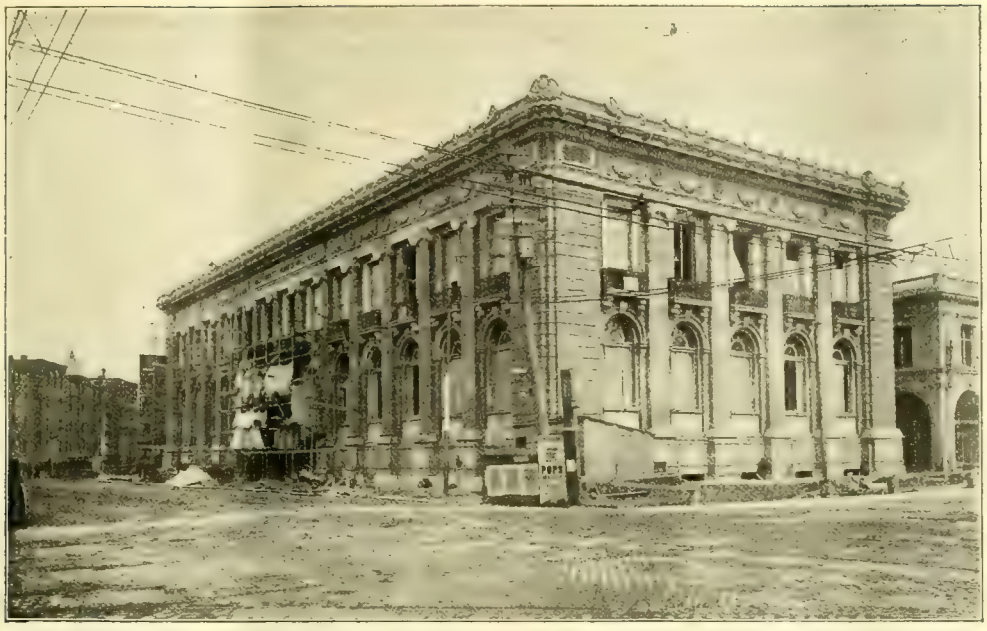
Leopold Koropp has bought the stock and fixtures of the E. A. Asmus Company, Chicago, and leased the greenhouses and store from Emil Buettner.

Culligan & Co. have bought out the long established business of George B. Jones, San Francisco, Cal. Mr. Culligan was an employee of the establishment for many years.

News of the Clubs and Societies

Society of American Florists and Ornamental Horticulturists

President Vaughan has appointed Messrs. E. V. Hallock of Queens, N. Y., and W. H. Elliott of Brighton, Mass., to serve as directors for the three-year term, beginning January 1, 1905.



Also the following gentlemen to serve as State Vice-Presidents for the year 1905: —

Alabama — Hugh Seale, Birmingham.
California — Hans Plath, San Francisco.
Colorado — J. A. Valentine, Denver.
Connecticut—John Coombs, Hartford.
Florida — C. D. Mills, Jacksonville.
Georgia — A. C. Oelschig, Savannah.
Illinois, S. — John Willius, Danville
Illinois, N.—P. J. Hauswirth, Chicago.
Indiana — Irwin C. Bertermann, Indianapolis.
Iowa—Theodore Ewaldt, Davenport.
Kansas — C. P. Mueller, Wichita.

WILLIAM J. STEWART, *Sec'y.*

The annual meeting of the Postal Progress League will be held at 20th Century Club Rooms, 2 Ashburton Place, Boston, Mass., on Tuesday, January 31, 1905, at 4 o'clock P.M. Do not fail to be present.

JAMES L. COWLES, *Sec'y.*

HORTICULTURAL HALL, BOSTON

Where the 1906 Meeting of the American Carnation Society will be held

At the meeting of the Massachusetts Horticultural Society on January 21, W. A. Manda was awarded certificates of merit for Cymbidium Tracyanum and a new Lycaste, a natural hybrid between L. Skinneri and L. lasioglossa, and honorable mention for Dendrobium nobile alba. E. O. Orpet received a certificate of merit for his hybrid Cattleya Suzanne.

The seventeenth annual dinner of the Montreal Gardeners' and Florists' Club was celebrated in the Club's rooms on January 16 and was one of the best on record although financially a failure. It is too bad when the Club votes to have a dinner, picnic, etc., that about 20 per cent of the members fail to turn up. Of course some have good reasons at times, especially in midwinter, when severe weather may prevent those from a distance attending, but in the present instance no such excuse could be advanced.

President Jos. Bennett made an excellent master of ceremonies and during the evening presented Mr. A. C. Wilshire with a fine timepiece as a slight acknowledgment from the members for his support and work on behalf of the Club. Mr. Wilshire was so surprised that he only briefly replied. An encouraging letter was read from our representative in the provincial parliament, promising to do all he could in our interests. The comic songs of Mr. McGrowly were a feature of the evening.

Reference was made to the approaching convention of the Canadian Horticultural Association and also to the carnation show which the Club will hold on Thursday, February 23, and to which all growers within reach are requested to attend or send an exhibit. A silver cup will be awarded for the best vase of one hundred blooms, any variety; certificates of merit are also offered

---

The State Florists' Association of Indiana has elected officers as follows: President, Fred Lemon, Richmond; First Vice-President, Herman Junge, Indianapolis; Second Vice-President, John Rieman, Indianapolis; Secretary, Fred Hukreide, Indianapolis; Treasurer, John Heidenreich, Indianapolis; Executive Committee, J. A. E. Haugh, Anderson; Gunnar Tielmann, Marion; J. A. Evans, Richmond; A. F. J. Baur and E. A. Nelson, Indianapolis. The Association appointed committees to seek a revision of the State Fair premium list and to secure an appropriation from the State for the Purdue University experimental station.

The Eighteenth Annual Dinner of The New York Florists' Club will be held Saturday, February 4th, 1905, at the St. Denis Hotel, Broadway and 11th Street, at 7.30 P.M.

Mr. Thomas Baker will be present with his staff of entertainers, and an excellent program has been arranged.

Indications point to a large attendance, and members are requested to send their acceptances to the Committee at once to facilitate its work in making final arrangements.

At the annual election of the New Hampshire Horticultural society, held at Concord, January 18, the following resolution was unanimously adopted:

Resolved, That the New Hampshire Horticultural Society commends to the legislature the bill introduced in the house, by Mr. Davis of Hinsdale, and in the senate by Senator Dudley of Concord, for the re-organization of the forestry commission and the protection of forests from fire, and that the reorganized commission should not be merged with any other board.

The much talked of contest between the New York and Flatbush bowling florists came off on the night of January 19, at Flatbush, and resulted in the complete discomfiture of Flatbush. A good dinner was enjoyed after the games, and a number of enthusiasts returned to the alleys and were not dislodged until after midnight.

The scores were as follows: —

Flatbush

Mellis	124	115

The New Rose WELLESLEY

Is a welcome addition to the list of forcing roses

Color is bright pink, with reverse of petals clear silvery pink, thus producing a combination that is exceedingly effective either in daylight or in artificial light.

Growth is very free and exceptionally vigorous and will prove satisfactory every month in the year.

Delivery strictly in rotation, beginning April first.

JOHN N. MAY, SUMMIT, N. J.

THE Christmas Fuchsia

A winter flowering variety that will bloom at Christmas and make a nice bushy plant for the holiday trade is wanted. Neither FULGENS nor COCCINEA are satisfactory subjects for Christmas. A variety has been found that has all these good qualities and is in fact almost a perpetual bloomer. It has beautiful bronze foliage, and bright red flowers three inches long freely produced in terminal drooping clusters. So far as known, only one small batch of it is in existence and the fortunate possessor holds same tight. He has, however, consented to propogate a quantity for us and we are prepared to book orders now for delivery as soon as well rooted —from 2½-inch pots—which it is expected will be about April 15th,

35 cents each
$3.50 per dozen
$25.00 per 100

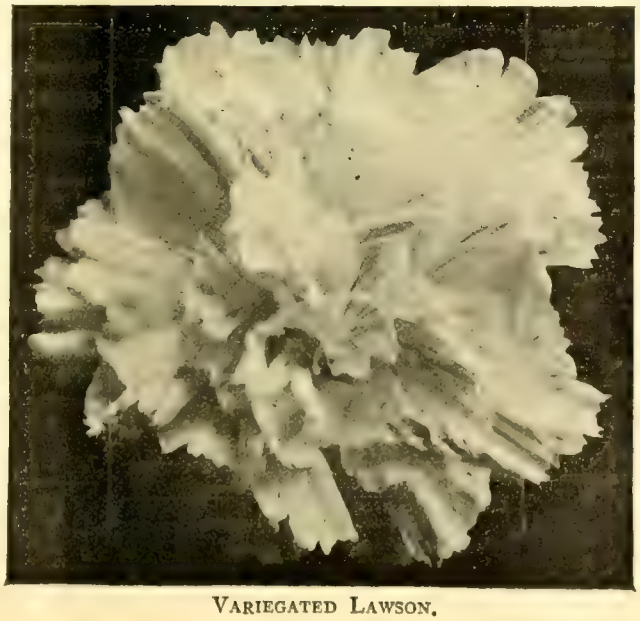
A TRIO OF PIERSON INTRO-DUCTIONS



WHITE LAWSON

DAHEIM

The three varieties illustrated on this page need no introduction to our readers. Daheim, F. R. Pierson's phenomenal dark crimson, disseminated last season has, with good reason, been termed the Crimson Lawson. As a commercial and an exhibition flower, it is conceded to stand in the first rank. He who knows the Lawson — and who doesn't? — needs only to be told that the White Lawson, introduced last season and Variegated Lawson, now being disseminated, are counterparts of the parent variety in all respects except color and, particularly in the case of the last-named variety, a longer stem and less disposition to burst the calyx. Variegated Lawson is ivory-white with delicate carmine pencillings. Our issue of December 31st illustrated a house of this variety, a certificate of merit having just been given to it by the Gardeners' and Florists' Club of Boston.

VARIEGATED LAWSON.

WHOLESALE FLORISTS

PHILADELPHIA MARKET REPORT

Conditions improved somewhat during last week and things are now moving better. Carnations are not as plentiful and roses are also in smaller supply. It looks as if there would be considerable snap to things during the next few weeks and prices ought to stiffen considerably. Medium-length Beautys were in better demand than extras, and, in proportion, brought better prices. Libertys were in fair supply and went fairly well at normal prices. Brides and Bridesmaids were in fair supply and of good quality. What fancy prices were obtained were for Bridesmaids rather than for Brides. What few Killarneys in the market came from New York and sold pretty well. Golden Gates from local sources were in good supply and excellent quality and sold well. Sunrise, only a few around and in demand mainly for the sake of something different. Some La Detroit are being grown here, but not enough to make much impression on the market. More of it could be used. Orchids went in fair shape and at normal prices; white in best demand. Cypripediums are nearly over and the cattleya flood is also past, although crop will continue in moderate supply for some time yet. Violets slow. Gardenias fairly plentiful and went well. White lilac came in good and of extra fine quality. Demand very fair. Lily of the valley a bit slow. Paper white narcissi and Roman hyacinths about past, with prices stiffening a little. Daffodils now good and selling well. Some myosotis appeared last week and was salable. Lilies in good demand and in fair supply. Callas slow.

LOUISVILLE MARKET REPORT

Business the previous week has gotten back to about the usual run, after quite a while of dull business. Carnations of good quality are coming in in small quantities, and are far from being ample to supply the heavy demand. The supply of roses is also very short, and the quality is not very good, although the demand is keeping up well. In mignonette a pretty fair demand is realized, but the quality and supply are very irregular, some being very good, while others are very poor. Sweet peas of good quality are coming in in small quantities, and the demand is about equal to the supply. Violets and lily of the valley of good quality are in fair demand, and the quantity adequate. Sprays of asparagus are very hard to secure. The weather has been rather warm the past few days, making it very convenient for decorations, etc.

Charles F. Meyer, of New York, has been a recent visitor.

PITTSBURG MARKET REPORT

The weather the past week has been decidedly in favor of the florists, having considerable sunshine for three days, an unusual pleasure in Pittsburg at this season of the year, and fortunately most of the heavy snow melted away under the rays of a clear, bright sun.

Most of the florists report business fair, though a few of the smaller ones complain of dull business, especially so close after the holidays. Good scarlet carnations were scarce, most other varieties being plentiful. Good choice roses were not so plentiful, but supply of medium grades is equal to demand. Lilies are rather scarce and small, most growers holding back for Easter holidays. Visitors, D. MacRorie, South Orange, N. J., and Rudolph Hantzsch, Philadelphia, Pa.

BUFFALO MARKET REPORT

The market in Buffalo is better this week than it has been the last two weeks. Flowers are somewhat scarce and more in demand, — there is not much of a glut in anything. Bulbous stock is coming in pretty freely, and selling fairly well.

Random Notes Abroad

[No. 3]

I reached the land of the Kaiser on my wandering abroad on December 23, a season of the year that, as may easily be imagined, would furnish the least possible interest from a landscape point of view. Nevertheless, there is always something in a strange land cropping up now and again to interest, even if only in the way of comparison.

I soon noticed that the trees mentioned in my previous article as doing so well in the British Isles, were non-observable. In fact, I didn't see a single specimen of them during my stay in Germany of three months. I would imagine that this somewhat milder climate of the Fatherland would be more adapted for the successful cultivation of the trees referred to, than the climate of Great Britain.

A feature that strikes the visitor to Germany with more than a passing interest, if he is horticulturally inclined, is the fruit-tree-lined highways so conspicuous in parts of that country. The apple predominates, although some highways are planted with cherry trees, others again with plums, etc. As a rule, there are two rows of trees, one on each side of the road, most of them showing evidence of skillful training on the part of those responsible for them; but like everything else, some sections are better than others, partly on account of richer soil, and not a little attributable to the man in charge. Each tree has a clean stem to the first branches of from seven to eight feet, and they are quite uniform in this respect; after the desired number of main branches is secured, there is little further pruning necessary, excepting a limb now and again to maintain an airy, open head. Each section foreman has a number of highway miles of those trees to look after, with the necessary number of under-assistants to perform the manual labor in caring for same, and the keeping in repair, cleaning, and other necessary jobs for the maintenance of their respective sections of public roads in good order.

In the fall of the year the fruit of those trees is auctioned off to the highest bidder and as it stands on the tree; each purchaser to gather his own fruit, but always subject to the direction of the section foreman. The money thus collected from the annual sales of such fruit is more than enough to keep the roads in perfect order, and pay for labor and all expenses. This, however, is only true of sections advantageously situated as to good deep soil, etc., and where the maximum of care is given to other details.

The most popular apple there is Golden Pomane, standing in general esteem as a revenue producing apple with them, in much the same way as the Baldwin with us. There are many more varieties grown, and of considerable merit, but to much lesser extent. In the parts of the country where this industry is carried on extensively, embracing hundreds of miles of tree-lined roads, the scene when the trees are in blossom must be charming.

Although my journey across to the other side was primarily undertaken to escape an immediate association with cemeteries, yet on finding myself within easy distance of some of the most important, I was drawn into some of them but not from any desire of choosing a select spot for a future resting-place; in fact, I had a dread of this sort of job being thrust on me, preferring to leave it to the distant future and making such a selection on Uncle Sam's territory.

The first cemetery I visited in the Fatherland was in Mianz, and it was a fine one, quite extensive and well kept; planned on the English kitchen garden model, the main avenues cutting each other at right angles, leaving the burial ground proper in more or less square plots. Each avenue was lined with trees, maples, elms, lindens, and ashes, but each avenue had its own species entire, no mixture. They were splendidly cared for, all dead limbs being scrupulously cut out smooth and clean, and all scars painted.

It would seem that it is a universal custom in Germany to decorate the graves at Christmas time, few graves, old or new, being wanting in this respect, when I visited the cemetery above mentioned a week or two after Christmas. In some cases the designs were numerous and elaborate, giving at that time a flower-garden aspect on a large scale to the surroundings. The flowers, however, were mostly all artificial; the groundwork was constructed of laurel leaves, spruce branchlets, cupressus branchlets, and other greens; there were representation of most all kinds of flowers to be seen, and as to color and botanical details they were well done, the fabric used being apparently waxed linen. While the scene had been deprived considerably of the higher and finer sentiments on account of its artificiality, yet I couldn't help admiring its cheerfulness, and it also had the merit of being lasting.

One of the most elegant effects that I have seen was produced with the real article, Erica rubra and E. alba massed in clumps on the graves or otherwise deviced in figure forms, grown in four or five-inch pots and plunged in the earth to cover the pots from view, giving the impression that they were growing there; this decoration had the merit of being real, charming and lasting, for these ericas were uninjured in floral beauty though they were in the clumps and devices nearly three weeks ere I saw them. This erica was also seen extensively used for veranda and outside window decoration, grown or plunged in narrow green painted boxes, and a beautiful display it made with its abundance of tiny urn-shaped rose-pink drooping bells.

One of the faults that I observed in this otherwise fine cemetery, and which is a common fault in the general European cemeteries, was the raised mound construction of the individual grave, as varied in form as there are owners of graves apparently. The curbing constituting the outlines of each individual grave was made up of tiny seashells imbedded in cement, or the more substantial granite curbing, the whole looking like a gigantic rockery. I am satisfied that this idea of a cemetery lay-out is a mistaken one. Give me the smooth lawn style of Yankee-land.

K. FINLAYSON.

SPECIAL EXPRESS RATES ON PLANT SHIPMENTS

The special rate on plants properly boxed, secured by the action of the S. A. F. committee several years ago is available for all plant shippers who comply with the provisions and make the demand. The following is a copy of the classification in force:

Plants — Completely boxed or crated — general special rate.

Between points where no general special is in force, plants packed as above may be taken at 20 per cent less than merchandise rates, pound rates, minimum charge 35 cents for each company carrying, prepaid or guaranteed.

Completely enclosed in baskets, and so packed that they may be stowed with other freight without injury to the plants, pound rates, minimum 35 cents — merchandise rate.

Plants not packed as above, double merchandise rate.

Roots — For planting, completely boxed and packed so that they may be handled without extra care — general special rate.

Between points where no general special is in force, roots packed as above may be taken at 20 per cent less than merchandise rates, pound rates, minimum charge of 35 cents for each company carrying, prepaid or guaranteed.

Completely enclosed in baskets, and so packed that they may be stowed with other freight without injury to the roots, pound rates, minimum, 35 cents — merchandise rate.

The following paster is used by a number of large shippers, and its adoption is recommended to all who desire to take advantage of the concession.

This box is billed at special rate, twenty per cent less than merchandise rates, by a special arrangement agreed to by the Adams, American, United States, National, Northern Pacific, Pacific, Suther and Wells, Fargo & Co.

IT TAKES $20,000 worth of postage stamps to mail THE MAULE SEED catalogue for 1905. It contains 152 large pages, full from cover to cover of illustrations and descriptions of the best and newest things known in horticulture. As the original introducer of Prizetaker Onion, Nott's Excelsior Pea, Davis' Wax Bean, etc., I know what I am saying when I make the statement that never before have I offered so many novelties in flower and vegetable seeds of real merit. No gardener can afford to be without this book, which will be sent free to all sending me their address on a postal card.

WM. HENRY MAULE, PHILADELPHIA, PA.

DREER'S NEW WAREHOUSE

Under the able guidance of Mr. McKubbin, we were given the privilege of a look through the new storage warehouse for seeds and sundries which the Dreer firm has erected at 7th and Locust as an annex to their 7th and Chestnut Sts. establishment.

The building is six stories, with basement and sub-cellar about 80 × 25 running through from Locust to Orange St., and is of the most substantial construction — immense beams running from wall to wall and all pillar obstructions avoided. The elevator is the latest style Morse electric, and is bricked in on every floor and has substantial iron-bound doors, making it fireproof. A private telephone system goes all over the building and is also connected with a similar system in the Chestnut Street store, thus reaching all the heads of departments. The ventilation system is very complete on all floors, there being air shafts at intervals along the upper part of the walls in addition to wide, airy windows at both ends of the building.

The sub-cellar is to be used for the storage of potatoes, bulbs, etc., and is cool and frost-proof — an ideal place for the purpose. The basement is intended for incubators, fertilizers, and other sundries. Heavy seeds will be on the first floor, while the second is to be devoted entirely to flower seeds. Grass and garden seeds will be on the third, fourth, and fifth floors, while the sixth will have the power cleaning mills. A special building has been erected on the roof as a power house. It will contain the motors for driving the elevator and cleaning mills.

Mr. William F. Dreer, the head of the firm, has given close personal attention to planning all the details of the building and has been ably assisted by Mr. Thilow and other heads of departments. The result is an ideal warehouse affording much needed facilities for the rapidly expanding business. Congratulations are in order and are hereby extended.

The Gardener and Landscape Gardening

Read before the Gardeners' and Florists' Club of Boston by J. Woodward Manning

(Continued from last week's issue)

Suggestions ought always to be in order and should be received in the most liberal spirit; nine times out of ten they will be so received; the tenth instance would be a reflection on the landscape architect.

The landscape architect may feel that the gardener is merely a caretaker, his duties being to simply carry out his design; he is merely a workman, and that the landscape architect is alone responsible for and entitled to credit for what results: some of this is true, but much is either false or should be. There may be two reasons for this, one that the landscape architect has not reached that stage where he can recognize merit in any one else than himself, or that he is justified in the opinion that the limits of usefulness of a particular gardener is that of a caretaker; in the first place the gardener is very likely to succeed the landscape architect; in the other, the so-called gardener will never make much headway in that line of trade. I fear many embryo landscape architects may never become good gardeners; I am also convinced that many gardeners will broaden their capabilities enough to preclude the necessity of the landscape architect on places where intricate problems do not exist. If, however, the problem involves complex questions of design and engineering, it is better that such studies embracing economy and utility as well, should be in the hands of one whose constant and proved practical solution of such matters can handle the problem broadly, understandingyl and effectively; your own experience in assisting him to attain the object in view will be an education in itself and aid you later in handling less complicated problems for your employer when you have the opportunity. Perfect harmony between the landscape architect and the gardener is essential to enable the latter to know what is sought for; eventually the problem will come under the gardener's care, and it can be no reflection to the gardener to be responsible for the final results that make the picture complete. By such harmonious relations instances are numerous in which the landscape architect gets all the credit due him, but the gardener gains even greater laurels in being able to execute the details.

Many gardeners feel that their duties are altogether too varied now and their present efforts are not sufficiently appreciated as it is. It cannot be denied that this may be so, but may this not be due to yourself largely? Is it not because that there is a lack of varied and interesting results, this may or may not be possible according to opportunities? Do you make the most of such whenever they occur? Is not your greatest opportunity in so broadening your knowledge and applying it that your worth may have greater recognition? If your duties are so numerous and varied that gardening must of necessity be a minor matter, you may still broaden your knowledge as far as possible, but look to it that as soon as may be you obtain a situation elsewhere, that your gardening propensities may be better appreciated and encouraged. The broadening interest in gardening that is being produced by the numerous horticultural books and papers now existing or promised, is but a forerunner of what is to follow. I believe it indisputable that New England will eventually become a center of as intense interest in gardening on the part of the householder as well as the gardener as is now the case in old England, with the result at least that the gardener will, on many estates, be given the opportunity to apply his exclusive attention to his profession; hence the importance to broaden your knowledge to meet the demand.

Don't fall into the common error of following a rut of work, planting only what you have planted in the past, repeating the same treatment in the most perfunctory manner; don't feel that you should necessarily be directed by the owner without taking the initiative when opportunity presents; this may be unavoidable, perhaps the fault is yours.

The solving of the problem of opportunity I consider of the highest importance for the gardener in showing his worth, and this problem is that fundamental basis of landscape gardening that I am advising you to practice, where you study to make the most of what you have to work with, rather than to follow the lead of some rival, particularly when conditions may be so different as to make such an attempt ludicrous. First study the place as a whole and convince yourself at the outset as to what the limitations must be. The natural conditions ought to solve the problem largely. If a bare, open area, then you must produce the future picture; if possessing rugged or picturesque features, arrive at an early decision as to whether such conditions are not the forerunner of the policy you ought to pursue, and if so, use every precaution to preserve what nature may be abundantly supplying; an old tree may be favorably placed to give emphasis to a view; the study of how to add a bit of planting to aid the effect and complete the picture or to improve by a little judicious thinning with due regard to the preservation of the best, will be interesting; perhaps you can save an outcropping ledge that might ordinarily be considered an encumbrance when it may be the opportunity to form an interesting feature of itself, or, with proper planting form the nucleus of something of harmonious interest; the use of the greatest discretion in clearing underbrush in a bit of woods with a careful discernment as to whether the native growth does not of itself have ornamental value in better harmony and attractiveness than could be produced artificially; even a mass of clinging poison ivy clambering over a sturdy tree trunk may perhaps be preserved, provided you supply planting at the base, of an impenetrable nature to preclude any danger. Recognize and study the value of our common native plants, our ferns, native roses, our own wild asters and columbines, witch hazels and many others that the landscape architect has had sufficient discernment to take advantage of. Many of these plants are adapted to shady or sterile situations where effort to establish exotic plants would be disappointing; this by no means, however, precludes the use of the exotics wherever their proper place may be. You can get lots of good points from nature on the grouping and combination of plants that will work to advantage under varied conditions. Carefully study the adaptability of plants; don't place rhododendron and azalea beds in sunny, unprotected, dry situations where annual expense will be required to provide the needed protection artificially, and which can only partially produce the desired results and eventually discourage your employer in such expenses. Think out the lawn problems. Good taste is no longer in sympathy with dotting the surface of a well-kept lawn, with individual trees out of proportion to its real needs, with the result of breaking up its continuity, lessening its apparent size, and rendering it more expensive to maintain. A few dignified specimens may be desirable, but groups or masses arranged with a double purpose of adding depth, or to serve as a framework to important vistas over the lawn, or the equally important service of acting as screens to objectionable views or divisions to various portions of the estate constitute the best treatment. Shrubs too, should not unnecessarily break up the lawn, but should be grouped or massed on the boundaries or against the base of tree masses, often serving the double purpose of screen and ornament. Again, planting at the base of buildings may add much to their attractiveness; the grouping of the shrubs should be studied out with a view to making harmonious combinations of foliage and with an avoidance of spottiness; an arboretum of shrubs should not be attempted in a private place, but rather strive to make the more effective mass effects with due regard to the proper use of occasional selected individuals whose character should be so emphasized. Do not overlook the advantage of using some of the vigorous perennials in such shrub borders; for instance, the silphiums, eulalias, helianthuses and others, may be used more effectively in this way than in a strictly perennial border, and the blooming season of the shrub border can be materially lengthened thereby. Give the area of the lawn careful study and limit the closely trimmed portion to the immediate vicinity of the buildings or paths or the strictly formal gardens; make easy transitions from this more expensive greensward to less frequently trimmed, less used lawns, and finally to a field condition on those portions of the estate where such would be in better keeping with the needs and uses; such cases improve the opportunity for the naturalization of hardy bulbs and wild flowers that would lend added interest at the spring season when such things are most appreciated. How many of you apply your old bulbs thus, or better still, buy an inexpensive class of bulbs for this purpose alone. You can well

put much study into all these lawn problems, and the questions of shutting out objectionable views, retaining distant vistas, viewing the same lawn from distant and varied points, making properly framed glimpses between tree trunks under their canopy of foliage or through their branches and many other such details, comprise the very essence of the highest types of landscape gardening. A vast improvement has been accomplished by abandoning the meaningless fancy beds cut into the lawn, destroying its continuity; their use is properly relegated to one spot, perhaps adjacent to the house, or better in a formal garden set aside for that purpose. How much better to carry the eye over an unbroken turf to the lawn margins made interesting by shrub, herbaceous or tree borders than the incongruity of placing meaningless geometrical beds in the foreground to such an interesting picture.

The formal garden frequently is a most important feature of a place, but its size, situation, and effect is a serious problem; it is difficult to maintain a constant flower effect therein; it is the most expensive form of gardening; it should usually be adjacent to the residence and form rarely an outdoor apartment of the home; its interest is as much centered in its formal design as in the details of its makeup, and unless it is particularly good the disappointments may be serious. Be careful, therefore, in recommending such a feature unless you are convinced it may be harmonious with the surroundings, reasonably demanded, and that the expense may be justified in the results gained.

The herbaceous border is here to stay. It should be extended to the full requirements, as in addition to its ornamental value it is a very economical supply of cut flowers, but use great care in the selection of varieties, as in the long lists offered there are many kinds that are better adapted to naturalizing or grouping in the shrub borders or elsewhere than to being placed in the herbaceous border proper. The various forms of the European columbine (Aquilegia vulgaris) are all good herbaceous border plants, but our native species Aquilegia Canadensis shows to far better advantage in its natural positions in the crevices of rocks in ledges, and moreover, is more permanent here than in the border; many native asters are very much more effective naturalized in the woods or encouraged in wilder portions of the estate than they are in the border, and it is far better that they and such other gross feeders as the better types of goldenrods and knotweeds be so planted that this drawback may not affect their neighbors. Other perennials of so-called miffy nature can be very successfully cultivated, provided you give them the natural conditions of perfect drainage, sun exposure, or otherwise meet their requirements. Edelweiss, (Leontopodium alpinum), the Cromwell (Lithospermum prostratum), the gentianella (Gentiana acaulis) are with a long list of other examples, plants requiring this special attention to attain the greatest success. The herbaceous border itself must be carefully thought out as to the subjects used and their grouping; study the avoidance of spotty planting above all things, but do not forget foliage combinations as well as flower harmony of color, and do not depend absolutely on perennials in such a border, otherwise there will be a monotony in the repetition of the same effect from year to year; use annuals and tender plants in liberal quantities to vary each season from another; moreover, a perennial border without a proper background seldom shows to the best advantage.

In naturalizing, large masses are generally essential for best results, but this use of perennial bulbs and herbs is a fascinating study to yourself and your employer, making it possible to give great charm to portions of the grounds that may have been previously neglected. Without considering bulbs now think how attractive the moist situation may be made with the introduction of colonies of the ever-blooming swamp forget-me-not (Myosotis palustris semperflorens); a large clump of the Gladwin iris with its yellow flowers, spreading masses of Lysimachia clethroides; to what advantage a dry waste corner could be improved with the plume poppy (Bocconia cordata) or the giant knotweed (Polygonum cuspidatum), both of which you would not dare to plant in the rich soils of the garden; but really I must break away from this line of thought to take up others. Rockeries are dangerous features to fool with, but, if you know how, can be made most interesting features; aside, however, from the danger of error in their structural details is that of introducing them at all if they are not in harmony.

The vegetable garden can usually be improved upon and at times may be made an ornamental feature of the place. Where else could you raise to better advantage gladioli, lines of batchelor's buttons and numerous other cut flowers and where more easily cultivate them; and is it not important that the flower display elsewhere should be free from the otherwise heavy house cutting demands?

These hints may serve as suggestions as to how you may practice practical landscape gardening, and moreover, you may find this the solution of the problem of expenditures whereby you are producing the maximum of results with a minimum of cash, a strong factor of appeal to your employer.

Do not allow the tendency to follow paths of earlier training all your days, prevent your varying your methods or ideals, if not adapted to our present needs or the requirements of your employer; doubtless this earlier training was fully up to date for those times, but with new methods and new ideals you must give such careful attention and apply them to your personal use. Immense strides are being made in horticulture; the painstaking methods of the old gardening training of the European countries is excellent in the same way that the study of botany is excellent training even if in after life you make little application of the technical knowledge. No country at present is advancing in horticulture as fast as this, however, especially in the line of new investigation; it is true that much time and money has been spent by the experiment stations and the government departments in lines that have seemingly been a waste. It is not easy for the college professor to abandon theory for practice, yet we are hardly in a position to criticise him for his accurate investigations which are bound in the long run to tell, and already far-reaching results are being accomplished. Pure mushroom culture is a recent and very important result. Nitro-culture will prove of far wider importance. Fertilizer investigations, the study of soils, irrigation and forestry; the remedies for plant diseases; the control of insect pests, all are very largely attributable to government effort, and this knowledge is yours for the asking; all are indirectly or perhaps directly connected with landscape gardening.

Another problem is that of the greenhouse or conservatory on a private place. Is it not true that in many ways the expense involved, its detraction from giving attention to other problems, is disproportionate to results obtained? Every one loves flowers in winter; they are a necessity, but is there not a tendency to devote too much expenditure to this feature? Are the conservatories visited by the owner as frequently after the second year as before? Does his or her interest keep active, or is it true that after a time the expense of maintenance becomes a burden to the owner, and may it not lead to a feeling that results hardly warrant the cost and perhaps to the undoing of the gardener? If the owner's interest is centered in the conservatories, that feature may become the dominating one, though there would be a question even then if the estate does not have opportunities for development which the owner may have not recognized and which it is your place to be able to take advantage of and encourage to the owner's pleasure and appreciation. Greenhouse work is tantalizing, imperative usually, and I by no means wish to discourage it, but I do wish to show that it may be fatal for you to neglect your outside opportunities. If you have your work so well under hand that the greenhouse in no way interferes with your making the most of your opportunities, little criticism can be raised; but on the other hand, if the use is that of producing plants for bedding effects that had, better not be attempted on the place under your care, then that use of the greenhouse should be changed. Is it not worth your while to make the most of your opportunity to study better and more varied effects in the greenhouse also? Conservatory treatment is subject to the same criticism as the treatment of the ordinary estate, *i.e.* that of too much monotony. The regulation palms, cycads, dracænas, rubber-plants, carried to that extent that nine times out of ten a list may be made in advance of what is to be seen in an unvisited conservatory, tends to destroy interest. Introduce some unique things, study better displays of what you have in far greater variety. Take advantage of the suggestion made a few years since by the Bussey Institution at the annual spring exhibitions of the Massachusetts Horticultural Society, of forcing native or introduced perennials and shrubs. No great expense may be necessary to do this, and the interest in the gardener's work will be perennial with the owner.

The problem of your success in your profession, therefore, is that of your willingness to study and think and work, to take the utmost advantage of your opportunities presented in the problems under your care, and to apply the fundamental principles of landscape gardening, *i.e.*, good taste, so persistently as to convince your employer of your indispensable qualities which is the measure of value in every line of effort.

Special Cheap Offer of Florists' Orchids

We want room for large importations

CYPRIPEDIUM INSIGNE: 5000 established unflowered growths. $8 per 100; $75 per 1000.

CYPRIPEDIUM CALLOSUM: 1600 established unflowered growths. $20 per 100.

CYPRIPEDIUM LAWRENCEANUM: 1500 established unflowered growths, $25 per 100.

DENDROBIUM FORMOSUM GIGANTEUM: The florist's white orchid. Established plants, 8 to 10 bulbs, $9 per 12; $70 per 100.

VANDA CŒRULEA. The florist's blue orchid. A rare opportunity. Established plants, 10 to 12 leaves, $15 per 12; 14 to 18 leaves, $22 per 12. All clean, healthy, perfect plants.

A GARDEN CITY

When we speak of a garden city our thoughts turn instinctively to those cities of the Orient mentioned in biblical literature, where each citizen had his own "Vine and fig-tree, none daring to make them afraid," and now in these days of high pressure, when cities like mushrooms grow, it is with pleasure we read an account describing the evolution of a city in Hitchin, England, where the inhabitants will be able to have at least a full share of fresh air and sunshine.

The chief point, however, is that it is to be a city where Flora and Sylva shall in some measure sway the hearts of the people and where horticulture may be freely enjoyed by all who choose to take up their abode there.

The following facts will give one an idea of the scheme: — Four thousand acres of beautiful country have been purchased by a company on which to build a town. The land is now being let very readily for a price which yields about 50 per cent on the first cost, so there will be an enormous sum to be disposed of; this is to be devoted to laying out streets, parks, and gardens, to education, etc.

All the streets will have margins of not less than seven feet of grass between the road and pavement in which trees and shrubs are to be planted. Out of fifty miles that have to be done, only two as yet are completed. All the streets will radiate from a central square, and fine sylvan views will be obtained from every part of the city. The experiment of freely planting fruit trees in the streets will be tried, and a collection of the best herbaceous plants in cultivation is to be grown in a large area especially set aside with a view to showing the people what to plant, while seventy-seven acres of moorland will be for a wild-garden, where a large collection of British plants will find a home. A large tea-garden with lakes and pergolas is in course of formation at present. Surely the above project when completed will be worthy of all approval and will tend much to make the "City beautiful." E. MATTHEWS.

AMERICAN CARNATION SOCIETY

BOSTON

SELECTED AS THE NEXT MEETING PLACE

PETER FISHER

ELECTED PRESIDENT

The Annual Meeting of the American Carnation Society opened, according to custom, with a brief preliminary session at ten o'clock Wednesday forenoon, January 25. The time up to one o'clock was fully occupied in the work of staging the exhibits, and at the appointed hour the judges began their labors. Two of the exhibitors only, Messrs. R. Witterstaetter and W. J. Palmer & Son, arrived too late for judging. The formal session of the society opened at 7.30 P.M., when Mr. Howard S. Taylor was introduced and made an address of welcome on behalf of the city of Chicago. He said:

Mr. Chairman, Ladies, Gentlemen: — I am sure if Mayor Harrison could have known, if he could have seen the specimens of beauty in the other room and this room, he would have much preferred to come and deliver his address of welcome himself. However, he has asked me as his personal representative to be present this evening and to tender his congratulations to this association of carnation growers and lovers and bid the visiting delegates a hearty welcome to Chicago. Allow me to say in reference to the remark of your chairman in introducing me as the prosecuting attorney of the city of Chicago, that I have not been alarmed by this congress of ladies and gentlemen and have taken no extra police precautions on your account. I have thought that when you go away you will take nothing with you except our hearts. As a student of things, allow me to say that since I have measured in some way the scientific advancement of floriculture as evidenced by this magnificent display, I have reflected upon the patience and ingenuity of the culturists that lie back of it all. I venture to say there are few ministries in nature more soothing, more satisfying, and solidly beneficial than the business you are engaged in. The mayor has desired me to say in this welcome to you that we speak forty-three languages here and would be glad to tell our welcome in each. I feel, however, this would embarrass you somewhat, so will put our welcome in plain English, and say to you, visiting ladies and gentlemen, that you are most heartily welcome to the city of Chicago. I must not detain you longer. I am much obliged to you for the opportunity to address you, to see this great show, and to mingle for a little while in this pleasant company. (Applause).

Mr. E. G. Hill made response on behalf of the society, as follows:

Mr. Taylor and Gentlemen: The chairman has tendered me a very handsome compliment in selecting me to respond to this kindly welcome. I only wish I possessed the gift of speech, in the measure at least, that Mr. Taylor possesses it, but you know we gardeners are not gifted in that line. Mr. Carmody says, however, that the gardener is the best listener in the world and likes to listen to ladies especially. Several

PETER FISHER
President-elect

years ago he got into trouble on this account, the same authority says; he bit an apple and the taste of that apple and sting of that bite has never been out of the gardener's mouth from that day to this. We florists, when we come to Chicago, receive a most royal welcome. I can say that we are entertained and treated most hospitably. City officials in the past have gone out of their way to confer favors upon florists. I think you in a measure appreciate our art. I know you are generous and kind hearted and look for the time when your generosity will recoil in measure upon you, because you know it takes good fertilizer to produce handsome carnations. I read in the St. Louis papers that you are sending all that material down to St. Louis (laughter). That is not a fair deal. If the St. Louis people come here and whip your carnation men, why, the city officials of the drainage board will be responsible. A few years ago we had small carnations, flowers perhaps an inch and a half across. When you look at this exhibition I think even the laymen not devoted to carnations will concede that great progress has been made. I want to say that we cordially appreciate your words of welcome here and will behave ourselves. I thank you for your kind welcome.

President Hartshorne then read his annual address, which was received with approving applause. This address, together with the reports of the secretary and treasurer which followed it, are given in full in the following pages of this paper. Mr. H. M. Altick next made report on behalf of the McKinley memorial committee, and by a unanimous vote the committee's work was endorsed and ordered continued. Prof. J. H. Hasselbring of the University of Chicago, then presented the valuable paper on Carnation Diseases which appears in full in this issue, and the discussion which followed was participated in by Messrs. W. N. Rudd, C. W. Ward, Fred. Dorner, and others. A vote of thanks was accorded Prof. Hasselbring.

The Board of Directors reported in favor of Boston as the next meeting place of the society. Nomination of officers resulted in the naming of Peter Fisher, Ellis, Mass., for President; J. H. Dunlop, Toronto, Ont., for Vice-President; Albert M. Herr, Lancaster, Pa., for Secretary; and Fred. Dorner, Jr., Lafayette, Ind., for Treasurer. One director, William Weber, Oakland, Md., was renominated; William Nicholson, Framingham, Mass., was nominated as judge for the full term of three years, and Eugene Dailledouse, Brooklyn, N. Y., as judge to take the place of William Scott, who was unable to serve on account of sickness.

Address of President Hartshorne

Ladies and Gentlemen, and Members of the American Carnation Society: What little I wish to say to you must be fragmentary, owing to my desire to avoid boring you with a long address. We meet to-day in our fourteenth annual convention. My predecessor has said, did he believe in signs and omens he would be fearful of the success of his — the thirteenth annual meeting. Now I would say, were I a believer in them, I would be fearful of what was going to happen to me, as I have the honor of being your thirteenth President. But if I may judge from the many old-time faces before me and such a goodly sprinkling of enthusiastic new ones, the welfare of our society and the success of this meeting is not to suffer on that account. Some of you have come a thousand miles or more to pay homage to (dare I say "The Queen"), well, to many of us the Queen of Flowers — the Carnation.

This society has done a great work since its organization in promoting these exhibitions, offering prizes and certificates for new as well as old carnations, thus making our hybridists work harder than ever to keep pace and meet the ideals of our judges. Without this society I am afraid we would still be plodding along in a marking-time fashion as we were fifteen to twenty years ago. It is just fourteen years ago since the dissemination of that once great carnation, Daybreak, which really marked a new era in carnationdom. While several good varieties made a bid for our favor in the following year, it was nine years before Mr. Fisher gave us the Mrs. Lawson, the next real sensation. After that came Prosperity, a variety that is still in a class by itself on account of its distinctiveness. Then came Enchantress, and now Lady Bountiful and Fiancee; therefore, it looks to me that, from now on, it is reasonable to expect a new wonder about every year. While we cannot all raise a wonder, each individual member of this society can take some share of the credit for what has been done in advancing the carnation in general, for you support the society and the society enthuses and stimulates the hybridizer to keep pegging away.

That gentleman is now having some valuable help from the sportive tendencies of what were at one time his seedlings, but now good standard varieties. The Mrs. Lawson, for instance, has given us the White Lawson. There is no question but what this variety, now thoroughly fixed, will become a valuable standard. It originated in two or three different establishments, and I believe each one of them is conceded to be identical with the other. It was a good thing for the trade when the owners of these several sports got together and agreed on one name for all of them. There are several other sports which I believe identical in every respect with each other, now being registered with the society under different names. This should be stopped, as it only causes confusion to the trade in general.

One matter that has been discussed pro and con in our past conventions is relative to judging seedlings at various seasons, and another one regarding the best month in which to hold our annual exhibition, both of which are worthy of our consideration. I wish to offer a few suggestions along these lines. I would like to have the society go on record as favoring an annual All American Flower Show to be held in November and in a different city each year. I believe the time is ripe for it. Perhaps the Society of American Florists or the World's Fair Flower Show Association could be induced to take the matter up. If there was such an exhibition it would enable us to see the new carnations in the fall as well as at our own grand show later in the season, without any extra expense to the American Carnation Society. We could offer our certificates there, which might be termed Fall Certificates, and also collect entry fee the same as usual. This in a measure would cover the part relative to judging seedlings at different seasons, and be a great benefit to introducer and buyer alike of a new variety as well as to the trade in general.

And we need not be so particular as to the date for our own exhibition. Here is another suggestion. If a certain grower has a new carnation for distribution to the trade, give him the chance of receiving our endorsement or otherwise of its commercial value, by applying to our president for a committee of judges or practical growers to visit his establishment and inspect the variety growing, say two or three times during the season. The committee could consist of three good men living in his (the grower's) vicinity. I believe this plan is followed by the New York Florists' Club. It would be just as easy to get the committees for this purpose as it is for the American Chrysanthemum Society to secure its several committees, to meet every Saturday for two or three months.

One feature of the carnation plant we can congratulate ourselves upon more than any other I believe, is the healthiness of the acknowledged present-day standard varieties. We do not hear so much about stem rot, bacteria, rust, etc., as we did four or five years ago. The reason for this I lay to the fact that the hybridist has refrained from using for crossing purposes varieties that are subject to those diseases and also to our semi-indoor mode of culture, early planting, which I recommended in my essay at the Buffalo meeting.

The prices obtained for carnation blooms the past few years has hardly kept pace with the improvement and the quality of them. When we held our convention in this city seven years ago, fancy carnations were bringing eight cents at the holidays and occasionally higher prices were heard of. The best varieties at that time were Jubilee, Mayor Pingree, Mrs. McBirney, and Mrs. George M. Bradt. The same prices were realized this season for improved varieties that were better grown, but the years between rarely saw the top figures, and yet the cost of production is much higher. The reason for this state of affairs is no doubt due to over-production, but when you take into consideration that there are a million more plants grown in this vicinity alone, producing about fourteen million a year more blooms for this, the Chicago market, we can hardly be surprised at the non-advancement of the price. Still I doubt if we have much reason to complain, for, during that period we have had no panic in the business world and no serious slump in flowerdom, and the prospects of the future, I think, are encouraging. Personally I think we are on the eve of an unusually prosperous era and I trust the carnationists will reap their share of the benefits.

Since we last met in Chicago, we have been to Philadelphia, Buffalo, and Baltimore, each one of these cities approximately a thousand miles from the western carnation belt, making it very difficult for growers in that vicinity to make creditable showings. In the years following the convention mentioned, we went to Indianapolis, Brooklyn, Detroit, and now Chicago. This is as it should be. Now let us go east again, the middle east, or even enter new fields, as I believe great benefits are derived by our society in spreading the knowledge of our work and showing the products of our skill in any city within a reasonable shipping distance of a carnation center.

The growth of the carnation's popularity among all classes of people, should be very gratifying to us, and still I believe it to be only in its infancy. One thing more than all others that will, I am sure, increase this popularity in the future, is that grand body the Carnation League of America with 3,000,000 members each wearing a carnation on January 29th, as a tribute to the memory of our beloved President McKinley.

We shall soon hear the report of the judges of the present exhibition. Some of us will be disappointed; others will experience those thrills of joy which victory brings. If you are a new exhibitor and are beaten, do not be discouraged. Take your defeat with good grace, find out if possible the weak points of your exhibit, and return home with a determination to overcome them next year.

Before concluding, I beg of you, one and all, to attend the sessions and stay with them until each one is over; help us to get through with what business we have and make this convention what it ought to be, the greatest yet. After the sessions are over, there will be plenty of time to explode your pent-up enthusiasm. That your Chicago friends will be with you and stay with you to the end, is a foregone conclusion. Now to business.

Report of the Secretary

Mr. President and Gentlemen of the American Carnation Society:

Your secretary reports having issued the regular printed matter of this society during the past year and mailing the same to all the members of the society.

The attempt was made of issuing the full Premium List early in the fall and mailing the same at two different times, once in October and again in January. The idea was to give the advertisers in this list the advantage of a double circulation. The attempt can hardly be called a success, as it was almost impossible to get advertising and specials together in September; they were received so slowly that it came to be a rush job and an error or two in the copy was the result. These were corrected in the issue sent out in January, and a few additions made to the list in the form of a supplement.

We are as yet without a permanent stenographer (that is, the same stenographer for every meeting) and until we get one, our reports are bound to be incomplete in some respect. We were fortunate in securing at the last meeting and for this one, stenographers who have had some experience in Horticultural matters, but to give us a complete report such as this society should have, requires a stenographer who will be with us year after year, get acquainted with us, know our names, our voices, and the meaning of all the terms we use.

There were during the year, the usual number of complaints as to mail matter not reaching the members, in several instances four pieces having been sent the same party. In justice to myself I want to say that all regular matter, such as circulars, premium lists, etc., are addressed by a machine that makes it a mechanical impossibility to miss any one.

While we are not by any means in financial straits, yet there are so many things the society could do with ample funds back of it, that we should use every endeavor to increase our permanent fund and our membership as well. For the latter I would suggest a display adv. gotten up with a cut of the front cover of our annual report and inserted in the trade papers the week the report is sent out, at a cost not to exceed $5 for each paper used, and one insertion only. With the papers presented for this meeting our report ought to be a good one, and a strong, pictured, good sized adv. ought to pay well in the increase of our membership.

Any member who has either criticism or new ideas for the advancement of this society can have the same brought before the Board of Directors promptly by sending them in writing to the secretary either at this meeting or any time during the year. There is no stop to the development of the Carnation; there can be none to this, its patron society, but we need the assistance of every member as well as the Board of Directors and other officers.

Respectfully submitted,

Albert M. Herr, *Secretary.*

Report of the Nomenclature Committee

There were registered during the year the following carnations: Mrs. W. L. Lewis, by W. L. Lewis, Marlboro, Mass.; Flambeau and Beatrice, by Baur & Smith, Indianapolis, Ind.; Variegated Lawson, by W. B. Arnold, Rockland, Mass.; Harvard Crimson, by F. A. Blake, Rochdale, Mass.; My Maryland, by H. Weber & Son, Oakland, Md.; White Enchantress, by L. E. Marquisee, Syracuse, N. Y.; Melody, by F. R. Thornton, Streator, Ill.; Victory, by Guttman & Weber, New York, N. Y.; Coral, Allspice, and Candace, by Indianapolis Flower & Plant Co., Indianapolis, Ind.; Maid of Honor, by W. A. Harkett, Dubuque, Ia.; Senator Crane, by Robert C. Pye, Nyack, N. Y.; Uncle Peter, by D. C. Noble, Columbia City, and.

There has been some complaint about the name Senator Crane from the members of this committee, lest it be confounded with the variety G. H. Crane. The secretary took this matter up with Mr. Pye and he replied that it was named because the flower was associated with the Crane family and that by the time it was likely to be introduced, the older variety Crane would no longer be grown, so he refused to change the name.

The variety Uncle Peter is similar in description to Melody and we hope at this show to have the two varieties together for comparison, the variety Melody having priority of registration.

(Signed) The Nomenclature Committee.

Papers Read before the American Carnation Society

CARNATION DISEASES

By Prof. Hasselbring, of the University of Chicago

With the extended cultivation and amelioration of the carnation, new diseases and disorders have made their appearance. Are these troubles the result of cultivation? Has the continued high culture predisposed the plants to certain forms of disease? What are the diseases that threaten the carnation to-day and how can they be prevented?

These are questions of ever-increasing importance to the florist. Their importance will increase with every extension of the cultivation of the carnation. In no other branch of horticulture is the investment and risk so great as in floriculture; no other branch of agriculture and all the related pursuits expend so large a proportion of the returns for labor. A failure means a corresponding loss. Every factor that is likely to cause failure should be thoroughly understood.

The whole question has received far from sufficient attention. Our experiment stations, while they have vastly furthered the interests of other branches of agriculture and horticulture, have left the whole field of florists' problems almost untouched. In this state (Illinois), containing the largest greenhouse industry in the world, our Experiment Station cannot legally take up any question relating to the culture of plants under glass. The florist must stand on his own feet.

In the absence of sufficient experimental investigation it will be possible to touch only the main features of the question of diseases, and point out the possible future of the carnation in relation to them.

In the main, the troubles with which the florist has to deal may be classed under three categories, insect enemies, physiological disorders, and fungous diseases. Fortunately, the carnation has but few insect enemies, and those are so well understood that I will not take up the time to speak of them. The others are not so well understood.

Physiological diseases result from the disturbances of the functions of a plant from any cause whatever. Less than three-quarters of a century ago it was the common view that all cultivated plants must be regarded as diseased because they were not growing under natural conditions. Therefore, their functions must be disturbed. We no longer follow this mode of thinking. There is no reason to believe that plants are weakened or impaired in vitality by continued cultivation. It is true that we cannot define what we mean by "vitality" in a plant, but if its vitality was impaired by continuous cultivation, we should finally expect it to die. This has not been our experience. Wheat has been in cultivation for thousands of years and the plants are more vigorous and give greater yields to-day than one thousand years ago. You will perhaps mention the "running out" of varieties. I do not think varieties have run out. They have been superceded by better ones and by comparison the older variety has appeared to "run out." We have no record but our judgment to show that any variety has "run out." It is true, certainly, that all plants vary under cultivation and the same seed pod may give some offsprings of a weak and some of a vigorous habit, but this is incident to cultivation and not caused thereby. The cause lies in the unknown factors governing the variation of plants.

As physiological troubles we may mention the "sleeping" of flowers, and bursting of the calyx. The cause of those troubles rests to a great extent in the nature of the variety, but to some extent also in outer conditions. The very fact that the calyx of certain varieties bursts with some growers, but not with others, shows that this trouble is greatly influenced by outer conditions and can be solved by experimentation. As yet, as I have said, these subjects have never been scientifically investigated. It is to be hoped that some time these questions will receive their proper share of attention by our Experiment Stations.

In considering fungous diseases we must keep in mind distinctly one thing: These diseases are caused by distinct parasitic organisms. A fungus is an individual organism just as much as the carnation plant is. It has a vegetative period and finally produces spores which again reproduce the same fungus. Its whole development can be followed with the same certainty with which the development of any plant can be followed from seed to maturity. Parasitic fungi live in the tissues of other plants, spreading in the same manner as roots in the soil. In this way fungi produce diseases by destroying the tissues of the plants upon which they feed.

Diseases of this nature are often attributed to some sort of unfavorable conditions, such as lack of ventilation, too much water, deep planting, and the like. This is an error. While certain conditions favor the growth of fungi and thus cause disease to appear more abundantly, it is nevertheless true that such diseases would not appear if the fungi were absent. The fungi are in every instance the prime cause of disease — not the conditions.

There are at the present time but two fungous diseases of the carnation which we need to discuss — the rust and the stem-rot.

The rust was a prevalent disease about ten years ago. At that time it was feared as the worst enemy of the carnation, as its frequent discussion in the horticultural literature of that time indicates. It still appears spasmodically here and there on some varieties, but it is no longer the dreaded enemy of the carnation. We will come back to the causes of this again.

The stem rot is a far more serious disease and one which will be difficult to control. It is caused by a fungus of the genus Fusarium. While the name of the fungus may not carry with it any special significance, we shall see presently that this is one of a great group of fungi which have received considerable attention of late, and that the study of this group has been the chief means of developing a new method for controlling diseases. These fungi are the causes of the now well-known "wilt diseases" of many plants. The wilt diseases of the cotton, cowpea, watermelon, flax, and aster, are caused by species of Fusarium. These diseases have been carefully investigated and from the knowledge gained from them we can fill out, tentatively at least, such points as are still unknown in the life of the carnation fusarium.

The stem rot, which is not primarily a rotting of the stem, but a wilt disease first manifests itself by a wilting of the leaves of some shoots. Very often only the leaves on one side of a shoot wilt, and in nearly all cases only a part of the plant is affected. This is more especially true during the early stages of the disease. It will frequently be found that the branches on one side of the plant are affected and sometimes only those arising low down on the main stem. The disease always progresses upward. The leaves on the affected branches soon die and turn to a pale color without dropping. The upper leaves on these branches may be wilted, but still grow until the whole branch finally dies. The calyx lobes or flower stems usually turn yellow at the tips before the upper leaves begin to die.

The root systems of these plants appear healthy externally *with the exception of one or two roots*. These are completely decayed, so that only a remnant of them is left. Yet if the diseased plants are carefully examined after the roots have been washed, these decayed roots can always be found. Here is evidence that the fungus has entered the plant from the soil through the roots.

The cause of the fungus in the plant and the reason for the peculiar damage it causes can be easily seen by cutting microscopical sections at different parts in the diseased stem and branches. The fungus grows from the infected roots into the water conducting channels of the stem and branches. When the disease is severe, these can be seen to be literally plugged up with a mass of the mycelium of the fungus. It is then impossible for the plant to obtain sufficient water, and wilting and death are the results. Sometimes the fungus invades only the ducts on one side of the stem and then the leaves and branches on this side wilt. Later when the plant is dying, the other tissues are also invaded, first the pith and then the cortex. The fungus produces innumerable spores on the dead stems and on the lower portions of the leaves.

So much for the effect of the fungus on the carnation plant. Questions of more practical importance are: How does this disease get into the carnation beds, and how can it be prevented?

The fusariums are a group of soil fungi. They are found nearly everywhere on decaying organic mater in the soil. I have been unable to collect evidence showing that the stem rot reappears in the same soil year after year, this being due to the fact that carnation growers change their soil annually. We know, however, that the plants are attacked from the soil and this in connection with the fact that the fusariums are found almost everywhere and can grow freely on dead matter in the soil, leaves scarcely any room for doubt that the soil is the source of infection. It has been definitely shown that the wilt fungus of the cotton, watermelon, cowpea, and flax remain indefinitely in soils once infected. In fact, it has been found impossible to eradicate them. The same is probably true for the carnation wilt or stem-rot.

The most important question is, how to prevent the disease? Since it remains in the soil it is beyond the reach of the usual fungicides. It attacks the plants beneath the soil so that direct preventive measures are practically excluded. What hope have we, then, of ever controlling the disease? I think the solution of the question will come from a study of varieties. If we look over the different varieties now generally cultivated, we find that some are badly affected, others less, and some seem not to suffer from the disease at all. It is somewhat difficult to collect exact data on this, but it seems to be everywhere conceded that such varieties as Crane, Morning Glory, and Flora Hill are most subject to the disease; many growers have thrown these varieties out entirely. Flamingo and Apollo and White Cloud seem to suffer as much as those just mentioned. On the other hand, many varieties seem to be free from the disease. These are especially the strong growing varieties, such as Harlowarden, Enchantress, those of the Lawson type and Lady Bountiful. I have seen America planted where Crane died of stem rot, yet the former variety was not affected. Some varieties seem to outgrow the disease even when affected. This seems to be true of Bradt and Lord. These observations are as yet of limited extent, but they point to one conclusion. Some varieties of carnations are immune from stem-rot. The problem for the future will be the production and selection of immune varieties. It should be the aim of the originator to produce resistant varieties, and only such varieties should be put upon the market. This plan is not impossible, for it has been successfully followed in the case of cotton. Through the work of the Department of Agriculture several varieties of cotton have been produced which are resistant to the wilt. Those can be planted in infected fields, where other varieties have been exterminated, without being attacked by the disease. I am convinced that we have a similar example in the carnation rust. Almost imperceptibly the discussion of this disease has dropped from horticultural literature. Why? If we examine the older catalogues we find many varieties advertised as "rust proof." Those may or may not have proved as represented, but the fact shows the tendency of the time to produce rust-proof carnations. Only the varieties that actually proved rust proof finally were extensively cultivated, and to-day the rust has practically disappeared from our greenhouses I have no doubt that we will have a similar experience with the carnation stem rot. We have already indications of the lines to follow, and experience has shown that they can be followed successfully.

EXHIBITION CARNATIONS

By Fred. Lemon, of Richmond, Ind.

In approaching the subject of "Exhibition Carnations," the first inclination is to seek a definition for the term. What are exhibition carnations, and who are the growers of exhibition carnations?

When we speak of exhibition chrysanthemums there immediately arises up before us a vision of immense reflexing or incurving Japanese blooms of various shades of color, some light, some dark, some gaudy, some dull, all beautiful, but scarcely any practicable for the purely commercial grower. We find these in the hands of a special class of growers: First, the large growers, importers and introducers of new chrysanthemums, whose aim in exhibiting the marvelous creations of the hybridizer is to arouse the interest of prospective buyers. Second, the private gardener, that true horticultural enthusiast, whose time and skill is devoted to perfecting the magnificent blooms, mainly to satisfy a love of the beautiful in nature. When we turn to the carnation, however, and examine the exhibition and the exhibitor, we find a magnificently large collection of the very same varieties which are daily seen by thousands in the wholesale houses of the country, — flowers a little better than the best in the market, perhaps, (because more carefully handled), and exhibited by the very men whose vast ranges supply the markets. Thus is the carnation distinctively the business man's flower and an exhibition of carnations a most practical demonstration of what can be accomplished by care and attention in growing flowers for the market.

A consideration, therefore, of the subject now before us, must of necessity encroach to a certain extent upon the daily task of cutting, packing, and shipping carnations, because the very methods which result in putting flowers into the market in the best possible condition, must form a foundation for our plans and methods of putting our blooms into the Exhibition Hall in perfect condition.

Granted, then, that we have flowers which we think are good enough to exhibit (and we might say right here that they must be *rather* good in this day and age), the first question is the selection of blooms, and time and method of cutting. Just here a study of the scale of points for judging will be of great benefit. This shows us that color must be the first consideration, with stem and size counted equally for second place. Great care should be used to obtain a very evenly-colored lot of blooms even at the expense of other points. With this end in view, it is best when possible, to cut all the flowers for one class about the same time, for there will surely be variations in color if some of the blooms have been kept in water sixty hours, and some only six hours.

Use a sharp knife to cut the blooms, and take every inch of stem you can get without going into the hard wood. The proper condition of a bloom to be cut for exhibition, depends largely upon the variety, but may be generally stated as — *just before that bloom reaches a state of perfection.* Here is where the judgment of the operator is put to the test, here the point where many prizes are lost. Such a variety as Enchantress, for instance, is in perfection when the flower is young, and failure greets the man who allows his Enchantress to develop too fully before cutting, while

that erstwhile grand variety, Flora Hill, only reached a state of perfection for exhibition after having stood upon the plants for many days and being allowed to develop very fully before cutting.

Between these two extremes are many gradations, and as before stated, must call upon the best judgment and broadest experience at command.

In cutting for exhibition, cut each class complete and keep that class to itself from this time until it is staged, only changing blooms to strengthen the class you are most desirous of winning.

Blooms should not lie out of water long after cutting, and it is a good plan to make a fresh cut on the stems after you reach the storing-room and before putting them into water.

Much has been written on the subject of a storing-room for blooms, but I believe that any room or cellar which meets the following requirements will be satisfactory: The air must be kept pure and sweet, and moderately dry, though a little continuously evaporating moisture is not injurious. It must not be totally dark. The temperature must be kept a few degrees lower than the night temperature of your greenhouse. In such a place the flowers should stand at least 6 hours, and may stand several days, before packing. When kept more than 24 hours, the water should be freshened, and the stems re-cut every morning.

In handling blooms at all stages, — especially with varieties of intense color, such as Adonis, — great care should be exercised to avoid bruising. This is a matter of great importance, as varieties of high color are especially easily bruised immediately after cutting, and if blooms are laid down on a rough board or cement bench, or carelessly knocked together while carrying from the house to the cooling-room, they will surely show the effect later, and on the observance of these minor points often hangs success.

All flowers which have an inclination to droop or hang their heads in the slightest degree, should be supported in a rigidly upright position. There are several methods of accomplishing this end. A wire ring like an ordinary carnation support may be attached to the jar in such a manner that it will act as a support for the blooms, and some people go to the trouble of tieing a wire to each stem.

Whatever method is used, they must be supported from the very time they are cut, for the first two or three hours in water is the time when most of the stiffening and hardening takes place, and if the stems harden in a bent or curved position, subsequent supporting will be useless.

Like all other essential steps in the task of placing blooms in the Exhibition Hall, packing the blooms for shipment is an operation of the utmost importance. The aim being to get the blooms through in the most perfect condition, any extra attention which can be given to this work is certainly time well spent. The most important point is to prevent the blooms from becoming crushed or mashed out of shape. This should be very carefully avoided, for if the broad bottom or ray petals become bent or pressed down, it is almost certain that they will not regain their proper form when set up for exhibition.

One of the simplest methods of accomplishing this end and one that is fairly efficacious, is to place the blooms upon pillows, or small rolls of paper as long as the width of the box, and about 1½ inches thick.

A more thorough method is to cut circular pasteboard discs, the size of the blooms, with a hole in the center, large enough to slip over the stem and calyx, so that the disc will press against the back of the flower, holding the ray petals in a perfectly horizontal position. These must be used in connection with the pillows, and they keep the blooms in perfect shape ; indeed, in many cases improving the form of irregular blooms.

As to packing the blooms, there are as many different methods as there are exhibitors. If the shipment is a long one, we have found it a good plan to lay the ends of the stems upon wet tissue paper, and place a layer of wet tissue over every layer of stems, so that the ends of the stems, freshly re-cut, are all surrounded by moisture. The flowers should be packed with their heads all one way, and a cleat pressed firmly down near the lower end of the stems every fifth or sixth row.

For our mid-winter shows, very thick lining of boxes is necessary, so some expedient must be adopted to prevent the heavy layers of paper, which are turned over the top, from resting on the blooms, as this will certainly press them out of shape.

If there are several boxes, it is a good plan to mark the contents by classes on the outside of each.

If the discussion of this paper brings out a recipe for the safe and expeditious handling of the boxes by the express companies the writer will be devoutly thankful. The only rule we know is, "Give your boxes to the Company and join the 'Don't worry Club.'"

If your exhibit is small, however, an excellent method is to buy a cheap trunk, make three trays to fit in it, pack your flowers very firmly, fill your upper vest pocket with cigars with bands around them, your lower pockets with quarters, and take it through as baggage. If you use this method, you must not expect to "experunce the comforts of thravel" (to quote Mr. Dooley), because it is necessary to follow the example of the elephant and stay close to your trunk.

Now, do not think because your blooms are fine, have been well packed, and have arrived in time, that the prize is won. It is impossible to overestimate the value of staging the blooms properly. It is safe to assert that where there are a number of entries of almost equal merit, the blooms which are most perfectly staged have five points advantage. This is mainly the result of "first impression on the judges."

Judges are human, and the most impartial man in the world cannot possibly avoid being influenced, to a certain extent, by his first impression, formed unconsciously the very instant his eyes take in the various entries.

The standard for an artistic parlor arrangement will not fit the exhibition. The aim here is to show every bloom in such a manner that it will emphasize the salient points of the scale for judging.

The blooms should be arranged evenly, if possible, not allowing any bloom to touch its neighbor. Every inch of stem possible should show above the vase and the stems should be held very tightly at the bottom, in order to spread the blooms properly.

It is frequently a good plan to use a smaller vase than the one supplied for the class, to accomplish this end.

When you begin unpacking, make a fresh cut on the ends of the stems as they are taken from the box, give the bloom a gentle downward rub with the hand to overcome any slight sleepy appearance, and lay them down on the table spread out so that each bloom may be examined. When one class is unpacked, carefully select and count out the exact number of blooms required for the class; keep the scale of points in mind, — evenness of color first, stem second, and size a close third. In arranging the blooms, select the longest stems first, take them up, one at a time, and hold them by the extreme end of the stem, with the flower hanging down. Use the longest, strongest, and straightest stems for a central bunch, placing the blooms exactly even. Work the blooms around this central bunch in circles (if that expression may be used), turning the bunch in the hand, and adding blooms equally on all sides. Place the outer rows of blooms so that they will stand a little lower than the central bunch. When complete place the whole bunch in a vase that will hold the stems as tightly as they have been held by the hand, and do not shove them too far down.

After the blooms are arranged, a study of color effect in placing the vase is important. A light scarlet carnation may be fine, and deserve to win, but if placed next to a variety the color of Adonis, it will lose much of its effectiveness.

Fundamentally, of course, intrinsic

merit in the flowers themselves should win, but deep down in the heart of the florist who becomes the judge, is the artistic instinct which will not be denied, and in this day of close competition, a recognition of this fact, if combined with high grade stock, will aid materially in reaching the goal, — first place against strong competition.

In summing up the points to be considered, one rule may be deduced, "If you want to win, nothing is too much trouble."

CUTTING, PACKING AND SHIPPING CARNATIONS

By C. L. Washburn, of Chicago

The development of the shipping business has been the cause of the remarkable increase in the growing of carnations in this market. Ten years ago a very few of the blooms then being grown would do to ship, while the quantity grown was not over ten or twenty per cent of the present output. The demand from outside points was very heavy and the problem to solve was how to ship the carnations so they would arrive in good condition. This brought a close study of the methods of handling the flowers and also the constant trial of new varieties. As soon as the growers began to improve their stock and their system of handling the flowers, there was an immense increase in the demand for the goods. This vast increase has taken place mostly in the last six or seven years, and every year has shown a larger amount of carnations planted and handled than the previous year. It is now almost impossible to get the exact amount of carnation blooms received each season, but a conservative opinion would place the number at about fifty thousand blooms per day during October and November, and then a gradual increase to one hundred thousand per day by midwinter, and continued at this rate to the end of the season. At least seventy-five or eighty per cent of this amount is shipped away from the city, and in the ability to deliver these flowers at their destination in first-class condition lies the successful conduct of the business.

The manner of handling these blooms as adopted by most of the larger growers is as follows:

The cutting of the flowers must be attended to with considerable judgment as regards the weather. If the weather is very cold the flower should be allowed to open a little more than usual, as if cut too close in very cold weather they soon go to sleep. Again, if there is a warm wave with lots of moisture in the atmosphere, the flowers will be soft, and must be cut pretty close; also, during these warm spells the flowers should be kept in a little cooler temperature than usual to make the blooms as firm as possible. After the flowers are cut and tied in bunches of twenty-five each, they should be placed in water as soon as possible. This is best accomplished by having pails of fresh water standing handy to the benches, so that as soon as a bunch is tied up it can be placed in the water at once, This is very necessary, as it helps prolong the life of the flower. If the blooms are left out of water until the cutting is all finished, a number of them will have wilted a little and the sap in the stem harden up to such an extent that the flower will not suck up water freely.

After the cutting and bunching is finished, the flowers should be placed in water in a closet or room where the temperature remains steady at about fifty-five degrees, and where no drafts of air will strike them. When packing to send them to the commission man or wholesale store, use a few sheets of newspaper between each layer of bunches, and keep the ends of the stems from touching any of the flowers. Two layers of bunches are enough to put in any package, as too many heads get broken when packed in too solid. The wholesale or commission house should put the flowers in water as soon as received.

Now for short distances, where the flowers can be shipped on trains that will arrive early enough for the flowers to be delivered that same day, the stock sent is usually that cut the night before; but for flowers that will have to remain packed in the boxes over night, and for all long-distance shipments, the stock taken is always cut in the morning, and after standing in water from three to six hours, is sent in to the market and shipped away the same day. The old idea that a carnation keeps best if allowed to stand in water twelve to twenty-four hours before sending into market has been disproved by actual experience, and of the carnation blooms received by the wholesale growers, at least two-thirds the stock is cut in the morning and shipped in to their wholesale stores in the early afternoon to send away the same day. These flowers will arrive in better shape and last longer every time than if cut the day before.

After carnations have been kept eighteen or twenty hours in water, they seem to get kind of soggy and do not ship well.

The boxes used for shipping carnations are made of thin wood, half-inch ends and quarter-inch tops, bottoms and sides, with two half-inch cleats to fasten the stems down and hold the ice securely. These boxes are usually twelve inches wide and four to eight inches deep, and thirty-six to forty-six inches long. The boxes may appear too long at first, but they are better too long than too short. Line the boxes first with four to eight thicknesses of newspapers, depending on the weather. Then a single thickness of soft wax paper all around. Commence and put in a row of carnations, usually about six flowers to a row, and between each row of heads place a strip of wax paper about three inches wide and as long as the box is wide; about four rows of flowers in each end will constitute a layer, and between each layer place a sheet of wax paper the width of the box and long enough to cover all the heads in that layer; keep on until the box is completed.

It will be found that with the extra long stems now being grown, that four or five rows in each end of the box will be all that can be put in a layer, as by that time the stems will be within six inches of the opposite row of flower heads. The number of layers of flowers should not go over four or six, which will allow of from two hundred to three hundred carnations in one box. In the center of the box where the stems meet there should be placed at least eight or ten thicknesses of well saturated newspaper. These newspapers should be kept in a pail of water so that they will have absorbed all the water they possibly can before being placed on the stems. After putting this wet paper on the stems, place the two cleats on and fasten them down securely with nails. Be careful in placing the cleats to put them only on the double rows of stems and not beyond, and also see there is plenty of wet newspapers under them, so there will be no danger of breaking the stems by pushing the cleats too far down.

The subject of icing a box is a debatable point, but for long distance shipments our experience is that a small piece of ice well wrapped with newspapers helps to preserve the flowers from heat; and also keep the newspapers over the stems moist. For varieties that have brittle stems, like Lawson, care must be taken not to fasten the cleats down too tight, or too near the neck of the flower, or the stems will be broken in handling the package. It is also well to put a few sheets of tissue paper well crumpled up between the cleats and the flower heads. This will absorb any damp, cold air from the ice, and will also serve as a cushion to protect the flowers from shaking up and down in the box by rough handling.

In order to dispose of our product to advantage, it is absolutely necessary to continue to improve our methods of handling carnations intended for shipment. They must be grown stronger,

more air given, and great care taken in feeding. The effect of the warm, spring rains must be overcome in some way, as during such periods it is almost impossible to ship carnations any distance and not have them arrive fast asleep.

All the little details of cutting, placing in water and shipping, should be attended to with the greatest fidelity, and as we improve our methods of handling and our varieties of stock, so shall we increase our volume of business. The advisability of devoting a certain amount of glass to growing plants for spring and early summer blooming is a point that should be considered. There are some varieties that are at their best during these periods, and there is no doubt that carnations always ship best when in full crop. If the creators of new varieties would give more attention to the keeping and shipping qualities of their new flowers instead of trying to increase the size so much, they would be working along lines that are susceptible of considerable improvement. No matter how large a flower, or how fragrant or brilliantly colored it is, if it will not keep well and ship well it cannot be grown extensively. The immense number of railroads centering here and reaching out in every direction, with frequent trains and quick express service, gives us a field to be supplied that reaches as far east as New York State, Pennsylvania, and south to Florida, New Orleans, Galveston, and various Texas points, while west we can reach all Colorado towns and some points in Montana, and then on north to Winnepeg. This vast scope of country makes Chicago the central flower market of the United States, and has built up the immense greenhouse business of this vicinity.

Report of the Judges

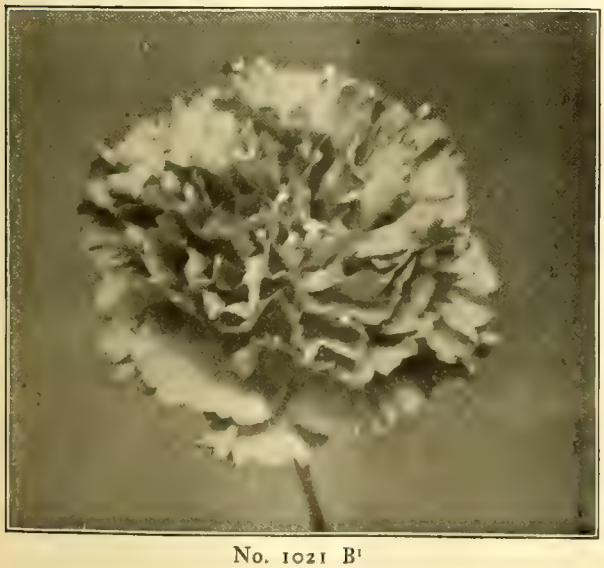
Mikado



Senator Crane

Afterglow

J.. A. Valentine

No. 1021 B[1]

The Aristocrat

Patten's Mikado

(See previous page)

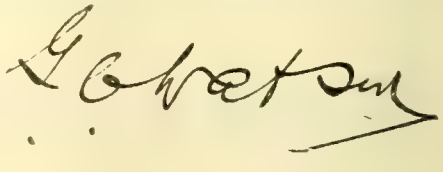
This sensational carnation which scored 88 points and was awarded a certificate at Chicago, is a cross between Prosperity and Gov. Roosevelt. Its general make-up resembles Prosperity, but the Roosevelt influence is seen in both habit and color-shading.

Carnation Senator Crane

(See previous page)

Senator Crane carnation was originated by Edward Dolby, gardener to Zenas Crane, Esq., Dalton, Mass. The flowers are a pleasing light pink shade, with a strong fragrance, making it with its other good qualities a variety of sterling merit. The accompanying illustrations are nearly life size, the flowers photographed measuring 3¾ inches in diameter. It is in its third year. Stock will be worked up and disseminated by Robert C. Pye, Nyack, N. Y.

A Quartette of Witterstaetter Seedlings



(See previous page)

Arriving with his exhibits too late for judging, the genial carnationist from Sedamsville does not figure in the prize lists of the Chicago carnation show of last week. But the country is always interested in what Mr. Witterstaetter is doing, and so we present herewith photographs of four of his most approved seedlings.

J. A. Valentine is a nice flower named after a nice man. It is of a pleasing Daybreak shade of pink, flowers 3 to 3½ inches in diameter. 1021B′ is a 3½- to 4-inch flower on the order of Fiancee. Afterglow is of a color between Fiancee and Lawson, with remarkably long and stiff stems. The Aristocrat is cerise, overlaid scarlet, and is classed by its raiser as a greatly improved Lawson in every way.

Blue-Blooded Carnations

According to the testimony of William C. Smith, who has a large range of greenhouses mostly devoted to growing carnations at 61st and Market Sts., Philadelphia, Enchantress is the best market variety at the present time; best grower, best bloomer, best seller, and brings the best price. Mr. Smith thinks Peter Fisher is the greatest man in the carnation world to-day, not only because he originated Lawson and other good ones, but also because he has never yet sent out a bad one. An enviable record truly, and we believe well merited. Fisher succeeded in developing new blood and a new standard for the divine flower, and his unbroken series of successes testify to the remarkable merit of his methods of crossing and selection. Mr. Smith places Mrs. M. A. Patten next to Enchantress as a moneymaker. Vesper is his best white. He grows Flora Hill, Bride, and other whites, but they do not come up to the Vesper standard. Lawson he places fourth on the list if it is planted early. It must be planted early to show up at its best. If planted late it does not develop stem enough until after Christmas. The Nelson Fisher beats the Lawson if planted late. Flamingo he considers the best scarlet we have; good form, good substance, and very free; good stem also, and it does not burst. Estelle is a good red, stem stiff enough but too short, and doesn't bring the price. Take it all in all, however, it is a pretty good pink. Prosperity is too shy, but thinks it is improving, as it has done better for him this year than ever before; bloomed earlier, and brought better price. Mrs. E. A. Nelson wants high feeding to do its best. Three inches of cow manure as mulch is none too much. Will stand more high feeding than any other variety; in fact, demands it before it will produce good stems. Flora Hill good only for funeral work. Not in it with Vesper and other blue-bloods.

Echoes from England

ORNAMENTAL TOBACCO PLANTS

During recent years no hardy plant has attracted so much attention as the new Nicotiana Sanderæ, a strong growing tobacco bearing a profusion of rich pink flowers. It was seen in this country by the public for the first time at the great Temple show in 1903, and every one was delighted with it. Seeds now can be obtained at 1/ per packet and it will doubtless have a tremendous sale this spring. Nicotiana Sanderæ is of hybrid origin; it is the result of crossing N. alata (affinis) with N. Forgetiana. The latter was discovered in Brazil about four years ago by M. Forget, a collector sent over by Messrs. Sander and Sons, St. Albans. There seems little doubt that this new tobacco will figure largely in English gardens, for it is said to be equally useful for outdoors as for the conservatory. It has the additional advantage of producing seeds freely and of coming true from seed. Messrs. Sander and Sons have raised some other hybrid forms of beautiful coloring, purple, rose, white, crimson, carmine: these, however, will not be put into commerce until next season (1905–1906). Nicotiana Sanderæ is undoubtedly one of the most beautiful hardy annuals ever introduced. The average height of a plant is three feet; some of the flowers are two and one-half inches across.

VISITORS TO KEW

It may be of some interest to your readers, as showing how Londoners appreciate their chief Botanic Garden, to give the number of visitors in 1903, which is the highest recorded during the last seven years, with the exception of 1901. In 1903 no less than 1,352,548 persons visited the Royal Gardens. The greatest number on any one day was 73,566 (June 1), and the smallest 116 (June 19). It is curious that the two extremes should have occurred so close together; it is probably the first time the minimum has occurred in June. During the decade ended December 31, 1903, the number of ordidary visitors to the gardens was nearly thirteen and a quarter millions. Besides these the gardens have been visited annually by thousands of botanists, gardeners, artists, etc., before the time of public opening. The large increase in the number of visitors is doubtless due to the fact that not only is Kew a unique botanical garden, but it is also a most beautiful and interesting one. The man who has a love for flowers but knows nothing about them appreciates Kew just as much as the expert. And that is just where many botanic gardens fail. If they are public gardens then I think they should be made attractive, for this can be done most successfully, as proved at Kew, without in any way detracting from their value as botanical and teaching institutions.

PROGRESS OF GARDENING

Gardening has made rapid progress in public favor during the last few years in this country; it is most clearly shown in the extraordinary increased list of members of the Royal Horticultural Society. During 1904 alone no less than 1,383 new members joined. At the last meeting held in December, forty-two were elected. During 1905 the Royal Horticultural Society will hold twenty-five exhibitions, most of them in their new hall, which was opened last year by King Edward. The estimated cost of this hall is £40,000, and a good deal, some £3,000, has still to be paid off. Minor provincial gardening societies have increased throughout the country, and some of them have a large membership. The Royal Horticultural Society has done, and is still doing, a valuable work in encouraging gardening in this country. During the London season its meetings and exhibitions are thronged by prominent members of the aristocracy.

A YELLOW BERRIED COTONEASTER

This is quite a new plant; it was shown in this country for the first time in December at a meeting of the Royal Horticultural Society. It then received a first-class certificate. The remarkable point about it is that it has clear orange-yellow berries, while all other cotoneasters in cultivation have berries of some shade of red. It thus introduces a distinct feature in one of our most useful hardy-berried shrubs, and should prove most valuable for lawn and shrubbery planting. We are indebted for its introduction to M. Maurice de Vilmorin, Paris. It was collected in China by French missionaries, who sent seed of it to M. Vilmorin; the latter raised and fruited it in his garden at Les Barres. It was shown in London for M. Vilmorin by Mr. George Paul of Cheshunt. In general appearance (save that of color) the fruit resembles that of C. Lelandii. Plants can be obtained from M. Léon Chenault, Orléans, France, or from Messrs. Robert Veitch & Sons, Exeter, England. This is perhaps the most distinct and generally useful hardy shrub that has been introduced for some time. We have had a good many new plants from China during the past few years, and we may confidently look forward to receiving others equally as valuable from that, as yet, only partially explored country.

BEST WINTER FLOWERING BEGONIAS

Winter flowering begonias are largely grown and much valued here, and rightly so, for they keep our houses bright with blossom when there is little else to have: they take up the running after the chrysanthemum is over and fill the gap splendidly. Begonia Gloire de Lorraine is still the most useful one. Turnford Hall is almost a white-flowered counterpart of the popular Lorraine. Messrs. James Veitch & Sons, Ltd., Chelsea, have raised some charming winter begonias, remarkable for their large flowers of rich and distinct coloring as well as for their profuse blooming. Among the best are Winter Cheer, Ensign, Winter Perfection, Julius and Mrs. Heal; all these are of clear shades of red or pink.

THE BEST MARKET CHRYSANTHEMUMS

It is a truism that if you want the best varieties of any flowers you must find out what the market man grows. He does not grow them unless they are really good, the colors clear and decided, and the blossoms freely produced. This is particularly true of chrysanthemums; no flower perhaps has so many varieties of "washy," undecided coloring, such as rose-pink, blush-pink, rose-red, etc. The market man discards these and grows those of self-coloring or of some decided tint. I shall not be far wrong if I say that the most popular chrysanthemum in England is Tuxedo. In this bronze and yellow blend so charmingly that they have captivated the public. The National Chrysanthemum Society held an exhibition a few weeks ago for market chrysanthemums only, and Tuxedo was quite the most popular sort shown there, winning numerous prizes. You may be interested to learn that the best white among chrysanthemums grown for market was Mdlle. Therese Pankcoucke: the best pink, Mme. Felix Perrin (Framfield Pink); the finest crimson, Violet Lady Beaumont, and Reiman the best yellow. Here you may be said to have the pick of our market chrysanthemums.

Harry H. Thomas

Formal Bedding at Girard College, Philadelphia

The formal bedding in front of Girard College, as seen in the photograph, has for many years been one of the "show" features of Philadelphia. Thousands every year visit this institution, which Stephen Girard willed to clothe, feed, and educate fatherless boys, and incidentally the brilliant coloring of the plant bedding is taken in and enjoyed.

The late highly respected George Huster, who for thirty-two years was at the head of the horticultural department at Girard College, developed this class of gardening until it is difficult to improve upon. The only opportunities remaining are in color combinations and variations in the designs of the two center round beds of the divided circular plot in front of the main building.

The two long beds on each side of the walk leading from the entrance to the main building were planted the past season with John Thorpe's S. A. Nutt zonal pelargonium, edged with Abutilon Savitzii, and the ribbon borders encircling these beds were planted with the maroon coleus, Verschæffeltii, and the yellow, Golden Bedder. The "black and white" picture does not show without looking closely where the maroon commences and the yellow ends; each color was "solid" in the spaces each occupied, from corners to corners. This was an innovation, and was pronounced very effective.

The four oval beds immediately adjoining the ribbon borders were planted with geranium John Doyle, edged with Madame Salleroi. The four beds next to the red geraniums (botanically zonal pelargoniums) were crotons (codiæums) Baron Rothschild, edged with the yellow variegated leaved Weismanii. Geranium beds alternate with the crotons around the circle. There were four beds of pink and two of white. La Favorite was the double white. The pinks in the photograph look as though they were white. The pink varieties were Jean Viaud, Mary Deering (now discarded), and what we call here Gloriaux, the latter proving to be by far the most satisfactory. It is a dwarf, short-jointed grower, and in color a pleasing light-rose pink. The trusses are not large, but numerous, and there is a persistency about the flowers that defies wind and rain, the petals drying up instead of dropping off. All the geranium beds were edged with Madame Salleroi, but we found it on the whole somewhat unsatisfactory, being uneven in its growth.

We had on trial on a small scale last summer a plant that would be commonly called one of the "dusty miller" family, and which was labelled Artimesia stelleriana. Experts among our visitors have pronounced the name incorrect, but were unable to produce any other, so that its real name is still in

doubt. We are so well impressed with it that we expect to have enough to use as an edging for all the oval geranium beds next summer.

Abutilon Savitzii was so very satisfactory that we have raised sufficient stock to use it quite plentifully in 1905. It is easily controlled by pinching, or it can be allowed to grow and be large enough for beds of cannas. We may use it as an edging for croton beds, believing the contrast will be both pronounced and pleasing.

The varieties of crotons we have found the most satisfactory, in addition to those mentioned, are Queen Victoria, Sunshine, Czar Alexander III., Faciatum, Dayspring, Andreanum, Ovalifolium, Langii, Hawkerii, and a few others. With few exceptions crotons do well generally with us. Those the most distinctive and effective are used in quantity. Personally I like Faciatum better than Andreanum; the pink tinge of coloring in the latter detracts somewhat from its effectiveness, yet the latter is a little the best doer.

Crotons ought to be more used for outdoor bedding than they are. In the vicinity of Philadelphia, if thrifty plants are set out in rich, light soil the first week in June and planted so as to give an immediate effect — provided the nights are warm enough (65° to 70°) and no cutting winds — they ought to give satisfaction. Our cuttings that will be used next summer have now (early January) been in the sand about two weeks in a night temperature of 75°, are rooting nicely and will be ready for potting within the next few days.

In the two center beds as seen in the illustration, carpet bedding is carried out. The designs, as will be seen, are not very intricate. A single flowered dahlia suggested the one herewith with some deviations. The plants used are those in use generally for such purposes, as alternantheras aurea nana, brilliantissima and Prospect Park; Echeverias secunda and secunda glauca, also a few metallica and sanguinea; Iresine Lindenii, Kleinea and Cotyledon, with crotons in center edged with Abutilon Savitzii. There were over fifteen thousand plants in those two beds. Each of the oval beds, both geraniums and crotons, takes about two hundred and fifty plants. In the long geranium beds there were fifteen hundred plants edged with seven hundred and fifty Abutilon Savitzii and fifteen hundred coleus for the ribbon borders.

EDWIN LONSDALE.

Hardy Grape-Growing

The accompanying photograph is of a vine of the same variety as was published in HORTICULTURE December 24, and although that represented a remarkable cluster to be grown in open ground, this photograph clearly demonstrates that it was not an exceptional one Fine clusters, uniform in size and lots of them, is a characteristic of the variety. These communications and illustrations are intended to awaken an interest in grape-growing in New England. There are many reasons why such an interest should prevail. It is a very pleasant occupation and can be made profitable. It can be started with but small outlay and continued at trifling expense. Any land that will grow and ripen a good crop of corn, will grow and mature a good crop of grapes that would be far more profitable. A farmer in New York last year raised on three acres of ground, nine tons of grapes and sold them for $80 per ton. Not every one can do that, but quite a small fraction of that amount would make a good income from three acres of ground.

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

If you have orders to give for any flowers, plants, or horticultural material of any kind, do not fail to give HORTICULTURE'S advertisers a chance. The best houses are represented in our advertising columns.

Advance orders already in the hands of importers of ornamental nursery stock indicate that the spring demand for such material will be heavy. It would not be surprising if the 1905 business in this line should be the largest on record for this country.

Observant forecasters are predicting an early spring for 1905. An early spring worthy of the name has not been experienced in Boston, at least, for many years. There have been on several occasions periods of abnormally early spring weather, which forced trees and shrubs into growth and flower only to blight them later on with an extra dose of winter frigidity. We'd rather not have an early spring, if it must be of that kind.

We note that the carnation enthusiasts are beginning to talk about six-inch flowers as a probability of the future. With due respect to this very laudable ambition, would it not be well to pause a while in the effort for bigness and seek to develop a race of good "keepers," with thick, hard-substanced petals that, once opened, will stay so. The same intelligent persistence that conquered the rust and other menacing ills of a decade ago will go far towards eliminating the sleepy carnation.

The Newport Horticultural Society has taken a most important step towards assured prosperity for the future, in establishing a building fund. A building in the business section, such as is proposed, with offices and stores to rent and commodious halls where exhibitions and meetings may be held and which may be rented for other gatherings, cannot fail of being a profitable investment. It was through this means, under wise judgment and foresight that, more than anything else, gave the Massachusetts Horticultural Society its enormous financial strength.

The elm-leaf beetle appears to have been pretty well exterminated in Eastern New England. Let us hope that the passing of this disgusting pest is permanent and that the most beautiful and best-loved of all American trees may hereafter be left free to adorn the New England landscape without an enemy to molest it. The exact cause of the disappearance is not fully known, but it is fair to give much credit therefor to the activity of the park authorities and tree wardens of the menaced communities, who put up an unrelenting fight all along the line.

A subscriber tells us of the pleasure he derives from passing HORTICULTURE around among his friends after having read it himself. This is the right spirit, for every issue of this journal contains a wealth of information presented by practical men in a useful and dignified form, and its dissemination means better horticulture and better horticulturists. So, he who induces a perusal of its columns serves his friends and the cause well. He does the paper a distinct service, also, for every new reader added to the list widens its influence and strengthens it for future usefulness.

Boston has been selected as the next meeting-place of the American Carnation Society. It was in 1895 that this organization met in Boston, under the leadership of president Eugene Dailledouze. The ever-genial Albert M. Herr was elected secretary at that meeting and has remained in unmolested possession thereof ever since. It is interesting to note that President Dailledouze advocated a plan of sectional judges to examine and report on new varieties such as is now recommended by his successor. The project was warmly commended by all the speakers at the time, yet after ten years, it stands just where it did. Among the varieties certificated at Boston in 1895, were Maud Dean, Lena Saling, Dean Hole, Storm King, Meteor, Armazindy, Triumph, and Della Fox. Among winners of the leading prizes were Alaska, Jubilee, William Scott, Tidal Wave, Buttercup, and Minnie Cook. Eldorado was a novelty and Helen Keller won the $25 special premium.

What They Say of Us

"The love of praise, howe'er conceaied by art
Reigns more or less, and glows in every heart."

I am glad that I started with the first copy. I enjoy reading it very much. — C. A. M.

I must say that I am well pleased with the appearance of HORTICULTURE and glad to say that I was a subscriber so as to receive the first copy, as I intend to keep them all. — J. T.

After Adjournment

It must have been the "office cat" that slipped that plate of Boston Horticultural Hall in an unfinished state into the forms last week. The hall itself is all right, though. Come and see it in its dress of roses next March.

Said a returned sojourner from the Carnation Annual Convention: — "Chicago — great town! Five million fancy ferns are nothing to the Chicago man in half the season. Good show and good attendance; no storm like what you had east of the Alleghenies. Fiancee showed up good; fine color, fine stem, and very large. Weber's Maryland has all the ear-marks of a winner among the whites. Robert Craig and Victory were very noticeable among the scarlets. Hospitality was the order of the day. Music, oratory, feasting, all of the highest quality. Mr. Miller, originator of the Timothy Eaton, made a hit with his little speech. Miller's all right, even if he is a Canadian.

SECRET OF SUCCESS

"What is the secret of success?" asked the Sphinx.

"Push," said the Button.

"Never be led," said the Pencil.

"Take pains," said the Window.

"Always keep cool," said the Ice.

"Be up to date," said the Calendar.

"Never lose your head," said the Barrel.

"Make light of everything," said the Fire.

"Do a driving business," said the Hammer.

"Aspire to greater things," said the Nutmeg.

"Be sharp in all your dealings," said the Knife.

"Find a good thing and stick to it," said the Glue.

"Do the work you are suited for," said the Chimney. — *Baltimore Sun.*

"Don't go to sleep," said the Carnation.

"Stay with the bunch," said the Violet.

"Keep a-climbing," said the Sweet Pea.

"Avoid tobacco," said the Greenfly.

"Hang on," said the Orchid.

The Book of Job

"Oh! that mine enemy would write a book!" said Job. Then Job could have got after him (the enemy), for, as the old song says,

"It takes time to learn every trade,
But critics, they are ready-made."

That's how I felt when I received the following letter from a dear friend. Its main point is based on the printer substituting "The" for "Mr." in a former manuscript, but there is so much wisdom, poetry, and philosophy dished up incidentally, that I am willing to be grilled for my reader's amusement.

MY DEAR GEORGE: —

"The Critic" has passed judgment of the severest kind upon your articles in this week's HORTICULTURE. There is "no hinge nor hook to hang a doubt on." You do not horticulture the English language to his satisfaction. To his mind the phraseology of your composition is like a garden barren of mystical charm. The mysterious lines that you put into your design scrape the polish off imagination. Ye gods! how can one man be the prototype of seven men (even though that man be a Stroud)? No, never; no more than one garden can be the prototype of several gardens. Fie, fie! get to work; take admonition from the book of Common Prayer and "read, mark, learn, and inwardly digest" the art of using words. Words are things that can be cultivated and watered by the dew of thought; you will find in their garden a glorious wealth of beautiful flowers suited to every purpose of the fancy, delicately humored and applied that each may be native to its place; the result will be an ideal of beautiful phraseology. "A fool must now and then be right by chance," but take no chances, be upright in all things and especially in the use of words. Do not even tread the borderland of mystery; there you are sure to get lost, for you draw a line between the mystical and mysterious that you can never cross; it is of too delicate a fiber.

You know with what fine perception of imagination the critic can apply his mind to an argument so mysterious as this, and like an ingenious spider, he weaves his cunning web seducingly to catch his prey. Beware of him. "He draweth out the thread of his verbosity finer than the staple of his argument."

And Poetry, too! Oh, Holy Smoke! How dare you knock at its portals with only "just enough learning to misquote?" Do you think it is a commodity

"Constructed by machines of different designs,
Each one with a gauge and a chopper to see to the length of the lines?"

Oh, George! what has become of your wisdom? "Wisdom is the principal thing; therefore get wisdom, and with all thy getting, get understanding." When in fancy you stood on the plains of Timbuctoo, what did you do with the missionary's coat and hat? The critic is abashed at the audacity of your quotation, but wait until he meets you face to face, "Then he will talk. Good Lord! how he will talk!"

Your friend and defender,
EDW. CAMPBELL.

I am much obliged to Mr. Campbell for this strong defense. I think he's a knocker, and his chum, "the critic," as he calls him, is a — well, he's troubled with megacephalousness of the intellect — that's what. — G. C. WATSON.

P.S. — John Birnie, are you satisfied now?

NEWPORT PERSONALS

John S. Hay, representing Henry A. Dreer of Philadelphia, was in town last week. This firm does a large plant business in Newport.

Messrs. Wm. B. Scott & Co. have added a department of seeds and plants to their business and have secured the services of Mr. M. B. Faxon, lately with the George A. Weaver Co., for manager of the new department.

Much surprise was manifested by the announcement last week that the large building on Broadway occupied by the George A. Weaver Co., was to be converted into a hotel. The seed and implement business has been conducted on the site of this building for more than sixty years by the present proprietor and his father. Mr. Weaver's continued illness is the reason ascribed for the contemplated change.

An event of more than ordinary importance was the celebration of their silver wedding by Mr. and Mrs. Robert Hunnick on Wednesday evening. More than two hundred invited guests (many coming from out of town) attended and participated in the festivities incident to the occasion.

Mr. and Mrs. Hunnick, assisted by their nephew, Mr. Ernest Duncan, and a few intimate friends, received their guests in the Merchants' Exchange Hall, where after hearty congratulations by everybody, all sat down to supper; and such a supper! And this was only the beginning, but to be brief (although brevity may be an injustice here), Mr. and Mrs. Hunnick provided an entertainment for their many friends that was elaborate, varied, and suggestive of refinement and good taste. The presents received by Mr. and Mrs. Hunnick (all silver) were numerous and costly.

The Story of the Convention Completed

GENERAL VIEW OF THE EXHIBITION

The weather in Chicago was in keeping with the winter season and we were fortunate to escape the storms prevailing in other sections of the country. Most exhibits came on morning trains, and as usual at this time of year, some trains were several hours late. However, all exhibits arrived in time for staging except those of R. Witterstaetter, Cincinnati, O., and W. J. Palmer & Son, Lancaster, N. Y. The quality of exhibits has never before approached this high standard, and the space in exhibition hall was fully occupied. There were 11 entrees in Class A for 100 white, and only 4 varieties were represented, the Belle, Lady Bountiful, White Lawson and Gov. Wolcott. For the 100 pink class there were 8 entries, of which 6 were Lawson. Cardinal won the 1st prize in 100 scarlet, with Robert Craig second. Other varieties were Victory, Estelle, and Flamingo. There were five entries in class I for gold medal. (The report on awards appeared in our issue of January 21.)

H. M. Altick of the McKinley memorial fund reported slow progress. He had sent out 20,000 pieces of mail matter, traveled over 1,000 miles, with the result of only 150 subscriptions to the fund from our 12,000 florists. It was voiced that to the trade it ought to be something beyond dollars and cents, and growers should not force up prices on that particular day. Many members pledged support and to give to fund on January 29, on Chicago basis, 5 per cent from commission men, 15 per cent from growers, 25 per cent from retailers. The American Carnation Society, on motion of W. N. Rudd, voted to place an offering of carnations on McKinley's tomb January 29.

The discussion on Prof. Hasselbring's paper was opened by W. N. Rudd. The following good points were brought out:

W. N. Rudd said carnations do run out, as can be seen in Lawson. In regard to rust, he said, keep foliage as dry as possible. Mr. Ward said that in general, disease is at a minimum and with him at this day this condition had been brought about by two things — 1st, sterilizing the soil, also the sand for propagating. 2d, propagating from healthy plants only and planting young stock that is free from disease. His compost is made richer by animal fertilizer and the use of chemical fertilizer, with a weaker and lesser quantity each year. Years ago it was thought necessary to keep a temperature 56°, but now 48°, 50°, and 52° is conceded to be high enough.

Peter Fisher said that stem rot is due to cuttings being left too long in sand and these weakened plants are thereby more subject to fungus and disease. Prof. Hasselbring said that stem rot cannot attack a healthy growing plant, and when same appears, the plant's growth has been checked which causes a disorganization of tissue resulting in stem rot and disease. C. W. Ward said that he grows all his carnations indoors and has less stem rot now. Years ago he practiced field culture and found that lifting caused a check of growth. Another cause of disease was inexperienced help and apprentices who are not reliable in watering and preventing extremes of moisture. Mr. Weber said his preventive for rot is good cultivation, ventilation, absence of extremes of temperature and moisture.

Invitations to hold the next meeting at Toronto and at Boston resulted in a vote of Boston 30 and Toronto 36. The executive committee having decided in favor of Boston, this was de-

GENERAL VIEW OF THE EXHIBITION

clared wrong, and to get the matter settled according to the constitution, was left to board of directors. Upon J. H. Dunlop's withdrawing Toronto's invitation, the board was saved the embarrassment of its decision and selected Boston as a meeting place for 1906, the meeting to be held at the same time of year as in 1905.

At the forenoon meeting of the second day, C. W. Ward, chairman, committee on President's address, recommended that the president's suggestions regarding sports be referred to the nomenclature committee. Also that a committee of three be appointed to arrange and coöperate with big fall shows.

The recommendations were adopted.

Discussing Mr. Washburn's papers, Mr. Gillette called attention to carelessness on part of many growers in packing too near end of boxes, the blooms being bruised by striking against the ends, many breaking off at the neck. He recommended that twenty-six flowers be put in each bunch.

At the afternoon session, in the discussion on Mr. Lemon's paper, E. Dailledouze said that to keep exhibition blooms the water should be about 45°; this will keep cool long enough if not too many flowers are placed in the same vessel. R. Witterstaetter said he had been successful in keeping blooms three weeks in water and up to the last day of exhibition. A few drops of aqua ammonia is beneficial in developing the blooms. Exhibition blooms are best cut about two or three days before full development and do best when kept at about 40° to 48°.

President Hartshorne appointed a committee of three, C. W. Ward, Fred Lemon, R. Witterstaetter, to present to directors plans to exhibit seedlings at fall exhibitions. On motion of J. A. Valentine, the secretary was instructed to express to William Scott, Buffalo, sympathy of American Carnation Society and hope for speedy recovery. A resolution was adopted to commend the work for floriculture at Indiana experiment station at Purdue. Mr. Valentine also proposed resolution to express the society's sympathy on loss by death of E. N. Pierce of Waltham, Mass.

On Thursday evening the visitors were in the hands of the Chicago Florists' Club. The lady visitors were entertained at supper and the theater.

The gentlemen were the guests of the Club at a banquet at the Auditorium. The decorations were very fine. The speaker's table was in red — Rose Richmond, Red Lawson, Cardinal, and Pierson's Tarrytown ferns being used. W. N. Rudd was toastmaster. The orchestra was screened by a beautiful group of palms, intermingled with Roses La Detroit, Rosalind Orr English, and Wellesley. The attendance was about two hundred and fifty.

FIANCEE ADONIS ROBERT CRAIG CARDINAL MY MARYLAND

GOLD MEDAL CANDIDATES AT CHICAGO

The Banquet

After the royal feast, toastmaster W. N. Rudd opened with this greeting: "*Mr. President, Officers, and Gentlemen:* It indeed gives me much pleasure to address you here this evening. Your first meeting held in this city was held in this room, and after seven years I greet you all here once more. It took hard work to decide the next meeting-place, and, gentlemen, to-night I am urged to suggest that we meet in Chicago again the next year." (Applause.)

Mr. Peter Fisher responded for "The American Carnation Society." He said: "A few years ago it was predicted that the 4-inch carnation would be the limit of size, but we are nearing an ideal of 6 inches. This society has been very successful; we are growing in membership, also enthusiasm. Come to Boston next year and bring your best with you."

E. G. Hill, responding to "Frenzied Floriculture," said: "I am glad to be present here to-night at the auspicious event; this is a most interesting crowd. I'm no phenomenal speaker, but will just make a plain Richmond effort. Frenzied Floriculture stumps to me are new, and if I hailed from Boston, the assignment might be more in keeping. William Scott could do the subject as-assigned me justice. I think it's a mistake to over-exploit anything. Mr. Fisher and Mr. Pierson and several others do not enjoy the notoriety given by the press. We do not need such reports to promote our business. The question of good flowers and truthful statements go farther. We should use better judgment in selection of varieties. There is no reason why we should have Lawson one-half of the entire crop planted. The florists have been foolish in regard to over-heating houses and much money is wasted. We ought to call in experts on such subjects."

J. C. Vaughan responded for "Conventions and Flower Shows," and F. C. Miller of Bracondale, "The Good Old Times."

C. W. Ward's subject was "What About the Future?" So far as the future is concerned, it seems Uncle Thorpe's ideal is nearly realized. I do not believe the limit of size stands at 4 inches for a carnation flower. We measured 4½ inch blooms on stems 36 inches long and the stems were rigid. I believe we can yet get them 6 inches in diameter. I expect to realize it within the next ten years. The improvement will not be limited to the flower — everything will be better. Our sons will be ambitious to outshine our achievements. The old jealousies are already disappearing and the florist is rapidly elevating himself. These meetings have helped to accomplish all this. On my trip abroad I found that a membership in this society was a good introduction to the best people in horticulture. Floriculture is the greatest means of refinement we have.

Speeches by F. Dorner, Jr., F. R. Pierson, L. Ullrich and P. Hauswirth; stories by Mr. Williams of Joliet, songs by W. J. Lawrence, the presentation of the Lawson medals, and the report of the committee on final resolutions, followed. Then Mr. Rudd, on behalf of the Chicago Florists' Club, said:

"We are deeply grateful and highly honored because you selected this place of meeting, and in return pledge to go to Boston with the largest delegation and more flowers than ever before."

On Friday, January 27, a party of eighty visited the Joliet establishments, chaperoned by James Hartshorne. Many words of praise were heard for the two establishments there.

A lunch was given at the Elks Hall where the mayor turned the city over to the flower men. Many visitors went to Richmond, Ind., Cincinnati, O., and Indianapolis before going home.

P. J. Hauswirth, of Chicago, was the recipient of a beautiful gold watch, presented by the World's Fair Flower Show Association, for his creditable work as Superintendent of World's Fair Flower Show held in St. Louis, November, 1904.

Supplementary Report of the Judges on Miscellaneous Exhibits

B. K. & B. Floral Co., Richmond, Ind. Display of carnation Richmond Gem.

J. A. Peterson, Cincinnati, O. Begonia Turnford Hall.

E. G. Hill Co., Richmond, Ind. Rose Richmond; a magnificent rose, beautifully staged.

Rosalind Orr English; a beautiful pink rose.

Nathan Smith & Son, Adrian, Mich. Chrysanthemum, John Burton; remarkably good for so late a date.

R. Witterstaetter, Cincinnati, O. A fine exhibit, too late for competition. Afterglow, Aristocrat, and 1021–B1, were among the undisseminated carnations of unusual excellence. Also a well-done vase of Lady Bountiful.

F. Dorner & Sons, Lafayette, Ind. A striking vase of many unnamed seedlings made a very interesting display.

F. R. Pierson Co., Tarrytown, N. Y. Honorable mention for Variegated Lawson. Also showed a good display of White Lawson and Tarrytown Fern.

Cottage Gardens, Queens, N. Y. A large display of unnamed seedlings.

Waban Conservatories, Natick, Mass. Rose Wellesley.

J. M. Gasser Co., Cleveland, O. Rose Gen. MacArthur.

Indianapolis Flower & Plant Co. and John Hartje, Indianapolis, Ind. Carnations, Candace, a pretty pink; Coral, promising Daybreak; Allspice, variegated.

Swan-Peterson Floral Co., Gibson City, Ill. The Belle and a nice display of other varieties.

Vaughan's Seed Store. Display of Boston Ferns.

LIEUT. PEARY, Scored 88 points and a Certificate

CONVENTIONISTS INSPECTING "FIANCEE" CUTTINGS
At Chicago Carnation Co., Joliet, Ill.

J. Breitmeyer's Sons, Mt. Clemens, Mich. Rose La Detroit and a fine display of Antirrhinums.

Eli Cross, Grand Rapids, Mich. A good display of violets, single and double.

Robert Klegge, Mt. Clemens, Mich. An interesting lot of seedling carnations.

W. J. Palmer & Son, Lancaster, N. Y. A very fine exhibit of Red Lawson, which arrived late Wednesday evening and was awarded honorable mention.

Davis Bros., Geneva and Morrison, Ill. Exhibit of Boston Ferns.

The Cleveland Cut Flower Co., Cleveland, O., showed a new style bench made of tile.

The King Construction Co., Toronto. Section of iron gutter.

A. Dietsch, Chicago. Section of patent wooden U gutter.

G. W. Neff & Co., Richmond, Ind. Carnation support.

Other Miscellaneous Exhibits

Eagle Machine Works, Richmond, Ind. Wire carnation support.

King Construction Co., North Tonawanda, N. Y. Section of iron gutter.

Dietsch Co., Chicago. Section of patent gutter.

NEWS OF THE CLUBS AND SOCIETIES

The annual banquet of the Duchess County Horticultural Society will take place at the Nelson House, Poughkeepsie, N. Y., on February 9.

The local Florists' Society will hold a monthly meeting Tuesday night, February the 7th, at the residence of Joseph Wettle, on Broadway. There is a good time in store, also many club matters of importance.

The Cleveland (O.) Florist Club will hold a carnation exhibition in the Club room at its next meeting, February 13th. Any one desiring to make an exhibit can address the flowers to the secretary, Isaac Kennedy, in care of the Cleveland Cut Flower Co., 52 High Street.

It will be Carnation Night at the Florists' Club of Philadelphia on Tuesday, February 7th, when it is hoped and expected that all the meritorious varieties, whether new or old, will be on exhibition. If they cannot be brought to the meeting, they may be sent prepaid by express in care of David Rust, Horticultural Hall, Broad Street, Philadelphia, Pa. EDWIN LONSDALE, *Secretary*.

At the meeting of the New Hampshire Horticultural Society on January 18, Prof. F. W. Rane of Durham and Philip W. Ayres were appointed a committee of two with power to act in coöperation with a similar committee from the Society for the Protection of New Hampshire Forests, which joint committee is requested to coöperate with the authorities in Massachusetts who are seeking to exterminate the brown-tail moth.

The society urges the towns in the southern tier of the State where this pest is already making headway to take immediate action in destroying all nests before the first warm days of spring.

A grand carnation exhibition will be held at the St. Louis Florist Club meeting rooms on February 9th, at 2 o'clock P.M., in Odd Fellows' Building, S. E. corner Ninth and Olive Streets, eighth floor, Hall No. 2. The Club has offered $50 in prizes: $25 for outside growers, and $25 for local growers.

Blooms are to be judged by points, according to the rules of the American Carnation Society.

Growers of new varieties are requested to send exhibition blooms.

Stock should be sent prepaid to any of the following named wholesalers who can also supply schedules of the prizes:

C. A. Kuehn, 1122 Pine Street; F. M. Ellis, 1316 Pine Street; H. G. Berning, 1402 Pine Street.

The call sent out for a meeting of St. Louis growers resulted in nineteen florists being present, some being former members of the old club, others members still. F. W. Ude was chosen as temporary president, and E. H. Michel, secretary. Henry Berning acted as sergeant-at-arms and no wholesalers or retailers got into the meeting that night. It was decided to name the club The St. Louis Plant Growers' and Flower Association. James W. Dunford of Clayton, St. Louis Co., made an address, stating the objects of this club.

The largest and best growers in St. Louis were conspicuous for their absence, and will remain with the older body. The store men and other two wholesalers were not wanted. The object of this new club is still a mystery to most of us in the trade, unless it be a direct opposition to the parent body. If so, we think they will find out that they will have to travel "the Rocky Road to Dublin."

The "Golden Jubilee" of the Western New York Horticultural Society was held at Rochester on January 26, President W. C. Barry presiding. Between 200 and 300 members were present.

George G. Atwood, chief inspector of the State Department of Agriculture, read an interesting and particularly instructive paper on "The Gypsy Moth," which was listened to with the closest attention by the members.

Mr. Atwood described minutely the gypsy moth, how it is spread and grows, and the effect it has on the fruit. He stated that it is only of late that the nature of the damage done by the gypsy moth has come to be fully realized by those who grow fruit and who are interested in preserving their orchards.

In the estimation of Mr. Atwood the government authorities should be just as anxious to prevent the importation and spread of this pest as it is to put down the boll weevil. He stated that the power for damage held by the gypsy moth is fully as dangerous to the country's interests as that of the boll weevil.

"Up to the present time some difficulty has been experienced in convincing the government authorities of the necessity of appropriating money to prevent the spread of the gypsy moth and to exterminate it in sections where it prevails. Of late some impression has been made on the authorities, and it is likely that in the near future more attention will be paid to it.

"The gypsy moth, if allowed to grow and spread unchecked, can do fully as much damage to the country's interests as the boll weevil, of which we hear so much. If the government is to take steps to prevent the importation and spread of one of these evils, why neglect the other?"

The premium schedules for the exhibitions of the Newport Horticultural Society will be printed and in the hands of the members and intending exhibitors much earlier this year than formerly. The Legislature has already given favorable consideration to the appropriation bill, in which provision is made for this society. The money thus given is used exclusively for premiums to persons resident within the State. Competition is not restricted, however, because the society appropriates out of the treasury every year a sum for premiums and a good deal in excess and in addition to that given by the State, thus leaving many classes open. It is the intention of the schedule committee this year to urge the need for more open classes, which if heeded, as doubtless it will be, means that nearly all the important classes for cut flowers will be open for outside competition.

Prof. John Barlow of the Rhode Island College of Agriculture and Mechanic Arts will address a public meeting of the Newport Horticultural Society on "Economic Insects." Professor Barlow will illustrate his address with lantern slides. Each year the addresses by the professors from the college are looked forward to with much interest by the members of the society. Invariably these addresses are on subjects with which many of the audience are somewhat familiar, and greatly interested in, and the lecturer usually treats his subject in such a pleasing way that what might be supposed to be "dry" turns out to be anything but that.

The "embattled farmers" of Amherst, Mass., have executed a flank movement at the State House, the object of their attack being the appropriation towards the maintenance of the different departments which they assert enables the Agricultural College to undersell them on garden truck, and the local florists are also lining up with a similar grievance.

The greenhouses of Mrs. J. W. Butterfield at South Sudbury, Mass., were burned on Saturday night, January 14.

American Rose Society

Schedule of Prizes offered at the Annual Meeting and Exhibition to be held in connection with the Spring Exhibition of the Massachusetts Horticultural Society, March 23–26, 1905 —

TEAS AND HYBRID TEAS

DIVISION A. Twenty-five Cut Blooms.

OPEN TO ALL.

CLASS.

A 1. American Beauty (stems not to exceed four feet) $10, $7
A 2. Queen of Edgely 10, 7

In all the following classes prizes are: First, $10; Second, $5 : —

CLASS.		CLASS.	
A 3.	Bride.	A 17.	Niphetos.
A 4.	Bridesmaid.	A 18.	Papa Gontier.
A 5.	Kais. Aug. Victoria.	A 19.	Bon Silene.
A 6.	Meteor.	A 20.	La France.
A 7.	Mrs. P. Morgan.	A 21.	Mrs. Oliver Ames.
A 8.	Souv. de Wootton.	A 22.	Ivory.
A 9.	Mme. Cusin.	A 23.	Lady Dorothea,
A 10.	Mme. Hoste.	A 24.	Mrs. Robt. Garrett.
A 11.	Mme. Car. Testout.	A 25.	Belle Siebrecht.
A 12	Souv. du Pr. Carnot.	A 26.	Ma Capucine.
A 13.	Perle des Jardins.	A 27.	Safrano.
A 14.	Sunset.	A 28.	Mme. de Watteville.
A 15.	Golden Gate.	A 29.	Liberty.
A 16.	Mme. Chatenay.	A 30	Sunrise.

A 31. Any other named disseminated variety.

NOTE. — Any variety not named above may be shown in Class A 31, and first and second prizes may be awarded to *each variety* shown (at the discretion of the judges). Entries are unlimited.

DIVISION B. Twelve Cut Blooms.

OPEN TO GROWERS HAVING NOT MORE THAN FORTY THOUSAND FEET OF GLASS IN ROSES.

CLASS.

B 32. American Beauty (stems not to exceed four feet) $5, $3
B 33. Queen of Edgely 5, 3

In all the following classes prizes are: First, $5; second, $3 : —

CLASS.		CLASS.	
B 34.	Bride.	B 48.	Niphetos.
B 35.	Bridesmaid.	B 49.	Papa Gontier.
B 36.	Kais. Aug. Victoria.	B 50.	Bon Silene.
B 37.	Meteor.	B 51.	La France.
B 38.	Mrs. P. Morgan.	B 52.	Mrs. Oliver Ames.
B 39.	Souv. de Wootton.	B 53.	Ivory.
B 40.	Mme. Cusin.	B 54.	Lady Dorothea.
B 41.	Mme. Hoste.	B 55.	Mrs. Robt. Garrett.
B 42.	Mme. Car. Testout.	B 56.	Belle Siebrecht.
B 43.	Souv. du Pr. Carnot.	B 57.	Ma Capucine.
B 44.	Perle des Jardins.	B 58.	Safrano.
B 45.	Sunset.	B 59.	Mme. de Watteville.
B 46.	Golden Gate.	B 60.	Liberty.
B 47.	Mme. Chatenay.	B 61.	Sunrise.

B 62. Any other named disseminated variety.

NOTE. — Any variety not named above may be shown in Class B 62, and first and second prizes may be awarded to *each variety* shown (at the discretion of the judges). Entries are unlimited.

DIVISION C. Twelve Cut Blooms.

OPEN TO PRIVATE GARDENERS AND AMATEURS ONLY.

CLASS.

C 63. American Beauty (stems not to exceed four feet) $5, $3
C 64. Queen of Edgely 5, 3

In all the following classes prizes are: First, $5; second, $3: —

CLASS.		CLASS.	
C 65.	Bride.	C 79.	La France.
C 66.	Bridesmaid.	C 80.	Mrs. Oliver Ames.
C 67.	Kais. Aug. Victoria.	C 81.	Ivory.
C 68.	Meteor.	C 82.	Lady Dorothea.
C 69	Mrs. P. Morgan.	C 83.	Mrs. Robt. Garrett.
C 70.	Souv. de Wootton,	C 84.	Belle Siebrecht,
C 71.	Mme. Cusin.	C 85.	Ma Capucine.
C 72.	Mme. Hoste.	C 86.	Safrano.
C 73.	Mme. Car. Testout.	C 87.	Sunset.
C 74.	Souv. du Pr. Carnot.	C 88.	Golden Gate.
C 75.	Perle des Jardins.	C 89.	Mme. Chatenay.
C 76.	Niphetos.	C 90.	Mme. de Watteville.
C 77.	Papa Gontier.	C 91.	Liberty.
C 78.	Bon Silene.	C 92.	Sunrise.

C 93. Any other named disseminated variety.

NOTE. — Any variety not named above may be shown in Class C 93, and first and second prizes may be awarded to *each variety* shown (at the discretion of the judges). Entries are unlimited.

HYBRID PERPETUALS

DIVISION D. Twelve Cut Blooms (stems not less than twelve inches).

OPEN TO ALL.

Prizes : First, $10; second, $5.

CLASS.		CLASS.	
D 94.	Ulrich Brunner.	D 105.	Capt Hayward
D 95.	Mrs John Laing.	D 106	Prince C du Rohan
D 96.	Gabriel Luizet	D 107.	Duke of Edin'bgh
D 97.	S. de Rodocanachi	D 108.	Magna Charta.
D 98.	Paul Neyron.	D 109.	Capt. Christy.
D 99.	Anne de Diesbach	D 110.	Clio.
D 100.	Bar'n's Rothschild.	D 111.	Gen. Washington
D 101.	Merv de Lyon	D 112.	Mme. Chas Wood.
D 102.	Mabel Morrison.	D 113.	Reynolds Hole.
D 103.	Mrs S. Crawford.	D 114	Marie Baumann
D 104.	Gen. Jacqueminot.	D 115.	Fisher Holmes

D 116. Any other named disseminated variety.

NOTE. — Any variety not named above may be shown in Class D 116, and first and second prizes may be awarded to *each variety* shown (at the discretion of the judges). Entries are unlimited.

DIVISION E. Twelve Cut Blooms (stems not less than twelve inches).

OPEN TO PRIVATE GARDENERS AND AMATEURS ONLY.

Prizes: First, $10; Second, $5.

CLASS.		CLASS.	
E 117.	Ulrich Brunner.	E 128.	Capt. Christy.
E 118.	Mrs. John Laing.	E 129.	Clio.
E 119.	Gabriel Luizet	E 130.	Gen. Washington.
E 120.	S. de Rodocanachi	E 131.	Merv. de Lyon
E 121.	Paul Neyron.	E 132.	Mabel Morrison
E 122.	Anne de Diesbach	E 133.	Mrs. S. Crawford.
E 123.	Bar Rothschild	E 134.	Gen Jacqueminot.
E 124.	Capt. Hayward.	E 135.	Mme. Chas. Wood.
E 125.	Prince C de Rohan.	E 136.	Reynolds Hole.
E 126.	Duke of Edinb'gh.	E 137.	Marie Baumann.
E 127.	Magna Charta.	E 138.	Fisher Holmes.

E 139. Any other named disseminated variety.

NOTE. — Any variety not named above may be shown in Class E 139, and first and second prizes may be awarded to *each variety* shown (at the discretion of the judges). Entries are unlimited.

DIVISION F. Special Prizes for Cut Blooms.

CLASS.

F 140. For display of cut blooms of roses not less than five varieties, and not less than twenty-five blooms of any one variety to be competed for by growers outside of a radius of one hundred and fifty miles of Boston as measured by railroad time tables . . Silver cup, value $100
Prize presented by Benjamin Dorrance.

F 141. Twenty-five blooms of any Red Rose, not disseminated previous to 1903 . . $25, $15
Offered by John B. Nugent, Jr.

F 142. Twenty-five blooms of any Pink Rose, not disseminated previous to 1903 . . $25, $15
Offered by John B. Nugent, Jr.

F 143. Twenty-five blooms of any American Seedling Rose, introduced in or since 1901 . . . . . $25
Offered by President Alexander Montgomery.

F 144. Fifty blooms of Killarney, grown within two hundred and fifty miles of Boston $25
Offered by Siebrecht & Sons.

F 145. Fifty blooms of La Detroit . . $50, $30, $20
Offered by John Breitmeyer's Sons.

F 146. Display of blooms, not less than ten varieties, in a space of fifty square feet (twenty points allowed for effect) . . $50
Offered by Treasurer John N. May.

F 147. Fifty blooms American Beauty Rose, the "*Executive Committee's Prizes*" . $50, $25

The Lord & Burnham Trophy, valued at $250, presented by the Lord & Burnham Co., will be awarded in conjunction with the first (cash) prize for fifty American Beauty Roses in this class, and will become the property of the competitor winning it twice hereafter, consecutively or otherwise.

F 148. Fifty blooms of any other variety . $20, $15
Exhibitors may use their own vases.

F 149. Six blooms of any variety introduced in 1901, or subsequently $5, $3

F 150. Twenty-five blooms of any Rose of American origin, not yet in commerce, either Tea or Hybride Tea, seedling or sport. Silver Cup, value $50

FOR PRIVATE GARDENERS ONLY.

F 151. Twenty-five blooms of H. P. Roses, not less than six varieties. Silver Cup, value $25. Or cash if preferred.
Offered by E. A. Clark.

POT PLANTS

DIVISION G. OPEN TO ALL.

G 152. Twenty-five H. P. Roses in pots, not less than ten varieties . Silver Cup, value $50
Presented by Col. Charles Pfaff.

G 153. Twelve H. P. Roses in pots, not less than five varieties $25
Offered by M. H. Walsh.

G 154 Six plants, any one variety (not climbers) in not larger than eight inch pots . $8, $5

NOTE — Prizes may be awarded for *each variety* shown, at the discretion of the judges, and entries in this class are unlimited.

G 155. Specimen plant in pot (not climber) $10, $5

CLIMBING ROSES IN POTS

G 156. Specimen plant, trained or not, in tub or pot (not less than twelve inch) . $12, $8
G 157. Crimson Rambler, six plants . . $12, $8
G 158. Six plants, distinct varieties, in not exceeding seven-inch pots . . . $12, $8
G 159 Display of Rambler and Climbing Roses in pots, covering not less than fifty square feet $25
Special prize offered by F. R. Newbold.

G 160. Specimen Wichuraiana Hybrid, any variety $15
Offered by Benjamin Hammond.

AMERICAN ROSE SOCIETY'S MEDALS FOR NOVELTIES

Gold medal for the best new Rose not yet disseminated, whether of domestic or foreign origin. Exhibits to be judged by the official scale of the American Rose Society, and no gold medal to be awarded to any Rose scoring less than 95 points.

Silver medal is offered at the same time and under the same conditions for a novelty scoring not less than 85 points.

It is further ordered that the complete scores of all entries in the competition be filed with the Secretary of the American Rose Society before the award of any medal is confirmed. No duplicate medals will be awarded. It is understood that though the award of the gold or silver medal may be made to the same variety from one exhibitor exhibited in different centers, only one medal will be delivered to the exhibitor.

The Executive Committee of the American Rose Society reserves to itself the right of selection of the judges who shall pass upon the exhibits in the competition for these medals

WM. J. STEWART, *Secretary.*
11 Hamilton Place, Boston.

NEW YORK vs. MADISON

The warriors from New York sallied forth again last Thursday against the Jerseyites and scooped in two games out of three with the Madison bowlers. More than that, their man, Phil Kessler, made the highest score — 202 — and the highest average — 182 — for the evening. Heavy offers have been made to New York for him, but they refuse to sell him at any figure. Following are the scores:

Madison

Duckham	136	146	185
Robbins	117	133	136
Keating	134	182	133
Plusch	112	181	158
Totty	126	91	101
Cook	145	158	183

New York

Holt	121	200	125
Kessler	202	176	169
O'Mara	138	157	131
Ford	141	184	127
Siebrecht	138	142	176
Fenrich	130	167	120

BOSTON MARKET REPORT

This market is strong on carnations, but no increase in price is noted. Fancy carnations are particularly good stock just now. The small varieties, when of good quality, sell well also. The greatest drawback is the number of split calyxes in evidence. Rarely do we see so much of this defect in this market. American Beauty roses are decidedly scarce and so are Brides and Bridesmaids. The supply of the two latter is entirely inadequate to the demand, and anything of fair grade with good stem can be disposed of at sight. Bulbous stock, including freesia, lily of the valley, hyacinths and daffodils, single and double, is overstocked. On first call, quoted figures are realized, but last call, after the stock has been housed by the wholesalers for a couple of days, brings down quantities of this material at half price. Violets are overloaded and prices already at the spring notch.

CHICAGO MARKET REPORT

An irregular cut flower market prevailed the past week. A fair shipping demand aided trade which otherwise might have broken badly. Commencing with Wednesday, an improvement was noted. The Beauty crop is diminishing, and returns for such as are sent in should now take on prosperous proportions. Good teas are also in light supply, and anything of extra quality easily brings above published quotations. The demand generally for teas seems impossible to fill. Carnations have gained over last reports. The supply for Friday and Saturday was liberal and was quickly bought up at quoted rates, the McKinley Day demand helping, and the red varieties showing most strength.

Since supply and demand regulate prices on such occasions, the attitude of wholesalers and retailers was commendable in that they were not disposed to force prices, and the growers should join in the spirit, send in fresh flowers, and be satisfied with reasonable prices. otherwise the high prices will react on the carnation industry.

The receipts of violets continue heavy and prices weak. Tulips are improving in quality and Stollery Bros.' top-finished La Reine are quickly taken at 5 cents. There has been a good call for narcissi and Roman hyacinths. Harrissi clean out daily and therefore callas are sometimes substituted. Orchid consignments are received daily at McKellar's, which include all seasonable varieties, among which I noticed some fine white cattleyas and dendrobiums. The green market is steady, adiantum being the shortest item. Supply of smilax is equal to the call.

INDIANAPOLIS MARKET REPORT

The month of January favored us with a mixture of weather which would be hard to beat. Everything was represented, from blizzards and extremely cold weather to thaws and rain storms. At present writing the outlook for bright, clear weather is promising. January business has been disappointing, especially following the holidays. Prospects point now toward a slight improvement as society seems to be lvening up. The supply has been very heavy in all lines, especially in tea roses and carnations. Bulbous stock is moving very slowly, with supply greatly in excess of demand. Violets and home-grown lily of the valley are becoming plentiful and are not selling clean by any means.

Great quantities of finely grown azaleas, cinerarias, cyclamens and primulas are in the market, on which sales are reported slow. Sweet peas and mignonette are in fair quantity and find ready sale. Plant decorations for funerals are called for more than ever and becoming quite as necessary as cut flowers and floral designs.

PITTSBURG MARKET REPORT

Pittsburg was struck very hard with zero weather on Wednesday last, and countless ills beset the city as a result of frigid weather, and most florists who use gas for heating, found the shortage season is on. Trains were delayed for twenty-four hours from New York and Philadelphia, the result creating a famine in Beauties and violets; however, western trains came in on time. In anticipation of a rush for carnations for McKinley Day, all the wholesale houses had an abundance to supply the demand. Lilies (Harrisii) are very scarce.

Bulbous stock, such as tulips, narcissi, freesias, and Roman hyacinths are plentiful, and good grades are coming in.

PHILADELPHIA MARKET REPORT

A fair week, notwithstanding the heavy storm and delays in delivery. A good deal of stock came in frozen. Beauties shortened up somewhat in quantity. Liberty still in good supply. Brides and Bridesmaids normal. Supply fair and quality good. Carnations very scarce on account of delayed shipments. McKinley day did not seem to have any great effect on the market. The violet market is still rather ragged. Very little life in it this season. Cattleyas moving well at the old figure. A good many callas and Harrisii lilies are coming in and going fairly well, especially Harrisii. All bulbous stock, mignonette, snap dragon, primulas, myosotis, and other miscellaneous material all in fair demand and in good supply.

Gustave Hoffman, who has conducted a greenhouse business in Huntsville Ala., for the past year, disappeared two weeks ago and has not been heard from since. He is a member of the S. A. F.

Obituary

C. A. Keyes died at his home on Highland Street Worcester, Mass., on January 27th. He was the oldest florist in Worcester, having been engaged in the business for the past fifty years. He came to Worcester from Northboro, his birthplace, when sixteen years old, and ten years later started in business

CHARLES A. KEYES

on Highland Avenue, where he continued until his death. Mr. Keyes was well liked and held in highest esteem by the florists of Worcester and the wholesale markets of Boston, where he had been a familiar visitor for many years. His age was 75 years.

Mr. E. G. T. Lueder of Sauk City, who has just died, was one of Wisconsin's remarkable citizens. He was a botanist, and came to Sauk Prairie in July, 1841, with letters of introduction from Asa Gray, who afterwards became world-renowned. In 1843 he joined Fremont's company to go to Oregon, and at the Grand Cascades of the Columbia River all his specimens and his baggage were lost. John C. Fremont, who was in the party, mentions the botanist and his works, and was so greatly impressed with him that he named a body of water Lueder's Bay in his honor. The loss of his specimens was so discouraging to Mr. Lueder that he left at once for his home in Hamburg. He later returned to America, and resided in St. Louis until 1851, when he came to Sauk Prairie. In his collection, to which he devoted his life, are some of the finest and rarest botanical specimens in the world. He was ninety years old. — *Boston Transcript.*

D. Newsham died at the Touro Infirmary, New Orleans, on January 15, from the effects of an operation. He was thirty-five years of age, English by birth, a gardener of high attainments and admirable qualities. He was secretary of the New Orleans Horticultural Society until the past summer, when he took charge of the Louisiana exhibit at the World's Fair. He was a member of the S. A. F.

Patrick Sullivan, well-known locally as a landscape gardener, died at his home in Biddeford, Me., on January 20th.

A. W. Higgins of Rutland, Vt., died January 16.

BUSINESS CHANGES

The Giles County Nursery Co., Lynnville, Tenn., has bought fifty-five acres of land in Pulaski and may in the future transfer their headquarters to the new location.

Julius Baer of Cincinnati, is now making preparations to move into his new store on 4th St., a few doors east of his present location. He will have the largest and finest show window in the West.

Peter Weiland, Cincinnati, O., has moved his wholesale house from the second floor at 128 E. 3d St., to the first floor of same number. William Gardener, his store manager, has their business facilities improved both in the way of handling stock and otherwise conducting business.

LOUISVILLE MARKET REPORT

Business conditions the past week turned out to be a little slow, with no big orders on file. McKinley Day was a failure, so far as the sale of carnations was concerned. Carnations are very short in quantity, however the quality is very encouraging. The regular demand has been very good. Roses are fair in quality; demand and supply satisfactory. Violets are coming in in larger quantities, quality and demand very good. Lilies of the valley, ditto. Dutch hyacinths, jonquils, tulips, etc., are soon to be seen in good quantities.

The Greylock Park Commissioners have made preparations to take by eminent domain 1,361 acres of land in Adams and New Ashford, Mass. This addition will make the Greylock reservation comprise 5,460 acres in the aggregate.

G. A. Parker, superintendent of Keney Park, Hartford, Conn., has gone on a three weeks' trip to New Orleans, Dallas, Shreveport, Birmingham, Louisville, and other southern points of interest.

A Heating Question

EDITOR HORTICULTURE.

Dear Sir: — What size horizontal tubular boiler should I use to heat four greenhouses as follows: One house, lean-to, 6 × 50; one house, ¾ span, 17 × 50; both houses for palms, ferns, flowering and bedding plants; two houses, 16 × 100, for carnations? The temperature outside very seldom falls to zero in this section.

A reply through HORTICULTURE will greatly oblige

Yours truly,

——— C. A. M.

C. A. M. — Replying to your inquiry regarding boilers, we understand you have the following greenhouses, which you desire to heat with steam: one lean-to house, 6 × 50, one ¾ span house, 17 × 50 — these to be used for palms, ferns, flowering, and bedding plants; also two carnation houses, 16 × 100. We have assumed the first two named houses contain approximately 1,700 sq. ft. of glass, and you desire an average temperature in the two houses at night during zero weather of about 70°. We assume the two carnation houses contain approximately 5,000 sq. ft. of glass, and that you desire a temperature of from 50–55° in zero weather. If the above conditions are correct, you would require a horizontal tubular boiler of about 20 nominal horse power, with a grate surface of about 9 sq. ft. If you desire to heat with hot water, you would require a boiler capable of taking care of about 2,700 sq. ft. of radiating surface. In each of the above calculations there is an allowance of surplus boiler power, and the mains leading to the several houses have been taken into consideration. No hard and fast rules can be employed for determining the exact heating capacity of boilers, or for ascertaining the sizes best adapted for different work. There are so many different makes of boilers that it is almost impossible to give you the dimensions. This you could ascertain by writing to the manufacturers. *

Quite a party of St. Louis florists attended the carnation meeting at Chicago. Edwardsville was represented by Fred Ammann and Belleville by E. W. Guy, Pleasant Hill by George M. Kellogg, St. Louis by F. H. Meinhardt, Otto Koenig, Fred C. Weber, Frank Fillmore, and Theo. Miller; Webster's Grove by John Connon and St. Louis Co. by John Steidle and A. Jablonsky. Ralph M. Ward of New York was also with the party. They traveled in a special sleeper *via* Wabash Railroad, reaching Chicago Wednesday morning. Some of them took opportunity to visit other points of interest in Indiana and Ohio before coming home.

CINCINNATI MARKET REPORT

For week ending January 28

Business was very good, but owing to the cold, dark days and the shortage of roses, compelled the store-keepers to hustle for stock enough to fill orders. Bulbous stock is now coming in in good quantities and has sold readily. Green goods, especially smilax, has sold on sight. Beauties have been very scarce and the prospects are that they will continue so for a few weeks. Violets are coming in in good quantities, but are not selling as readily as they should. Colored carnations were in great demand for McKinley day, and kept wholesalers hustling to obtain enough to fill orders. White ones did not move as rapidly. The eastern fern that has been coming into this market has been of a very poor quality, and has been a great loss to the commission men in trade and financially.

NEW YORK MARKET REPORT

General business may be characterized as good without being brisk. American Beauty roses have shortened up very decidedly in crop, hence an advance in value of the higher grades, and last week's blizzard, severest of the season, made still further curtailment of the product of this as well as several other specialties. On teas the demand has eased up somewhat, and quoted prices are frequently cut to clinch a sale. Liberty is particularly strong. Carnations are doing poorly, and the supply exceeds the call; many low sales are made and prices are generally unsteady. Violets are plentiful and concessions to buyers are necessary when it comes to moving the surplus, although it is not out of the way to say that the demand is fair, everything considered. Bulbous stock of all kinds, with the exception of lilies, is on the increase. Lilies are not over-abundant and are moving better. Prices on everything else in the bulbous line are low, but the stock is fairly well cleaned up. There is no apparent shortness in smilax so far. Asparagus plumosus is all taken and all the adiantums are in good demand with supply short.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

Surplus lists containing offers of beans may be looked for about March.

R. McNeff is representing William Elliott & Sons, New York, on the road. H. B. Odell is not now in the employ of this firm.

The short crop of beans harvested by the seed growers will prove an illustration of the wind being tempered to the shorn lamb.

Harvey Seed Co. of Buffalo, N. Y., which firm bought the business of Frank H. Battles at assignee's sale, have decided to close up the business at Rochester.

Retail seedsmen report that their salesmen are meeting with a very light demand from market gardeners for beans. This sustains the statements made in these columns some weeks ago that the market gardeners had saved most of their own beans.

Catalogues Received

W. B. Longstreth, Gratiot, O. Seed Annual and "Bargain Catalog."

George W. P. Jerrard Co., Caribou, Me. Seed Potatoes and Early Seeds.

Green's Nursery Co., Rochester, N. Y. Catalogue of Fruit and Ornamental Trees and Vines.

Julius Roehrs, Exotic Nurseries, Rutherford, N. J. Price List of Bay trees, standard and pyramidal.

Haskell Ave. Floral Co., Dallas, Texas. Roses for the southern planter. Lists a general collection of plants.

Hermann Thiemann, Owosso, Mich. A selected list of Dahlias. A very comprehensive list, carefully selected.

Conrad Appel, Darmstadt, Germany. Wholesale Price List of Grass, Clover, and Agricultural Seeds and Lawn Mixtures.

Henry Saxton Adams, Jamaica Plain, Mass. "A Little Green Book for the Garden." Quite convenient and interesting.

Burpee's Fordhook Folder. "Printed for Broadcast Distribution to Make New Friends for Burpee's Seeds." It undoubtedly fulfills its mission.

Eastern Nurseries, M. M. Dawson, Mgr., Jamaica Plain, Mass. Wholesale Trade List. Contains offers of all the most desirable ornamental trees and shrubs for hardy plantations.

W. W. Rawson & Co., Boston. Seed Catalogue for 1905. Resplendent with hollyhocks in embossed colors, on front cover, and tempting vegetable specialties on the back. Up-to-date inside and out.

John N. May, Summit, N. J. Wholesale Trade List of Roses, Carnations, and Chrysanthemums for 1905. Contains descriptions and offers of the leading novelties and a critical selection of the best of the older introductions.

Elizabeth Duse, daughter and only child of Mme. Eleanora Duse, the Italian tragedienne, has entered an English college devoted to the study of farming and horticulture. Signorina Duse is only seventeen years old. To her mother's great joy she has shown no desire for stage life; her tastes are, in fact, strongly anti-theater, and she has never even seen Duse act. In appearance, however, the two are wonderfully alike. — *Boston Transcript.*

Dreer's Superb Double Petunias

For nearly half a century we have been making a specialty of **DOUBLE PETUNIAS**, and our strain is accepted as second to none, either here or in Europe. We annually plant many thousand seedlings from which only the finest double fringed forms are selected for propagating purposes, thus improving the strain every season, and this year's collection is the brightest and most pleasing one we have yet sent out. We offer 15 distinct varieties.

2½-inch pots, 60c. per doz.; $4.00 per 100; the set of 15 for 75c.

3-inch pots, 75c. per doz.; $6.00 per 100; the set of 15 for $1.00.

SEED OF OUR SUPERB STRAIN OF FRINGED PETUNIAS. Double, 75c. per 500 seeds: $1.50 per 1000 seeds. **Single**, 50c. per trade packet.

DREER'S QUARTERLY WHOLESALE PRICE LIST of Seeds, Plants, Bulbs, etc. is mailed to all Florists. If you do not have it at hand, please advise us and a copy will be mailed at once.

Outdoor Art and Craft

The Park Department of the city of Haverhill, Mass., asks the Board of Aldermen to appropriate $1,000 for the purpose of collecting and destroying brown-tail moth nests.

The Orange Judd Farmer in discussing the latest horticultural freak, the seedless apple, cautions intending growers against paying fancy prices for seedless apple stock, claiming that they are not commercially warranted. While the apples may be seedless, they contain the usual core, or carpels. The blossom end of the apple, instead of being closed, is more or less open, and extends a considerable distance towards the center of the fruit. The seedless apple seems to be a freak of no especial merit. The coreless apple is what is needed.

PENNSYLVANIA NURSERIES REPORT

According to the report of the State Inspector of Pennsylvania, the ravages of the San Jose scale has decreased in the southeastern part of the state. Eighty per cent of the nurseries were infected in 1902, sixty per cent in 1903, but only forty per cent in 1904. Vigorous work has been the watchword — spraying and burning and all the important nurseries now have their certificates for 1905. Montgomery County, Philadelphia County, Lancaster County, and Chester County, all had clean slates at last inspection, and, with the work since done, the re-inspection will doubtless certificate most of the others.

TREE-PLANTING BY A BIG CORPORATION

The American people are difficult to rouse on the subject of replanting their denuded timber lands. From the time of the early settlers it has constantly been the problem how to destroy rather than how to replenish, and this inherited attitude will stand in the way of much being done until things are much worse than they are now.

It is gratifying, therefore, to learn that a big corporation like the Pennsylvania Railroad has taken time by the forelock and is now planting for the year 1935, so as to have plenty of crossties then, as they figure there will be a famine by that time. The task of planting 280,000 young trees was finished recently. 200,000 more will be planted in the spring and 600,000 in the fall. It is figured that it will require 39,000,000 trees to supply the road's demand.

GREENHOUSES BUILDING AND PROJECTED

PORTCHESTER, N. Y. — Emil Leonhard, retail plant house.

SECANE, PA. — E. R. Smith, additions.

BOTANICAL GARDEN, BRONX PARK, N. Y. — Plant house 26½ × 280.

GERMANTOWN, PA. — Mergenthaler Bros., additions.

CYNWYD, PA. — Arburger & Cascaden, additions.

SPRINGFIELD, MASS. — A. J. Buckleton, propagating house. Wm. Schlatter & Son, carnation house.

LYNBROOK, N. Y. — Charles Weber, two houses.

BETTENDORF, IA. — Henry Kahle, range of vegetable forcing houses.

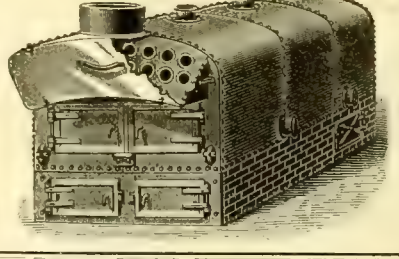
Peter Reinberg contemplates the erection of five houses, each 30 × 500 at his farm north of Chicago, on the lint of the drainage canal as at first laid out

EDGEBROOK, ILL. — George Wittbold Co., two houses,—each 28 × 300—for carnations and roses, a new departure for this firm.

BROOKLYN, N. Y.— John Scott, three plant houses.

MILWAUKEE, WIS. — Theodore Van Beck, two houses, 30 × 100.

J. C. Moninger Co. has the contracts for the following: —



ARDMORE, PA. — Rolan Van Wallburg, Conservatory and plant house. DAYTON, O. — Miami Floral Co., three houses, 34 × 155. ARLINGTON HEIGHTS, ILL. — Schraia Bros., one house, 30 × 150. COLORADO SPRINGS, COL.—Henry Evans, cypress for several houses. Also NORTHPORT, L. I., N. Y. — James Cockroft, three houses, 33 × 157. Thus the far East patronizes Chicago firms.

CARNATIONS

Novelties of the Season

Variegated Lawson

This variety, introduced by us this season, is sure to meet with popular favor. It is a sport from Mrs. THOS. W. LAWSON, pure ivory white, with delicate carmine pencilings. Mr. W. N. Craig, an authority on everything pertaining to horticulture, states that he believes this will outbloom the favorite Mrs. M. A. PATTEN two to one. For some reason or other, the stem seems to be longer than that of Mrs. THOS. W. LAWSON, and the flowers are less inclined to burst. It is a beautiful variegated variety, and one that is sure to be in demand on account of its delicate pencilings. It is superb in every respect. Our exclusive purchase of this variety has created a sensation in the daily press of the country.

$12.00 per 100. $100.00 per 1000

Fiancee

THE QUEEN OF PINK CARNATIONS. In a class by itself. Magnificent flowers. Strictly fancy in every respect.

$12.00 per 100. $100.00 per 1000

Cardinal

Bright cardinal, or crimson scarlet. **$12.00 per 100. $100.00 per 1000**

Fred Burki

Recommended as an extra free-blooming white variety, and a claimant for popular favor.

$12.00 per 100. $100.00 per 1000

THE BEST OF LAST SEASON'S NOVELTIES AND OLDER STANDARD SORTS

White Lawson

We consider this variety, which we introduced last season, the Finest White Carnation ever sent out. It has given great satisfaction, When left on the plants until fully developed, the flowers are much larger than Mrs. THOS. W. LAWSON. Nothing excels it for freedom of bloom, fine keeping qualities, and general all-round value. We believe that this will occupy among white carnations the same place that Mrs. THOS. W. LAWSON does among pinks. *Remember that we are headquarters for it.* Splendid stock ready for immediate delivery.

$7.00 per 100. $60.00 per 1000

Daheim

A fine crimson, introduced by us last year, with the style and habit of Mrs. THOS. W. LAWSON; might be called a *Crimson Lawson*, as it has all the characteristics of that variety as far as freedom of flowering, habit of growth, etc., are concerned. It has grand, stiff stems, calyx never bursts, and it is a free and abundant bloomer, developing very quickly. We believe this to be the Best All-round Crimson Carnation.

$6.00 per 100. $50.00 per 1000

Mrs. M. A. Patten

This grand variegated Carnation has given splendid satisfaction, **$6.00 per 100. $50.00 per 1000**

Lady Bountiful

A magnificent White of last season's introduction. **$6.00 per 100. $50.00 per 1000**

Enchantress

This magnificent Carnation is unequalled for size, beautiful color—light, silvery pink—and freedom of bloom. It brings the very highest market prices, and is in great demand. **$4.00 per 100. $35.00 per 1000**

Mrs. Thos. W. Lawson

The Standard Dark Pink. **$3.00 per 100 $25.00 per 1000**

Prosperity

A magnificent fancy sort, entirely distinct from others. A sterling variety. **$3.00 per 100. $25.00 per 1000**

We are also pleased to announce that we have been appointed distributing agents for the sale of

Victory

and that all orders for this variety should be sent direct to us. We are now prepared to book orders for this variety **FOR DELIVERY SPRING 1906.**

We have watched this Carnation for some time, and believe that it is the best scarlet ever offered, with good stems, flowers of the largest size. A magnificent keeper and shipper, and an exceedingly free and early bloomer. While the flowers of this variety are of the largest size, and it will rank in the fancy class, its freedom of bloom and general good qualities will make it a "bread-and-butter" scarlet. There is a great demand for a good scarlet at the holiday time, and the flowers of this variety brought 25 cents each last Christmas, which is an indication of its popularity.

Strong-rooted Cuttings delivery next season. $12.00 per 100. $100.00 per 1000

Ferns for Everyday Use

The Nephrodiums constitute another section of Aspidium; they are also called Lastrea. Some of the American botanists insist on the name Dryopteris. In that section the spore cases are round, some small, some very apparent and covered with a kidney-shaped indusium; in some cases this indusium is small enough to be hardly noticed; they are set in one, sometimes in two rows on each side, some near the mid rib, some near the edge of the pinnules.

Nephrodiums do not need any particular treatment; good fibrous loam and a little leaf mould for the big-growing species; more leaf mould and a little sand for the small growing ones, and some pulverized dry cow manure added for the big ones will help their growing. They are all propagated by spores. The small ones can be divided when they grow side shoots.

This section is composed of very numerous species, some like N. amplum from West Indies, N. dissectum from New Caledonia.

N. villosum from West Indies, and others, grow to a great size with fronds from three to five feet, but seldom seen in cultivation.

I will enumerate a few of the best for their decorative qualities.

Neph. molle; from West Indies and a little all over the world, can be called a weed in old greenhouses where it grows all over the walls and pots, but when well cultivated is a good looking plant, rich in foliage. There are a few good crested forms from it that are more looked after.

Neph. patens, from West Indies and Central America, is a nice decorative fern; its long-stalked fronds of a light-green color are arching and numerous; it is common, but makes a good show plant.

Neph. lepidum looks very much like a form of patens; the fronds, one to two feet long and oval in shape, are long, tapering to the end, the pinnæ are deeply cut, and the pinnules narrow and apart. It is a very graceful fern.

Neph. conterminum, from Jamaica, is anohter patens-looking fern, about the same size, but of more erect habit; the fronds are tapering on both sides and clothed with pinnæ from the base, the first ones very short and the middle ones long. It makes a nice round-crowned plant.

Neph. ceraceum, from Jamaica, is a bushy plant of a light-green color, not of very great dimensions. The stalk is as long as the leafy part of the frond, which is triangular in form. The pinnæ are deeply cut and the divisions close together; all the extremities are pointed. It is a compact, showy plant.

Neph. amplum, from West Indies, is one of those big growing species, the triangular leafy frond about three feet long and large, are arching, much dentated, and light-green in color; the long stalks are clothed with narrow twisted scales at the base; it is more a greenhouse fern.

All the above are of soft texture; the following pro-

duce heavy leathery fronds and we will call them Lastrea.

Lastrea hastæfolia, sometimes called Polypodium hastæfolium, is a native from Jamaica. It is a beautiful and elegant little plant, the fronds numerous and not over one foot long, are erect, arching at the top, and simply pinnate. The pinnæ, which are closely set, are eared at the base and make like a row of little fronds overlapping one another along the center of the frond.

Last. deltoidea, from Jamaica, is a little over one foot high, from the base to the middle of the frond the pinnæ are reduced to little ear-like rudiments; the other half is long spear-shaped, the pinnæ bluntly cut nearly to the mid rib and of a dark glossy green color.

Last. decomposita, from New Zealand and Australia, is a fern with fronds triangular in form, about two feet long and half as broad, with a long stalk; a good hardy plant.

Last. d. glabella, from New Zealand, is a form of it. The frond finely cut and of a nice green color, could be mistaken for a Trichomanes radicans. It is a little over a foot high, very bushy and handsome when well cultivated, but turns brown and sickly when watered over head.

Last. chrysoloba, from Brazil, is a small growing fern which is used some and well appreciated, with its dark green fronds, and golden downy surface underneath.

Last. denticulata, from West Indies, looks like some kinds of davalleas. The pinnules are small and spaced; spoon-shaped and dentated. The frond is triangular, with a long stalk, hairy at the base; grows over two feet in height, and is a distinct looking fern which makes a good effect.

Last. opaca, Last. carusca, and Last. varia, all three from Japan, are closely related to L. erythrosora, and prolifica which have been described in a previous article. They are all very hardy, of very strong substance, and very attractive in the bronze color of the young fronds.

Lastrea viridissima, from Japan, is a plant of recent introduction, very little known I think, and deserves a first place among decorative ferns. We described L. Standishii before. Viridissima has much likeness to it; the fronds are not so big, but more numerous and grow in a round crown of a beautiful shape with the same wavy appearance and of a nice light-green color. The spore cases are very apparent and of a dark-blue color. A house full of L. viridissima would be as easy to sell as Boston ferns.

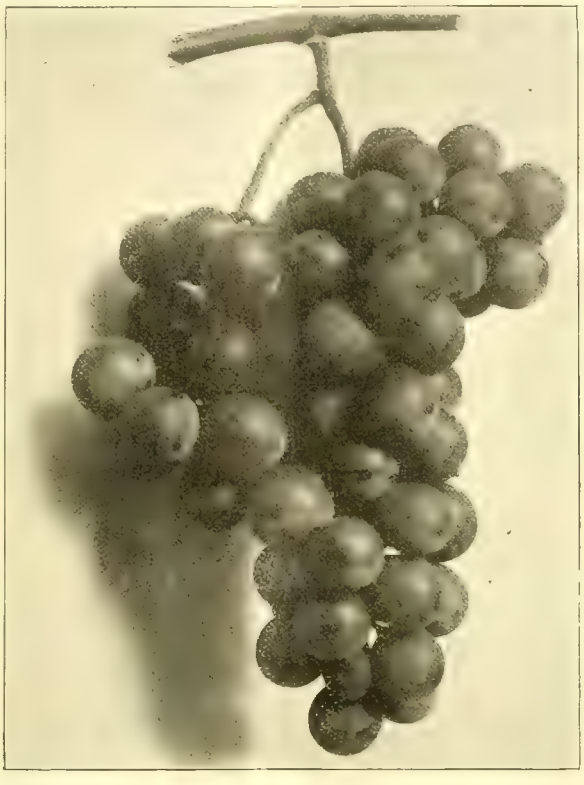
Amongst the hardy Nephrodiums, Lastreas and their varied forms are some fine varieties which would make good pot plants. We shall speak about them later, when we look over the hardy ferns in general.

Amidu Khan

Hippeastrum aulicum (Syn. Amaryllis aulica)

This is a brilliant, two-flowered, winter-flowering, greenhouse hippeastrum from Brazil, that materially assists in brightening the greenhouse or conservatory during the dull winter months if grown in considerable quantities. It is a robust and easy subject to handle, producing large bulbs with good ordinary care, throwing in turn two flower-scapes from each bulb, the scapes being from 16 inches to 20 inches high, not counting the flowers, according to the size and vigor of the bulbs. The flowers stand semi-erect on the stems and not drooping or horizontally inclined, as in the case of the hybrid hippeastrums. They are of a brilliant scarlet hue, with purple shading towards the base of the petal segments, with a further small green circle at the very base of the flowers. The flowers measure 6 to 7 inches across.

It increases quite freely from offsets, has long, shiny green leaves looking as if varnished, from 2½ to 3¾ inches wide, and from 18 inches to 22 inches in length, the edges of some upturning and incurving, and whether in flower or out of flower, it is attractive on account of its bold, handsome foliage.



To have it in flower now or earlier, it requires to be potted in fresh material yearly about the first of August or thereabout, much in the same way and time that callas are potted, and like them, stood out of doors for considerable time thereafter; in fact, up until the autumn nights indicate chilliness. Water must be sparingly given while it is thus establishing itself in the newly potted material.

A greenhouse temperature of from 50° to 55° suits it to a T. When thoroughly established it will take kindly to a heartier diet than cold water will furnish. It reluctantly parts with its handsome leaves and I don't blame it; this would indicate that its tendencies are to be evergreen, and therefore it should not, after flowering, be cast in any out-of-the-way corner. On the contrary, it should have a long season of growth, up to the latter part of April, I should say, thereafter gradually withholding water until the leaves are practically compelled to give up their functions. Under such treatment I have found this plant to do admirably. There are several varieties of the type, one being called Aulica platypetela. The subject of this note was purchased by me a good many years ago for the latter variety, from V. H. Hallock, or John Lewis Childs, I forget which. Being in doubt as to the correctness of the name, I consulted the Botanical Register and found to my satisfaction I had the type, platypetela as the specific name denotes being much broader in the petals, and less brilliant in color, according to the plates.

K. Fujiyama

The King Philip Grape

The King Philip is without doubt the most remarkable grape ever originated in this country. It is early, ripening with our earliest grapes. It is hardy and withstood without protection 30° below zero during the winter of 1903–1904. It is a strong and vigorous grower, with large dark-green foliage; with large clusters, and berries resembling Black Hamburg and equalling in quality that grape or any of the grapes that we get from California.

Its origin is as follows: — I had in my grounds, a chance or accidental wild hybrid of V. Labrusca and V. riparia, a staminate grape named Duke. From this grape, I pollenated blossoms of the Black Hamburg. The result of this pollenating of the Black Hamburg was that I obtained eight vines, and all but one were staminate. This excess of staminate vines is not unusual where a staminate vine is used as the male parent. From those seven staminate vines, I selected one that seemed the most promising and named it Duke 2d, and from this vine I pollenated the Black Eagle, a V. vinifera and V. Labrusca (Concord) hybrid, and the King Philip is the result of that cross, making it, according to Galton's law or rule,

½ v. vinifera,
¾ v. labrusca,
¼ v. riparia.

Galton's law is that of the whole heritage of the offspring. The two parents together, on an average, contribute one-half, the four grandparents one-quarter, the eight grandparents one-eighth, and so on. That, I admit, is the accepted rule, but nature does not confirm our record when made according to that rule. The work in her laboratory is not conducted under any such rule, as every experimenter with the grape soon learns and the results of many crosses go far to confirm. The idea is that the gametes or germ cells of the grape are of a compound nature, and each component part of the combination represents one character of one of the parents and not both. Now it is very improbable that the two gametes that united to make the King Philip were such as to make that grape just one-half V. vinifera, three-fourths V. Labrusca, and one-fourth V. riparia, and I doubt if the experiment were tried over again a thousand times, any two gametes having the same characters in the same proportion that those two had, that united to make the King Philip. One of the most remarkable features of that grape is that the fruit most resembles the vinifera (or foreign grape) while the vine most resembles the native species. One other fact in relation to the creation of that grape is, that the crosses were made both ways. The native was crossed on the foreign and the foreign on the native. I know of no other grape that has been produced in that way.

W. B. White

The Outlook for Florists' Choice Seeds

Twenty years ago any young gardener (he had to be young), applying for work at a commercial florist's establishment, would very likely be asked some such question as, "How many geraniums can you pot off in a day?" Everything had to be done in a hurry, and a good workman who wished to do his work thoroughly was counted too slow for this country.

We have had the experience gradually forced upon us, that it pays to take time and do good work. The time has gone by when the retailer will hold up for your inspection a plant with one leg, and what was intended for a bloom on the top of it, and tell you he can buy this for just one-half what you are asking for yours.

The retailer and the public, too, have become educated in plants and know the difference, and have experienced the satisfaction of buying carefully-grown specimens, with the result that the retailer now looks for the best, and is willing to pay a fair price. The demand for well-grown specimens (and that means high-priced ones), especially at the holiday seasons, is growing by leaps and bounds every

year. It makes very little difference about the variety; if it is well grown and a good strain it will sell.

Fifteen years ago half a thousand cyclamen blocked the Boston market. Now nearly every city in the country has them by the ten thousands. The same may be said of Primula sinensis. Good strains of cineraria and calceolaria will, I think, come to be in great demand for the Easter trade; but the strains must be good, and when so should sell as readily as azaleas.

And just here is the point that the American grower needs to consider. The question is often asked, Where can I get good seed, that I can rely upon being a good strain? We have always depended on importing from Europe, but with our plant trade growing at such a rapid rate the demand for seed has been correspondingly great, with the result that reliable seed are becoming harder to get. I am inclined to think that the seed raisers of Europe have not realized to what extent our demand for good seed is growing, and have not been prepared, and so fill orders with inferior seeds.

I think the time has come in the evolution of our business when it will pay to produce our own seed. The American florist has taken time and great pains to hybridize the carnation, with the result that the whole world is applauding his success and is eager to purchase his products. He can be just as successful in hybridizing other plants if he will take the time, and it will pay him just as handsomely.

There is nothing that we can grow too good for the American millionaire. He has made his money, and is looking for pretty things to buy, and is willing to pay for the best. A good, painstaking, up-to-date man could build up quite a trade in this way, not only in producing good strains for his customers, but also for his brother florists and the seedsman, who will be glad of the opportunity to buy at home.

I see no reason why we cannot produce strains as good as and better than the class of seeds we are mporting at present.

Geo. M. Anderson

Begonias as Bedding Plants

For several years past we have used begonias as bedding plants with very satisfactory results, especially so with the Semperflorens varieties. The seed of these are sown during the month of February in pans of well-drained, light soil, which has been made firm and watered before sowing the seed. Of course it is understood that the seeds are sown on the surface. A pane of glass is placed over the pan, which is put in a warm temperature and kept shaded until the young plants appear.

Instead of watering from the top we place the pans in water, allowing the soil to become moist, as by this method there is less chance of the young plant's dampening. Should they show any sign of the above, we sprinkle the soil with dry sand mixed with a little sulphur.

When the plants become crowded in the seed-pan they are pricked off into flats, allowing one inch each way, using soil, leaf-mould, and sand. When the plants touch they are then planted in 2-inch pots. When they have filled these pots with roots they are shifted to 3-inch, using a little stronger soil, placed in a temperature of about 65 degrees, and by the month of June we have strong, healthy plants, in flower. And from the time the beds are planted until frost they are a mass of blooms.

Begonia Erfordii, which is one of the best for the above purpose, being a hybrid, may revert; but by having the plants in flower before planting out, any plant not coming true may be seen. The new Red Erfordii, no doubt, will be a great acquisition to this class.

I know of no plant that will stand heavy rains better than the begonia, for even after the summer showers, when other flowers are wilted and faded, the begonia still looks as bright as before.

David F. Roy

Phalænopsis Schilleriana

(See frontispiece)

This beautiful orchid is one of those that may be classed as the grandest genus among the orchids, and its magnificent flowers, when well grown, outshine all others. The color of these delicate flowers and their construction is most wonderful. Sometime ago I received a letter from W. A. Manda, South Orange, N. J., in which he stated that one was grown in Mr. Schole's collection in Brooklyn, bore two spikes with three hundred and twenty blooms and buds, but that since that time the plant had died. The accompanying photograph represents a specimen grown by the writer at Schenley Park, Pittsburg. It had one hundred and thirty-two flowers. I also grew one the same year with ninety-six flowers. Both these plants had been severely bruised the year previous by a hailstorm, the terminal growths of each being broken off. They were shaken out and repotted carefully in moss, peat and charcoal and given rest for about eight weeks and then started to grow, the baskets being hung by their sides. They were given a temperature of 70° to 80° in the day and about 65° at night. They were syringed a few times after showing spike, with a very weak solution of salt water, and the roots were dipped three or four times in a weak solution of manure water.

The spike on this plant measured 5 feet, 3 inches in length, and 2 feet, 11 inches across, the plant bearing seven leaves, three of them over 17 inches long.

Jas. O. Powell

British Horticulture

The wave of depression passing over Britain has made itself felt in the horticultural trades. The severe weather experienced since the opening of the year has not improved matters. The flower trade at Covent Garden has been hampered by the shortage of supplies from the south of France, where the cold has been exceptionally sharp. The high prices prevailing have had a prohibitive tendency.

American carnations are in great favor on this side, and are usually well represented at the leading shows. When they were first imported there was a prejudice against them on account of their serrated petals, but this objection has been surmounted. The varieties, vigorous growth, and the attractive, scented flowers gained for them many admirers. Their long, stiff stems and well-formed calyx also secured for them greater acceptance. Market growers have recognized their value. At a show of the Royal Horticultural Society, in London, a few weeks ago, a Guernsey nurseryman gained awards of merit for Enchantress, Adonis, and the President. Among the other varieties in vogue are Mrs. T. W. Lawson, first favorite, Queen Louise, Alba, Alpine Glow, Harry Fenn, Sybil, Golden Beauty, America, and Melba. A controversy has been raging as to whether a variety named Fascination, shown by a London nurseryman, is not synonymous with Enchantress. It is not a new experience to find flowers assuming different aliases to suit the purpose of certain traders; but it is a mischievous form of trading which the conscientious members do their best to suppress.

This is the time when British seedsmen are busy attending to the orders for seed potatoes. The big "boom" culminating in tubers fetching three times their weight in gold has had its day, and prices have reached a more normal level. There are over one hundred and fifty new varieties on the market, each claiming to be the best! It is hoped that the new National Potato Society will be able to organize authoritative trials as to the respective merits of these many claimants for supremacy. At the present time, buyers are sorely perplexed in their selections. The British introducers are not having it all their own way, for they have to face competition from the United States. Messrs. Thorburn & Co. of New York, who introduced the Beauty of Hebron, an extremely popular variety in its day on this side, are now bringing before the British public the merits of the new early Noroton Beauty, which is being offered at the reasonable price of 4s. 6d. a pound. Among the other varieties from America receiving attention are Cramond Blossom, Carman, Divide, Crown Jewel, Irish Cobbler, White Rose, White Ohio, Clarke's Pride, and Vermont Gold Coin.

Messrs. W. Wells & Co., Ltd., of Carlswood, Surrey, whose chrysanthemums have gained an American reputation—samples having been successfully shipped on several occasions — are this year offering a number of interesting novelties. Some of these were included in a collection which was awarded a gold medal at the American Chrysanthemum Society's show at Boston on Nov. 3d. This is the only firm outside the United States who have received the highest honors from the society already named. At the Scottish Horticultural Society's show at Edinburgh, Messrs. Wells carried off the prize for the best novelty with Mrs. John E. Dunne. This is a handsome terra-cotta bloom, with a stiff habit and flower stem. Amongst the Japanese, the other new-comers include E. J. Brooks, purple crimson, with plum and white reverse; Mary Ann Pockett, Indian red, with golden buff reverse; Miss May Seddon, pure white; Mrs. D. Willis James, chestnut terra cotta, with old-gold reverse; Mrs. G. Heaume, delicate salmon buff; Mrs. Henry Partridge, crimson, with bronze reverse; Mrs. R. E. Mason, deep Indian red. The singles comprise Dorothy Fortescue, pure white, with broad flat florets; Clara Bishop, deep pink; Ethel Beer, terra cotta; Hilda, terra cotta; Katie Covell, maroon, etc.

Mr. Joseph Cheal of the Lowfield Nursery, Sussex, is a strong believer in travel as an educational factor. Some time ago he toured through America and Canada, making a free use of his note-book. He has recently given several audiences an account of his latest trip to Egypt and Syria, illustrated by lantern views. Another well-known traveler is Mr. Peter Barr, the veteran "Daffodil King." After a brief rest from the exertions of a trip around the world, Mr. Barr set out for an Eastern tour, and is still traveling.

Some interesting facts are revealed in the annual report published in connection with the experimental fruit farm, established on the estate of the Duke of Bedford, at Ridgmont, in Bedfordshire. Manurial tests have been made, which show that the fruit crops were increased by moderate dressings of dung in every case except that of apples, and were increased by artificials in every case with the exception of apples and gooseberries. The growth was increased by dung except in the case of apples, and in a lesser degree by artificials. The authors of the report emphasize the fact that the modern grower, to be successful, must, to a certain extent, be an experimentalist. They rightly contend that the spirit of investigation, when properly directed, can never fail to benefit the investigator.

Arrangements are being made for an International Horticultural Exhibition at Edinburgh, on September 13th and two following days. Traders from all parts of the world are expected. Most of the London nurserymen will, of course, endeavor to outvie their northern colleagues.

The Royal Horticultural Society have arranged an excellent series of shows to be held in London this year. There is to be another show of Colonial fruit in the spring, in addition to the exhibition of home-grown produce in the autumn. The Society is making increased headway since it took possession of the handsome new hall and offices in Vincent Square, Westminster.

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

We learn from the European consular reports that Austro-Hungarian and English makes of agricultural machines are outselling those of other countries on account of the long credit terms accorded purchasers. It would be interesting to know the length of time given. We were under the impression that the credit system in our own country had reached its limit, and that it was about time to work in the other direction. "Short accounts make long friends."

Our account of the meeting of the New Jersey Floricultural Society's meeting at Orange, last Friday, reveals a rare and most happy accord between the gardeners and their employers in that favored section. The gentleman who so generously contributed the silver cups avowed that if he were not a foundryman he would be a gardener. There is nothing that more charmingly demonstrates the universal kinship of mankind than the love of horticulture. Here all meet on common ground. Orange has set an excellent example.

There are unmistakable evidences of increasing activity and interest in club and society work in all sections of the country. An awakening to the great usefulness of these agencies in promoting the general and individual welfare cannot fail to exercise a most stimulating influence on American horticulture. When the individual comes to a realization of the power of coöperation and united effort, when he experiences that peculiar gravitation which "makes one vast heart out of the many," then and not till then is the best advancement assured. Don't neglect your society.

Our London letter in this number conveys the pleasing news of a growing appreciation of American carnations in England. It is very true that the American carnation overthrows many of the accepted rules hitherto recognized by the English carnation fancier, but it is not surprising that its distinctive qualities of floriferousness, stem and fragrance should win a place for the American class, nevertheless. It is not improbable that we, too, may yet fall into line and find a place in our judging scales for those ideals of form which appeal so forcibly to the British expert.

Our cut flower market reports indicate a superfluity of violets unprecedented at so early a date in the season. It is the opinion of merchants well informed on the capacity of the communities supplied from the big producing section about Rhinebeck, that more than enough violets are now grown to supply any possible consumption and that an increase of the output simply adds to the waste without adding a dollar to the returns for the growers. This view does not seem to appeal to the growers themselves, for it is stated that no less than twenty-eight new violet houses are to be built in Rhinebeck this spring. It is admitted that the very low temperature, so long continued, is in a large degree responsible for the complete break-down in violet values so early in the season, as it shuts out entirely the street vendor who is an indispensable factor in the marketing of the larger part of the violet product as soon as it touches popular prices.

We like the advice given by Mr. Stroud in his talk at Philadelphia on Carnation Growing, that growers make frequent visits to their wholesale commission man and learn by consultation and observation how they can best coöperate with him by supplying the goods in such condition as will enable him to secure best results. The commission man, standing between the grower and the retail dealer, has exceptional opportunities for seeing and understanding the troubles that beset each, and must, from the nature of his business, be just to both. It is as much to his interest as to that of the grower that stock should arrive at the market in the condition which will quickly realize the highest price; it is also as much to his interest as to that of the retailer that the latter receive a fair equivalent for his money in the flowers which he has yet to dispose of to critical retail buyers. The not infrequent humiliating fate of over-ripe or carelessly packed flowers is by no means a new subject, and there is little that can be said on it that has not already been said earnestly and often, but its bearing on the cut flower industry cannot be overestimated. Both grower and retailer will be directly benefited by frequent "heart-to-heart" talks with the men who, as wholesale dealers, fill so important a place in the process whereby flowers find their way from greenhouse to drawing-room, and this not so much on the mere question of "returns," as for the purpose of ascertaining by mutual investigation and observation how to minimize the effects of the marketing process and demonstrate how best to maintain the prestige of the cut flower in the eyes of the purchasing public.

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heartt."

I think the paper is fine and needs the hearty support of all who are at all interested in the trade. Wishing you every success. — J. T. B.

Please find enclosed check as payment for HORTICULTURE for one year. I feel that the carnation number alone is well worth the amount. — J. W. R.

Inclosed please find $2.00 for two years' subscription to your paper. I like the way your paper is gotten up very much. Its business form and clearness of printing make it show up to good advantage. Wishing you every success. — E. B.

You certainly deserve credit for your journal; every member of our family reads it with great interest. I have given nearly all the numbers, after we have read them, to different members of the profession, and all are praising HORTICULTURE. We will send you a list of subscribers in the near future. — V. S.

HORTICULTURE. This is the title of a new gardening paper published in Boston, Mass., U. S. A. It is well illustrated and attractively produced, so it should have a prosperous future. The first number contains some interesting articles, notably one about the large azalea nursery, at Bruges, of Mr. Sander, "Useful Ferns for Everyday Use," etc. We wish our contemporary every success. — *The Garden, London, Eng.*

CULTURE OF DENDROBIUM FORMOSUM GIGANTEUM

January 10, 1905.

Editor Horticulture: —

Mr. Storer says, in HORTICULTURE, December 31, 1904, that Mr. McWilliam has Dendrobium formosum giganteum nineteen years in cultivation. This is really remarkable. Can you get a note as to how Mr. McWilliam grows them? It would be very interesting, especially to the trade. I knew a man who threw away several hundred after four years' culture. Yours hastily,

*

WHITINSVILLE, MASS., *Jan.* 25, 1905.

Dear Sir: —About the Dendrobium formosum giganteum. In June, 1885, I received four plants from Hugh Low & Co. (I think their place then was at Clapton, but now Endfield). The plants flowered that fall, and the present flowering makes twenty years' flowering in succession. The plants have been divided many times since. There have been some bought later.

As grown here they are potted in orchid pots or baskets, the potting material being fern root. They are grown in the warm-house, well up to the roof-glass, with a light shading. When well rooted in the potting material they are kept wet, and when maturing their growth they get manure-water freely. When the growths are finished and the flower buds show, the plants are moved into a cooler house, where the temperature runs about 60° at night, until after flowering; then they are moved into a house which is kept at from 45° to 50° at night, with no shading, where they stay anywhere from six weeks to three months. I have kept plants in the cool-house for six months without any bad effect. When rested they are put back into the intermediate-house until they show signs of starting into growth, when they are moved into the warm-house again for the summer.

GEO. MCWILLIAM.

GOOD OLD JACQ.

General Jacqueminot as a forcing rose is seldom heard of now, but J. William Colflesh at 53d and Woodland Ave., Philadelphia, still runs a house of it. He leaves the plants permanently in this house, and uses solid beds, inarching the plants. On February 2, the date of our visit, the big fat canes had not yet begun to show a leaf, but a few days will make a great change. Mr. Colflesh makes a specialty of Easter plants such as hydrangeas, ramblers, azaleas, etc., and does them well. Pot roses such as Hermosa, Teplitz and Soupert are grown largely here for spring sales, also ivy and other bedding plants, — this being one of the few places that still cater to the bedding plant trade, while all around acres of glass are going up for specialties.

THE SOUTH'S MISFORTUNE

If the truck farms in what we have hitherto been glad to consider all-the-year garden States are going to freeze up every time we have a little cold snap, it appears we may no longer put our trust in them. We may no longer feel sure that, come next week or next month, we can look to the Southern States to furnish our tables wth the lettuces we like; reckoning upon farmers in the sunny South to send us string beans and peas and radishes in January and February will be out of the question in menu making. Still, since it's an ill wind that blows nobody good, we may in the premises expect to see the hothouse farmers of Massachusetts putting more of their acres under glass. Already they have enough land so covered to know how handsome the returns can be, and if they wish to expand we assure them they will find consumers always ready to buy their products. Our palates are attuned to green things in the winter now, and if they do come high we mean to have them. The misfortune of the Southern farmers furnishes the Massachusetts gardeners with an opportunity they do not have every year. — *Boston Transcript.*

WAGON EXPRESS TO NEW YORK A SUCCESS

The night wagon express between Chatham and New York has just completed its second year of constant service. In warm and cold weather, by moonlight and through fogs, in dark nights and stormy ones, this wagon never fails every evening to visit the various greenhouses about Chatham; distributing the "empties" and collecting the past day's crop of flowers.

During the wee small hours of any and every night, Saturdays excepted, the wagon, with its fragrant load, is traversing the lonely highways and streets of Newark and Jersey City. Each morning it arrives at seven o'clock at Chatham's first agency in Twenty-sixth Street, New York. Even the storms of the past winter have not delayed it; its delivery is always prompt and the goods never touched by frost. There have been times when passing Wyoming at about three A.M., the horses encounter untrodden snow all through the Oranges, and they are the ones that have to make the first tracks for a number of miles. During the recent big snowstorms, think what this has meant. Even this ordeal has not broken their record of an always prompt delivery.

By this method the grower saves himself the cost of taking his goods to the station. At his very door he is relieved of them and has the satisfaction of seeing them at once sheltered from the cold, and they are kept so sheltered right up to their destination in New York. By an intelligent use of a smaller or larger number of lighted lanterns, these perishable goods are kept just cool enough but never allowed to get frostbitten. There are, of course, relays of horses, and the men who assemble the consignments from Madison and other neighborhoods are relieved at Summit by other men who accompany the loads across the flats. In these days of railroads this transportation by wagons may seem primitive, but railroads never visit one's warehouse nor carry goods without change over ferries or up city streets. This is a case where re-adopting old ways has proved to be a progress. — *Chatham Press.*

Awfully sorry, old man, but "Pride goeth before a fall." And it was Old Boreas who took the fall out of the wagon express two weeks ago. First knock-out, and we hope it will be many years before it happens again.

NEWS OF THE CLUBS AND SOCIETIES

CINCINNATI FLORISTS' SOCIETY

Herewith we give the schedule of prizes offered for the February exhibition of this society. A good competition is solicited. These shows are given for the purpose of educating the public in floriculture and a good showing is desirable, as from four to five thousand persons visit them in the afternoon and evening.

FEBRUARY 11th, 1905

Special Exhibition of Roses at Jabez Flower Market Elliott

	1st	2d	3d
12 Am. Beauty,	$10 00	$6.00	$4.00
25 Bridesmaid,	4 00	3.00	2.00
25 Bride,	4 00	3.00	2.00
25 Meteor,	4 00	3 00	2.00
25 P. des Jardins	4.00	3.00	2.00
25 Golden Gate,	4.00	3.00	2.00
25 Ivory,	4 00	3 00	2.00
25 Liberty,	4 00	3 00	2.00
Best display of violets,	6.00	4.00	3.00
Best general display	10.00		

Anything new or meritorious in plants or cut flowers will also be competed for.

The S. A. F. Medals, one silver and one bronze, offered by the Society of American Florists and Ornamental Horticulturists and awarded by the Cincinnati Florists' Society, for a new and meritorious plant or flower of American origin. The medals may be competed for at this and subsequent shows, not less than twelve blooms to be staged of any cut flower in competing for above medals. Medals to be awarded at March exhibition. Rules of Cincinnati Florists' Society will apply to the above.

GEORGE MURPHY, *Sec'y.*

REPORT OF MONTHLY MEETING OF T. H. S.

The Tarrytown, N. Y., Horticultural Society held the first meeting of the year on Tuesday, January 31st. The newly-elected president, Mr. Francis Gibson, occupied the chair in a pleasing and masterly manner. The prize of the evening (a pair of handsome sleeve links given by Mr. L. A. Martin) was for the best plant suitable for table decoration. Several foliage and several flowering plants were placed in competition. The judges, J. Mooney and Howard Nichols, after considerable deliberation awarded the prize to William Scott's exhibit, a plant of Croton superba. A very interesting discussion was brought out regarding the relative merits of flowering *versus* foliage plants for table decoration, the concensus of opinion seeming to lean to the plant in flower.

The F. R. Pierson Company exhibited several vases of carnations and were awarded a certificate of merit for Variegated Lawson, also honorable mention for vases of Flamingo and White Lawson. The secretary announced that he had an offer of two special prizes for the next November show, one of $25 from Mrs. J. B. Trevor for twelve best blooms of Glenview chrysanthemum, and a silver cup from F. R. Pierson for fifty blooms of Variegated Lawson. Both prizes were accepted and votes of thanks tendered to the donors. The next meeting takes place on February 28th.

WM. SCOTT, *Cor. Sec'y.*

ANNUAL DINNER OF NEW YORK FLORISTS' CLUB

Saturday night, February 4th, was a gala occasion at the St. Denis Hotel, New York. The club turned out about seventy strong in dress suits and blithe of heart and made merry until midnight, about a board well-supplied with provender and appropriately adorned with orchids, carnations, violets and daffodils — the best of the growers' product. "Tommy" Baker was there with his corps of melodious artists and the chinks in the program were industriously filled in with chorus songs. A printed sheet was distributed having the words for the choruses so that all might join in. And all did join in, most lustily, and "He rambled till the butcher cut him down," "Good-bye, little girl, good-bye," "Put down six and carry two," "Down where the Wurzburger flows, flows, flows," and similar favorites were rendered with rollicking vivacity. Speeches? Yes, there were a few, but what of it? They were'nt out for speeches and speeches were as superfluous in that hall as a report of them would be here. Above all the rest, as usual, was the merry talk of irresistible Patrick O'Mara. President Traendly beamed and spoke briefly in appreciation of the enthusiasm shown. W. F. Sheridan as toast-master was unruffled as ever. Vice-president Shaw, treasurer Weathered, W. J. Stewart, Alex. Wallace, C. H. Totty, J. G. Esler, "War horse" Burns, John Birnie and others contributed each their mite of congratulation, song or story, and Robert E. Berry raised a veritable whirlwind with a speech that would put the County Chairman into abashed retirement. And everybody went home happy.

The next meeting of the New York Florists' Club, Monday evening, February 13th, will be Ladies' Night, also Carnation Night. This combination ought to bring out a record attendance of members and visitors. If you have a new carnation, that's the place to take it, and if you want to see all the novelties, that's the place to go. And if you're not a member you can't find a better night for the initiation ceremonies.

A GOOD TIME AT ORANGE

The New Jersey Floricultural Society and guests made merry on Friday evening, February 3d. It was the annual supper of that prosperous fraternal aggregation and was, as usual, a gratifying success. Previous to the supper, the regular meeting of the society was held and the tables were resplendent with the initial exhibits of plants and flowers in competition for the silver cups to be awarded a year hence. Officers' reports all gave evidence of the enviable prosperity enjoyed by the society during the past year. A feature of unusual interest was the presence of Mr. William Runkle, on whose estate president D. Kindsgrab is gardener, to present in person the twelve silver cups he had generously given as premiums in the annual competition. His speech was replete with kind and appreciative words for the gardener and his avocation. He spoke of the community of interests, the friendship that should exist between employer and gardener and the grand opportunities open to all who strive earnestly and faithfully. Referring to the late chrysanthemum exhibition he promised to see that a larger and better hall shall be provided for next year and that the cup prizes will be also forthcoming. A message from Mr. Colgate was read also giving assurance that when the society should want anything, all they need to do is to ask for it. A rising vote of thanks was accorded Mr. Runkle.

The cups were distributed as follows:

CLASS A

Flowers. 1st, Peter Duff; 2d, George Smith.

Plants. 1st, A. W. Bodwell; 2d, D. Kindsgrab.

Fruit. 1st, Peter Duff; 2d, William Reed.

CLASS B

Flowers. 1st, C. W. Ashmead; 2d, H. Horneker.

Fruit. 1st, H. Horneker; 2d, T. Maybury.

Vegetables. 1st, C. W. Ashmead; 2d, T. Maybury.

Among the numerous exhibits one that attracted universal attention was a vase of unusually fine spikes of Euphorbia Jacquinæfolia, contributed by Peter Duff, and it furnished the text for enthusiastic remarks by several of the after-dinner speakers. Quite a number of visitors were present, representing other organizations, the horticultural press, etc., and the hospitality of the hosts was exhaustless.

FLORISTS' CLUB OF PHILADELPHIA

There was a big attendance at the regular monthly meeting of the club which was held on the 7th inst., also a good exhibition of carnations. Edward A. Stroud of the Strafford Carnation Farm was the essayist of the occasion. His remarks on carnation growing, while given with characteristic modesty and diffidence, were very practical and to the point, and were well received.

J E. Haines, Bethlehem, Pa., staged his new red "John E. Haines," a very large, fine flower, which he intends to put on the market next year. Mr. Guttman came over from New York with his famous Victory, and Davis Bros. of Bloomsburg, Pa., sent a vase of white Mary Albert, a vase of dark pink without a name, and a vase of their new red Crisis, which latter appears to be a good commercial variety and is said to be a great bloomer. J. J. Black & Sons, Hightstown, N. J., had a vase of their white seedling which is unnamed as yet, but which from its size and quality bids fair to be heard from yet. John Kuhn staged some seedlings, several of which looked promising, especially a rosy-pink variety labelled number thirteen. S. S. Pennock sent a vase of Weber's Maryland which was much admired, and was pronounced the best all 'round white ever exhibited here. The Strafford Flower Farms contribution consisted of superb vases of Enchantress, Lawson, Prosperity, Flamingo, Fenn, Hinsdale, and Patten. The flowers were of the highest grade, showing the result of careful cultivation.

The following new members were balloted for and elected: E. A. Harvey, Brandywine Summit; William J. Muth, 1516 Sansom St.; Thomas Roberts, Torresdale, and J. A. Gwinner, Philadelphia. Frank Brinton of Wilmington and Frank Ibbotson of Roxboro were proposed for membership and will be balloted for at the March meeting.

A committee was appointed to see about getting up a musicale for the benefit of the club and report particulars at the March meeting.

SOME NOTES ON CARNATION GROWING

Read by Edward A. Stroud, before the Florists' Club of Philadelphia, February 7, 1905

I have been asked to speak on the carnation and hardly know why, being probably the youngest grower around Philadelphia; however, if my experience will be of interest to any of you I am pleased to give it, telling you of our methods, which do not differ, as far as I know, from the general cultivation of the divine flower. Doubtless, after the rose, the carnation is the most useful of flowers, its keeping qualities and the low price for which it can be bought bringing it in contact with the greatest number of people. There has been great advancement made in the culture of the carnation, due to the introduction of the Lawson, by Peter Fisher, which, to my mind, marks the dividing line between the old and the new.

The carnation industry may be classed under three heads; — first, the growing of the flower for the public; second, the production of cuttings for the trade; and third, the raising of seedlings. With us it would be impossible to handle the three together, and we think each grower should decide for himself which branch he and his place are best suited to and which will bring him the best results. We have taken up the cut-flower production and our experience has been a practical one. As far as we can see, there is no great secret connected with producing the flowers; we have tried to follow nature's laws, using common sense — close attention to details — cleanliness and houses well ventilated. One of the most essential points, undoubtedly, is to have good stock to start with, for if the young stock is unhealthy there is little hope of ever obtaining first-class blooms.

We select our stock carefully, from flowering stems as much as possible; of course on some of the new varieties we buy we are compelled to cut closer in order to get sufficient stock. We put in the sand, first, those that take the longest time to make plants, such as Prosperity, Lawson, and Flamingo, following with such as root more quickly. When rooted we pot them into 2-inch pots, then into 3-inch, and if necessary, into 4-inch. We take great care in watering, not allowing the young plants to suffer at any time for want of it; this insures us a clean, kind growth. From the propagating house we move them into the field or into the bench, the latter method being adopted by most of our modern growers. Our slight experience with indoor culture has not been a decided success over field culture, and we think that in our climate, situated as we are, a compromise between the two is much the best. We have adopted the plan of early propagating, planting in the field as soon as the weather permits and lifting by the middle of July. These measures have given us the best results, although we feel that, to make a fair test, planting in the house should be made the same time as in the field and not early in June as we heretofore have done. The objection to indoor culture might be the throwing out of our old plants before Decoration Day, and the poor prices obtainable during the chrysanthemum season. We throw out our old plants in July, take out the soil, whitewash the benches, and then give a thorough fumigation, after which the soil is replaced as quickly as possible, extra labor being hired for this purpose. Last year our houses (of which there are three, each 308 by 30 feet) were emptied on the 17th of July and planted with new stock by the 3d of August; this we consider very important as it would be very poor economy to let the work drag along.

We make a compost heap every fall, consisting of one part cow-manure to three parts soil, adding some air-slacked lime to sweeten things up a bit. We turn the pile once in the spring and again before it is wheeled into the houses. There is one point in regard to soil which we consider very important — what we term its mechanical condition, which means a soil which will drain water freely, and at the same time distribute food to the roots; this is particularly important immediately after planting from the field. The bewildering subject of stem-rot and its causes is, to my mind, due to impaired root action and a drowning process of watering; this can occur in the propagating bench, the pot, the flats or the field, and a check of some sort is generally responsible for it.

We plant carefully, firming the ground around each plant and resort to frequent syringings, watering plants as little as possible while they are getting established. During planting, we shade the houses lightly with cloth, removing it as soon as plants have taken with the soil. Then the daily routine of staking, disbudding and watering begins and we are under way.

The question of what varieties to grow is always an interesting one, the tendency, nowadays, being after something new and it is hard to resist the temptation of buying new things on seeing the exhibitions at our various flower shows. It is well to be progressive, but we advise the man with limited glass not to attempt too many varieties; three or four in the different colors which require the same treatment, is best. It takes some time to become acquainted with the carnation and the special care it likes; and we do not pass judgment without giving each one a fair trial, which cannot always be accomplished in a year. The competition in carnations is becoming stronger every day; the people no longer ask for a red, pink, or white, but mention the name of the bloom desired, and for this reason it is a good thing to tag each variety when it goes to market. In this way the public become acquainted with the various kinds and we find out the most popular. By keeping careful records we find that those producing the greatest number of blooms are not necessarily the most profitable.

IT TAKES $20,000 worth of postage stamps to mail THE MAULE SEED catalogue for 1905. It contains 152 large pages, full from cover to cover of illustrations and descriptions of the best and newest things known in horticulture. As the original introducer of Prizetaker Onion, Nott's Excelsior Pea, Davis' Wax Bean, etc., I know what I am saying when I make the statement that never before have I offered so many novelties in flower and vegetable seeds of real merit. No gardener can afford to be without this book, which will be sent free to all sending me their address on a postal card.

WM. HENRY MAULE, PHILADELPHIA, PA.

Our experience proves that it pays to work together with the commission man, keeping him posted as to what we will have and when we will ship. This gives him an opportunity to make sales which he might otherwise lose. We advise frequent visits to the wholesaler, not necessarily to see the proprietor but to examine our goods there, see how they are keeping, and compare with the product of other growers. Valuable lessons may be learned in this way. It is hardly necessary to call your attention to careful bunching and packing.

In conclusion would quote Mr. Fred Lemon when he said, at the Carnation convention, "If you wish to succeed, nothing is too much trouble."

NASSAU COUNTY HORTICULTURAL SOCIETY

This society held its regular monthly meeting, February 1st, at Glen Cove, N. Y., and elected three new members.

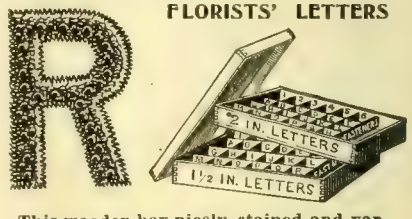
The society enjoyed a very eloquent address from President Thomas Harrison.

Lack of space prevents our giving it in full. We take pleasure, however, in presenting a few extracts.

After speaking of the objects of the organization and his appreciation of the honor of serving as its first president, he said: —

This society represents and embodies the practical knowledge and experience of men who have spent years in acquiring a knowledge of their art, and their work has probably been mingled with successes and failures, and who as members of this organization are willing to impart the results of their experiences and detail their experiments for the benefit of their fellow members. So, from an educational standpoint, I consider a horticultural society is of an inestimable value to every member who attends its meetings.

Individual ambition must make way for united action and sympathy in our work if we are to reap the benefits which should accrue from our organization as a horticultural society. Every member should have the interests of the society at heart, and ardently labor to advance its progress, to the end that our efforts may be appreciated by the community in diffusing a love of nature's noblest and grandest art. Its rank as a profession cannot be questioned by any one. The associations are pleasant and profitable, and the pleasure and enjoyment it affords the poor as well as the rich is beyond conception. Also, in renewing old and forming new acquaintances our social instincts are developed and gratified. . . .



If we wish to keep pace with the progress of the times we must put all our prevailing energy that thinks into motion, and apply ourselves with unwavering persistency in the research and investigation into the mysteries of nature along the lines where science sheds its light upon the art. We, as workers, can then combine theory with practice, and demonstrate, by bringing the results of our work before the public in the shape of exhibitions, that we are men of thought and authorities on our work, and not men who are working simply for their daily wage. . . .

A more scientific knowledge of our work is necessary to bring about this condition of affairs. I, for one, would like to see the day when it will be necessary for a gardener to exhibit his diploma for proficiency in the different branches of the work from some horticultural college to be recognized as a professional horticulturist. This would not be an injustice to the already well-informed practical gardener, but would inconvenience a great many of would-be gardeners, whose only qualifications are that they have washed pots in a palm house, picked up the dead leaves in a rose house, admired the different colors of the flowers in the carnation house, and been led by the ear in at one door and kicked out of the other door of an orchid house, then washed down with the garden hose, then have the audacity to pose as professional gardeners, and aspire to fill some of our most prominent places in the country. These are the men who are "thorns in the flesh," so to speak, and are a detriment to our most noble profession.

Chicago Jottings

E. F. Winterson Co., have completed the arduous task of their annual stock-taking.

Mrs. Leonard Kill is at a private hospital, and about to undergo a serious operation.

Miss Jennie G. Daniels was married on January 25, to Edwin C. Benthey, a son of F. F. Benthey. The groom is a member of the Benthey, Coatsworth Company.

Fire at Mangel's last Monday A.M., caused by defective electric wiring insulation, caused considerable commotion, but was confined to the passageway leading to storerooms. Loss, estimated at $300.

On February 12th, 1905, the Chicago *Tribune* in their Sunday magazine will publish an article by Uncle John Thorpe entitled, "Nealy Twenty Million Dollars Spent Each Year for Flowers." We are sure Uncle will avoid the frenzied chord.

News Notes

Three greenhouses belonging to J. H. Rebstock at Lancaster, N. Y., were burned on the morning of January 29th.

The building in which Mrs. Myra Patten has a flower store, at Lynn, Mass., was gutted by fire on the night of Sunday, January 29th. Mrs. Patten's loss was $100.

George A. Sutherland, Boston, has added a wire design manufacturnig department to his business. Henry Malotta, formerly with the late John Wajsik, takes charge.

The plants in the conservatories of Stephen Salisbury at Worcester, Mass., have been injured to the extent of probably several thousand dollars, by gas escaping from a leaky main. Many valuable orchids were among the victims.

The florists of Hoboken, New Durham, Rutherford, and vicinity, N. J., think they have at last got on the track of the thieves who have been plundering their greenhouses of flowers and plants for the past year. A quantity of the plants recently stolen have been located by detectives in a Third Ave. store in New York. The amount of the thieving is estimated up into thousands of dollars.

F. T. White of Holbrook, Mass., has a seedling white carnation with which he is much pleased. He says it is in no sense a wonder, but it averages up to such a standard that he will grow it exclusively as a white another season. From the single plant of four years ago he has this year sufficient stock to propagate from, to give him all the plants he needs.

Polygonum for Banking.

The subject of this picture, Polygonum cuspidatum crispulum, is an excellent species for holding banks of streams, especially those that are subject to sudden floods. It flowers in August and September, and is covered with myriads of creamy white, sweet-scented, drooping, feathery panicles, which are good for decorations and are much liked by bees. Fine for an edging to shady woods, but is too rank for the herbaceous garden proper. Surpasses the willow for holding streams. Once established, it is a stayer. The left side of picture is, of course, the polygonum.

Personal

Mr. Keur of C. Keur & Sons, Hillegum, Holland, was a visitor in Louisville recently.

Mr. and Mrs. C. H. Maynard of Allen, Mich., are wintering in the summer breezes at Los Angeles, Cal.

Mr. and Mrs. A. Wiegand, Indianapolis, Ind., will leave Feb. 15th for a two months' visit to Southern California.

Prof. John F. Cowell, of the Botanic Garden, Buffalo, N. Y., leaves on the 15th inst. for Panama to make a botanical survey of the Canal Zone.

Miss Amy K. Luffman, who has had a position in Galveston, Tex., since leaving Birmingham, Ala., has accepted a position with Albert Fuchs, 2059 Clarendon Ave., Chicago.

Visitors recorded in Pittsburg last week: George Huscroft, Steubenville, O., and Mathew Fenton, West Mentor, Pa. In Boston, Winfried Rolker, New York, and E. J. Fancourt, Philadelphia, Pa.

NEW YORK MARKET REPORT

The past week saw a rapid reduction of the rose receipts in the wholesale markets and an inability to supply the call for choice material which sent the price of "specials," particularly of American Beauty, to a figure not reached since Christmas. No other line of cut flowers participated in this excitement, and there is little change to report as to either supply, quality, or demand except in the case of violets which took another tumble. Violets are coming down from the Hudson factories in quantities far beyond the possibilities of absorption. The growers are all complaining and protesting against the prices being returned to them by the wholesalers, but there seems no remedy except a change in the weather. As soon as the temperature has moderated sufficiently to permit the street men to sell violets in the open air, the surplus will have some chance to move; at present it is impossible. All that can be done is being done. The quality of violets is grand, — unprecedentedly so — and they are well worth a good price; but there are tens of thousands more than are wanted every day, and "there you are."

NEWPORT, R. I., MARKET REPORT

The flower market was much improved last week. There was a better demand and the supply was a little short, due to the somewhat unexpected cold snap which retarded stock, and also caused the local florist to make very conservative estimates of their possible needs.

Roses and carnations are selling well and bringing better prices than last year at this time. The few lilies brought in are picked up quickly, although most growers are holding these back for Easter. They consider it pays them better to have a sure sale for a large number at a moderate price than run the necessary risks of early forcing. Other bulbous stock is not much in evidence. Plants are not selling well, with the possible exception of small ferns. Bedding plants seem to be scarcer than usual, a fact which together with a promise of a good Newport summer, would seem to warrant better prices and larger importations, for even in ordinary seasons immense quantities are bought from out-of-town growers.

LATER REPORT

With the mercury hovering down around zero and most people keeping well within doors, it is not at all surprising that but little business was done in cut flowers last week. Now, however, with the weather moderating, and for other reasons, a much more hopeful feeling has taken possession of the local florists. The lull of last week is an annual affair, therefore, in a way looked for, and besides being anticipated it is usually prepared for; consequently but little loss ensues. Roses and carnations monopolized all the call there was last week and the prices were good, but none too good considering the conditions. Buyers, however, are often only too prone to forget conditions while in search of bargains in flowers.

As I was about to say, the lull of last week afforded the florists an opportunity to make plans for an increased business promised upon the advent of spring if not before. A number of funeral orders have come in during the past few days, and these will help considerably in cleaning what little stock accumulated last week.

FIANCEE CUTTINGS

To the Trade;

We beg to inform all florists who have orders placed for carnation "Fiancee" we have been somewhat disappointed in its refusing to produce enough cuttings for January deliveries owing to its superb habit of producing long flowering stems only.

These stems have now been pinched back from 30,000 plants and there is now an abundance of excellent cuttings coming along.

We are putting in the sand large batches every week and expect by the latter end of March that all orders now on our books will have been filled. There is an average of 20 cuttings to the plant now in sight, making a total of 600,000 available cuttings for spring deliveries.

"Fiancee" has no disease of any kind; it makes fine strong plants by fall, even from May struck cuttings, in fact it is the strongest grower of any carnation.

We further wish to state that we intend every one shall be satisfied with the quality of cuttings received, would rather be the loser ourselves than otherwise.

Those who visited the greenhouses after the convention can vouch for the reliability of this statement in the whole, and especially for quality and quantity of cuttings obtainable.

We ask every one to be patient and in the end they will have no kick coming to any one.

CHICAGO CARNATION CO.,
JAMES HARTSHORNE, *Mgr.*

Business Changes

Ryan Bros. have closed out their store in Quincy, Mass., and returned to Braintree.

The Manchester (Conn.) Floral Company has vacated the store on Elm Street, Rockville.

The Boston Cut Flower Company has removed to new and spacious quarters at 14 Bromfield Street.

The Otto Grundman Company, Secaucus, N. J., has been incorporated with a capital of $20,000.

Alexander Whiteley, manager of the Richards Bradley greenhouse, at Brattleboro, Vt., will resign his place March 1. Mr. Whiteley is undecided whether to remove to Boston or accept an offer from Connecticut.

J. E. Nelson of Field's Corner, Boston, has bought a farm in Hingham and will move there upon the expiration of the lease of his present place of business. "Raddy" has evidently made some money at the old stand, and if the lease can be renewed at the present terms it will leave a possible chance for some one else to do the same.

John R. Weir and Frederick Weir, the well-known florists, who have an establishment at Fulton Street and Elm Place, Brooklyn, have brought suit in the Supreme Court against Frances E. Barker, as sole surviving trustee under the will of Charles Barker, who died some twenty-five years ago, for a renewal of the lease of the store property now occupied by the florists and sublet by them to Silsbe & Company. Plaintiffs claim that they have an option to a renewal of the lease in consideration for their carrying a suit brought by Rosa Zipp in a dispute to enforce a court yard restriction of fifteen feet alongside their premises on Elm Street, to the Court of Appeals. The last five-year lease at $11,000 a year rental expires May 1, 1905, and plaintiffs stand ready to renew for another five years, but defendant refuses to give such lease. — *Brooklyn Standard Union.*

CHICAGO MARKET REPORT

With supply decreased by "15° below" weather, yet the receipts of flowers last week were fully equal to the call. American Beauty mid-winter crops are coming to an end and values are gaining. Growers of teas who six weeks ago anticipated improved yields, are much disappointed; the average cut in January was the lowest in the history of the trade. Liberty is in short supply. Meteor is the only variety suffering for orders. A wonderful improvement is noticed on Reinberg's rose, Uncle John; fine stems and beautiful color which sets the pace for first place among the season's novelties.

The increased supply of carnations on account of McKinley day speculation indicated that considerable stock was held for the last minute and much of it awaited sales on the opening day of the next week. However, there seems to be a shortage of white and red carnations. Retailers report unsatisfactorily on McKinley day sales. The concensus of opinion seems that the day should be made a legal holiday and its meaning more advertised. Violets continue on the toboggan slide.

A noteworthy feature of last week's market was the enormous demand for bulbous stock and Roman hyacinths, and narcissi are once again on a paying basis. Lily of the valley is of fine quality and cleaned up daily. Shipping trade was marked by a great increase and this has kept the market from lowering. Greens are in sufficient supply, except Adiantum which is good property to have. Callas and Harrisii are equal to the call. Tulips can be had in any color now, and Dutch Roman hyacinths have put in their appearance.

PHILADELPHIA MARKET REPORT

The Beauty market is very tight, demand strong; Liberty and other varieties in good demand and quality improving. Bride and Bridesmaid better than at any time this season. A steady, healthy demand exists. Carnations are firmer, especially the better grades. Lawson for dark pink, Enchantress for light, Boston Market for white, Flamingo for scarlet, Roosevelt for crimson, and Prosperity, are the leaders. Lily of the valley and lilac selling well and bulbous material improved. Golden Spur is the best daffodil. Single violets move better, but doubles, sluggish. All green material normal in supply and demand brisk. Growers are said to clip the size of strings and bunches to equalize the market, and so quoted prices remain unchanged. Specialties noted at Philadelphia cut flower wholesalers' this week were good mignonette and fancy Rhinebeck violets at Ed Reid's; splendid acacia sprays and Lukens' fancy freesia at Niessen's; fancy freezia and Bride roses at W. J. Baker's, and gardenias and Asparagus Sprengeri and plumosus from Florida at S. S. Pennock's. This asparagus is a novelty in this market and very acceptable, being of a very dark green and superior in every way. Many prefer it to the northern-grown stock.

PITTSBURG MARKET REPORT

Frigid weather has not brightened the prospects of local growers and retailers during the past week. Fancy carnations and roses are curtailed and considerable shipments are coming in from other places, but the supply in general was equal to the demand. Normal prices again prevail except on choice Beauty and Liberty roses. Though American Beauty is mostly in demand, Liberty is pressing it very close and some with 2 to 3-foot stems are eagerly bought up. In carnations, while Enchantress and Lawson are the most popular, there is quite a demand for Prosperity and also good scarlets, of which a good fancy variety is lacking in this field. Bulbous stock is here in profusion, white and pink tulips more in demand than other sorts. Daffodils and jonquils are plentiful, also lily of the valley, mignonette, violets, sweet peas, callas, white lilacs, but purple lilac is scarce. Freesias are in demand and are not plentiful at this writing. We have just received warning from Weather Bureau of another cold wave, so that we can prepare by keeping the coal shed door open and our gas-metre well oiled.

LOUISVILLE MARKET REPORT

This past week business conditions have been about up to expectations, with business probably a little on the slow side. The severe weather has had probably a great deal to do with it. Carnations are short in quantity; however, the demand and quality are very satisfactory. Roses have been somewhat disgusting in quality, taking price, etc., into consideration. The demand is a little slow. Lily of the valley is plentiful, with very little demand, but the quality is exceptionally good. Violets of good quality abundant, with the demand fair. Bulbous stock will soon be on in great quantities, but the demand so far has not been very bright.

Henry Fuchs has had quite a lot of trouble with some of his tulips. When the flowers are about ready some of the stems seem to take a fancy to rot, making it a very undesirable feature.

BOSTON MARKET REPORT

The market lacks stability as compared with last week and weakness is apparent in all lines. Roses are in better supply and increasing daily. Quality is also improving. Carnations are increasing as to receipts, with prices tending downward. Violets are decidedly a drug, many being left to face the chance of a bargain counter deal. All bulbous stock is in over supply, with difficulty to place much of the receipts. Ferns are decidedly scarce.

ST. LOUIS MARKET REPORT

Roses are scarce in St. Louis, and carnations plentiful. All other market flowers normal. Trade is generally fair to good.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

Philadelphia seedsmen report retail trade as rather backward to date.

Some of the finer types of wax beans are very scarce. This is especially true of Valentine Wax.

It is reported that potatoes are rotting badly, and sound seed stock should bring a good price next spring.

W. C. Rickards, Jr., of Thorburn & Co., has returned from a very successful trip among the Long Island growers.

Al. Wheeler, with Weeber & Don for the past three years, has gone into partnership in the firm of W. E. Marshall & Co.

Seedsmen everywhere in this country and abroad are experiencing a phenomenal demand for that sterling novelty, Nicotiana Sanderæ.

Noroton Beauty, Thorburn & Co.'s new potato, is in big demand and it would seem that its sale this season will exceed that of any potato novelty ever introduced in the United States.

Heavy frosts in the south of France have destroyed all the flowers on the Riviera and it is probable that Roman hyacinths will be high in price and small in size on account of the check to their growth by the freezing.

Mr. John H. Allen, the veteran and much respected seed grower of Pictou, Ont., paid a visit to his old friends in New York city last week. Mr. Allan's call was purely social as he retired from active business several years ago.

Business has opened up much earlier than usual with the New York seedsmen. Retail orders are coming in so briskly as to denote a good season. In some establishments they have been working nights for the past three weeks and have many orders ahead.

A new disease, the character of which has not yet been determined, has appeared on the peanut in German East Africa where the peanut is one of the most important agricultural plants. Whether of bacterial or fungous origin is not known, but it is very destructive thus far.

The German consul in Bukharest, Roumania, reports that the favorable grain crop of 1904, in Roumania, has caused an increase of about 25 per cent in the purchase of agricultural machines there as compared with the year before. Austro-Hungarian and English makes of machines have outsold those of other countries on account of the long credit terms allowed the purchaser.

William Elliott & Sons are preparing to remove from their place on Dey Street, New York, to 201 Fulton Street, where an entire building is being fitted up for them with electric elevators, steam radiators and all modern conveniences for handling a big business. Land speculation in connection with the "McAdoo tunnel" has raised rents in the old location to an unreasonable limit. Messrs. Elliott will move on May 1.

Catalogues Received

The Mitchell Greenhouses and Nurseries, Mitchell, S. D. A catalogue of general outdoor and indoor stock and floral designs.

William Henry Maule, the Philadelphia seedsman, has made a radical change in his seed book this year by leaving out colored plates and putting the thousands of dollars thus saved into gifts of choice seeds to his customers. This would appear to be good business and no doubt will be duly appreciated. Every florist and market gardener ought to have a copy of the Maule book. Its 152 pages are crowded with good things.

Dreer's Superb Double Petunias

For nearly half a century we have been making a specialty of **DOUBLE PETUNIAS**, and our strain is accepted as second to none, either here or in Europe. We annually plant many thousand seedlings from which only the finest double fringed forms are selected for propagating purposes, thus improving the strain every season, and this year's collection is the brightest and most pleasing one we have yet sent out. We offer 15 distinct varieties.

2¼-inch pots, 60c. per doz.; $4.00 per 100; the set of 15 for 75c.

3-inch pots, 75c. per doz.; $6.00 per 100; the set of 15 for $1.00.

SEED OF OUR SUPERB STRAIN OF FRINGED PETUNIAS. Double, 75c. per 500 seeds; $1.50 per 1000 seeds. **Single**, 50c. per trade packet.

DREER'S QUARTERLY WHOLESALE PRICE LIST of Seeds, Plants, Bulbs, etc. is mailed to all Florists. If you do not have it at hand, please advise us and a copy will be mailed at once.

Metropolitan Park District of Rhode Island

A movement has begun looking to the formation of a Metropolitan Park District of Rhode Island, including Providence and the surrounding towns.

* * *

The territory proposed to be included in this Metropolitan Park District is a parallelogram in shape, its longest side running north and south about eleven miles, the width of the District being about seven miles, including about 50,000 acres of one-fourteenth of the total land area of the state. As large a proportion as this is of the State's area, yet when compared with the twenty-four other cities of the United States containing over 150,000 population, we find that seven cities are greater in area than this entire district, New York being four times its size and New Orleans and Chicago two and one-half times its size, while Philadelphia and San Francisco are fifty per cent larger.

The total population of this Metropolitan Park District of Providence is over 300,000, which, if united in one city, would make Providence the fourteenth city in population in the United States; but in place of being united, there are ten municipalities within the District, each independent of the others, and that, too, a New England independence which is self-centered and jealous of its neighbors. The time has come when these imaginary barriers should disappear, not only on account of the park interest, but also for the general interests of the people, for the functions of a city have so multiplied and increased and the necessity of a comprehensive sanitary arrangement of sewers, water, streets, parks, lighting and equalization of taxation, should tend to make this territory not only a Metropolitan Park District, but an unit, and to become in fact, as well as in name, Greater Providence.

* * *

This Metropolitan District has many great advantages. First, there is the unsurpassed Narragansett Bay, which in the form of the harbor, reaches the heart of the city. Then, there are nine rivers and twenty lakes, with their main valleys and secondary valleys and springs and rivulets within its borders, which for centuries have been carving and moulding their lands into forms of great beauty and attractiveness for men, to welcome the coming of man and to give him hope. And the hills which rise in long slopes, while not precipitous, are high and bold for shores of an inland bay, being from two to five hundred feet above the waters encircling their feet. The slopes on these hills are at places very abrupt, with ledges cropping out and great boulders rendering the scene most picturesque. While there are but few large, broad meadows, yet there are many most delightful little valleys and glens. Many of these hills and valleys are well wooded. Few lots of large trees are still standing. Altogether a most interesting, beautiful, and picturesque country for the installation of a park system.

* * *

The scheme as outlined by those interested is to take a half dozen of the hills on the west and make of their summits and slopes, parks and reservations. Those selected have most interesting and ever-varying outlooks. Another part of the proposition is to include the ponds with their shores, and the streams with their banks, wherever not needed for manufacturing purposes, with several points and stretch of shore on Narragansett Bay; and at all the different places, to take sufficient lands, which, with the waterscapes and the outlooks, to make commodious grounds and scenic effects, all to be connected by a system of boulevards and parkways twenty-four miles in length. A most generous scheme and a bold conception, although much of the detail of the work has been but partially brought forward.

It is said that the gods differ from us mortals by being never behind time, never ahead of time, but always on time, and it would seem as if the gods were favoring Providence, for Providence has grown throughout this whole territory, settling her people here and there by the waterways as opportunity was needed to use its power for making things, and yet where not needed, she has kept place after place in much of their pristine beauty. While her hills have been mostly stripped of their great tree growth, yet she has clothed them with a secondary growth that promises to renew their glory, and what is more, she has kept people from settling on them. So well has the Goddess Fortune preserved the good things in store for Providence, hiding them, as it were, from the people that they might not destroy them, and what will appeal to the thrifty Rhode Islander, keeping the money value of these lands so low that now in the installation of this magnificent system of parks and boulevards, the promoters state that not over one hundred acres of high cost land is involved and less than that number of buildings, all of low price, are included. Truly, where has there ever been another city so fortunate? But the time has come when all this must change, or rather, is even now changing, for there began, several years ago, a movement among the people towards these lands, and their beauty and desirableness are becoming known and appreciated, and this must result not only in their value increasing, but that they will be taken for private use. Surely, now is Providence's opportunity, for she can now make such a selection for her public lands as will make available and bring into the market a large amount of the most desirable residential property, which will not only increase her population, but will also so increase her assessed valuation, that the taxes received for the increase which the parks and boulevards will create will, in the end, entirely pay for the cost of lands and construction, and also pay for the annual cost of maintenance. Therefore, in point of fact, Providence has only to lend her credit, for the scheme may be made to become self-constructive, and self-supporting. This is the experience in other cities, for parks if properly located and managed, have lessened taxation by increasing valuation, so that considered from the financial side alone, they have been profitable. They may become as profitable and self-sustaining as the waterworks; in fact, any city function which does not in the end become self-sustaining and profitable, is either not needed or is mismanaged, and parks are no exception to this law, although the working out of this law relating to parks is more intricate and indirect than with waterworks and gas plants. Yet it is nevertheless certain and true. The profit of parks may be as indirect as raising taxes by revenue. We may not give thought to either, but a careful analysis shows they exist. Providence is indeed fortunate in her opportunities and in the timeliness of this movement,

Now as Providence seems about to leave the foot and go to the head of her class, what are the lessons for her sister cities? * * * She claims beautiful meadows and valleys, picturesque glens and slopes, cozy nooks and delightful, shady wood scenes. She has all these. * * * She claims tidy streets and brilliant and decorative lighting of them, and a general thrift and tidiness in her housekeeping. While many of her sisters are good housekeepers, yet Providence would probably take the first rank here. If she should claim great natural gifts and that she has made good use of them, the judges, I fear, would shake their heads and say, "No, no." "You as well as every one of your sister cities have had their special gifts and great opportunities. Some of them may have neglected theirs more than you have yours, but all have neglected them so sadly that we must pass them by and give none of you the rank, for every one of you have shown a great and wasteful neglect of your natural gifts."

Items of Park News.

Forest Planting for Profit

Mr. Theodore F. Borst, consulting forest engineer of Boston, was the speaker before the Massachusetts Horticultural Society on January 21. The subject of "Forest Planting for Profit in Massachusetts" was fully treated. The many excellent stereopticon views used made this important subject interesting and readily intelligible. After briefly referring to the importance of forests and how indiscriminate cutting of the past has made it impossible for nature to much longer supply our needs, Mr. Borst at once took up his problem to show where forests should be planted, how seedling trees are raised in a nursery, how a young forest is properly planted and how a plantation should be tended for profitable returns. Good profits from forest culture were shown.

It is a matter of common knowledge that prices of all forest products, especially wood of the better kinds, has been very rapidly rising, and as these advanced prices are occasioned by a scarcity of desirable timber there is no reason to believe that prices will ever be lower; in fact, everything points toward much higher prices in the future. Just two weeks ago the President of the United States, through an address before the American Forest Congress held at Washington, called the attention of the American people to the grave problems now confronting us by the rapid destruction of our forests. These forests were once thought inexhaustible, but at this congress, as never before, the leading interests depending upon forest products, namely: the lumbermen, the railroads, the mining interests, paper manufacturers, the box and cooperage manufacturers, the furniture manufacturers and all woodworkers and users in general, did, through able representatives of their various interests, cry aloud their needs for wood materials. The area formerly covered with valuable timber has been much reduced, and the regrowth now taking place on other lands is upon culls left standing in the lumbering of the past. As nature will no longer supply our demands we must by artificial means stimulate and direct nature's forces in timber production.

There are many thousands of acres of land in Massachusetts that are absolutely waste. Much of this land is either unfit or unnecessary for agricultural purposes. Everywhere we note abandoned, brushy, wornout pastures, impoverished ploughland, deforested tops of ridges, steep, rocky hillsides, poor, loose, sandy soil, odd corners too expensive to plough and cultivate; yet many of these waste lands could at small expense be made to yield valuable timber crops. Mr. Borst showed a series of views of such deforested lands, burned over areas, etc., both from the surface and sectional cuts. These pictures made clear what poor lands, white pine and other valuable trees can thrive on. In discussing how many trees to plant, the size of plants to use and the spacing between the trees, it was shown how very dependent the answer to these questions is on the nature of the land to be forested. It was shown that upon areas where more or less voluntary tree growth exists the supplementary planting necessary to fill the open places was very quickly and cheaply done, sometimes costing as low as four or five dollars per acre, using white pine trees for this purpose. Where the entire area must be planted the trees are set about 5×5 feet apart, requiring 1743 trees per acre, and may cost from seven to fifteen dollars per acre. The size of plans needed determines much the cost of the plantation. The size needed is very dependent upon soil conditions and the nature of growth covering the land. Brushy, blueberry and sweet fern land require, for instance, the use of three-year-old transplanted stock, while open, exhausted pasture lands can frequently be planted with two-year-old seedlings. Where conditions permit the use of chestnuts, acorns or hickory nuts, the cost of planting per acre may be only two or three dollars. Some 18,000 acres of waste land have already been artificially forested in this State. A few of such areas have recently been lumbered at a net profit of over 6 per cent on the entire investment. If the planting which was done forty, fifty and sixty years ago has proved profitable, certainly the planting we would do to-day which would come into the market forty, fifty and sixty years hence must prove even more profitable; especially when there is every indication that timber prices will double or perhaps treble themselves before that time.

It was illustrated at length how tree seeds are collected, how a sandy loam soil is selected for a nursery and how the same is laid out, ploughed, harrowed, etc., for raising young trees. The seeds are soaked in warm water, poisoned for preventing mice from eating them and then are carefully sown in drills in a nursery bed. Careful tending is necessary until the seeds germinate and are one year old. The seedlings remain in seed beds two years. They are then about six inches high and may be set directly into the field, or if larger, more stock plants are needed, the seedlings are transplanted into nursery rows where they may remain one or two years longer. Views were shown illustrating how the seedlings are taken up, transported to the land to be planted, and how the men plant the same. Each two men of a crew work together, one man making the holes while the second man sets the trees. The details of how to properly and quickly set these trees were shown. Mr. Borst states that by his method each man employed in the planting will set more than 700 trees in nine hours. One crew of sixteen men and a foreman have set considerably more than 16,000 trees in nine hours. Under fair conditions, using two-year-old seedlings, two men working together will plant from three-quarters to one acre a day. Great care is necessary to obtain good stock, as frequently poor trees are delivered and the planting is correspondingly disappointing. One difficulty in the way of the general tree planting is that proper trees for forest planting are not readily obtainable at sufficiently low prices. For small plantings it may be advisable to transplant small seedlings, say from six to twelve inches high from open pastures, but usually for plantations larger than five or six acres, the additional cost for labor, etc., necessary to collect and plant such stock is not compensated for. Also the success of such planting is often not encouraging. Mr. Borst carried his audience through the various stages in the development of a planted grove, and showed that there is no essential difference in the planted forest and one sown by nature. The foresters' artificial method of planting is necessary when the seed trees have been destroyed or when the area has not been completely reclothed. It is often cheaper and more satisfactory to plant a forest than to depend on nature's sowing. White pine, chestnut, hickory, ash, oak, maple and tamarack are among the best trees for planting in Massachusetts, but under some circumstances other trees might be preferable. Mr. Borst has during the past four years made plans for and supervised the planting of considerably over one million trees in Massachusetts, and many more trees are now being grown in nurseries for forest plantations. This year seedlings can be furnished cheaper than ever before. Data from actual experience was presented to show the cost of reforesting lands of different types, and several planting plans were discussed. If the planting is done on sufficiently large scale, say 25, 50 or 100 acres, the cost of planting including the young trees may be from five to fifteen dollars per acre. Ten dollars per acre has frequently been the cost for white pine planting. The proper age and the manner in which to prune and thin a forest was shown. If a stand is thinned too early or thinned too severely much injury can be done, as the trees will thereby become low crowned and produce knotty timber; and over-thinning also endangers a crop to windfall. It was shown that a mature white pine stand can be lumbered, and at the same time the ground be naturally reset with young pines. Tables were shown giving the volume of timber produced by white pine per acre in this State, and also data from European planted white pine forests. Uncared for white pine forests in Massachusetts may produce in sixty years about 30,000 feet of timber, B. M., while under forestry treatment the European figures show that 50,000 feet can readily be produced on one acre during the same period of time. White pine plantations have been figured to yield a net annual return of $1.15 per acre paid at the expiration of forty years in addition to 4 per cent compound interest on the money invested. Under a different calculation, using all costs, it is estimated a return of about $2.25 per acre per year for forty years from the time of planting to the time of cutting is obtainable. This estimate is corroborated by actual experience. These returns are certainly very satisfactory, considering the fact that it is secured from land which is almost useless for any other purpose, and which, without a timber crop, would be a source of constant expense in taxes. A timber crop not only gives a return on the money invested, but it makes productive the capital locked up in the land. These returns are figured on the yield obtainable without pruning, thining, etc. If forestry treatment is given the returns should be higher. Again, these profits are figured on prices of stumpage prevailing to-day. The future profits will be higher in proportion to the advance in stumpage values.

Timber culture for profit is strongly commended to landowners, especially where lands are being held that are producing no returns whatever. One great advantage of tree culture is that the farmer and his regular labor can be readily taught to do the work and that very little attention save protection is needed after the crop is once started.

Mr. Borst's address was well calculated to demonstrate the entire practicability of forest culture for profit.

Greenhouses Building or Projected

WEST MILAN, N. Y. — C. Williams, violet house.

HANOVER, MASS. — Geo. F. Sylvester, plant house.

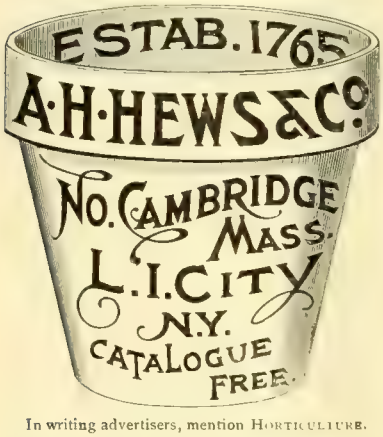
PHILADELPHIA, PA. — E. R. Martin & Co., 2614 Columbia Ave., greenhouse, 17 × 70.

FRENCH LICK SPRINGS, IND. —French Lick Springs Hotel Co., two houses, 20 × 100.

There are reasons for believing that the State of Rhode Island will appropriate fifteen thousand dollars for a greenhouse for the use of the Agricultural College at Kingston.

Reported by J. C. Moninger Co.

DECATUR, ILL. — Mrs. Dant, house 20 × 80.



BENSONVILLE, ILL. — W. F. Dunterman, house 20 × 90.

FAIRBURG, ILL. — Kring Bros., one carload cypress material.

CHICAGO, ILL. (High Ridge). — Adam Zender, four houses, 28 × 200, each.

PARIS, ILL. — J. A. Helfrich, one house 16 × 60; one house 26 × 60.

MILWAUKEE, WIS. — Chas. Burmeister, house 30 × 125. Wm. Helwig, one house. Theo. Van Beck, two houses, each 30 × 100.

CARNATIONS

STRONG ROOTED CUTTINGS

We offer first-class stock of the finest varieties

VARIEGATED LAWSON. This variety which we are introducing this season we are sure will prove to be the very best variegated sort. Pure ivory white with delicate carmine pencilings. Mr. W. N. Craig, an authority on everything pertaining to horticulture, says that he knows that this variety will outbloom the favorite Mrs. M. A. Patten three to one. It has the Lawson habit and stem, and is bound to give satisfaction. **$12 per 100, $100 per 1000.**

RED LAWSON.—A bright red sport of Lawson that is bound to be popular, and will be grown where Lawson is popular. **$10 per 100, $75 per 1000.**

CARDINAL.—Bright cardinal, or crimson-scarlet. Won first prize for best 100 scarlet, first prize for best 50 carnations any color, first prize for best 50 scarlet seedlings, Chicago. **$12 per 100, $100 per 1000**

FIANCEE—The queen of pink carnations; in a class by itself. Magnificent flowers, strictly fancy in every respect. **$12 per 100, $100 per 1000.**

FRED BURKI.—Recommended as an extra free-blooming white variety and a claimant for popular favor. **$12 per 100, $100 per 1000.**

WHITE LAWSON.—We consider this variety, which we introduced last season, the most profitable white carnation ever sent out. We think it will outbloom any other white two to one. It has given great satisfaction. When the flowers are left on the plants until fully developed they are much larger than Mrs. Thos. W. Lawson. We believe this will occupy among white carnations the same place that Mrs. Thos. W. Lawson does among pink carnations. Remember that we are headquarters for it. Splendid stock ready for immediate delivery. **$7 per 100, $60 per 1000.**

LADY BOUNTIFUL.—A magnificent white of last season's introduction. **$6 per 100, $50 per 1000.**

MRS. M. A. PATTEN.—This grand variegated carnation has given splendid satisfaction. **$6 per 100, $50 per 1000.**

DAHEIM.—Dark crimson. Grand stiff stem. Calyx never bursts. Free and abundant bloomer, developing very quickly. We consider this the best all-round crimson carnation. **$6 per 100, $50 per 1000.**

ENCHANTRESS.—Freest blooming, bringing highest market prices. In great demand. **$4 per 100, $30 per 1000.**

MRS. THOS. W. LAWSON.—**$3 per 100, $20 per 1000.**

PROSPERITY. A magnificent fancy carnation. **$3 per 100, $20 per 1000.**

We are now prepared to book orders for 1906, for

The Coming Scarlet Carnation

VICTORY

This is a real bread-and-butter variety. An early, free, and abundant bloomer, with good stem; a magnificent keeper and shipper; flowers of the largest size, commanding the very highest price. This is going to be a money-maker. Orders will be filled in rotation, as received, delivery beginning December next. **$12 per 100, $100 per 1000.**

THE BEST WHITE CARNATION IS

Lieut. Peary (WARD)

CERTIFICATED 90 POINTS

PEDIGREE — White seedlings for several generations. **COLOR** — Snow white. **FRAGRANCE** — Very strong clove, decidedly fresh, and pleasing. **SIZE** — Large, averaging 3 inches in diameter on strong stiff stems, 18 to 20 inches in length. **FLOWER** — Full, broad petaled and high center and of a fine symmetrical form. **CALYX** — Long, strong and does not burst. Fine keeper and excellent shipper. **HABIT** — Strong and erect. **GRASS** — Medium width. **CONSTITUTION** — Very vigorous and free from disease. Cuttings root rapidly and will be sent out in the most perfect condition. Commences blooming October 15th and flowers continuously throughout the winter, affording an abundant crop. A first class commercial variety in every respect. NOW BOOKING ORDERS.

PRICE, $12.00 per 100; $100.00 per 1000.

Gesnerias

Gesnerias are among the oldest of decorative plants for stove, greenhouse, or table decoration, and are indispensable where a general collection of flowering plants are in demand. The order includes Achimenes, Gloxinia, Streptocarpus, Tydæa, Isoloma, Saintpaulia, etc., all of which have been greatly improved of late by hybridization, rendering them far more valuable and useful for the gardener and florist.

The newest hybrids of gesnerias are remarkable for their abundance of bloom and continuous succession in which the flowers are produced for about four months in the fall and early winter months. They may also be had in perfection for a longer period by starting successional batches from March until midsummer, but I prefer having one good batch of from one hundred to one hundred and fifty plants in 5-inch and 6-inch pots. This gives a beautiful display, uninterrupted by other members of the genera, embracing many shades of color, including pure white, white with yellow throat, yellow in several shades, apricot to rose and rose pink, scarlet to dark red and crimson — some self-colored, others again spotted like the tydæas. As to their floriferousness some have single spikes with abundance of pentstemon-like flowers, others again producing three to five spikes and similarly loaded with their showy flowers which are unusually persistent.

Apart from their good flowering qualities they are of great value and service as decorative foliage plants. The leaves are opposite, cordate-ovate, of several shades of color, from light to dark green, often beautifully mottled with lighter colors, others dull purplish, with light shadings, others again a cinnabar red, all of which are covered with minute hairs of similar colors having the appearance of velvet or plush.

On well-grown specimens the leaves are from six to eight inches over, the flower spikes attaining a height of from ten inches to two feet. The scaly tubers are not as readily obtainable as seed, but the latter if sown in April or May will produce fine flowering plants next fall or early winter. Where tubers are obtainable they should be started in May or earlier if desired for summer flowering.

The same treatment given gloxinias will suit gesnerias but, if they are not brought into flower before October, they will last much longer and produce a mass of flowers when bright colors are most desirable. The most important point in their culture is watering; they delight in a moist atmosphere and standing on a moist bench, but water from the syringe or hose is fatal to their well-being, as the leaves will soon get disfigured if water is splashed on them. Water in nearly all cases contains lime, and as evaporation takes place a sediment is left which is very injurious. Do not expose to bright sunshine or allow the plants to become dry at the roots. After growth is complete and the flowers appear, a temperature of 65° or 60° will contribute to their lasting quality.

Thrips and mealy bug must be guarded against, but if the house is clean when the plants are started they are easily managed. Started either from seed or tubers they are perfectly clean, unlike other plants started from cuttings.

Echoes from England

FRENCH FLOWERS AND FROST

We get most of our early spring flowers from the French Riviera, in the neighborhood of Nice, Cannes, and Grasse. The supply has lately been very limited, however, owing to a severe frost which has done serious damage in the gardens of the South of France. Consequently prices have advanced considerably and it is to be hoped that the home growers will reap an advantage. Writing from Nice, a correspondent who has spent many winters there says: "The very severe frost that descended from the mountains and devastated the Riviera gardens was more sudden and unexpected than any I can remember. January dawned bright and pleasant and the cool air gave no warning of anything unusual. At midday a bitterly cold wind set in and in spite of the bright sun, the temperature fell rapidly. At noon the thermometer stood at 46° Fah., at 5 P.M. at 29°, and the next morning was as low as 20°. A most intense

sun increased the mischief to the frozen plants, while the two following nights completed it. The wreck of flowers on this coast is deplorable everywhere."

Owing to this disastrous state of affairs on the Riviera, roses are very scarce and they are difficult to procure except when specially ordered. The Mimosa seems to be the only French flower that continues to arrive in quantity.

AMERICAN CARNATIONS IN ENGLAND

It is surprising how the American varieties of the tree carnation have become popular in this country during the past few years. They are now largely grown for market, and the flowers, which are rendered additionally valuable by reason of their long stems, command good prices. Such sorts as Mrs. Lawson, Floriana, Enchantress, Fair Maid, G. H. Crane, Royalty, and others are chiefly grown. In Covent Garden, ordinary winter flowering sorts are making 18 to 30 shillings per dozen bunches, whereas the flowers of the best American varieties are selling at 3s. 6d. to 6s. per dozen blooms. They lack one quality, namely, that of fragrance; in vigor of growth, rich coloring, and general usefulness however, they are all that could be desired. This is proved by the fact that they have taken the public fancy, and the West End florists' shops expose them in large quantities. On account of their long and strong stems they are invaluable for making into bouquets and other floral devices.

COTONEASTER PANNOSA

Although this Cotoneaster does not compare with the new Cotoneaster angustifolia that I mentioned recently, for beauty, it is nevertheless an elegant plant, and one that has its value as a winter-berried shrub. It is not new, but it had not been exhibited before the Royal Horticultural Society until their last meeting on January 24. It was then shown by Messrs. James Veitch and Sons, Ltd., Chelsea, and received an award of merit. The berries, which are produced almost the whole length of the long slender shoots, are of scarlet coloring, about the size of those of the white thorn, — they are arranged in axillary clusters. Although it does not promise to be so vigorous, judging from the plant shown, as some of the Cotoneasters that make our shrubberies so bright during winter, it is as pretty and as elegant as any of them. It was introduced from the province of Yunnan in China.

A VALUABLE SOUTH AFRICAN PLANT

Among various useful greenhouse plants introduced in recent years, one from South Africa called Moschosma riparium has come to the front a good deal lately. It forms a splendid companion to the blue flowered Coleus (C. thrysoideus). When out of flower it resembles a green leaved Coleus or a Salvia. The leaves are about two inches long and roundly ovate, the margins being deeply toothed. The flowers are small and white, with purple anthers and are borne in large, elegant terminal racemes often two feet or three feet long. The flowering period commences in early December and continues until the middle of February, so it has proved to be one of the most useful winter blooming plants we have for the warm greenhouse. Although naturally a perennial, it is best treated as an annual, growing it each year from cuttings. To do this, the plants after flowering are put in a warm, moist house to start into growth. When the shoots are three inches long, they may be taken off and inserted as cuttings. It is a plant well worth bringing to your notice.

SPECIAL SOCIETIES

We have all sorts of special societies in this country, the Chrysanthemum, Dahlia, Rose, Carnation, Sweet Pea, Potato, and others, so you may know that the interests of these particular plants are well looked after. The Sweet Pea and the Potato are the youngest, and both of them have just published very satisfactory reports. At a meeting of the National Chrysanthemum Society to be held on February 6, the report to be presented states: "It gives your committee satisfaction to report that the society still maintains a foremost position among the special societies having for their object the culture of some particular flower. The Chrysanthemum, especially as represented by the large exhibition of Japanese varieties, continues as popular as ever, while the growth in the commercial value of the flower as a market and decorative subject has been highly satisfactory."

Harry H. Thomas

In planning your advertising for the coming year, remember that HORTICULTURE proposes to work overtime the season through to prove itself the best medium in the country.

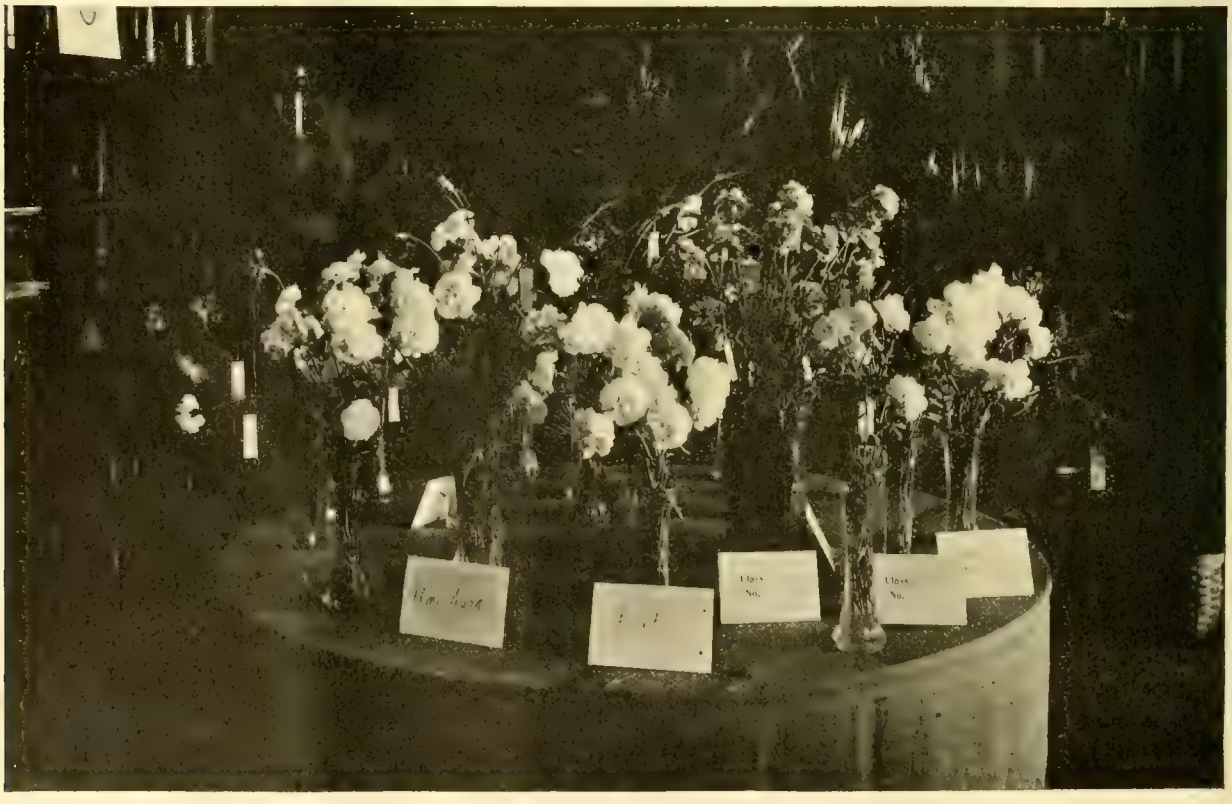
South American Horticulture

I — SANTOS

Looking at the orchids from the street, through the windows of fashionable stores of city florists, very few, I suppose, realize at the moment that the plants they see are imported wild plants, not uncommon sights in their native woods, each being one of many species of parasites which cover decaying trunks, dead limbs, or thick-barked and moss-grown trees in South American woodlands, from whence most of our orchids come. An every-day plant is the orchid in its native land, at which you will turn to look once or twice, but later will often pass, taking no more notice of it than you would of a bunch of pretty ivy or of honeysuckle climbing on a North American elm or maple. Around the homes of South American people, on the piazzas or the walls of the backyards in the city, the orchids hang on pieces of wood much as our geraniums live on shelves and in the windows in our (northern) homes, from San Francisco to New York, and Berlin. It is, like the geranium, the house-plant of tropical countries, which grows anyway, flowers again and again in a dozen and more different colors and shapes — and looks ugly the rest of the time.

A year ago, in the latter part of January, I boarded a coast-steamer of the Lloyd Braziliero Line, bound from Desterro to Santos, the greatest harbor and market on the globe for that every-day tropical beverage — coffee. Where this plant has been cultivated in South America and especially in Brazil, the old settlements of the Portuguese are most numerous, money is more plentiful, and modern Brazilian civilization is more advanced. It is there, where you find tropical flori- and horti- culture in its first state, and although in its own original infancy, yet with a promise, I presume, of a grand, splendid, and fanciful future.

In the central tropical countries, under the straight rays of the equatorial sun, the jungle of woods, the swamp, the valley, and the palm-covered hill are all steaming in one almost continuous hot boiler-room temperature, in which all higher aspirations of art are smothered to a general indifference. And it seems that precisely in the same manner, sometimes, writings on tropical vegetation or nature in the hot tropics of Africa or equatorial America give one at last a weary sensation of impenetrable masses of green foliage, slow, warm streams and big puddles.



This seems so because civilization has not made any effort to bring order and culture into the surrounding natural objects, and a writer has really little to describe of human interest in common. It is all wild nature of immense power, with which human efforts are in vain, and the parts of the earth, which have as yet escaped man's progressive march in subjecting the earth to him, followed since Adam's times.

Not so is it in farther northern and southern parts of the tropics and in the sub-tropics. In these latter countries we can see fine tropical flori- and horti-culture in well-kept gardens on artistic avenues, with grand natural scenery as background, and here, as well, we can enjoy it. The effect is as wonderful in reality as it was in the imaginations of our boyhood days when plunging into one of Walter Scott's marvelous tales of the Orient with its grand natural treasures and beauties. You have then the delights of your boyish expectations realized, when you read of Pizarro, Cortez, or the discoverer of Brazil, Cabrâl. You are beholding practically the same thrilling wonders of nature, only much more elaborated by divers human cultural achievements, such as the building of a city with its suburbs, as when you are out on the beach of Santos, along the sands of whose shore stand the mansions of the old families of European coffee merchants and Portuguese business men. The massive square buildings show their upper stories and roofs behind thick stone walls clad with vines of all natures, of all countries, in garlands hundreds of yards long, of ivy, clematis of different species — paniculata, Jackmanii, and others, of Jasmines and of Maréchal Niel roses. All these vines are overgrown again by big-leafed and grotesque flowering tropical vines. Inside the walls, elegant palms forty to sixty feet high decorate the boundary line of these seats of modern Latin civilization and refined southern culture. On the gates, generally clumps of Areca palms are planted as corner pieces, perhaps next to some beds of bushy chrysanthemums, running along the main walk to the house, three feet high and loaded with small (not over three inches in diameter), but choice flowers in very distinct and bright colors. If you are fortunate enough to get acquaintance with the gardener inside the monastic enclosure, you will be pleasantly surprised with the general brightness of hundred fold dyed flowers and plant. The designs are somewhat stiff in arrangement, as if the design of old imperial coats of arms was to be imitated in carpet-bedding, yet always as brilliant in the sunshine as fire and flames in the rainbow. There you will find alternantheras with colors wholly unsuspected from your experience with them, the colors varying from the bright carnation scarlet to purple, brown, and yellow. By Brazilian tradesmen, and in the general street language, they are called "perequetos," which is the word for parrots. Coleus are standing out like burning shrubs, three feet high between dark green tree-ferns of all sorts; but among all, it's the crotons with their multi-colored small, or broad-leafed sword-like foliage, some twisted around and around like a corkscrew, that will make the show. Some good planting is done with crotons, coleus, and ferns, and they will make you stop quickly enough and let you know that there are "other people on the rolling beach of the Atlantic Ocean." Among the border

plants you can admire very fine species of Cocos Weddelliana, four feet high; big tree-ferns, standard roses, hibiscus of over man's height, and grand snow-white camelias.

The houses are as if with all doors and no windows, being open from the floor to the ceiling on all four sides, on a warm day in January or other midsummer months. You may walk inside at most any point of the broad stone or wooden piazza, which surrounds the building proper, enjoying the same privilege as the dolls in the schoolgirls' dollhouse. There are no walls in front to obstruct the view of the grand carpet designs of the terrace garden. The somewhat formal arrangement of the many colored beds is diversified by the taller plants on the borders, and by some clumps of picturesque bamboo or big phœnix palms. The green foliage and the flowers are all around you, as if nature stretched her arms into the very rooms of the inhabitants. Covered walks, built out of natural wood on which hundreds of orchids grow under the shade of climbing red and white roses, lead along some side of the garden wall to the invariable spot of outlook in the Brazilian home grounds. This is an embankment on a corner point mostly against the enclosing wall within two feet from the top, so that you can peep over it at convenience and look right and left on the sidewalk to see what is doing on the street, or who may be coming. Here on the Santos beach you are seated on a cool, low stone seat on one of these outlooks and view the breaking beach and the narrow channel into the ocean, where incoming steamers are first sighted, surrounded by high, picturesque, zig-zag, mountainous shores with big lumps of red, rough rocks in front looming up high out of foaming waves. Over all hangs a clear blue sky and soft and warm winds swing from among the palms on the mountain side across the beach to where you are watching. It has the same effect as did the breeze in Lombardy, which sapped the strong blood of the Germanic conquerors of Italy. You reach heroically for a strong, black Brazilian cigarette to strengthen your nerves, and solve the problem of the morality of a cup of genuine coffee, made of a gallon of water to two pounds of coffee, as the coffee-restaurant mistress of the beach-house will confidentially tell you, after you have become a regular guest. Take a last look, before boarding the car to the city, and it all seems like a mighty palm-house under a mighty blue glass sky. A wonderful forest of palms, oleos, tree-ferns and giant bamboo bouquets are decorating immense shelves of mountains along the shore, among which lie the estates of wealthy Santos merchants.

Gerhard Bleicken.

C. W. WARD'S TABLE OF SEEDLINGS AT CHICAGO SHOW

Poinsettia (Euphorbia pulcherrima)

Perhaps enough has already been written concerning this most popular and useful plant, but it is said that one never tires of a "good thing," so these few notes may not be amiss.

As set forth by our plant historians and botanists *E. pulcherrima* was discovered in the early part of the 18th century by an unknown traveler. Nothing came of his discovery, however, as the plant was not distributed until many years later when a Mr. Poinsette of Charleston, S. C., rediscovered it while traveling in tropical Mexico. Early recognizing the value of his discovery he communicated with Robert Buist, at that time one of the most famous plantsmen in America, offering to sell the entire stock. Buist accepted the offer and immediately began to increase the number of plants. In a few years the stock was widely distributed and in the early seventies the so-called double varieties were introduced. Var. plenissima (Gardener's Chronicle, III., 5:17) has a double series of bracts with a larger head than the type. A single form known as Var. bracteata alba is now under cultivation at the Missouri Botanical Garden. The bracts are small, yellowish or dirty white in color. Probably of little value to the trade.

The plant has certain medicinal properties that are infrequently utilized in practice. Instances have been reported of persons being poisoned while handling the plants especially when contact was had with the sap. (Garden and Forest, IV., 104). In Mexico it is commonly designated "Flor de Nache Buena" or "Flower of Christmas Eve."

CULTURAL NOTES

The following cultural notes were supplied by Mr. August Koch, a gardener at the Missouri Botanical Garden. — The cultivation of poinsettias is not especially difficult if the grower uses a little care. When the plants are through flowering I set them aside and gradually withhold water until they are quite dry. As soon as the foliage has fallen, which occurs when the water is withheld I cut back the stems to within eighteen inches of the pots. This much is left in order to secure sufficient wood for cuttings later on. The plants are left in a dormant condition until it is desired to start them in the spring. I usually set them out of doors in a sunny situation about the middle of May and water thoroughly. The young growths appear soon after and when about three inches long are ready for the cutting bench. Cut close to the stem, with a heel. Place them in clean sand in an air-tight case, and water thoroughly. Shade is then given as sunlight must be kept from the tender cuttings. Bottom heat is not necessary, but the temperature should be from 75° to 80°. After three or four days a little ventilation is given, otherwise the cuttings are liable to rot. In about three weeks the cuttings should be well rooted. I have had as high as 98 per cent strike roots — never less than 93 per cent.

The first potting should be in a soil that is not too heavy. A mixture of ¾ sod soil and ¼ fertilizer is very good. As soon as the pots are filled with roots the plants are shifted until the size desired is attained. Plants in 6-in. pots and dwarfed plants in pans are conveniently handled. It is very necessary to feed the plants, which may be done by using liquid cow manure, bone meal, or by top dressing with cow manure. The fertilizers are given after the plants are shifted the last time, and then not until the roots have filled the pots.

CUT BLOOMS

It is said that the bracts will last a long time if the cut parts are steeped in boiling water as soon as cut. This prevents the loss of sap that takes place when the stem is cut. Searing the cut with a hot iron has also been employed but is more inconvenient. (Orpet, Garden and Forest.)

F. K. Balthis

"A long pull, a strong pull and a pull all together," —for advertiser, buyer and us, means success for all.

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

Carnation Victory has again demonstrated its superiority in the Boston estimation. And Boston's conservatism in such matters makes the indorsement all the more significant.

A Catholic clergyman in Waltham, Mass., has created a commotion among the local florists by prohibiting the use of flowers at funerals. It goes without saying that his efforts will be fruitless. But it is just possible that the universal abandonment of the practice of displaying flowers at funerals might ultimately benefit the florists' industry.

The proposed law now before the Massachusetts legislature for the abatement of the moth nuisance is founded on the principle that every individual shall be held responsible for conditions existing on his property and insists that he shall do his duty towards his neighbors by keeping his premises clear of the nuisance. This seems just and reasonable. Put it through.

Offering premiums to the school children for collecting brown-tail moth nests, as practiced in some New England towns, is unquestionably a very practical method of getting the work done. There is, however, one serious drawback. The browntail has a habit of locating its nest at the outermost tip of the highest branch. We hope the boys' enthusiasm and industry will not result in any broken necks.

The agitation among the rural folk against the State appropriation for Amherst Agricultural College seems a "tempest in a tea-pot." To impartial observers it appears that the benefits conferred upon the farming interests by such institutions as the Agricultural College far outweigh any possible injury resulting from the sale of a few vegetables or flowers by the institution. The college authorities are not at all likely to intentionally do harm to the tillers of the soil. Get together, gentlemen, and fix it up amicably among yourselves.

There is of late some discussion in German horticultural papers about lily-of-the-valley forcing, and several first-class growers have given their experiences, contending that if the pips are put overnight in warm water — perhaps in barrels near the boilers or on steam pipes — before being planted in the benches, they force about five days quicker than those not so treated, and produce better developed flowers. We think there would be no risk to our growers in trying this method and comparing the results with pips put in at the same time and treated in the usual way. We shall be pleased to publish the results of any experiments along these lines.

Reports from the various departments of horticultural activity indicate an already lively movement in the seed trade and a probability of unprecedented business in ornamental nursery stock and herbaceous perennials for the coming season. On the other hand the cut flower situation seems to be a bit disappointing both in the size of the product and the extent of the demand. Now is the time, recognized as the height of the fashionable season, when flowers should find their most profitable market. The season is longer than the average, however, on account of a late Easter and there is yet time for an old-fashioned spurt. We hope the flower people will get it and make good use of it. The plant-growing specialist has straight sailing until Easter, with prospects encouraging as usual.

The fusion of the flower-market trade exhibition with that of the Massachusetts Horticultural Society, as described in our news notes, seems to proclaim the beginning of a new era in Boston horticulture. Whatever the causes may have been, it is true that, for many years, commercial floricultural interests and this great society have seemed to pursue divergent paths, and the progress of the one and the influence of the other have thus been woefully retarded. For some time past, the tendency towards coöperation has been unmistakable and it now discloses a future full of promise. The unanimity of sentiment so rapidly maturing brings to the society the enthusiastic support of an element peculiarly robust and virile and assures to the horticulturists, not only of this section, but the entire country, the inestimable advantages that are inseparable from well-directed organization.

"Is there room for another paper?" inquired the timorous one.

HORTICULTURE is demonstrating the truth of the old saying that "*There's always room at the top.*"

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

HORTICULTURE is all right and will I hope receive the recognition it deserves at the hands of the subscribing public. — A. M. H.

Inclosed herewith please find my humble subscription to your very fine journal of HORTICULTURE. It is all right. — A. J. S.

Inclosed find $1 for HORTICULTURE, with the hope that it will maintain the standard of excellence that has characterized its life thus far. — E. W. B.

Accept my congratulations and best wishes to your paper HORTICULTURE, which I read with great interest. I like it better every week. Wishing you success, I remain, Yours truly, G. B.

HORTICULTURE seems to be the paper we have long been looking for. It covers the field as no other trade-paper has. I am more than pleased with it.

Very truly yours,
W. B. A.

After Adjournment

Yes, thank you, we are growing satisfactorily. The rapid daily growth of HORTICULTURE'S subscription list gives us the best kind of evidence that the paper has the approval of the American horticultural profession.

The story of the sale of the famous Variegated Lawson makes a healthy growth as it goes its rounds. At latest report, Mr. Pierson is "a millionaire many times over." Glad to hear it and hope to have the honor of his distinguished consideration.

That hoary-headed old yarn about the "See You Later" inscription on a funeral design, has just reached the *Boston Traveler*. The *Traveler* runs an interesting department each day, giving extracts from its columns of seventy-five years ago. Perhaps this S. Y. L. item slipped out of that column by mistake.

A peculiar pink was found last week in a Bath, Me., greenhouse. It bore the three shades of red, white, and pink and was one of the most perfect specimens of floriculture that has ever been raised at the greenhouses. It has been classed as one of the freakiest freaks ever grown in that vicinity. — *Boston Globe.*

Send it to a millionaire, quick.

The Worcester (Mass.) *Telegram* is at it again. This time it is a fearful tale of "the cannibal tree that swallows a man in its horrible embrace." The instant a man touches the pistils of the monstrous plant, the leaves fly together like a trap, crushing the life out of the intruder. "Angels and ministers of grace defend us!" The authority given for this is a man named Johnson, "considered an expert in horticulture." Next!

FIANCEE AT CHICAGO CARNATION SHOW.

The *Boston Traveler* has come to the conclusion that never before in the history of New York society has there been such an extravagant use of flowers as during the present season. Like Mr. Muldoon and the "mineral wather" the *Traveler* has it on competent authority that the New Yorkers have been "obliged to draw upon the conservatories of dealers as far south as Atlanta." Wow!

"The discovery of a means of metamorphosing radishes into potatoes has been made in so solemn a place as the Academy of Sciences, Paris," says *The American Inventor*. "M. Molliard takes a very young radish, 'Pasteurizes' it in a certain way, and it grows up into a fine potato. More scientifically, the young radish is cultivated in a glass retort, after a process invented by Pasteur, in a concentrated solution of glucose. Starch then develops plentifully in the cells of the radish, which swells out, loses its pepperiness, and acquires practically the consistence, flavor, and especially the nutritive properties of the potato."

Take them away. The old-fashioned "spud" for us, if you please.

It must be rather disheartening to Congressman Roberts, who wants the government to make a big appropriation for destroying moths in Massachusetts, to have the people of Roxbury suddenly conclude that the situation, so far as their town is concerned, can be easily handled without government or state aid. Assuming that an ounce of prevention is worth a pound of cure, Roxbury folk are going to destroy the nests, thousands of which may now be seen on the trees. If each community would tackle this moth problem in a determined and systematic manner instead of waiting for state or national aid, in a few years the plague of the gypsy and brown-tail would be a matter of tradition. — *Springfield Union.*

Yes, if they would. But they will not. Even in communities where the majority are willing to do the fair thing, there can be found men who will not lift a finger to clear their trees, or allow others to do it. Such cases must be met by a legal process, allowing the public to protect itself. Where communities do the work thoroughly there will be no need of public outlay, but there are places enough where an appropriation can be applied, and the work at Roxbury will not turn Mr. Roberts from his purpose of obtaining government assistance. — *Lynn Item.*

The *Lynn Item* is right, as usual. Lynn knows how it is; Springfield doesn't, but she will.

NEWS OF THE CLUBS AND SOCIETIES

MASSACHUSETTS HORTICULTURAL SOCIETY

The February exhibition of the Massachusetts Horticultural Society combined with the special annual shows of the two flower markets made a splendid display and drew a large attendance at Horticultural Hall, last Saturday. The usal groups of specimen primulas and Lorraine begonias attested the skill of the private gardeners, and the expert commercial growers were represented by a brilliant profusion of carnations and violets.

The prizes for Primula sinensis were won by E. J. Mitton, George F. Fabyan, and Mrs. J. L. Gardner respectively, in order named; for Primula stellata by E. A. Clark and Mrs. J. L. Gardner; for Primula obconica by George F. Fabyan, twice, and Mrs. J. L. Gardner; and for Begonia Gloire de Lorraine, by M. T. Stevens and E. A. Clark.

Other displays in the plant section were some fine lachenalias from Harvard Botanic Garden, well-grown commercial cyclamen from A. M. Davenport, primulas from Mrs. A. W. Blake, E. W. Breed, E. A. Clark, Botanic Garden and Francis Skinner, and Cypripedium Dauthieri from A. W. Blake; also the following which received special recognition: Dendrobium Ainsworthii by W. C. Rust, gardener to Dr. C. G. Weld, certificate of merit for superior cultivation.

Lælia Mrs. M. Gratrix (L. Cinnabar ina×L. Digbyana) a beautiful orange colored flower with fringed lip, by J. E. Rothwell, certificate of merit; Lælio-Cattleya Adolphus (L. cinnabarina×C. Acklandiæ) by J. E. Rothwell, honorable mention.

Judged by quality and advanced selection, the carnation display was the finest ever seen in Boston. The highest honor won was a silver medal by Victory of which Alex. Guttman of New York showed a fine vase. Certificates of merit were awarded to seedling Helen Goddard shown by S. J. Goddard, Red Lawson from W. J. Palmer & Son and seedlings Aristocrat and Afterglow from R. Witterstaetter. Honorable mention was given to seedling scarlet from E. N. Pierce & Son, and seedling Mikado from M. A. Patten. The special prize offered by HORTICULTURE for vase of one hundred blooms arranged with other foliage was won by Patten & Co., the contents of the vase being The Belle, Dorothy Whitney and Mrs. M. A. Patten with Pierson fern fronds and Asparagus Sprengeri.

As showing in some degree the relative importance of the various commercial carnations in this section it may be of interest to know the number of growers staging each. Enchantress was staged by Patten, Fisher, Goddard, Stevens, Reuter, Backer and Pierce; Mrs. M. A. Patten by Patten, Nicholson, Fisher, Stevens, Goddard and Backer; Lawson by Fisher, Nicholson, Reuter, Small and Goddard; Harry Fenn by Nicholson, Patten, Backer and Stevens; Fair Maid by Stevens, Roper, Small, and Capers; Flamingo by Fisher, Backer and Dickerman; Lady Bountiful by Fisher and Patten; Nelson Fisher by Fisher and Patten; Dorothy Whitney by Patten and Backer; Gov. Wolcott by Stevens; Harlowarden by Reuter; Belle by Pattens; Eldorado by Backer; Vesper by Reuter; Judge Hinsdale by Pierce; Her Majesty by Capers; White Lawson by Dickerman. F. R. Pierson Co., showed Variegated Lawson and Winsor; A. Roper showed Chester Roper; Patten & Co. showed the Pink Patten, and Backer & Co., a yellow seedling from Lawson×Eldorado.

Prizes were awarded as folows: 25 White — Peter Fisher, Lady Bountiful; Patten & Co., Lady Bountiful; H A. Stevens, Gov. Wolcott. 25 Scarlet — Backer & Co., Flamingo, C. E. Dickerman, Flamingo. 25 light pink — Patten & Co., Enchantress; S. J. Goddard, ditto; H. A. Stevens, ditto. 25 dark pink — William Nicholson, Lawson; L. E. Small, Lawson; Patten & Co., Nelson Fisher. 25 crimson — William Nicholson, Harry Fenn; Patten & Co., ditto; Backer & Co., ditto. 25 variegated — William Nicholson, Mrs. M. A. Patten; Patten & Co., ditto; Peter Fisher, ditto. 25 yellow — Patten & Co., Dorothy Whitney; Backer & Co., ditto; Backer & Co., Eldorado.

The special prizes of the Boston Cooperative Flower Growers' Association were awarded as follows:

50 white — Peter Fisher, Lady Bountiful; Patten & Co., ditto. 50 scarlet — Peter Fisher, Flamingo. 50 light pink — Peter Fisher, Enchantress; S. J. Reuter, ditto. 50 dark pink — Peter Fisher, Nelson Fisher; S. J. Reuter, Lawson. 50 crimson — Peter Fisher, seedling No. 113 (Maceo×Lawson); S. J. Reuter, Harlowarden. 50 variegated — Patten & Co., Mrs. M. A. Patten; Peter Fisher, ditto. 50 yellow — Patten & Co., Dorothy Whitney. 100 blooms not less than six varieties — William Nicholson.

The special prizes of the Boston Cooperative Flower Market were awarded as follows; 50 Fair Maid — H. A. Stevens Co., A. Roper. 50 white — C. E. Dickerman, White Lawson; L. E. Small, seedling No. 3. Best seedling not in commerce — Patten & Co.. Mikado. Violets; 100 Princess of Wales — H. F. Woods, William Sim. 100 Lady Hume Campbell — H. F. Woods, L. E. Small. 25 roses other than American Beauty — Waban Rose Conservatories. Wellesley. Sweet Peas; 100 spikes — William Sim, Malcolm Orr. Mignonette; 25 spikes — William Nicholson, A. H. Fewkes.

The Horticultural Society's violet prizes were awarded as follows: 100 blooms, double — Malcolm Orr, L. E. Small, A. F. Coolidge. 100 blooms, single — William Sim, J. H. White, M. B. Dallachie. Other violet contributors were A. M. Davenport, M. T. Stevens, N. F. Comley and Edward Wood. Joseph Clark showed some good wall flowers and J. McFarland a bunch of fine lily of the valley.

In the fruit and vegetable department there was a good display of radishes, cucumbers, lettuce, etc., but the most admired exhibit was a plate of superb mushrooms grown from pure culture spawn by H. A. Stevens Co.

NEW YORK FLORISTS' CLUB

The meeting on Monday evening, February 13, was one of the most remarkable in the club's history. Over two hundred were in attendance and all were brimfull of enthusiasm. A superb exhibition of carnations added to the brilliancy imparted by the large number of young, beautiful, and talented ladies present. Because of these extra attractions the routine business of the club was passed over rapidly and several matters were deferred until the next meeting. Five new members were elected and six more were proposed.

Mr. William Weber of Oakland presented the instructive paper on cutting bench fungus or stem rot, which we present in this issue, and after some appreciative comments a unanimous vote of thanks was tendered to its author.

The social features of the affair were exceedingly enjoyable and well carried out. The various departments of the house committee's special work under the supervision of its efficient chairman, J. B. Nugent, Jr., were conducted with one object in view, — the comfort and pleasure of everybody — and with unparalleled success. John Birnie and the bag-pipes, the Misses Birnie and friends contributed songs and dances, and even Mr. Nugent was himself prevailed upon to give a couple of sweet songs. The outer room was efficiently managed by Messrs. Jos. Manda and Robert Koehne.

The question box is to be made a leading feature of future meetings. The query, "What are the most valuable characteristics in a carnation, a rose, a chrysanthemum, and a fern?" has been referred to John Birnie, Harry O. May, William Duckham, and John Scott respectively with request to reply at the next meeting of the club.

The following named exhibits were made and a vote of thanks was recorded for their donors. F. R. Pierson Co., Carnations — Winsor, Daheim, Mrs. M. A. Patten, Variegated Lawson, Enchantress and Flamingo; Max Weiman-White Lawson and Max Weiman; Cottage Gardens, Lieut. Peary, Robert Craig, President, No. 222, No. 2621, and a number of seedlings; John Reimels, Variegated Lawson and No. 31; R. C. Pye, Enchantress, Sport; Patten & Co.. Mikado, J. N. May, Phyllis; J. L. Dillon, Crisis; Young & Nugent, cape jessamines; Peter Bisset, seedling rose; John E. Haines, carnations; Sea Cliff Nursery, carnation Long Island Beauty; H. Weber & Son, My Maryland, and No. 68; W. J. Palmer & Co., Red Lawson; Guttman & Weber, Victory.

PITTSBURG AND ALLEGHANY FLORISTS' AND GARDENERS' CLUB

At the meeting of the Pittsburg and Allegheny Florists' and Gardeners' Club on February 7, the resignation of President William Falconer was accepted, and as a mark of its appreciation of his services the club presented Mr. Falconer a handsome silver coffee set. It was with great regret that the society gave up the leader who organized the society in the first place and who has always been its head. T. P. Langhans was elected to the presidency and the other officers were unanimously re-elected, as follows: Vice-president, E. C. Reineman; secretary, H. P. Joslin of Ben Avon; treasurer, Fred Burki.

The special subject for discussion was the carnation, and there were on exhibition many handsome exhibits from local and distant growers.

Following is the address of President-elect T. P. Langhans.

Gentlemen: —

I am deeply sensible of the compliment you pay me by your unanimous

choice of me to be your chairman. I appreciate the confidence you place in me and esteem it no small honor that you show me. Accept my hearty thanks. The office I accept with some hesitation and misgivings, because I am wholly inexperienced and am afraid I shall do but poorly in comparison with my worthy predecessor. Lend me your friendly assistance and support. On my part, I promise to do my best.

The club has been highly successful, whether viewed from an educational, commercial, or social standpoint. We have come together and frankly told each other what we knew, or thought we knew, about our art and our business; we have made exhibitions of flowers, plants, florists' and gardeners' material, interesting in themselves and of great educational value to our profession. I am certain that no one who has attended our meetings can truthfully say he has learned nothing at them, and received no benefit from them. Let us continue to conduct the club just as we have been doing with the same frank discussions and the same interesting exhibitions. Our efforts to make the club a success will surely redound to the individual advancement and profit of each member. The club enters the year under favorable and encouraging circumstances. Our secretary's report shows an enrollment of 153 members, and the finances are in good condition.

The club's present flourishing condition and its well-attended meetings are largely due to the untiring efforts of the retiring president. He won our respect and admiration when he presided at our meetings, and kept alive the interest in them, but even more did we respect and admire him when, as an earnest club member and enthusiast in his chosen life's calling, he gave us the benefit of his deep learning and acquirements and his extensive experience. We have learned to appreciate his excellent qualities of head and heart.

Mr. Falconer, I know I voice the sentiment of every member when I express the gratitude we feel toward you and our regret to have you vacate the chair. The members desire me to thank you for your valuable services to the club, and to show their appreciation in tangible form have delegated me to present to you this sterling coffee service, and thus have you constantly drinking to our health and the success of this society. Accept it as coming from your sincere friends, with their best wishes for your future happiness and well-being.

VERMONT HORTICULTURAL SOCIETY

The eighth annual meeting of the Vermont Horticultural Society opened at Vergennes, February 9. Mayor F. C. Phelps gave an address of welcome, and a response was made by President George H. Terrill of Morrisville. The reports of the secretary and treasurer were read and accepted. The first number on the programme was "Suggestions for Planting and Caring for Young Orchards," by A. M. Vaughan of Randolph. He spoke from his own experience and said care should be exercised in preparing the ground as much as for any other crop.

T. L. Kinney of South Hero followed with an address on "Some Pointers on Growing and Marketing Fruit." He said that careful picking and sorting are necessary to get the best prices. Every fruit grower should have a storehouse.

W. T. Marcoum of the central experiment station at Ottawa gave an instructive address on the "Cherry." To overcome the difficulty of raising cherries in a cold climate he advised introducing the dwarf varieties, as they are much harder. The best of the larger varieties are Early Richmond, Montmorency, English Morello.

At the evening session Mrs. Mary A. Smith of Morrisville read an interesting paper on "Horticulture and Its Relation to the Home." H. W. Heath of the Vermont University read two selections, Professor L. H. Bailey of Cornell University gave an able address on "Horticulture as Compared with Other Professions," and Professor L. R. Jones of Burlington spoke on "Some Observations of European Horticulture."

The first number on the programme for the second day was a paper on "Market Gardening" by L. H. Sheldon of Fair Haven. Mr. Sheldon advocates advertising in the newspapers and says that in his town they find it pays.

G. E. Hunt of Rutland followed with an instructive and interesting paper on "The Growing of Plants and Cut Flowers."

George W. Perry of Chester spoke upon "Sunshine," and its part in the production of the best fruit.

"Small Fruits for Home Use and for the Market" was the subject of a paper read by Mrs. Etta LePage of Barre, which contained helpful hints and suggestions.

Professor Frank A. Waugh of Amherst read an able and interesting paper on "The Advancement Made in Horticulture for the Last Fifty Years." W. Stuart of Burlington followed with an excellent paper on "Suggestions on the Preparation and Use of Fungicides," in which he called attention to the better methods in the preparation of fungicides, especially of Bordeaux mixture, the use of pumps capable of developing sufficient pressure to make a fine spray, and a clearer idea of diseases, and the best remedy for their eradication.

In the afternoon President G. H. Terrill gave an address. He firmly believed that in the near future by the influence of this association, the press, the experiment station, the board of agriculture, and last but not least the Grange a work is being done that will turn the best young men back to agricultural pursuits and so build up the State that emigration will flow in, instead of ebbing away.

The following officers were elected: President, E. S. Brigham of St. Albans; secretary, William Stuart of Burlington; treasurer, A. M. Vaughan of Randolph; auditor, T. L. Kinney of South Hero.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS

At a meeting of the Executive committee held in Springfield, Mass., January 18th last, it was voted to hold the annual convention at Buffalo, N. Y., June 28, 29, 30, and that Niagara Falls and Rochester might also receive a visit.

KENTUCKY SOCIETY OF FLORISTS

The meeting of the Kentucky Society of Florists last Tuesday night was a very pleasing one, although the attendance wasn't any too large. After the meeting which was held at Mr. Wettle's residence, lunch was served, and a very good time prevailed, for which a vote of thanks was given.

Tuesday March 7, has been designated "Carnation and Rose Night," and anyone having anything in the way of new or recent varieties will greatly favor us by sending a few blooms to the secretary.

The Kentucky Society of Florists,
Per FRED L. SCHULZ, *Sec'y*,
644 Fourth Ave., Louisville

HUNTINGTON HORTICULTURAL AND AGRICULTURAL SOCIETY

The above society will hold its annual Carnation Exhibition in the Court Room, Huntington, N. Y., on Tuesday evening, February 21. Doors will open at 7 o'clock and the admission will be free. Everybody is invited. Certificates, diplomas and prize cards will be awarded as premiums in the following classes:

CARNATIONS

I. 25 Thomas W. Lawson or any other dark pink.
II. 25 Enchantress or any other light pink.
III. 25 White.
IV. 25 Scarlet.
V. 25 Crimson.
VI. 25 Any other variety.
VII. 25 Any variety not disseminated.

ROSES

VIII. 12 Teas.
IX. 12 Any other variety.

VIOLETS

X. 100 Double.
XI. 100 Single.

Well grown specimens of any winter flowering or foliage plants will be recognized according to merit.

For judging carnations the American Carnation Society's scale of points will be used,

EXHIBITION COMMITTEE,
Silas Ott,
Walter Shaw,
A. H. Funnell, *Secretary.*

NEW LONDON HORTICULTURAL SOCIETY

The New London (Conn.) Horticultural Society, organized last September has already passed the hundred mark in membership, and so widespread is the enthusiasm over the institution that it is proposed to widen its scope by changing the name to that of the Eastern Connecticut Horticultural Society.

ANNUAL DINNER OF THE DUTCHESS COUNTY HORTICULTURAL SOCIETY

This interesting event took place at the Nelson House, Poughkeepsie, N. Y., on the evening of February 9th. The addresses were all of the high order of eloquence characteristic of the occasion in the past.

NOTES

The lecture at Horticultural Hall, Boston, on Saturday, February 11, was by Prof. F. A. Waugh of Amherst Agricultural College, his subject being, "Dwarf Fruit Trees; Their uses, propagation, and management." On February 18, Dr. George T. Moore of Washington will deliver a lecture on "Bacteria as Fertilizers," with stereopticon illustrations.

W. W. Rawson of Arlington, Mass., delivered an address before the Worcester County Horticultural Society last week.

Mr. Rawson spoke on the kinds of fertilizers in use, their proper application to the soil, their ingredients, and the different crops that benefit by their use. He said that fertilizers were not used so much in greenhouses as on land outside, as the florists fear to experiment with some of them. Ground bone is one of the best. Some are not good because not soluble. Moisture in the soil is necessary for the best results from some fertilizers. The uncertainty of their results makes the fertilizers undesirable sometimes.

STEM ROT

A paper read before the New York Florists' Club on February 13th, 1905, by Wm. Weber.

In accepting the invitation of your secretary to read a paper here to-night, I judged that in the absence of a definite subject being assigned to me, I was free to take up any part or parts I might choose. I have therefore sought to avoid rehearsing the old story beginning with the taking of the cuttings, and winding up with their ultimate end when the touch is applied somewhat more than a year later.

In attempting to discuss the subject of cutting bench fungus or stem rot, it is not my intention or wish to lock horns with any of our brethren who are studying these subjects from a scientific standpoint. We need the aid of the experiment stations and scientific men, and we have been benefited much as a result of their labors and we still look forward to aid in disposing of the various vexing problems which are constantly besetting us, but I believe that our friends, the professors, being only human, are apt to err just as we ordinary growers are apt to do.

Professor Hasselbring, in his paper read recently before the American Carnation Society in session at Chicago, stated that fungi in every instance are the prime causes of disease, not the condition. Now I doubt if any successful grower who has given the subject any serious consideration will corroborate Professor Hasselbring's statement. If he told us that typhoid, smallpox, etc., were the first causes and not the result of conditions he would be arguing along the same lines, but let us see how this theory stands when compared with what I believe are the actual facts in the case.

We will start at the cutting bench, say with a full bench of sound, healthy cuttings recently placed in new sand. I maintain the idea that during the rooting process cuttings not only do not require direct sunlight, but even strong light such as will penetrate ordinary newspapers with the sun shining directly upon it is far from beneficial. You will see at a glance then, that I am an ardent adherent of the north-side propagating house for carnations.

But to illustrate why fungus appear, let us imagine our bench of cuttings is in a house admitting the sun's rays at all hours, but especially during mid-day. During cloudy weather it is not difficult to maintain an even temperature of about 50 to 60 degrees, but during bright weather it is not so easy. Of course the glass may be shaded, but much heat will generate just the same, and it is quite easy for the temperature to go above the danger point, which is 60 to 65 degrees, depending somewhat upon the conditions.

Under the influence of strong light and added heat, plants throw off the moisture collected during the night, and a wilting ensues. This process is equivalent to exercise in the animal family, but we don't expect infants to take strong nourishment and vigorous exercise, and we must act accordingly with our cuttings. When we give heat and light in sufficient quantities to cause this wilting process, evaporation takes place out of all proportion to the cutting's vitality and ability to withstand the drain. One good experience like this will start the ball rolling. Cuttings here and there or whole batches have a shriveled appearance, and refuse to thoroughly freshen up; it will not be long then before an examination will disclose the presence of fungus around the stems which will kill the cuttings quickly, or slowly, according to the temperature maintained.

We advocate the north-side propagating house because of its easier management; the direct rays of the sun are kept out during the most of the propagating season, but sufficient light is admitted for all purposes. The only time we experience difficulty at all is when the high south partition or wall no longer excludes the sun's ray's, when greater vigilance is necessary. However, even then the sun's rays strike the glass at a very extreme angle and we do not suffer in proportion as we used to before we adopted the north side.

We have found it unnecessary to have clear, sharp sand; in fact we consider that a distinct drawback. The inability to secure sharp sand in our section soon taught us this lesson. We all know that for the first few weeks the cutting is obliged to subsist upon its own vitality, and while the process of rooting is going on, a gradual hardening of the stem takes place, and if allowed to remain in sharp sand long after they become rooted, we say they are woody; this is a frequent cause for stem rot developing in the plants later on, and usually produces the slow process of rotting unless conditions very favorable to the growth of fungi exist, when wholesale dying will result.

This does not occur with cuttings rooted in sand containing some loam, decayed leaves, twigs, etc., such as we find along the banks of any small stream which overflows at various times of the year, depositing the sand, leaves, twigs, etc., mixed with some of the fat of the land, a very fine loam.

The nourishment contained in sand of this kind while very mild, is very nourishing to young cuttings just putting out their first tiny rootlets, and from this moment on they begin to stop hardening at the stem, and grow, instead of getting woody and laying the foundation for various stages of stem rot to crop out later on.

With our system of propagation, it takes about six weeks during midwinter to thoroughly root a batch of cuttings, and during this time they are watered about six times, four times during the first two weeks. After they are calloused they are kept increasingly dryer until they are quite dry when ready to plant in soil or pot up. This drying process we find necessary to counteract the absence of sunlight.

I do not wish to infer that good results are not obtainable in a propagating house admitting the direct rays of the sun, but the point I would make is that the chances for unfavorable conditions to arise, are much greater as compared with the north-side house.

Any check sustained by the plants after being removed from the cutting bench, such as getting extremely dry

J. A. PETERSON AND HIS HOUSE OF LORRAINES, CINCINNATI

in flats or pots, will result in producing that hard woody condition in the base of the plant; and every grower knows how plants so treated will at best die a lingering death. Many plants more or less affected in this way find their way into the field, which is responsible for much of the stem rot found there. Deep planting and imperfect drainage are also large contributors to stem rot.

A couple of years ago we began our field planting as is our custom, about May 15. The soil was quite dry, but there were indications of rain; however, the rain did not come, and on the third day, we were obliged to water the plants by hand. The bright sun and a strong wind, however, had already sapped out all of the moisture the plants could muster, consequently quite a few never revived, some only partially revived, and others kept dying from time to time throughout the summer, and even after they were housed. Perhaps a week later we had plenty of rain, but those planted in the dry ground without being watered until the third day kept on dying just the same, while those planted after the rain, and those watered as they were planted, did not suffer.

Just a word concerning the theory advanced by Professor Hasselbring that the fungus enters the plants through the roots. I have never yet been led to believe this could be the case, and instead, I have invariably noticed that the fungus operates upon the surface of the sand or soil, and any dead roots are the result of curtailed breathing of the plant through a loss of foliage. The same thing happens if we use the pruning shears too freely upon our roses or other growing plants. A portion of the roots die through a lack of something to do.

We have all noticed young plants and even old plants carried off by quick rot just at the surface of the soil, and some time later see numerous small new growths coming out of the old stem, indicating that the old root is still alive, and doing away with the idea that the disease enters the plant by way of the roots. The slow form of stem rot would indeed give this impression, but knowing the facts as already stated, I believe this view to be erroneous. Cutting bench fungus and stem rot will cease when the conditions favoring its growth cease, and not before.

It is true that some varieties are carried off much quicker than others, but this does not indicate that we may hope for varieties which will remain immune under conditions favorable to the growth of fungi, but rather that those varieties of a rather soft or fleshy nature such as Daybreak, Uncle John, Flora Hill, Enchantress, and others similarly constituted need special care. As a rule such varieties must be kept a little dryer than others of a more firm and solid growth.

While there is no hope of ridding a plant of the disease when once attacked, I know that in the case of valuable plants, such as first year seedlings, cuttings may be taken with entire safety, providing the disease has not progressed too far. We can cite many illustrations of this kind.

We have also noticed that plants partially affected with stem rot have lived for months, and in the meantime, produced a partial crop of good blooms. We do not attribute this entirely to the resistant power of the plant to the disease, but rather to the absence of favorable conditions for the growth of the fungus.

I am willing to go on record as differing with Professor Hasselbring that the fungi are the prime cause of disease. In my humble opinion they are the effect, and conditions unfavorable to plant life and favorable to the rapid growth of the fungi are the immediate causes. In other words, the fungi bear the same relation to vegetable matter that the green bottle fly and its larva does to carrion — nature's method of disposing of dead matter where sufficient moisture and heat exist to make the growth of these organisms possible.

AMERICAN CARNATION SOCIETY

Carnations Registered

By M. Winandy, Chicago, Ill. — Lizzie McKey; color, scarlet red, size three inches in diameter, length of stem eighteen to twenty inches, strong and erect.

By the Indianapolis Flower and Plant Co., Indianapolis, Ind. — Coral; color, peach blossom, very bright and showy, size three and one-half inches, slightly fringed, very full; good strong calyx; vigorous growth and continuous bloomer. Allspice; color, white, heavily striped with red and petals edged with red; size three and one-half inches, very full, heavily built and unusually fragrant; very prolific, strong, quick, continuous grower. Candace; color, pink, shade brighter than Lawson, size three and one-quarter inches, very round, well-formed flower; an early and extremely heavy producer throughout the season; quick grower.

ALBERT M. HERR, *Secretary.*

NASSAU COUNTY HORTICULTURAL SOCIETY

The next meeting, March 1st, will be Carnation day. A box of cigars is offered by the president for the best vase of red and best vase of white carnations.

Meetings are held on the first Wednesday in each month at 2.30 P.M.

S. J. TREPESS, *Secretary.*

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

President J. C. Vaughan has appointed the following gentlemen State Vice-Presidents in addition to the list previously published:

DISTRICT OF COLUMBIA. — George H. Cooke, Washington.

KENTUCKY. — Fred Louis Schulz, Louisville.

PENNSYLVANIA. — W. Fred Burki, Bellevue.

WM. J. STEWART, *Secretary.*

GARDENERS' AND FLORISTS' CLUB OF BOSTON

W. W. Rawson will deliver a lecture at the next meeting of this club, February 21, at Horticultural Hall, his subject being, "The Increase in Productiveness of Greenhouses during the Past Twenty-Five Years." There will be a number of interesting exhibits and every gardener and florist within convenient distance should be present.

SITUATION WANTED — By first class all around man. A 1 vegetable grower, 15 years reference from former place. Address W. Care HORTICULTURE,
11 Hamilton Place, Boston.

OUTDOOR ART AND CRAFT

Messrs. August Rolker & Sons continue to be the American agents for August Haerens, Belgium, grower of palms, azaleas, etc. The old firm of Haerens Bros. having expired by limitation, August Haerens continues the business on the old place. It was Mr. August Haerens who visited this country six years in succession and built up the American business of Haerens Bros.

R. Inglis, industrial and agricultural agent of the Gulf & Ship Island Railroad, who is organizing truck-growing associations along the line of that road in Mississippi, states that 4000 bushels of seed Irish potatoes will be used by planters along the Gulf & Ship Island route this year in the effort to diversify their crops. He estimates that, under fair conditions, this amount of seed should yield from 200 to 300 carloads of potatoes for shipment to the Northern and Eastern markets.

Haverhill, Mass., is fully aroused in regard to the gypsy and brown-tail moths. Clubs, churches, societies, city government, and individuals are all showing a determination that means business. The city council has appropriated $1000 for the work, and a delegate meeting of thirty-five women's literary clubs has voted to assess each club the sum of $5, $100 of which will be used to purchase premiums for the schools where pupils succeed in collecting the largest number of brown-tail nests. Individual prizes will also be offered for collecting the largest number.

Representative Lovering has introduced a bill in Congress to prohibit interstate transportation of insect pests and the use of the United States mails for that purpose. It provides "that no railroad, steamboat, express, stage, or other transportation company shall transport from one state or territory into any other state or territory the gypsy moth, browntail moth, leopard moth, plum curculio, hop-plant louse, or any of them in a live state, or other insect in a live state which is notoriously injurious to cultivated crops or trees, except when shipped for scientific purposes under the regulations hereinafter prescribed." Removal of the objectionable insects by any person from one state to another is also prohibited.

Any person knowingly mailing or receiving from the mails a package of the class specified for the purpose of circulating or disposing of its contents shall be subject to a fine of not more than $5,000, or imprisonment at hard labor not more than five years, for each offence, or both, at the discretion of the court.

TREE PESTS IN NEWPORT

Bruce Butterton addressed the members of the Newport Horticultural Society at a recent meeting, on the San Jose scale. Mr. Butterton sketched this scourge of horticulture from its introduction into Newport some years ago until the present time, when it has attained proportions most alarming to those interested.

He urged the members to exert all their influence to have the legislature pass a measure whereby some one would be given authority to destroy nursery and other stock invested with this pest to such an extent that spraying or other methods would be unavailable, saying that, until this was done, there would be but little use in individuals taking precautions at the expense of much labor and money.

Mr. Butterton also spoke of his experience in combating the elm-leaf beetle. On the Berwind estate, which he has charge of, there are upwards of fifty elm trees averaging forty feet in height. With a medium-sized pump and sprayer he found it comparatively easy to rid these trees of the pest, thereby preserving the chief ornaments of the place. Mr. Butterton said he only accomplished what could be done by others if they persevered in the endeavor.

AMHERST AGRICULTURAL COLLEGE AND ITS NEEDS

In these days when advocates of the simple life are met with on every hand and it is generally acknowledged that farm labors and country pursuits are thoroughly admirable helps to a saner and more wholesome fashion of living, such a bill as that now before the Legislature to provide one hundred thousand dollars worth of much-needed improvements for the Massachusetts Agricultural College at Amherst, would seem sure to receive the cordial endorsement of all enlightened people. When the bill came up Friday morning last for discussion no opposition developed, to be sure. None the less, it is probable that this evil is merely postponed and that later, when the farmers and their representatives are given a hearing at Amherst, several of them will appear to oppose House Bill No. 325, introduced by Representative Jewett of Worcester, that new horticultural, botanical and entomoligical departments, new greenhouses and improved live stock, be provided for this excellent institution.

If the farmers are wise, however, they will think twice before opposing the growth of Amherst's Agricultural College. To place themselves in the attitude of critics towards this institution is merely to proclaim their own narrowness. Rather should they work with the college for the best interests of agriculture, — a cause which it has done much to promote. Even hampered as it has been by inadequate funds and a comparatively meagre equipment, this college has proved its right to existence. During the past year it has had nearly three hundred men receiving instruction, and that at absolutely no cost for tuition. Moreover, by reason of a system of self-help, it is here possible for a farmer's son of exceedingly cramped means to get a thoroughly valuable training in science.

It should not be thought, however, that only farmers' sons avail themselves of the opportunities of this college. Free as it is to all citizens of the United States, sons of men in various professions or wage-earning work, come here for an education. At present, the quarters for their accommodation are pitiably cramped. The exceedingly popular short-winter course has been compelled to set up a waiting list so inadequate are its facilities for instruction.

The situation of the college, on the top of a high hill, from which is to be seen the most beautiful mountain range in Massachusetts, is unsurpassed, and nowhere is the air finer or the conditions for a farm career more favorable. The life is simple and healthful. Chapel attendance is required, and every morning the lads at the "Farmers' College," as this institution is called in contradistinction from its purely academic neighbor in Amherst village, assemble for worship in the handsome granite chapel, which is almost the only really beautiful building on the campus. Drill is also required, this department being in charge of a distinguished West Pointer under whose supervision the students must undergo the discipline which care of their own rooms involves.

In short, Amherst Agricultural College is an institution which one has only to know about to approve. It is American and New England to the core. But it is more than either or both of these, — it is a humanizing force. For here lads are taught the dignity of that labor upon which Adam, the first gentleman, was engaged, and are made to understand that since nature is the kindly mother of every one of us we are all brethren. — *Boston Budget.*

AUGUST RÖLKER & SONS, *31 Barclay St., New York P. O. Box 752*

NEWPORT HORTICULTURAL SOCIETY.

Professor John Barlow, of the Rhode Island College of Agriculture and Mechanic Arts, lectured before the Newport Horticultural Society, on Wednesday evening last, on "Economic Insects," president James J. Sullivan in the chair. The meeting was well attended, and the lecture which was illustrated with lantern slides was listened to with close attention throughout. The lecturer illustrated many of the worst pests that gardeners and farmers have to contend with, telling of their various stages of development, how they are injurious, and how they can be controlled or destroyed. The formulæ for the destruction of these pests, as given by Professor Barlow, were in some parts new to many of those interested; but as he stated were used successfully at the experiment station.

We give a digest of the methods practised and adopted at the college for destroying garden pests.

Cabbage Butterfly. — This is an imported pest, thirty years in America. Butterfly, common white with black spots. Larvæ eat leaves. Most serious pest of this crop.

Treatment. — Cultural, remove all rubbish and thus kill winter cocoons. Spray with lead arsenate. For the destruction of this pest resin washes are useful, but are somewhat troublesome to prepare. Use all poison washes, when applied late in the season, with great care as they persist in the close heads.

Tomato Worm. — Beautiful moth and large green worm. This worm is often destroyed by parasites.

Treatment. — When numerous, spray with Paris green or lead arsenate before fruit ripens.

Coddling Moth. — Larvæ bore into young apple at blossom end, Has a partial brood in fall, and winters in cocoon in crevices of rough bark. These winter forms are destroyed in large numbers by woodpeckers.

Method of Control. — Only way is to put poison into the calyx of blossom before it closes. Young enter here and usually feed in the cup before entering the apple. Also destroy wormy apples.

Peach Borer. — Kills young trees. Worm enters tree near the root. When once in, the only way to kill is by thrusting a wire into the burrow. Some dig out, but this process injures the tree more than the other method. Protect trees from these pests by wrapping them in fine wire gauze, burlap, or thin veneer. This precaution will prevent the moth from reaching the tree, if the gauze or whatever is used is placed two or three inches below the surface of the ground. Another method, though less effective, is to wash the base of the tree with strong soap or lye.

Fall Web Worm. — These worms are destroyed by burning out the nest. It may often be removed bodily without injury to the tree.

Apple Tent Caterpillar. — Treatment as above. These worms leave nest to feed by day, hence burn early in the morning.

Currant Borer. — Larvæ of small moth bores in wood. Stems thus attacked will show wilting leaves in early summer. Cut out all such stems and burn them.

Elm Leaf Beetle. — Imported pest. Spray trees in summer with Paris green or lead arsenate. When the worms come down to pupate upon the trunks of the trees, kill with soap or caustic soda.

Rose Chafer. — Shake off beetles into a sheet. Spray with lead arsenate.

Plum Curculio. — Beetle, lays eggs under skin of young plums causing crescent shaped blemishes.

Treatment. — Shake off the beetles and plums into "Catcher," a big reversed umbrella-shaped affair of cloth. This must be done in early morning. Pears, apples, and cherries are also often injured by this pest.

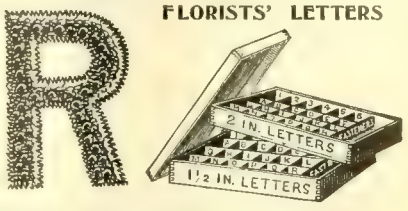
Apple Borer. — Attacks apple trees as the peach borer does peaches. Remedy the same.

Apple Aphis. — Green louse, causes "galls" on leaves, etc., and the fruit is spoiled. Spray with oil emulsion or whale-oil soap in lather.

San José Scale. — Only treatment is to spray in winter or early spring with lime, sulphur, salt wash, as the safest and best. In greenhouses, fumigate with hydro-eganine acid.

Oyster Shell Scale. — Spray while young are coming out in May or early June with whale-oil soap; one pound to six gallons of water.

Apple Maggot. — Caused by small fly. Only treatment known is to remove wormy apples to prevent flies from escaping from storage.



Brown-Tail Moth. — A serious pest that we will soon have to face in Rhode Island.

Treatment. — Spray with lead arsenate to kill the larvæ. Remove and burn the winter nests.

CUT FLOWER MARKET REPORTS

CHICAGO MARKET REPORT

The recent cold spell has been against a good market for some time and the week ending February 13 is no exception to this rule; in fact the market has contracted in values and receipts by a further decline on old mercury which reached 20 below zero on the government thermometers. This severe weather has considerably reduced the retail demands. There have been a number of shipments delivered to local commission men in a frozen condition, the bulk of which were violets. Delayed arrivals also were numerous. American Beauties, fancy and special grades, have advanced $10 per hundred, and it is on these that the demand cannot be filled. Brides and Bridesmaids are again coming in crop at the specialists'. The increased supply, however, shows considerable second quality, and active market. The call for Meteor and Liberty roses has been more pronounced than usual. The weak spot in the trade is in carnations; colored stock being mostly discriminated against. White carnations are in short proportions compared to total receipts and on these there is a good demand.

There have been sharp fluctuations in bulbous stock, tulips suffering most, this being occasioned by heavy receipts of La Reine. Quality is very common, only a few topfinished and novelties commanding the best published price. Violets are offered in less quantity and the interest turned largely to estimates for Monday and Tuesday's arrivals. There was a hope that St. Valentine's Day would give strength to the market on this item. Orchid supplies are regular, with demand steady. Their best sale is in the form of mixed boxes, these bringing from $5 to $25 per box. Chicago was favored with a big consignment of adiantum the past week at Winterson's, which was a timely help. Other green goods are equal to the call.

PHILADELPHIA MARKET REPORT

Business was fair the past week, the only very slow item being violets, especially the doubles. Beauty and Liberty roses were good, and not over plentiful; prices firm; but no advance over last week's quotations. Bridesmaids and Golden Gates have been in good supply, of extra fine quality, and going well. Brides also extra quality, but hung fire somewhat.

Carnations are still at their best as to quality, but there was hardly the snap that should have been in the market. Enchantress is still the leader where high grade; but poor stock of this is just as hard to sell as poor stock of any other. Good whites and reds are selling rather better in comparison than they were last week. Low grade white is movable, but poor stock of colored is hard to move at any price. There are a few cattleyas around,—about enough for the demand. Gardenias are plentiful and good; but the demand is rather light. Lily of the valley, Roman hyacinths, and narcissi in all sorts are in fair supply and an outlet is found for all that have come in at medium figures.

Lilac has moved in fair shape, especially first-class stock; but there has been considerable poor quality sent in lately. Myosotis was in good demand for St. Valentine's day. The violet market also got a boost.

Hadn't those twenty-eight violet growers at Rhinebeck better pause a bit before putting up the contemplated additions? Overdoing the market should be made a high crime and misdemeanor. It is ruination to all concerned. Get together! Get together! Not only violet growers, but everybody! Stop overdoing!!

BOSTON MARKET REPORT

Trade is decidedly improved this week. The supply of flowers generally has not decreased any and the healthier market is entirely attributable to the better demand. Very little, if any change in prices has taken place, although it would be fully in keeping with past seasons if, now, in the very height of the winter season, a stiffening up should be experienced. The grower, who is not succeeding in swinging the balance onto the favorable side of the ledger now, has good cause for apprehension as, after one of the steadiest winters on record, warm days with abundant sunlight and the consequent profuse blooming of all greenhouse crops will soon tear present values to pieces. In other years under the conditions prevailing this season, up to the present time the conditions would have approached starvation in the flower market. That it is not so this year must be interpreted as resulting from the greatly increased supply reaching this market. Valentine's Day business was very good in the city, and the out-of-town business coming to the wholesalers indicated that the country demand was also brisk. Violets and carnations had the best special call and roses also did well. Carnations are better in quality than heretofore, split calyxes having almost disappeared. American Beauty roses are not to be had in any quantity or in choice grades. They are exceedingly scarce.

LOUISVILLE MARKET REPORT

Business conditions the past week have been satisfactory, with the possible exception of a day or two, the weather having been so bad that very few could be seen walking about. Carnations of good quality are coming in in fair quantities, but the supply of the better grade is not sufficient for the demand. The supply and demand for roses is satisfactory, although the quality is not any too good. Mignonettes have not been demanded much recently, although the quality is very good and they are easily secured. The demand and quality of lilies of the valley are very good. Freesias have begun to come in, and they can be had in adequate quantities. The quality of jonquils, Dutch hyacinths, tulips, etc., is very good, and the demand so far has been all right. Violets sell well, the quality being good, and they can be had in adequate quantities.

NEW YORK MARKET REPORT

Trade conditions somewhat more favorable and averages likely to be better. Supply of American Beauty not yet much increased; demand rather slow, but showing signs of improvement. Carnations very abundant with prices weak. Violets moving rather more satisfactorily.

CHICAGO NOTES

It appears that our Bluebeard, Johann Hoch, the man of many wives, may also have tried our field. From an Associated Press dispatch we learn that in 1903 a man answering his description applied to Mrs. W. Rummler, West Nyack, N. Y., for a job as foreman at her greenhouses. They were married and in six months he disappeared with $6,000 of her money.

The following bulb men have visited Chicago this week:

Mr. Colyn, Holland; M. Tegelaar, Lies, Holland; H. F. Henry of Henry & Lee, New York; B. Suzuki of Suzuki & Iida, New York and Yokohama, Japan.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

The Vick Seed Company has been incorporated at Rochester, N. Y., by C. H. Vick, F. B. King and W. T. Fonda.

The situation as the Boston seedsmen find it, is exceedingly satisfactory. At present the business is well ahead of last year's business; people are buying more, and so far all the dealers are well pleased with returns from their catalogues, considering the time they have been out. Representatives of Philadelphia seed houses who have been here intimate that they do not anticipate as good a season as the last, but the reverse is generally true in Boston and all present indications would seem to justify this confidence.

The freight blocade on the N. Y. Central and N. Y., N. H., & H. R. R. is making no end of trouble for merchants in New England and the seedsmen are not escaping. A car started from Le Roy, N. Y., for a Boston seed house on January 19th has not yet (February 14th) arrived. The N. Y. Central and its Boston line, the B. & A., are practically out of commission and have been compelled to divert large quantities of freight to the Fitchburg R. R., with the result that a line of freight cars practically unbroken extends from Boston to the western extremity of the State.

Onion sets last year were a most unsatisfactory crop. When onion-set harvesting was due, the weather was most unfavorable, intermittent rains occurring every day or two and sets were badly damaged. An advance in price is anticipated. Even now, jobbers are practically holding yellows at $2.25 to $2 50 a bushel and whites at $3 to $3 50, and do not care to sell white at these figures unless a certain proportion of yellow are ordered with them. The whites are keeping very poorly, there being considerable smut and the prospects are that they will reach the values of last year by the time the planting season comes on.

By decree of the Provisional government of Venezuela, maize or Indian corn, red beans and French or kidney beans imported to that country are exempt from custom house duties.

On account of the increased price of the minor grains raised in the country, owing to the loss of crops for lack of rain, a decree has been promulgated by the Provisional Government, providing that after January 3, 1905, "el maiz, las caraotas y frijoles" (maize or Indian corn, red beans, and French or kidney beans) imported through the custom-houses shall be exempt from duties so long as the government shall deem necessary, of which determination there shall be forty day's notice given.

There is more and more disappointment every week with bean deliveries. Growers who reported a certain percentage a few weeks ago are reporting failures now, especially on the Wax varieties, which are very hard to secure. The expense of picking was heavy, the quality of the crop generally being so poor, and the finished product shows a shrinkage of ten or twelve pounds to the bushel, on the picking table. Early frosts and unfavorable weather at harvesting time compelled a heavy waste in the crop.

Of sweet corn, most seed houses feel there is to be more than enough to go around this year and this commodity is liable to find a slow market. One of the largest jobbers has been offering considerable surpluses but still some varieties are reported failures on account of improper curing, whereby vitality has been injured and the seed is not in good merchantable condition. Among the varieties reported as failures are Perry's Hybrid, Hickox, Old Colony, Mammoth, and Egyptian. The canners down in Maine lost most of their seed stock by the early freeze last September, and in all probability now that the canners' convention is over, they will be heavy buyers of Crosby, but they will be more critical than was the case in the recent panicky years.

Catalogues Received

The M. G. Madson Seed Co., Manitowoc, Wis. Handsome cover in colors. Filled with good things, including many that are new.

Hoopes, Brother & Thomas, West Chester, Pa. Semi-annual trade list of fruit and ornamental trees, shrubs, and hardy border plants.

Arthur Cowee, Berlin, N. Y. Catalogue of Groff's New Hybrid Gladioli. The title tells the story. The goods are known all over the world.

W. W. Barnard & Co., Chicago. No elaborate covers but chock-full of good things exemplifying the motto of the house, "The highest quality at a fair price."

L. A. Watkins Mdse. Co., Denver, Colo. Annual catalogue of seeds and agricultural implements. Lists everything wanted by the farmer or his wife. Cover in glowing colors.

Schlegel & Fottler Co., 26 and 27 South Market St., Boston. Spring catalogue of seeds, plants, and bulbs. Well printed and illustated, and its contents fully up to the standard of this well-known house.

W. A. Manda, Inc., South Orange, N. J. "Partial stock list of everything pertaining to Horticulture." Among the novelties catalogued is a set of new hardy Scotch pinks which will be a welcome addition to the herbaceous garden.

The Wm. H. Moon Co., Morrisville Penn. The Horticultural Art Book. A beautiful album filled with superb half-tone illustrations of park and garden plantations of conifers and deciduous ornamental trees and flowering shrubs. Irresistible as a garden promoter. Send for it and be happy.

Everblooming!

In addition to being a fine subject for the Holidays the

Christmas Fuchsia!

will also prove valuable at other seasons as it is practically everblooming!

UTICA FLORIST CLUB. — Pres., F. J. Baker; Vice-Pres., Seward Hakes; Sec'y, J. C. Spencer; Treas., C. F. Seitzer. Meeting first Thursday of the month. Chrysanthemum meeting in November; Carnation meeting in February; annual outing and clambake in August.

WESTCHESTER COUNTY HORTICULTURE SOCIETY, Mount Kisco, N. Y, — Pres., A. L. Marshall; Vice-Pres.; Wm. Wills, Katonah; Sec'y, Herbert A. Spavins. Meets every month; annual reunion at Mount Kisco.

WORCESTER COUNTY HORTICULTURAL SOCIETY, Worcester, Mass. — Pres., O. B. Hadwen; Sec'y, A. A. Hixon.

THE CHRYSANTHEMUMS OF M. CALVAT

From time to time we read that the new varieties of this well-known raiser are not so good as formerly, yet his latest set includes one at least as fine as any previously introduced. I refer to Chrysanthemiste Montigny, a light yellow, of magnificent proportions and comely shape. The florets incurve slightly, but their great length causes them to fall away, so that we have a drooping form, with each petal twisting in the shape of a Catherine wheel. Being easy to grow and constant, it will soon become a favorite with exhibitors.

This raiser has probably made the mistake of sending out too many varieties. Each year his set numbers about thirty, and a very considerable number prove to be useless; hence there is not the same desire among exhibitors to possess them until some of the trade growers sift the gold from the dross, as it were. But at the recent shows I have been struck with the great beauty of the Calvat varieties, and venture to name a dozen that would be difficult to match by any other raiser, or, for that matter, a combination of raisers: — F. S. Vallis, C. Montigny, Madame P. Radaelli, Madame Carnot, Mons. Chénon de Léché, Madame Gustave Henri, President Viger, Mrs. J. Lewis, Lieut.-Col. Ducroiset, Souvenir de Calvat Père, Jean Calvat, Marquis V. Venosta. — H. S. in *Journal of Horticulture.*

Agents for HORTICULTURE are wanted in every community. Liberal commissions to active workers. Write for information.

Carnations in Modern Houses

It may be that carnations will flower as freely and develop as high a type of bloom in an old-fashioned, two-bench sash-house as in a more modern one. Soil, temperature, and moisture can be regulated in almost any house; but the degree of light and manner of air-circulation depend upon construction. If these have an essential influence upon the health, thrift, and product of the plant, then such a house as that of C. E. Dickerman at Harrison Square, Mass., would naturally bring results more completely under control of the grower.

This is a Hitching's iron house of the most improved type. It is 55 × feet, with side walls 6 feet high and a depth of 24 feet, from ridge to floor. Its width, height and style of frame allow the greatest degree of light obtainable under a roof. Air-circulation is also possible which is not to be had in a more limited space.

The house has eight benches running the entire length, with about one thousand plants in each bench. White Lawson, Flamingo, Enchantress, Fair Maid and Mrs. T. W. Lawson are the principal varieties grown. Enchantress, White Lawson and Flamingo are at the present time very fine, not all exhibition flowers, but of high grade from a commercial standpoint. Mr. Matthews, Mr. Dickerman's grower, speaks highly of White Lawson, its one imperfection being that during the dark months it has a tinge of pink when it first opens. He finds Flamingo very desirable for a select retail trade. Enchantress also promises well. The carnation is more perfectly developed today than ever before, and the tendency of growers has been towards houses of which Mr. Dickerman's is an advanced type.

GEORGE H. HIGGINS.

FIRST-CLASS CERTIFICATES AWARDED TO NEW DAHLIAS IN 1904

Mrs. Hobbs, show, pure white (Hobbs). The following are cactus varieties: — Alexander, dark crimson flushed maroon (Mortimer); Antelope yellow, suffused with bright salmon (Stredwick); Cockatoo, white, with canary yellow base, outer petals changing to fawn (Keynes); Ella Kraemar, rosy-pink with lighter base (Stredwick); Fairy, pure white (Stredwick); Harbor Light, orange-red, tipped flame color (Hobbies); Helen Stephens, yellow (Hobbies); J. B. Riding, rich yellow base, shading to deep orange (Stredwick); Jeannette, clear buttercup yellow (Shoesmith); Lord of the Manor, scarlet, with greenish-yellow base (Seale); Miss Dorothy Oliver, white, tipped green, with primrose base (Shoesmith); Rosy Morn, peach blossom, with paler base and center (Keynes); Thomas Parkyn, light terra-cotta (Stredwick); Tricolor, lower half of petals pale yellow, upper half white, striped and speckled scarlet (Stredwick). Little Mary, pompon, deep crimson, with darker center (Seale); Neatness, pompon, salmon, with yellow center (West). Dorothy, single, pure white, margined rosy-crimson (Cheal); Mikado, single, crimson-scarlet, with yellow band, edged red (Seale); Miss Bastone, single, white, edged deep yellow (Seale); Unique, single, amber, with crimson ring (Seale). — *Journal of Horticulture.*

News Notes

B. Eschner, of M. Rice & Co., Philadelphia, was a recent visitor in Louisville.

A rare specialty at George A. Sutherland's Boston, this month is the beautiful Cherokee rose.

E. H. Howland, Holyoke, Mass., finds orchid blooms gaining ground steadily as florists' flowers in his section.

The greenhouses of Noble Pagett at Unadilla, N. Y., were totally destroyed by fire on the morning of February 3d, No insurance.

Pratt & Giger, New London, Conn., have thoroughly renovated their store at 4 Main Street, since the fire of a few days ago, and reopened for business.

A. J. Schmutz reports a rapidly growing plant trade in and around North Adams, Mass. Cyclamens have been the leaders in flowering plants this season, thus far. All the primulas also show up well in the winter sales.

The order of the United States Government removing duty charges from all imports for the Lewis and Clark Exposition has now gone into effect. While exhibitors from foreign countries will be permitted to import their wares duty free, the strictest regulations will be enforced to see that the order is not taken advantage of by smugglers.

Personal

The friends of George Shield, foreman for A. Leuthy & Co., Roslindale, Mass., will be glad to learn that he is recovering satisfactorily from the operation he underwent at the hospital last week.

Julius Roehrs of Rutherford, accompanied by J. M. Keller, Bay Ridge, N. Y., has gone on a southern trip for recuperation after his recent illness. The gentlemen started on Friday, February 10, on the Clyde Line steamer to Charleston and will also stop at Georgia and Florida points on the way to Havana.

Charles Faucett, who has been foreman for Mrs. J. S. Johnson at Boulder, Col., for some time has bought out his employer and will continue in the same location on his own account. He has the best wishes of many firm friends.

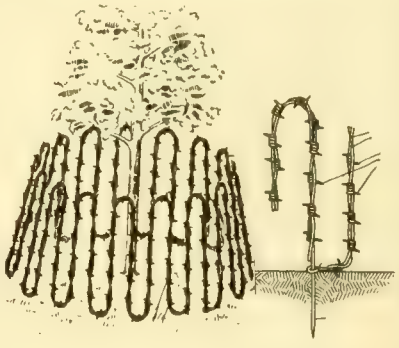
LIST OF PATENTS

Issued February 7, 1905.



781,864. Evaporating Apparatus. William C. Anderson, San José, Cal.

781,928. Potato-Digger. August Anderson, Nelson, Minn.

782,048. Tree-Protector. John A. Perou, Los Angeles, Cal.

A tree-protector consisting of barbed wire formed into a series of reverse loops, the protector being supported by the lower ends of said loops.

The invention is especially applicable for use in growing eucalyptus trees,

which are set out in great numbers for commercial purposes when very small and need protection until they have attained the height of about two feet, after which they are seldom molested owing, probably, to increased bitterness of taste. When a plantation has reached this stage, the protectors can be taken away and used in other places.

782,204. Process of Separating Seeds. Thomas M. Prine, Toledo, O.

Copies of any of the above patents can be procured by sending ten cents in stamps to E. G. Siggers, patent lawyer, Station G, Washington, D. C., by mentioning HORTICULTURE.

DUTY ON GLASS

Editor HORTICULTURE:

I have noticed that there is some talk of agitating the question of the tax on imported greenhouse glass which I earnestly believe should be carried forward till we get the required relief. I think a good way to do that would be for the different florists' societies throughout the country to write, either through their president or secretary, to their representative at Washington; also all the commercial men. I think it would have a telling effect very soon. — W. W.

The Julius Roehrs Company, of Rutherford, N. J., has been incorporated.

We Manufacture and Erect Every Type of Greenhouse

THE GALVANIZED "U" BAR TYPE
THE FLAT IRON RAFTER TYPE
THE SASH BAR TYPE

We make each type in several styles. We also furnish any of the constructions in the ridge and furrow type in any width of span.

"PIERSON" BOILERS

For Steam and Water

have more direct fire surface than any other horticultural boiler on the market, and this together with ample flue surface and area is the reason for the economical results obtained.

We will be pleased to tell you more fully as to their merits and also to send you letters of testimonials from those who have used them.

WE ALSO MANUFACTURE

Self-locking vent-opening apparatus, both the standard and self-oiling type. Wood and iron frame benches and tables. Hot bed sash and frames. Special hand made greenhouse putty.

ESTIMATES FURNISHED FOR COMPLETE STRUCTURES OR MATERIAL READY TO ERECT.

Hot-House Grape Vines

ALICANTE, berries large, round, large bunch. Late keeping.

APPLEY TOWERS, fine black sort, following Black Hamburg. Excellent flavor.

BLACK HAMBURG, the most popular grape in cultivation. Berries large, roundish-oval, juicy and rich.

GROS COLMAN, monstrous, round berries, juicy and sweet. Not good until fully ripe in late autumn.

GROS GUILLAUME, Barbarossa. Berries large and round, juicy and sweet but rather flat flavor. Very late.

MADRESFIELD COURT, berries very large; of true muscat flavor. Rich and excellent.

LADY DOWNE'S SEEDLING, large oval berries of rich aromatic flavor. Dark purple. One of the best late sorts.

MRS. PEARSON, large oval berries, transparent golden color. Luscious and juicy.

MUSCAT OF ALEXANDRIA, generally esteemed the best white grape. Berries large, amber yellow. Delicious flavor.

Strong Planting Canes; each $3.50

Lily of the Valley

Selected Berlin Pips

Per 100, $2.00; per 1000, $17.50; per case, 2000, $32.50

Fruit-Growing for Ornament and Profit

The pleasing and interesting narrative of Mr. Finlayson's travels in foreign lands, in a resent issue of HORTICULTURE, especially that part describing the fruit-lined highways of Germany, ought to suggest many things to us in this country with regard to outdoor fruit growing.

As Mr. Finlayson says, in Germany they plant fruit trees along the roadsides for the two fold purpose of ornamentation and profit. While the thrifty Germans may consider the first purpose the main one, yet their thrift and the results would seem to indicate that they aimed at a happy ultimate combination of profit and pleasure.

That the same results can be attained in this country is plainly evident to any one who may have seen fruit trees of various kinds grown outdoors in a few places here. There are many places where a trellis could be erected to grow peaches on, and if these trees are trained in the same manner as those grown indoors they will not only look well, but they will bear enough good fruit to more than pay for the little extra trouble necessary to make what would otherwise be an ugly bare wall or fence look beautiful. Apart from the fruit such trees yield, while in bloom they are worth fully as much to look upon as are many of the shrubs grown for their flowers alone.

Not only peaches but pears and apples can be planted and grown so as to be an ornament to the environments. This fact was fully impressed on me last season on passing the vegetable and flower gardens on the Berwind estate at Newport. There, on both sides of a long narrow path leading from the street to the greenhouses, is a trellis about four feet high on which are pear and apple trees beautifully trained, the whole making an appropriate entrance to this section of the grounds, besides affording much better fruit than if the trees were where they would very likely be more or less neglected. I do not mean by this that standards will not also repay one for all the extra care bestowed on them, but that such care is seldom bestowed on fruit trees unless the reason for their existence is a desire to beautify some spot and it is only by giving fruit trees much attention that their appearance is pleasing.

On this place many years ago there were planted a number of peach trees (perhaps forty) alongside (on the south) a stable wall — a wall previously covered with Ampelopsis Veitchii. These trees grew very well and bore medium-sized fruit, but with the snow from the roof and the high winds much of the fruiting wood was broken so that it was decided to erect an iron trellis along and fastened to the wall. The trees were then bent back and trained, and the results were not only fruit in greater abundance and of larger size but in addition a screen more pleasing to look at than the ampelopsis-covered wall. These trees thrived very well for about five years until that deadly pest, the San José scale got its work in. They were rooted out and young trees put in their places; trees that next year will yield a good deal of fruit.

Trees trained on a trellis outdoors are pruned and tied in during the late winter or early spring in the same manner as those in a house; likewise, the same processes of disbudding and thinning the fruit, and tying in only enough young wood for next year's crop. Always encourage vigorous young shoots from near the bottom, for if care is not taken to do this the trees will before long have a somewhat naked appearance.

Besides such fruits as we have already mentioned, small fruits, especially gooseberries, could be profitably grown in many localities. The samples of this fruit often seen in fruit stores are almost unrecognizable, so small are they, while on the other hand we have seen just as fine Industry gooseberries on bushes — in the garden of Commodore Gerry — as we have ever seen anywhere. Red currants are also grown there to perfection. We mention this only to suggest that the idea that these and other fruits are unsuited to our climate, is to a great extent unwarranted, and that if people were less predisposed to favor this notion there would be more of these fruits cultivated and fewer failures noted.

David McIntosh.

Winter Strawberries

In nearly all towns there is a demand, though often limited, which is increasing every year, for fruit out of season, for some little luxury during the cold, dreary winter days. People in moderate circumstances, as well as the very rich, are willing to pay a good price, and often a fancy one, for things that will tempt eye and appetite. And what is more pleasing than a dish of nice, ripe, juicy strawberries and cream, particularly when the thermometer stands at zero outside.

The growing of winter strawberries is not a difficult matter and the florist having a private trade can easily raise a few as a side-issue, which will bring him a handsome return for the little space and trouble necessary. After the plants have begun to bear they can be kept with other cool-weather plants, if given a place near the glass, as no special conditions are required.

The plants are taken during the summer after the first of July. Any healthy plantation will give an abundance, but the best are those taken from a field set in the spring or the fall before upon rich moist soil. Keep all flower stalks off, and pinch back the runners until about the first of July, when a few main runners are allowed to grow. These runners are to provide the plants for winter forcing. After the runners get a good start, 2½-in. pots filled with rich compost are sunken under the joints or nodes, the runners being held in place with a stick or stones. The

young plants forming are rooted into these pots. Do not let a plant set more than it can safely carry; choose three or four good stocky ones, and let the plant throw all its energy into this by keeping off all other runners. Young plants getting a good impetus remain just so far ahead during the whole season. After a couple of weeks, the pots will be filled with roots, and then the young plants are separated from the old ones, and repotted into 4-in. crocking for drainage. These pots are plunged in the earth and the plants repotted into 6-in. when ready. Give plenty of water, air, and sunshine, and guard against checks of any kind.

Another way to grow the plants is to take young plants in the spring and grow in pots during the summer, repotting when needed until the plants are in eights, in which they will fruit. The future treatment is the same for both lots.

No protection is needed until steady cold weather comes, when they are taken up and put in cold frames, being kept there until time to take inside. During this period they go through a dormant period of rest, which while perhaps not absolutely necessary, is of benefit. No protection is needed in the coldest weather other than the cold-frame glass.

The plants can be brought in any time from the cold-frames, ten to twelve weeks being allowed for the fruit to ripen. If a few are brought in at a time the grower gets a succession. After being taken from the frames they are kept for a few days in a cool place, as a shed or workshop, to thaw out, and then brought into the houses and given a place near the glass. The temperature best suited to them is 40° to 50° at night at first, 10° to 15° higher during the day, gradually increasing to 55° to 60° at night, and a corresponding higher temperature by day during blossoming time. But good results are obtained in ordinary greenhouses if grown with other plants. In five weeks they will blossom and these are fertilized by hand, the operation being repeated on bright days. The best way to do this is to collect the pollen in a spoon and then dust this over the pistils with a fine camel's hair brush, being sure to touch all the pistils, or an imperfect fruit will be the result. After the berries set, place a piece of wire netting under them or fill pots with sawdust in order to keep the fruits off the soil. The berries ripen about five weeks later, and each plant produces eight or ten fruits. Thus eight to twelve pots are required to produce a quart, and these use only two to three square feet of room. As the fruit is worth $2 to $5 a quart it gives a very good profit. Give the plants plenty of water, and a little liquid manure after the berries set two or three times a week. Syringe often for red spider until they bloom, and pick off and burn all leaves infested with "spot."

Most early or medium varieties are suitable for forcing, as Sharpless, Beder Wood, Agricultural, Seth Boyden, etc.

The course of treatment has been given but success is nine parts practice to one part theory. Take up a few plants next season and study out their requirement, aided by these few directions.

For winter decorations pots containing a few berries make one of the best and there is quite a demand for them especially at Christmas time, and at a fair price. For persons interested in their culture I will add, that success can be attained by growing in sunny windows provided that the temperature of the room does not fall below 40° at night.

R. L. Adams.

Success with the Lady Campbell Violet

When Malcolm Orr gave up the Brown houses at Wollaston, Mass., and bought the Miller plant at North Saugus, doubt was expressed among those who knew the circumstances as to the wisdom of the move if he intended to still grow violets. He had made a success the first year at Wollaston and improved on his record each succeeding year, and it was thought that the house, location, and the quality of the soil there were important factors in his success. Mr. Orr thought that all there was at Wollaston could be found elsewhere with important requisites added, especially larger, lighter and higher-roofed houses. He has filled one house 20×125 and one house 20×100 at Saugus with his own stock of Campbell violets, using 6000 plants. One house suffered a little for water before he had his steam pump in order, but the two days preceding Christmas he picked twenty-five thousand violets of a quality equal if not superior to the best double violets that were brought into Boston, and at the present time he is picking from four thousand to seven thousand blooms a day, of the same high quality, and his plants are invariably thrifty and promise the usual increase of bloom as the days grow longer.

In propagating, Mr. Orr begins by the middle of March and finishes before the middle of April, selecting runners, preferably those with some roots, from the best plants, putting them in sandy soil about two inches apart. Sometimes the young plants are transferred to a frame for a while and sometimes to the place in the house where they are to remain. But they are always kept growing. This is the fifth consecutive year that this practice has been followed, and during that time growth has been continuous. When it was dug up the parent plant had generally exhausted its blooming power, but it had healthy foliage and left behind it thrifty growing scions.

The little black fly must be destroyed to obtain the best results, and hydrocyanic fumigation is the only effectual method that Mr. Orr has found. Some years it has been necessary to repeat the treatment two or three times. Plenty of water for the young, growing plants and plenty of light and air with not too low a temperature for the flowering plants, are also some of the methods employed. Constant care has been exercised, as there has been no day during the five years, when the thing thought necessary to be done that day was not forthcoming, with the exception of the short time last fall, when the water supply was interrupted.

What the possibilities of the Campbell violet are, perhaps, is not known, but it is certain that Mr. Orr's stock to-day is of a more highly developed type than it was five years ago.

Geo. H. Huggins

South American Horticulture

2 — SANTOS

From the beach at Santos, two straight avenues run to the city about six blocks apart, perfectly parallel and perfectly level in their entire distance, which is about three miles. Lined right and left with stately palms, they run as they near the city through fine rows of houses, surrounded by pretty and fancy gardens; along the middle part of the avenues, between the beach and the city, is as yet open marsh and bush-country with but an occasional homestead among banana and orange trees. Entering the city the car turns to the left and soon you pass the new public park square on the foot of Rua de Senador Fejon, where the military band plays twice a week in public for two hours. This open air playing in the public park is a delightful as well as educational affair. First, it draws attention to the park in general; it's a pleasure to the eyesight as well as a feast for the ear.

As it is to-day the standard of the military concerts, the art of the buildings, the elaborate bandstand and perhaps a quiet open pavilion-restaurant, together with the decorative style of the surrounding park itself is by no means a small point by which to judge the size and influence of a Brazilian city and perhaps of other South American cities as well. This noble spirit, in regards to public music, can surely be recommended for imitation by all especially interested in the beautifying of natural aspects of cities; because, as cannot be impressed too much, it draws crowds of the people to the park, who get surely interested in the floral features of the same, during the intervals of music, thus creating a more general love and attention to beauty of nature. After the seats around the bandstand are taken up, the crowd left over promenade around and between the nearest lawns and flower-beds, and I never saw anybody leave till all was over and the hour getting late.

The Santos park has two main promenades, the one leading along the four sides of the square shaded by acacias, the other crossing in angles from corner to corner, swinging out in the centre, somewhat, to give room for the bandstand and the seats in front of it. Both stand and seats are placed near the middle of one of the boundary lines; only the promenade runs between them and the street. The floral feature of the park is the pillars and statuary work of alternantheras, the sides of which are pieces of a live floral mosaic. Fancy snake designs of white, red, blue, and yellow colors are laid into the sides of pillars eight feet high, and larger sockets supporting globes a foot and a half in diameter. The globes are perfectly round and even, covered by scarlet, yellow, and green or purple leaves. The plants used are mostly alternantheras, but also lobelias, sweet alyssum, and other carpet-bedders. Again this floral statuary is standing on bases of carpet-bedding of the most showy and fancy kind, with graceful proportioned palms as centerpieces and corners; the whole is tuned off by a quiet, smooth stretch of lawn towards the promenade. This work in carpet-bedding is on one side of the band stand, while on the opposing side is a fine group of canna, musa, caladium, and castor-oil bean. Of Araucaria excelsa there are here, as in every Brazilian park, some very good specimen plants. Further you notice a group of Pandanus Veitchii and utilis, while different well-known palms,— as latania, kentia, etc., are scattered along the shrub border. Santos has another larger and older park, more quiet and with good specimen tropical plants and several squares with unpretentious planting.

On the base of the perfectly flat land tongue — on which, in one corner, the city of Santos is situated and which is crossed by these boulevards from shore to shore, if you figure in the city end streets of the boulevards up to the coffee storesheds on the pier — on the base of this flat, joining with the mountain range along the coast is a set of high, steep hill knots with solid rock foundation half way up on one side, covered by layers of rocky loam on the other and clad in the most fashionable green garb of intertwined tropical foliage and flowers. On top is the pilot signal station and the lighthouse. Climbing up there is as bad as climbing the steps of the St. Peter in Rome on the knees, which has been done for repentance, we are told, because you are on your knees here almost the whole half hour which it takes to get to the top of the knot. The angle up-road is about 45°, so your knees have to make this very same angle at every step in order to keep your body steady up-hill. Considering a hot sunshine of 100° or more, giving no escape except on passing occasionally under a few feathery leaves of taller palms, it's like having a Turkish bath. In order to face the effect of it, the terrible perspiration and heavy breathing, and still be in happy spirits you must have a big aspiration "ad astra" and a longing for natural beauty. And how does it repay the toil? How it pleases? Indeed, well! Any landscape, in the northern moderate climate, compared with it, is as colorless as a flower decoration made out of nothing but ferns, evergreens and foliage of forest trees. Why, there may be fine artistic colors in northern landscape but not of this gayety and brightness and richness! Where is your perfect marine blue sky, your green ocean shore with snowwhite breakers, your brick-red rocks, on and in, the beach, with brown and white seagulls soaring around them? Where in North America is your flat-roofed, white, rose and purple painted city of well proportioned two-story buildings along the river's mouth, between green mountain walls and the ocean, seemingly on the verge of sinking into the water and yet with a tranquil, secure, and quiet aspect?

Seated on your kingly throne under some royal phœnix palms and fanned by higher and cooler ocean winds, you see over the whole city, harbor, beach and islands and the shores on the other side of the river that pours its waters into the Santos harbor. Your eyes rest on trees covered with yellow, red or pink garlands of flowers, and again your eyes wander to some group of palms towering high above the underwood on the top of a mountain. Then again you turn them to the waves of the ocean and watch the incoming of foreign steamers, signaling and answered by the pilot from the flagport near you with hundredfold colored signal flags. Those, the "out going" and the "coming in" of ships of all lands and all nations, are signalled to every office window in the city below you and you realize that you are in the land of the aromatic coffee-tree, in the world's beautiful coffee-harbor Santos.

Gerhard Kleicken.

HORTICULTURE

AN ILLUSTRATED JOURNAL

DEVOTED TO THE

FLORIST, PLANTSMAN, LANDSCAPE GARDENER AND KINDRED INTERESTS

PUBLISHED EVERY SATURDAY BY

HORTICULTURE PUBLISHING CO.

11 HAMILTON PLACE

Telephone, Oxford, 292 BOSTON, MASS.

WM. J. STEWART, Editor and Manager.

The Editor Has His Say

If it is true that "Imitation is the sincerest flattery," then HORTICULTURE bobs a curtsey to her esteemed contemporaries who so soon found in her something to imitate.

We learn with much solicitude of the serious illness of Edwin Lonsdale. No man in the horticultural world has the esteem of his fellows in a higher degree than has Mr. Lonsdale, and all will join with us in the sincere wish for his rapid and complete recovery.

If the Massachusetts legislature is to do anything of value looking to the suppression of the moth pests, no time should be lost in unnecessary talk and red-tape. Spring will soon be upon us, and the best chance for effectual work will then be past. Every day's delay now is a valuable day lost.

The new rose Wellesley was given an opportunity to demonstrate its value in large decorative work, at the Parker House last week, when it was used by Mr. Collins exclusively in the adornment of the mirrors and table on the occasion of a notable banquet. A distinctive qualification of this rose for such uses is its incomparable brilliancy under artificial light, when the petals glow as no other rose of our acquaintance does; another advantage is its excellent keeping qualities. The retailer's part in the popularizing of a new rose is a very important one. If he is so inclined and has the requisite taste, he has the means of advancing a special flower to a position of immediate prominence. Unfortunately, in the past, the retail florist has appeared to favor somewhat the limitation of commercial varieties rather than their multiplication. Wellesley is to be congratulated on its success as a débutante.

Macaulay said that "advertising is to business what steam is to machinery, the great propelling power." Enterprising florists, nurserymen, and seedsmen realize this truth, in common with the rest of the business world. Those who are reluctant to assume the labor and the cost of advertising the goods they have for sale will find sooner or later that it must be done or that they must accept the alternative of seeing their competitors, more progressive than they, rapidly gaining on them, and eventually leaving them far behind. Spasmodic advertising is only a little better than no advertising. Chance sales of surplus stock are all right, in their way, but in the long run the great winner is the man who keeps "everlastingly at it," offering and delivering goods of such quality that his customer once gained will come again and asking only the price the goods are worth. Notwithstanding the astounding development of advertising within the past few years, there is every reason to believe that the future increase in amount and quality will far exceed anything we have hitherto seen.

The list of advertising firms using the columns of HORTICULTURE shows a gratifying growth as the weeks pass. This recognition on the part of the enterprising firms represented, that HORTICULTURE has a special field and constituency whose trade is considered desirable, is very pleasing to us, and our best efforts shall be made to help bring about the result sought. Advertising is becoming a problem of considerable magnitude for the dealer in horticultural wares. To attempt to do business, under conditions now prevalent, without advertising, is useless. Yet there is a vast amount of advertising done which amounts to nothing. Good advertising is a gilt-edged investment; poor advertising is waste. To accomplish the desired combination of the right man, offering the right goods, at the right price, and through the right medium, requires the exercise of as much sagacity and discretion, — genius, even, — as is required for success in any other department of the horticulturist's profession. The fact that hundreds of readers representing all classes and all departments declare emphatically that HORTICULTURE is already the best paper in its class on this continent has its corollary in our well-filled advertising pages. And our age is just three months.

GREETING FROM AN OLD FRIEND

CHICAGO, Feb. 12, 1905.

Editor HORTICULTURE:

Your No. 11, February 11, to hand, prompt, on time, and I must say a very good number. I can easily understand why many will like the distinctive features in its make-up.

It is a far cry to those of us whose memory goes back to more than the half century's mark in the florists' business in this country to note the wonderful changes that are constantly taking place and will, to a far greater extent, as time goes on. And the literature has much to do with that change. The trade journal is a sign of the times, has a place to fill, and prospers on the trade it helps to make. Other efforts in literature come and go, the florists' stands pat. The man behind the gun has something to do with it, and the Hub has a long life history to fall back on for a share in the sayings and doings of the craft.

EDGAR SANDERS.

What They Say of Us

"The love of praise, howe'er concealed by art
Reigns more or less, and glows in every heart."

Enclosed please find $5. and book me for HORTICULTURE for five years. I like it. — T. M.

We think the paper is a very good one and very nicely advertised, and its make-up is a work of art. — J. L. D.

Dear Sir: — please stop at once sending the HORTICULTURE to me I am well suplite with other Florist Papper. — J. S.

HORTICULTURE is a remarkably bright and readable paper. It seems to me that you have done very well indeed in getting out a paper possessing so many attractive features so early in the game. — A. H. K.

Personal

A. R. Potter, Jr., of Chicago, has taken a position at Vicksburg, Miss.

Roland H. Messenger of Barre, Mass., succeeds Alexander E. Whitely as florist at the Bradley greenhouses, Brattleboro, Vt.,

Robert Paterson, for years superintendent at the late Frank Jones' estate in Portsmouth, N. H., has accepted a fine position as head of a big concern at Morristown, N. J., and he will move there from his farm in Northampton, where he has been since the Jones farm was closed up.

Henry Wild, who for the past seven years has held the position of superintendent of the Blake estate at Brookline, Mass., leaves on March 15th, to assume charge of Mrs. Converse's new place at Greenwich, Conn. This estate comprises no less than six hundred acres, and is to be magnificently embellished with Italian gardens, conservatories, fruit houses, etc.

At a recent meeting of the Board of Trustees of the Iowa State Agricultural College at Ames, Ia., the acting professor, Mr. A. T. Erwin, was made associate professor of horticulture.

Prof. Erwin is one of a long list of horticulturists who in earlier years studied at the St. Louis Botanical Gardens and since continued to progress in the service of one of the states.

Iowa is a foremost apple-growing state, and with Professors S. A. Beach and A. T. Erwin as its official leaders and directors of scientific horticulture we shall expect her to retain that prominence.

An advertisement for a gardener, which appeared in Pittsburg Press last Sunday: —

WANTED. — A good, practical gardener and florist, married and no children; must be a practical man, and know all about flowers, lawns, and shrubs, and understand the work on a gentleman's place; able to look after 2 horses and 1 cow and drive in evenings — will give a 4-room house and $20 per month, and if wife is good laundress, can make sometimes two days a week overtime.

If any reader of HORTICULTURE is desirous of taking a mortgage on his soul, now is his chance, as I think the advertiser would have no hesitancy in taking it up. J.

Imported Dendrobiums at St. Albans, England

Our illustration shows one of the corridors of Sander & Son's orchid houses at St. Albans, Eng. The picture hardly gives a good idea of its length, which is 350 feet. It is devoted to the reception of orchids from the tropics. The illustration shows an importation of Burmese dendrobes just unpacked and men selecting them for orders. The place is an ideal one for the purpose, being airy and free from excessive moisture. The plants in the foreground are Dendrobium Devonianum, and the rest of the consignment consists of 10,000 D. Wardianum, with quantities of D. crassinode, D. Brymerianum, D. Bensoniæ, D. thyrsiflorum, D. densiflorum, D. nobile, D. primulinum, etc.

Obituary

Farquhar Macrae died February 21st at his residence, 1138 Smith St., Providence, R. I. His death was very sudden, he having been ill only a few hours, the cause being peritonitis. Mr. Macrae was born in Rosshire, Scotland, in the year 1844. He served his apprenticeship as gardener at Conon gardens, the estate of Sir Kenneth McKenzie. After working in prominent places in England and Scotland, came to Providence about the year 1869, and entered the employ of Willard Whitcomb as an expert grower of grapes under glass. His product soon became known in the New York market, commanding the highest prices. After several years he moved to the G. W. Chapin place for the purpose of growing flowers commercially, the florist business at that time being in its infancy. He made it a success from the start. Leaving the Chapin place, he located on the outskirts of the city, where he was successful for a number of years as a grower for the wholesale markets of Providence and vicinity. About fifteen years ago he sold the property to his brother, John A. Macrae, and purchasing a tract of land adjacent of about twenty acres, he erected a modern greenhouse plant, where he made a specialty of carnations, roses, chrysanthemums, and violets, the growing of chrysanthemums being a great feature. He took about all the first premiums of the Rhode Island Horticultural Society on chrysanthemums, for many years. He was a man of sterling quality, endearing himself to all with whom he came in contact, and took great interest in things pertaining to horticulture. He was an active worker in the Rhode Island Horticultural Society and the Florists' and Gardeners' Club of Rhode Island, being president of the latter organization when the Society of American Florists held its convention in Providence in 1897, and also served that year as vice-president of the latter society. He was a model husband and father, and beside the host of friends he leaves a wife, three sons, and five daughters, also two brothers and one sister, Mrs. Batchelder, of Beverly, Mass., to mourn his loss. Two of his sons, Alexander and Walter were associated with him in business. His funeral took place Friday, 24th inst., the interment being at Swan Point Cemetery.

NEWS OF THE CLUBS AND SOCIETIES

ST. LOUIS FLORISTS' CLUB

President Juengel in the chair, all the other officers at their respective stations, about seventy members and visitors present, a splendid exhibition of carnations on the tables — this was the enviable showing made at the last meeting of this wide-awake organization. Visitors at the meeting included James Hartshorne and J. D. Thompson of Joliet, Ill., A. Canfield, Springfield, Ill., S. S. Skidelsky, Philadelphia, Pa., George M. Kellogg, Pleasant Hill, Mo.; L. Van der Mey, Lisse, Holland, all of whom addressed the meeting, and the ladies present were Mrs. M. M. Ayers and Mrs. H. G. Berning.

The exhibits and awards were as follows:

Home-grown carnations: 50 white — first, John Steidle with Gov. Wolcott; second, A. Jablonsky with Lady Bountiful; third, J. F. Ammann with White Cloud. 50 pink — John Steidle, Enchantress; J. F. Ammann, ditto; A. Jablonsky, ditto. 50 red — J. Steidle, Adonis; A. Jablonsky, Crane and Flamingo. 50 mixed — J. Steidle, A. Jablonsky, Fred Ammann.

Shown by outside growers: 50 white — Chicago Carnation Co., first and second with Lady Bountiful and White Lawson; E. G. Hill Co., third with Lady Bountiful. 50 pink — Chicago Carnation Co., first and second with Enchantress and Lawson; Salveston & Son, third with Lawson. 50 red — Chicago Carnation Co., Cardinal; J. D. Thompson Carnation Co., Robert Craig; E. G. Hill Co., Cardinal. 50 any other color — Chicago Carnation Co., first and second with Prosperity and Harlowarden; E. G. Hill Co., third with Mrs. Patten. Other exhibits were My Maryland from H. Weber & Son, 88 points and certificate; John E. Haines from John E. Haines and Victory from Guttman & Weber, both too far gone for judging. Red Lawson from W. J. Palmer & Son arrived one day too late. The judges were J. F. Ammann, John Steidle, and A. Jablonsky for outside exhibits and James Hartshorne, J. D. Thompson, and A. C. Canfield for the local entries.

Messrs. Weber, Kuehn and Koenig were appointed a new building committee, and Messrs. Beneke, Windler, and Windt, press committee. Frank Fillmore read an interesting account of of the recent trip to Chicago.

The March meeting will be the annual rose show, in charge of Otto Koenig, F. H. Meinhardt, and J. J. Beneke. A banquet will follow the meeting, at the Missouri Athletic Club and all visitors will be invited.

CINCINNATI FLORISTS' SOCIETY

The special exhibition of carnations will be held at the club rooms in Jabez Elliott Flower Market on March 11. Through the generosity of the club members and their friends the following prizes are offered for competition, and it is expected that the great success met with at the recent rose exhibition will be duplicated at this carnation show. Premiums are as follows:

CARNATIONS.

	1st	2d	3d
50 White,	$5.00	$4.00	$2.00
50 Light pink,	5.00	4.00	2.00
50 Dark "	5.00	4.00	2.00
50 Variegated,	5.00	4.00	2.00
100 mixed, not less than 6 Commercial Varieties,	8.00	6.00	4.00
25 Seedlings,	4.00	3.00	2.00

Best general display, 10.00

Scott to be the dividing color between light and dark pink.

For anything new or meritorious in plants or cut flowers the S. A. F. medals will also be competed for.

These medals, — one silver and one bronze, — are offered by the Society of American Florists and Ornamental Horticulturists to be awarded by the Cincinnati Florists' Society, for a new and meritorious plant or flower of American origin. The medals may be competed for at this and subsequent shows, not less than twelve blooms to be staged of any cut flower in competing for above medals. Medals to be awarded at March exhibition. Rules of Cincinnati Florists' Society will apply to the above.

The February rose show was a pronounced success, both in quality of blooms and quantity of stock shown. J. W. Rodgers, who had charge of the show, reports that the attendance was above the average, notwithstanding the disagreeable weather.

The exhibitors and awards were as follows:

W. K. Partridge received first prize for Liberty, Golden Gate, and Ivory, and second for Bridesmaid and Meteor. Mr. Partridge also took first on general display with one of the most unique and artistically arranged tables that has ever been exhibited at any show. His Golden Gate, Ivory, and Liberty roses were the best exhibition blooms the writer has ever seen.

A. Sunderbruch of Hyde Park, took first with a well-done vase of Bridesmaid and second with Bride. Peter Weiland showed Bridesmaid and Uncle John — all very good stock. He took third with Bride.

George & Allan, who always have the interest of the Society at heart, were present with a fine collection of bulbous stock and American Beauty, Bride and Bridesmaid roses. They took second on Beauty, Perle, and Bride, and first for Meteor. Their general display was also very creditable. J. A. Peterson was present with some well-grown plants of his new begonia.

J. W. Rodgers exhibited a fine lot of Princess of Wales and California violets, winning first on general display of violets. Theodore Bock made a very efficient and acceptable judge.

The stand-holders in the market re-

VASE OF 100 CARNATIONS WINNING HORTICULTURE PRIZE AT BOSTON EXHIBITION

ported sales much better than usual. This is due to the fact that the public must pass through the market to reach the club room and would indicate that a cooperation in the monthly exhibitions would be beneficial to all interested in the culture of flowers.

GARDENERS' AND FLORISTS' CLUB OF BOSTON

Another in the series of excellent meetings being held this season by this organization, took place on Tuesday evening, February 21. The address was by W. W. Rawson on the subject of vegetable growing under glass, and it was listened to with close attention by an audience of about seventy-five members. The lecturer talked interestingly on the increasing need for growing more and larger crops on smaller areas, the many obstructions that must be overcome by the market-gardener under glass, the methods of cultivation, marketing, etc., and especially on the construction and heating of greenhouses for this purpose. The increase in greenhouse area devoted to the forcing of vegetables during the winter season was characterized as remarkable during recent years, and the knowledge of their management had become more universal. Mr. Rawson said that he had no use for hot-water heating except in very small establishments, and the latter he would not advise at all, as, if one cannot go in large enough to make of it a business worth something, he would be wise to stay out. If hot water must be had, he would use only tubular boilers, and soft coal in any event. He said that nothing he has ever undertaken has given him the satisfaction that has been gained from sterilization of the soil. For a house of half an acre area, the cost is about $150. It takes six men three days and requires the use of about five tons of coal.

On the exhibition table were vases of carnation Cardinal and rose Rosalind Orr English from E. G. Hill Co., carnation Chester Roper from A. Roper; Flamingo from Stevens & Co., and canna Admiral Dewey from Mr. Westwood. The next field-day of the club will be March 11, when a visit will be made to the forcing houses of W. W. Rawson at Arlington.

LENOX HORTICULTURAL SOCIETY

Probably the most successful ball of the long series held annually under the auspices of the Lenox Horticultural Society was that of Valentine's evening in Sedgwick hall. Despite the cold night, there was a very large company, many from Pittsfield, Lee, Stockbridge, and other surrounding towns attending. The hall was beautifully decorated, evergreen boughs, palms, and flowering plants being used about the stage. Gartland's orchestra of Albany, directed by John L. Gartland, gave an interesting concert, beginning about 8.30, and an hour later the grand march was formed. Throughout the evening caterer Peters served a supper in one of the anterooms and on the stage. The committee of arrangements was Fred Heremans, S. Carlquist, A. J. Loveless, Frank Butler, and William Woods; reception, R. A. Schmidt, Edwards Jenkins, A. J. Loveless, E. J. Norman, A. McConnachie, George H. Thompson; floor directors, Ralph Gorham, Charles R. Russell, J. Bosworth, William G. Clifford, George Ferguson, Frank Howard.

The regular meeting of the Lenox Horticultural Society was held February 18th, President E. Jenkins in the chair. The Housatonic Agricultural Society held an institute with the Lenox Horticultural Society, and introduced Prof. George E. Stone, who gave a public lecture on "The Relation of Science to Agriculture." Prof. Stone dealt chiefly on the experiments they are making at Amherst, and was very interesting. — G. F.

A NEW SOCIETY

The Federation of Agricultural Organizations of New Jersey is the high-sounding title of a new society formed at Trenton. It is practically a union of the State Board of Agriculture, the State Horticultural Society, the State Grange, the Cranberry Growers' Association, and the Board of Managers of the State experiment station, for purposes offensive and defensive. It is not so much a combination of the agricultural interests of the state, for the development of the constituent organizations, as it is a kind of advisory board for the whole, each society being entitled to two delegates to the annual meeting, held in January of each year. The avowed purpose is to work for legislation that will benefit the agriculturists of the state, and to prevent the enactment of laws inimical to their interests. Just what this may mean in the concrete will doubtless be made known in the future, but it is not likely that bills for the slaughter of birds of any kind will be advocated by the new organization. Some horticulturists may want such bills, but the agriculturists do not. Anti-automobile bills, anti-high-speed bills, good roads bills and the like may be strongly advocated; so also many bills against allowing noxious weeds to grow and ripen. Whatever bills the agriculturists really need they should have, for no class of people is more deserving or more essential to the state's welfare.

FLORISTS' CLUB OF PHILADELPHIA

It has been decided by the committee having the matter in charge that the next meeting of the Florists' Club of Philadelphia, to be held Tuesday, March 7, will be Rose Night. The members of the Florists' Club are anxious to see all the novelties among roses that are likely to become popular. All those having such are invited to bring them to this meeting, or if it will be impossible to do so, kindly forward same by express prepaid in care of David Rust, Horticultural Hall, Broad Street, Philadelphia, Pa.

EDWIN LONSDALE, *Secretary*,

HARTFORD FLORISTS' CLUB

J. K. M. L. Farquhar, of Boston, delivered a lecture before this club, in the board of trade room, on February 17th, his subject being "Horticulture and Gardening in Japan." Many stereopticon views were shown in illustration of the lecture.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

Introducers of new varieties of plants, home raised or imported, whether members of the Society or not, are earnestly requested to send to the Secretary a list giving name, origin, and description of such new plants, to be disseminated during 1905, for the purpose of record in the annual report of the Society.

CARNATIONS AT MARKET EXHIBITION, HORTICULTURE HALL, BOSTON

Bostoniensis. Described as a strong grower, the fronds arching and forming a double curve; pinnæ strikingly undulating.

William J. Stewart, *Secretary.*

AMERICAN CARNATION SOCIETY

Carnation Registered by F. H. Kramer, Washington, D.C.

"F. H. Kramer." A cross between Lawson and Marquis, color a shade brighter than Lawson, flower a trifle larger, with no short stems in the fall, and does not burst. In growth it is stronger than any carnation we have grown and is entirely free from disease, a continuous bloomer and stems stand without support.

Albert M. Herr, *Lancaster, Pa.*

NOTES

The annual reunion of the Worcester County (Mass.) Horticultural Society will take place on Wednesday, March 8. The convention of the Massachusetts Fruit Growers will take place on that date and the day following.

On Saturday, February 25th, at Horticultural Hall, Boston, there will be a general discussion on flowers, to be opened by J. Woodward Manning. Meeting opens at 11 A.M. On Saturday, March 4th, A. Herrington will read a paper on "Some Aspects of Hardy Flower Culture."

Referring to the Plant and Cut-Flower Growers' Association, which was organized at St. Louis on February 9th, A. S. Halstead, president of the Association, says in a circular just issued that it should be definitely understood that the object of the association is not in conflict with the St. Louis Florists' Club, and that there is no intention to supplant that organization, the objects of the new body being to benefit in every way possible the growers of plants and cut flowers.

A NEW ASTER

We have received a photograph, showing a vase of blooms of the new aster, Miss Kate Lock, originated by John H. Lock, Toronto, Ont. This aster originated from the Washington and American Branching asters. It grows from 38 to 48 inches high. Mr. Lock informs us that each plant produces about fifteen large full-centered flowers on stiff stems. The plants are very robust. Judging from the flowers shown in the photograph, this aster should take a first place in market. It is certainly very handsome.

CHICAGO NEWS

Friedman's 35th Street store was a victim of our recent cold spell. The heating system of the building gave out Wednesday night, February 15. The break was occasioned by a water pipe bursting in basement, flooding same, which put out the boiler fires. Many choice plants in the store were frozen and everything in the conservatory which is attached to their store was a complete loss. Friedman is one of the few florists who carried such a large stock of fine and valuable decorative plants.

Primula Obconica at Boston Exhibition

FLORIDA'S OPPORTUNITY

The floating gardens of Mexico, so-called, are in many respects similar to the everglades. They are reclaimed from a great swamp or lake adjoining the City of Mexico, by a system of drainage canals, the Viga canal being the principal outlet into which numerous small ditches let the water, leaving the black muck soil dry for tillage.

There is no reason why the people of Florida should not accomplish greater results with a far less expenditure of money.

If the United States can apply millions of dollars in river and harbor improvements, it can, with equal propriety, expend a moderate sum in draining the everglades, for this is of equal importance as a public improvement.

While the City of Mexico is eight thousand feet higher than sea level, there are in the vicinity several lakes and marshy tracts which require extensive drainage operations. The Viga canal is one of these great drainage systems, and upon it are numerous barges, which transport farm and garden produce from the market gardens to the city. Flat-bottomed boats, propelled by a pole, convey passengers to the floating gardens.

The gardens are located on marsh land quite similar to the tule lands of California. The soil is composed of decayed reed and grass roots, being entirely of vegetable mould and quite fertile. Ditches at frequent intervals drain the gardens and furnish means of communication by canoes and small boats to the larger canal, and thus to the city. Here are the great market gardens, where vegetables are grown for Mexico's consumption. Here, too, are grown the magnificent flowers which form one of the principal attractions of Mexico City, the flower market being a wonder in the quantity and exquisite beauty both of the individual tropic flowers and the magnificent floral forms, which are made with great taste and skill.

Street cars also connect the city with the villages upon the Viga canal, and they are well patronized. — *Arboriculture.*

CANADIAN CUSTOMS REGULATIONS

(From United Sates Consul Gunsaulus, Toronto, Canada)

The new customs regulations affecting invoices of goods coming into Canada, which recently went into effect, are as follows:

The customs authorities now require duplicate invoices, and on each invoice must be a column in which is to be entered the fair selling price in the country from which the articles are imported. This is part of the "anti-dumping" regulations. On each invoice there must be printed or written a certificate of the value of the goods contained in the consignment. The new form of certificate must be signed by the exporter or by a responsible agent, and must be to the effect that the invoice is correct as to the price of goods; that the value placed on them is the fair market value if they were sold in like quantity or condition for home consumption; that no different invoice will be furnished to anyone, and that there is no arrangement allowing the purchaser any discount or rebate or any compensation whatsoever. On all invoices of goods not entered under the British preferential tariff a special certificate has to be sworn to, stating that none of the articles is the product or manufacture of Germany. A certificate is required on invoices of goods of British manufacture, giving details as to the countries from which the materials included in the consignment come; and in the invoice of goods sold by an exporter prior to their shipment to Canada, not only must the market value of the goods for home consumption be given, but also the selling price to the purchaser in Canada.

Outdoor Art and Craft

The Board of Estimate of the city of New York has appropriated $1,000,000 for new play-grounds and $3,000,000 for small parks. This was done after the Board had decided to limit the expenditure for parks and playgrounds to $4,000,000.

The largest appropriation for a park was for Chelsea Park, Manhattan, which is to cost $1,250,000. The Board authorized the purchase of land between Ninth and Tenth avenues, Twenty-sixth and Twenty-seventh streets, for this park. The other appropriations included $750,000 for the Highland Park extension in Brooklyn, $25,000 for Fort Joseph Rodman Drake Park in the Bronx; $400,000 for a park at Barclay, Hoyt, and Ditmars avenues in Queens, and $100,000 for the acquirement of title to property at Crotona avenue and Southern boulevard in the Bronx for park purposes. The Board also passed appropriations aggregating $925,000 for property in Bay Ridge, Brooklyn, known as Owl's Head. Of the money, $625,000 is for land above water and $300,000 for land under water.

The city government of Holyoke, Mass., has appropriated the sum of $20,000 for park purposes, the money to be raised by taxation.

NEW HARDY HERBACEOUS PLANTS

One of the finest of the more recent introductions among herbaceous plants is Incarvillea Delavayi, a very distinct and beautiful plant introduced from China. It grows to a height of between eighteen inches and two and a half feet, according to the position, the richness of the soil, etc., and an additional advantage is that its cultivation is exceedingly simple — the same, in fact, as that of any ordinary hardy perennial. The large blossoms are long, or tube-shaped, resembling those of a gloxinia, and vary in color from a deep rose-color to rich carmine. The foliage is nicely laciniated, and altogether this is one of the very finest of plants for the herbaceous border. It should be planted in deep, rich, sandy loam, and in an open and sunny position.

Conandron ramondioides is a charming little "Alpine" (or rock plant) from Japan. It bears a considerable resemblance to the now well-known Ramondia, growing only about six inches in height, and bearing pretty sprays of white blossoms with purple centers. It succeeds best in the shady and moister positions of the rock garden.

Meconopsis cambrica is a double flowered form of the "Welsh Poppy," a very handsome plant with very double flowers of a rich orange-yellow color. It succeeds best in a fairly light soil, and a cool shady position. Meconopsis Wallichi, the blue Himalayan Poppy, has large saucer-shaped flowers, of a soft pale blue, with a central mass of golden stamens. Like the last, this delights in a cool and moist position; both are true perennials and quite hardy.

In Patrinia villosa we have another fine new hardy perennial, bearing large heads of rosy-lilac blossoms in the autumn, on plants some five feet high. This is a grand thing for planting towards the back of a wide herbaceous border, and in color it contrasts admirably with the asters, tritomas, Pyrethrum uliginosum, etc.

Haberlea rhodonopsis bears some resemblance to the Ramondia and Conandron, and is a pretty dwarf plant, only about six inches high, from the Balkan mountains, succeeding best on the more shady parts of rockwork, or on a cool north border. The flowers are tubular in form, and of a charming bluish lilac shade. — *Garden Life, London.*

House of Lettuce

Here we have a new house and an instructive object lesson in management, as followed by a grower who has been uniformly successful in all his undertakings because of wise foresight and good judgment. The house illustrated is the first of a contemplated range to be erected by W. W. Edgar of Waverly, Mass. It is, of course, intended for floricultural purposes but for various good reasons, Mr. Edgar saw better prospective results from a first crop of lettuce, as seen in the picture, to be followed by a crop of tomatoes, for which the young plants are already grown, and later in the season probably a crop of chrysanthemums. The element of "luck," as some call it, which is, rather, a result of good business management, has followed Mr. Edgar's venture, for lettuce is now worth $2 a box in the market, a dozen bringing as much money as a box did not long since.

The house is 40×200, of steel construction, and was built and heated by Lord & Burnham Company.

Catalogues Received

John D. Imlay, Zanesville, O. A Few Choice Seeds and Plants.

Henry A. Dreer, Philadelphia, Pa. Hints and Suggestions for the Garden. A 4-page illustrated sheet, just what its name indicates.

Thomas J. Grey & Co., 32 and 33 South Market St., Boston. Seed and Implement Catalogue for 1905. Grows bigger and better every year.

Andorra Nurseries, Chestnut Hill, Philadelphia, Pa. Price-list of specimen Trees, Shrubs, Roses, and Fruit. 1905. A big list in small compass.

Wood, Stubbs, & Co., Louisville, Ky. Success with Lawns. Illustrated with views of velvety lawns and contains valuable instructions in the care of such.

V. Lemoine et Fils, Rue du Montet, 134a, Nancy, France. Selections from regular catalogue; illustrations of Begonia Triomphe de l'Est, Deutzia Vilmorinæ, and D. myriantha.

R. & J. Farquhar & Co., Boston. A handsome embossed cover shows a cluster of four varieties of asters and three garden roses in colors. Profusely illustrated throughout its 160 pages and full of good things in annuals and hardy perennials and shrubs.

Joseph Breck & Sons Corporation, Boston. 82d Annual Catalogue of High Grade Seeds. This spring visitor from the oldest seed house in New England is welcome as ever, and if there is anything in seeds, implements, and agricultural goods that it does not list, they can easily be dispensed with.

Arthur T. Boddington, 342 West 14th Street, New York. Wholesale Catalogue of Seeds, Bulbs, and Plants of Quality. An illustration of a houseful of Boddington's double white ten-weeks' stock in bloom, on the title-page, commands attention. General spring catalogue of the same establishment is comprehensive, freely illustrated, and a model in press-work.

Planters' Seed Co., Springfield, Mo., "The Planters' Guide" for 1905. This is the first catalogue of this new concern. It is devoted mainly to vegetable and field seeds and supplies. The secretary of the company is F. W. Maas, for a number of years connected with W. Atlee Burpee & Co., Philadelphia, whose ability and experience will count for much in the future career of the new concern.

W. FROMOW & SONS, Bagshot, England

Extensive Growers of Hardy and Decorative Nursery Stocks, in extra selected grade. Our GOLDEN PRIVETS and RETINOSPORA, in sorts, are extra fine at reasonable cost. Address for trade list, our American agents:

AUGUST RÖLKER & SONS, *31 Barclay St., New York P. O. Box 752*

"The Cardinal"

The Best Scarlet Carnation

Again defeats all comers at St. Louis Carnation Show.
Scores 97 points at Toronto, last week—higher than all others.
The Cardinal is a profitable carnation to grow; produces more blooms to the square foot than any other.
If you get a good stock of this Grand Scarlet you will have done investing in new scarlets for years to come. *Do it now.*
ROOTED CUTTINGS, $12.00 per 100; $100.00 per 1000. 250 at 1000 rates. Special prices on larger quantities.

WE OWN THE FIFTY MILLION DOLLAR WORLD'S FAIR

The Chicago House Wrecking Company purchased the entire St Louis Exposition, with all its Millions of Dollars worth of equipment and supplies. This is an unequalled opportunity for Florists and Greenhousemen to secure equipment and materials for improvement at very low prices. It is all offered for sale from our Headquarters on the World's Fair Grounds.

Below we list some of the more important items:

BOILER TUBES. Two carloads of 3½ and 4 inch good Boiler Tubes that have been used We took these out of several boilers that we dismantled on the Exposition Grounds, and as they are practically as good as new, they are of special value The ends have been cut square, they have been rattled and they are free from scales and imperfections They are in long lengths They are just what you require for extending your Heating System

We furnish with these tubes at small cost wrought iron sleeve couplings thread'd one size larger than the boiler tubes themselves For large quantity orders we will make special low prices At our Chicago Plant we have 200 carloads of such tubes for delivery.

GREENHOUSES We offer for sale the three complete Greenhouses used on the Exposition Grounds Each Building, 22 - 300 ft., with all latest improvements double-strength glass, ventilating apparatus, Heating Plant, pipe, valves and fittings Sketch and full information on application We will sell these Greenhouses singly

HOT BED SASH - 10,000, good as new, have heavy frame. Advise us how many you can use.

FLOWER POTS. 20,000 Paper Flower Pots that have never been used Low prices for quick delivery

25,000 PLANTS. All the Plants now stored in the Hot House are in first class condition They are being properly taken care of and consist of the following: - 500 Bay Tree Standard, in tubs, also Pyramid, 3,000 Crotons, 1,000 Large Philanthus, 1,000 Kentias, 600 Mixed Alternantheras, 2,000 Echeverias, 5,000 Solanum Hend, 5,000 Vinca Major, 5,000 Santolina, 200 Ammonium, 2,000 Matricaria, and thousands of others

LUMBER. - 100,000,000 feet of Highly Seasoned Lumber ready for quick delivery We are making extremely low prices in carload lots. If you are interested send us your carpenter's bill for our estimate

PIPE. 10,000,000 feet of Standard Black Wrought Iron Pipe It has been in service only during the Exposition Sizes range from ¼ up to 42 inch We can furnish you pipe of any kind Write for complete list

GREENHOUSE FITTINGS. Anything needed in the line as our stock is complete. Write us your requirements We can furnish you valves, fittings, etc.

Thousands of other items: Garden Hose, Pumps, Step Ladders, Glass, Sash, Doors, etc., etc.

Cable Address, ALEXCONNELL

PITTSBURG MARKET REPORT

Pittsburg florists have suffered during the past week, through cold weather, more than any previous week this winter. Our local growers report nearly everything, excepting bulbous stock, at a standstill. Shipments of cut flowers were considerably delayed, and Beauties very scarce, also good Brides and Bridesmaids. A vast quantity of violets was disposed of this week, one firm handling several thousand. Lilies are more plentiful, but still of rather a poor grade. Carnations were about the same as last week, with the excpetion of more and better grade of Enchantress, and some fine Fred Burki (white) are coming in now. More of this good white should be grown. Scarlets are very scarce and rather small and weak in stems. The Phipps Conservatory in Allegheny had to use wood and coal during the zero weather this week, and several private conservatories that use gas experienced a considerable drop in temperature. Luckily no one has reported a freeze-out. The outlook for the Easter display at the Schenley Park Conservatories is very promising, and the bulbs are being brought in and are in good shape at present. There are rumors of another wholesale store and two retail stores to be opened here in the near future, but at present writing the writer cannot claim it authentic. Visitors this week: E. Perry, Greensburg and Thomas Perkins, Cleveland, O.

CINCINNATI MARKET REPORT

Dark days have caused the business to be sick, the florists to look sick, and when their coal bills come in they will look sicker. There is very little to be said about the conditions of trade. The demand for stock for funeral work has been very good, but owing to the conditions of the weather, hardly any white flowers were to be had. It would be a very hard matter to fix any certain price on cut flowers, as the quantity and quality of stock varies so much.

A well-known grower in this vicinity was fortunate enough a year ago to raise quite a number of American Beauty seedlings, each and every one being different in appearance of growth. The result remains to be seen. The same grower two years ago raised a white Bouvardia of extraordinary growth. The stock increased from one plant to thirty-two and then to several thousands of plants. This promises to be one of the most profitable of winter plants in existence, as some of the stems measured 36 inches in length, with very large trusses of blooms, and it is also noted for its free-blooming qualities. Several white Bouvardias have been raised, but there has been none which can compete with this.

BUFFALO MARKET REPORT

The conditions of the market in general are not any too bright, but we believe that as soon as the cold weather is over business will pick up. It has been very cold here for the past few weeks and consequently business was somewhat at a stand-still.

Trains have been late bringing stuff into the market, consequently prices were not as high as they should have been for this time of the year. Bulbous stock is plentiful. Of violets there are more than are needed. Carnations are in ample supply for the demand.

Roses are selling best of anything, because there are not too many of them.

BALTIMORE MARKET REPORT

The demand has been very good for the past week. Some very fine roses coming in, but not enough to supply the demand. All stock has moved pretty well, except occasionally single violets hung a little heavy.

PREMATURE CUTTING OF LILY OF THE VALLEY

It is not always the fault of the pips that lily of the valley does not give first-class, salable sprays. An examination of grades one, two, three, and four, in a prominent commission house recently gave evidence that a large per cent. of the difference was on account of injudicious cutting. The best had from eight to eleven bells well developed; the lowest grade five to six; but the balance were there in embryo — undeveloped. Cut too soon. If care had been exercised, grade four would have become one, in a matter of two or three days. The foliage of the lower grade was pale, and a few days longer would have made a big difference in depth and salableness. Now this may seem to some an academical question, and not a matter of dollars and cents. Is it? Ask any lily of the valley grower who is running his place to pay, and he will promptly tell you that if he can turn grade four into grade one by merely waiting a few days, it will mean a difference of possibly two dollars per hundred in returns; and differences like that are vital on a crop of any magnitude.

BERKSHIRE

New Double Pink

PETUNIA

Strong grower, very free bloomer and a beautiful shade of pink color of Bridesmaid rose I guarantee this Petunia to be as represented. Orders filled in rotation at the following prices: Rooted cuttings, prepaid, 25 for $1.00; 50 for $1.75; 100 for $3.00; 2½ in. pot plants, $5.00 per 100, express.

CHICAGO MARKET REPORT

Receipts of the week were about equal to that of the previous week. There has been no material change in prices. The extreme cold spell was the cause for much anxiety as to safe arrival of shipments. Incoming consignments arriving frozen were numerous. Several commission men report instances where their out-of-town orders arrived frozen. This will be a total loss to the shippers, as no redress can be obtained. Express companies would not accept unless at "Your own risk." American Beauties have been far below the demand. The reports from growers indicate a shorter supply with some improvement in quality. The demand for Brides and Bridesmaids continues ahead of the new crop cut. There are many sales reported above quoted prices. J. A. Budlong is cutting a grade of teas which equals the exhibition select strain. Their Brides are wonders, stems 30 inches carrying solid buds as large as teacups, and their finish on Bridesmaids is the feature of the rose market. Carnations are not under any heavy pressure of orders. Colored stock moves slowly. There has been a strong demand for white for the past two weeks. This demand seems incapable of being filled. Quality is of high order. Enchantress, Morning Glory in light pink, Gov. Wolcott, The Belle, White Lawson, and Lady Bountiful in white, Mrs. Thomas Lawson, Nelson Fisher in dark pink, and Estelle, Crusader, Chicago are standard sorts. Some fine Robert Craig and Cardinal are sometimes to be had. In variegated, Mrs. M. A. Patten leads, and Harlowarden is depended on for best crimson. Some fine mixed bunches of seedling novelties are also offered Violets continue with a weak call. Tulips are somewhat easier, and only the better grades move quickly. In orchids the supply has somewhat decreased. Cattleyas especially scarce.

Chicago retailers were fairly pleased with sales on St. Valentine's Day. Considerable transfer business is reported, and HORTICULTURE's advertisers shared the benefit. Violets of course were first choice with red roses or carnations also in good demand. Lily of the valley and myosotis were also popular. Plants seem to get the preference as tokens for "Cupid's Day," and many special arrangements were ordered.

Proserpine tulips in heart-shaped pans were very popular, also azalea Apollo, lilac Marie Legraye, and azalea Mollis Proscitete trimmed in accord for the season. This latter variety is a beautiful shade of yellow, blooms very profusely and is of rich perfume. Wienhoeber is cutting high-colored pink tulip Salvator Rose, a variety far ahead of Murillo, which, when stock is larger, will surely take the place of the old standard variety Murillo.

PHILADELPHIA MARKET REPORT

Market last week was in good condition. Roses were scarce and carnations not nearly as abundant as the week before. Tulips and daffodils were too plentiful and many late arriving lots had to be sacrificed. Von Zions, good stuff, brought in some instances as low as $15 per thousand, although the ruling price asked was $3 to $4. Violet market took a little spurt St. Valentine's Day, but it is again in the dumps. Lowest prices on record. The hard, dull, bitter winter has kept the ladies indoors, and violets have not been worn as much as usual. This may seem a small reason, but we believe it is the main one. Enormous quantities are used in this way, in ordinary seasons. Gardenias have been going fairly well, but too many have been coming in for present demand and prices have dropped considerable. Lily of the valley and Roman hyacinths about normal. There are very few paper white narcissi around now. White lilac, where of good quality, has sold nicely.

Pussy willows are around and are in some demand as a novetly. There's not much to them. People fondly imagine they are a sign of spring, and like to see them about the house as an emblem of hope. They fondly delude themselves that spring is near, forgetting the Ground Hog and the Goose Bone Man. Wouldn't it have been fine if we could have caught and cooked the Ground Hog and sent the Goose Bone Man to the insane asylum? Easter lilies are in fair demand and plentiful at S. S. Pennock's, the only place in town that has these in quantity at present. Myosotis, sweet peas candy tuft, and mignonette are around, and fill their allotted part in the market, at fairly remunerative prices. Acacia sprays are an exclusive item with the Leo Niessen Co. at present. The best Emperor daffodils we have seen this week are being handled by W. J. Baker.

LOUISVILLE MARKET REPORT

Business conditions the previous week were very much up to expectations, especially so at St. Valentine's. Besides roses and carnations, bulbous stock sold very well, especially so, considering the cold weather we have been having. Carnations are of very satisfactory quality. The demand for roses has been very good, and has tested the supply to the utmost extent. Roses of medium grade are available in adequate quantities, except that Beauties are out of question, there being only a few to be seen. Tulips, hyacinths, jonquils, etc., are of very good quality and sell satisfactorily. The sale and quality of violets has been very satisfactory, with the supply light. Lilies of the valley find only fair demand. Freesias and mignonette haven't been very good in quality or sale. Green are very scarce.

Mr. S. S. Skidelsky, of Philadelphia, Pa., was a recent visitor, doing good business.

BOSTON MARKET REPORT

Business has been excellent with the florists of the Hub, — growers, wholesalers, and retailers, — for the past ten days. Everything of acceptable quality is going freely and at fair rates. Balmy conditions are in the air and increasing production is now well due. The heavy receipts always to be expected in early March are sure to have their effect on market values, and it is doubtful if the maximum prices now quoted can be long maintained, but at present there is no trouble to realize in full on roses, and a clean sale is also assured on carnations of good grade. Violets already show a slight improvement over the past few weeks, which is likely to be sustained if the weather should continue spring-like. All bulbous material shares to greater or less extent in the general revival.

NEW YORK MARKET REPORT

The rose supply shows some increase, and with a little milder weather a somewhat larger supply may be expected. Carnations are abundant. Prosperity and Enchantress are blooming more freely. Up to a few weeks ago, Enchantress of prime quality was one of the best sellers, but of late it is a laggard. Good Lawsons are now the favorites. Lilies are moving slowly, with supply increasing. Violets hold their own for this time of the year. A day or two of unfavorable weather, however, and they accumulate rapidly, and then the street people dictate prices for surplus stock. Sweet peas are showing in larger quantities and the best are disposed of at fairly good prices.

Seed Trade Topics

Items, personal or otherwise, of interest to the seed trade are solicited and will be given a place in this column.

Mushrooms grown in flats and surrounded by spawn and mushroom literature was a prime attraction in the window of a Chicago seed house recently.

Among the bulbs injured by the recent freeze in south of France, freesias are the worst sufferers, and these bulbs will be very scarce from those districts. This will not seriously affect the American supply or price, as the bulk of the stock required for the American trade comes from California and Bermuda.

UNCLE SAM AS A SEEDSMAN

Each session of Congress witnesses the uplifting a handful of heroic souls who eloquently denounce the iniquity of the free distribution of seeds. This gives them repute in the public prints as faithful guardians of the exchequer. The seed appropriation is passed in the usual way, and the issue sags into peace for another twelve months.

There are two kinds of government seed distribution — scientific and political. One is carried on for the benefit of the agricultural interests of the country, the other for the benefit of Congressmen.

In the scientific distribution, new varieties of seeds are sent to educated observers for experimental purposes. The results of this distribution are invaluable. In the political distribution, garden and flower seeds are sent out by the Congressmen, who furnish the names and leave the manual labor to the Agricultural Department.

This kind of seed distribution is an application of the Cockran theory that the government should pay election expenses. The $200,000 or so spent on seeds is an indirect appropriation to that end.

There is a mistaken notion that the bucolic statesmen alone are responsible for the government's competition with private seed companies. City Congressmen like to exploit this myth; but while their constituents have no use for pumpkin and rutabaga seeds, flower seeds are welcome, even to the tenement dwellers who can support only a window garden.

Mr. Tawney, a famous Minnesota seeker after truth, wants to know why the Government should not distribute Durham bulls as well as seeds. The reasons are simple. In the first place, many farmers prefer Holstein bulls to Durham. In the next place, people who live in a five-room flat cannot pasture a Durham bull. What would happen on the east side if the Hon. "Big Tim" Sullivan should undertake to distribute Durham bulls to his constituency? Everybody would say "Tim's batty," and it would cost him his seat at the next election. — *New York World.*

TREE SEED CROP IN GERMANY

The crop report of Conrad Appel, Darmstadt, Germany, says that while the crop of Quercus robur is not so good as that of Quercus pedunculata (both however fair), Quercus rubra, on the other hand, is reported to have yielded very little, and Fagus sylvatica failed altogether. Others, such as Acer platanoides and Acer pseudo platanus, Alnus glutinosa and Alnus incana, Betula alba, Carpinus betulus, and Fraxinus excelsior have been secured in sufficient quantities.

Picea excelsa has been doing well in some districts. The yield of Larix europæa also is satisfactory and prices are cheap. Abies pectinata yielded an average crop. Of Pinus strobus, only in some isolated cases could average quantities be gathered on this side. The crop of Pinus cembra turned out very small, whereas Pinus maritima and Pinus montana also Pinus corsica are satisfactory in quantity and in quality. Of Pinus austriaca, little has been harvested and good quality is much in request.

GRASS AND FIELD SEED CROP IN GERMANY

The January report of Conrad Appel, Darmstadt, Germany, states that the crop of 1904 of the various kinds of grass seeds is very satisfactory on the whole and prices lower than for years. As to red clover, it appears that the western districts including the Palatinate will produce very little more, if anything, whereas the crop of Württemberg is now arriving on the market. It is however not expected that it will influence prices in any way, as the seed is rapidly being bought up by dealers. At the present moderate prices of luzern a purchase can only be recommended. White clover is exceptionally cheap and of excellent quality. Alsyke yielded only an average crop in Germany, likewise in Canada, so that markets are higher than last year. Yellow trefoil is also high in price owing to a short crop, and crimson clover has arrived at almost prohibitive prices, nearly all the stocks being cleared. Sufficient has been harvested of common sainfoin in Moravia, but seed producing 2 cuts is much sought for at advanced prices. Offers in lupins and in seradella are scarce; very high prices are asked and paid for the latter, Spring vetches are tending upwards, while sand or villous vetches, peas for sowing purposes, white mutard and spurry are quoted at acceptable rates.

Mention HORTICULTURE when you write.

IT TAKES $20,000 worth of postage stamps to mail THE MAULE SEED catalogue for 1905. It contains 152 large pages, full from cover to cover of illustrations and descriptions of the best and newest things known in horticulture. As the original introducer of Prizetaker Onion, Nott's Excelsior Pea, Davis' Wax Bean, etc., I know what I am saying when I make the statement that never before have I offered so many novelties in flower and vegetable seeds of real merit. No gardener can afford to be without this book, which will be sent free to all sending me their address on a postal card.

Greenhouses Building or Projected

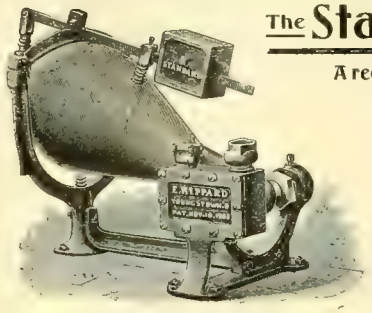
WEST MILAN, N. Y. — C. Williams, violet house.

SHARON HILL, PA. — Robert Scott & Son, house 54 x 180.

J. C. Moninger reports the following:

INDIANAPOLIS, IND.—Smith & Young, two houses, each 44 x 300. Concrete walls, iron gutters, bars 24 and 26 ft. long, height to ridge 19 ft., 7 ft. under gutters, ventilators both sides of roof, 6 tile benches, each 5 ft., 2 in. wide, in each house. J. A. Helfrich, house 16 x 60 and one 26 x 60.

News Notes



Carnation John E. Haines scored 85 points at the Chicago Florists' Club.

A hearing before a committee of the Massachusetts legislature on February 20th, on the subject of a state flower, brought out a large attendance, mostly women, in advocacy of the mountain laurel for that honor. Jackson Dawson, who is credited with having first suggested this as an appropriate flower, was present and spoke in favor of its selection.

"I reckons," said Miss Miami Brown, "dat what de young gemmen needs nowadays is mo' scientific education."

"What makes you think so?"

"I was done stan'in' under de mistletoe foh half an hour but foh all dem young gemmen knowed 'bout botany it might as well have been a cabbage leaf." — *Washington Star.*

The Standard Steam Trap

A recently patented trap that is just what a Florist or any other party in need of a trap wants; it is the simplest and the only ever-working trap in the market, warranted to work and also warranted for 10 years. If not satisfactory after trial, will accept its return.

Testimonials if desired

Also the Standard Ventilating Machine and the Duplex Gutters, Hinges and other fittings.

Business Changes

W. C. Cook has opened a florist and nursery business at Kalamazoo, Mich.

New seed house. — Taylor & Rogers, 416 East Locust street, Des Moines, Ia.

Willam Gerke has bought out the greenhouse business of John Geddes at Girard, O.

B. L. Elliott, Pisttburg, Pa., has sold out his business and greenhouses to L. I. Neff.

George Purdue, 373 Main street, East Orange, N. J., has made an assignment for the benefit of his creditors.

L. K. Peacock, Inc., successors to W. P. Peacock and L. K. Peacock, Atco, N. J., have been organized with L. K. Peacock, president; W. P. Peacock, vice-president; A. M. Peacock, treasurer; G. E. Cain, secretary; L. K. Peacock, W. P. Peacock, S. S. Pennock, Thomas B. Hall, and Adam Schlorer, directors. They have ample facilities for a big business, including seven new greenhouses (new or rebuilt), four shops, two cellars, and a three-story warehouse, 30 x 100.

Please Appreciate

A special advantage given to advertisers in HORTICULTURE, *without charge*, is the Buyers' Directory which tabulates the advertisers in each issue of the paper under the respective heading of the goods offered. This is a convenient ready reference for buyers and its value to advertisers is obvious, being in fact a *double* announcement without extra cost.

THE PIERSON-SEFTON CO
Horticultural Architects and Builders
West Side Ave., JERSEY CITY, N. J.

We manufacture and erect every type of Greenhouse

THE GALVANIZED "U" BAR TYPE
THE FLAT IRON RAFTER TYPE
THE SASH BAR TYPE

We make each type in several styles. We also furnish any of the constructions in the ridge and furrow type in any width of span.

"PIERSON" BOILERS

For Steam and Water

have more direct fire surface than any other horticultural boiler on the market, and this together with ample flue surface and area is the reason for the economical results obtained.

We will be pleased to tell you more fully as to their merits and also to send you letters of testimonials from those who have used them.

WE ALSO MANUFACTURE

Self locking vent-opening apparatus, both the standard and self-oiling type. Wood and iron frame benches and tables. Hot-bed sash and frames. Special hand-made greenhouse putty.

ESTIMATES FURNISHED FOR COMPLETE STRUCTURES OR MATERIAL READY TO ERECT.

VAUGHAN'S SEED STORE, Chicago, Ill.

AT HALF PRICE

Read the Reasons Given

Natural Business Laws justify higher prices on Novelties than stock in normal demand and supply can command

An event unusual is that of a meritorious novelty—such as appeals sensibly to all growers of judgment—offered below half its normal price.

Nevertheless, as the full time and attention of the introducer are now fully demanded with other lines of his business, in planning to directly close out the limited balance of the originally grown stock of

Adiantum Croweanum,

it is now on sale at less than half price.

As a standard novelty the sterling values of this fern develop more and more daily, hence this offering is no reflection on its true merits.

THE FOLLOWING PRICES TELL THEIR OWN STORY:

Strong plants from 3-inch pots, $2.50 per dozen; $15.00 per 100; $125.00 per 1000.
25 plants at 100 rate; 250 at 1000 rate.
$100.00 per thousand in 5000 lots.

In order to ensure orders being filled, would-be buyers need to speak quickly.

LET NO ONE HESITATE NOW!

Hot-House Grape Vines

ALICANTE, berries large, round, large bunch. Late keeping.

APPLEY TOWERS, fine black sort, following Black Hamburg. Excellent flavor.

BLACK HAMBURG, the most popular grape in cultivation. Berries large, roundish-oval, juicy and rich.

GROS COLMAN, monstrous, round berries, juicy and sweet. Not good until fully ripe in late autumn.

GROS GUILLAUME, Barbarossa. Berries large and round, juicy and sweet but rather flat flavor. Very late.

MADRESFIELD COURT, berries very large; of true muscat flavor. Rich and excellent.

LADY DOWNE'S SEEDLING, large oval berries of rich aromatic flavor. Dark purple. One of the best late sorts.

MRS. PEARSON, large oval berries, transparent golden color. Luscious and juicy.

MUSCAT OF ALEXANDRIA, generally esteemed the best white grape. Berries large, amber yellow. Delicious flavor.

Strong Planting Canes; each $3.50

Lily of the Valley Selected Berlin Pips

Per 100, $2.00; per 1000, $17.50; per case, 2000, $32.50

CARNATIONS

STRONG ROOTED CUTTINGS

We offer first-class stock of the finest varieties

VARIEGATED LAWSON.—This variety which we are introducing this season we are sure will prove to be the very best variegated sort. Pure ivory white with delicate carmine pencilings. Mr. W. N. Craig, an authority on everything pertaining to horticulture, says that he knows that this variety will outbloom the favorite Mrs. M. A. Patten three to one. It has the Lawson habit and stem, and is bound to give satisfaction. **$12 per 100. $100 per 1000.**

RED LAWSON.—A bright red sport of Lawson that is bound to be popular, and will be grown where Lawson is popular. **$10 per 100, $75 per 1000.**

CARDINAL.—Bright cardinal, or crimson-scarlet. Won first prize for best 100 scarlet, first prize for best 50 carnations any color, first prize for best 50 scarlet seedlings, Chicago. **$12 per 100, $100 per 1000.**

FIANCEE.—The queen of pink carnations; in a class by itself. Magnificent flowers, strictly fancy in every respect. **$12 per 100, $100 per 1000.**

FRED BURKI.—Recommended as an extra free-blooming white variety and a claimant for popular favor. **$12 per 100, $100 per 1000.**

WHITE LAWSON.—We consider this variety, which we introduced last season, the most profitable white carnation ever sent out. We think it will outbloom any other white two to one. It has given great satisfaction. When the flowers are left on the plants until fully developed they are much larger than Mrs. Thos. W. Lawson. We believe this will occupy among white carnations the same place that Mrs. Thos. W. Lawson does among pink carnations. Remember that we are headquarters for it. Splendid stock ready for immediate delivery. **$7 per 100, $60 per 1000.**

LADY BOUNTIFUL.—A magnificent white of last season's introduction. **$6 per 100, $50 per 1000.**

MRS. M. A. PATTEN.—This grand variegated carnation has given splendid satisfaction. **$6 per 100, $50 per 1000.**

DAHEIM.—Dark crimson. Grand stiff stem. Calyx never bursts. Free and abundant bloomer, developing very quickly. We consider this the best all-round crimson carnation. **$6 per 100, $50 per 1000.**

ENCHANTRESS.—Freest blooming, bringing highest market prices. In great demand. **$4 per 100, $30 per 1000.**

MRS. THOS. W. LAWSON.—**$3 per 100, $20 per 1000.**

PROSPERITY.—A magnificent fancy carnation. **$3 per 100, $20 per 1000.**

We are now prepared to book orders for 1906, for

The Coming Scarlet Carnation

VICTORY

This is a real bread-and-butter variety. An early, free, and abundant bloomer, with good stem; a magnificent keeper and shipper; flowers of the largest size, commanding the very highest price. This is going to be a money-maker. Orders will be filled in rotation, as received, delivery beginning December next. **$12 per 100, $100 per 1000.**

LAGER & HURRELL

ORCHID GROWERS & IMPORTERS
SUMMIT, N. J.

Dendrobium Wardianum

Dendrobium Wardianum is one of our easiest dendrobes to grow and though we do not frequently see it as luxuriant as the photograph shows, yet it readily responds to generous treatment. Once its requirements are determined, the rest is easy. To get a vigorous growth is essential for a generous display of flower, but some plants break much more readily than others. The plant illustrated has invariably commenced growing about the time the previous growth is maturing, and every encouragement is given the new growth. We hang the plants up near the roof in the cattleya house, where they get plenty of air, though shaded from the direct rays of the sun while growing, and a little stimulating food is given at regular intervals until the growths show signs of maturing, when the plants are removed to a cooler house, where they get abundance of air and all the sunlight possible, but the water is reduced to just sufficient to keep the bulbs plump. They remain in this house until the buds commence to swell, when they are returned to the house where they were previously grown, and the buds swell out rapidly and soon attain their full size. The plant illustrated is growing in a five-inch shallow pan. The growth was four feet and six inches in length, and carried seventy-five large blooms, but owing to its great length, the camera could scarcely do it justice. The picture is sufficient, however, to convey an idea of how beautiful the growth looked when completed. At the present moment there is a new growth about two feet long started on the same plant. We make a practice of removing the old growth with the flowers, and the plant does not appear to resent this treatment.

Alfred J. Loveless.

Lenox, Mass.

Chlorophytum elatum variegatum

This old, useful, and favorite plant, I believe was originally sent out in 1874 or 1875, under the name of Anthericum variegatum, and specimen plants in 6- or 7-inch pots were worth at that time $5 each. As a decorative plant it was a novelty and advertised to supercede Pandanus Veitchii, but this promise was never realised, although it is often used now in decorations, and gives a nice effect as a border for latanias and aspidistras in dark corners and fireplaces. It was formerly used frequently in competitive groups, and is always capable of producing a good effect by reason of its well-marked foliage, either as a raised, isolated example, or among the lower plants constituting the margin.

I remember, some ten or twelve years ago, it was used quite extensively in out-door planting in shady places. In parks of Washington, D. C., for several years, it was planted as a border for a circular bed of ferns, also for one of Brazilian caladiums, which throve well under the stately old elms in Franklin and Lafayette parks. I also saw it as a border for tuberous begonias, where it created a pleasing effect. Pans of about three specimens, edged with a few plants of Carex Japonica and grown in a temperature of 50 degrees for about four weeks, will make as good and salable a plant for florists' general purposes as any other that I can think of, and with less care, as, when once potted it can be almost left to its own devices.

David D. Thowell

Cinerarias for Easter

The improvement in horticultural buildings for the last few years has been so marked that the old-fashioned structures, in so far as the production of cut flowers is concerned, are knocked out of competition. But if we consider the great and growing demand for potted plants, especially at the holidays, we may conclude that the old-style house is still of some value. In fact, for most pot plants, I think they are the best, the flickering shade of their more numerous sash bars being more acceptable than the full glare of light so essential to success in the production of cut blooms. Especially is this so in the successful cultivation of the cineraria.

My ideal house for Easter cineraria is one after the style of a pit, built running north and south, and the roof rather flat, so that they get enough light to keep the plants stocky, but not enough sun to warm them up and encourage them to bloom. If possible, have a cement floor, not too evenly laid, but so that it will hold a pool of water here and there, for the cineraria likes a cool; damp atmosphere.

I will not presume to instruct the craft in all the little details necessary in the first stages of culture, but will endeavor to give a few hints about the cultivation of fine, large specimens for the Easter trade. First and foremost, be sure that you have a good strain that will give you good colors and flowers at least three inches in diameter; if you are not sure, don't risk time and space with them.

We will suppose that you have procured seed of a good strain, or, what is better, raised some for yourself and are satisfied that they are all right, and have sowed some time in May or June first, so as to have nice, stocky plants in 6½ or 7-inch pots, for Christmas. Before giving these Christmas plants their final shift, pick out all that have a tendency to run up tall and have large leaves,— those plants that you know do not look well when they are bloomed in a small pot; these make the best plants for Easter specimens.

Set them by themselves and let them become somewhat pot-bound and the flower stem pretty well run up before giving them a shift. This treatment has a tendency to encourage the immediate production of side shoots and suckers at the base, and when they are repotted into a large well-drained shift, say a seven-inch, and kept cool, say 35 degrees by night and 45 to 48 degrees by day, the side shoots and suckers will grow, while the main flowering shoot will be very much retarded, — in fact will come along so slowly that the suckers will grow up and make a plant from two and a half to three feet through, and they and the main shoot will bloom together. They should be set up on inverted pots, until almost touching the glass, and lowered when necessary; this helps to check the main stem, allows a good circulation underneath, and provides an opportunity to keep tobacco stems pretty close to the foliage. Green-fly should never be allowed to set foot on them. Prevention is the only cure, if you are to have clean, healthy plants.

The next and final shift will be to nine- or ten-inch pots; this should be done as soon as the roots touch the drainage, for, if allowed this time to get the least pot-bound, that main stem will commence to wake up quicker than is desired. This retards him again, and gives the side shoots another chance. The buds on the main stem will be growing very slowly, but very strong; they will look blind and as if they would never flower, but they will, and that so strong and sturdy as to have better staying qualities than any other flowering plant in the market at Easter. All ventilation should be from the top and even in fairly cold weather, if you can do so with safety, leave a little crack on all night; it will help to keep the plants strong and stocky. They must have plenty of room; crowding cannot be allowed. By February the side shoots will be pretty well along and forming buds.

The date of Easter will have to determine whether you will require to push them gradually or keep them back. By March first the sun will be getting strong enough to necessitate a light shading, and if Easter should be late, as it is this year, an additional shade of cotton cloth may be necessary.

In regard to compost, I will treat only on that given at the final shift. I have always found four parts turfy loam, one part leaf loam, one part cow manure, saved from a pasture, a few shovels of sand, a liberal sprinkling of lime, wood ashes and bone flour, a good compost.

Give good drainage. A handful of inch bone, which has been lying in a damp corner for six months, thrown on top of the drainage will be beneficial when the roots reach it. I do not believe in liquid manure for the reason that a plant fed in stimulants will not have the staying qualities of one that gets its food regularly and gradually. A better plan is to get some goose quills and fill them with dry, well-pulverized sheep manure and soot, well-mixed, stop up the open end and cut a slit about five inches long down one side, with the point of a sharp knife. Insert six or eight of these around the edge of the pot at the final shift and the plant will get it about the time it needs it.

Keep in mind that you cannot come any of your "Yankee hurry-up" methods and throw water out of a hose at these plants, if you are to have success. Careful and regular attention to watering with a watering-pot is one of the main secrets. Neither should it ever be necessary to fumigate or dip them. Keep tobacco stems under them always, and if they are clean when they leave you, the lady will have no cause to exclaim, "Oh! the horrid lice! They will be all over the house! Take that plant away!"

Properly grown, they will, I believe, become the most popular of plants for Easter decoration, fit for any exhibition hall, but none too good for the ever-increasing demands of our plant-buying, plant-loving public.

Geo. M. Anderson

Ferns for Every-day Use

Asplenium is another genus of the fern family represented by numerous species; the spore cases are in linear dots, sometimes long, sometimes short, set generally in an oblique way on each side of the midribs. Sometimes they are forked, as in A. celtidifolium, and in a few cases nearly parallel alongside with the midrib, or veins, as A. serra and A. dimidiatum.

The sections Cuasplenium, Darea, Diplazium, and others are evergreen and most of them of a heavy, succulent texture. The section Athyrium lose, or partly lose their fronds in winter. Among aspleniums are a few big-growing species, most of them are medium size and some dwarf. These, when well cultivated, are nice, bushy plants of great service for table decoration. They are mostly all hardy, not difficult to grow, and like fibrous loam, peat, or leaf mould, with sand and a good drainage. Some of the smaller ones that are found in nature, growing on rocks, old walls, or on tree trunks do better in fibrous peat, or non-fermented leaf mould and sand mixed with small, broken sandstones or bricks; some like old mortar. They do not all require the same temperature; this is in accordance with the climate where they come from. A peculiarity of a great number of Aspleniums is their proliferous and viviparous nature; that is, the way they grow bulbils at the end of the fronds, or all over their leafy part. When those bulbils come in contact with soil, they soon take root and a young plant grows up from it. The quickest way to propagate those that produce bulbils all over the fronds, like A. bulbiferum, A. viviparum, etc., is to cut the fronds well provided with them and lay them in a box or pan filled before with loose soil covered with a thin layer of sand. The fronds have to be kept steady with little wooden pegs. When the bulbils grow little leaves on the fronds, they can be detached and planted directly in pans till they are rooted. In both cases they have to be kept air-tight. The others are propagated by spores that are sometimes slow to show life.

A few of the best among the many species are in a section with undivided fronds, and may be coarse looking, but are ornamental and showy anyhow. A. Nidus and its forked form from Japan and South Asia, the "birds'-nest fern," with long, broad, shiny fronds is well known. A. N. australasica from Australia looks much like the other. A. N. musæfolia is a noble plant, the fronds often five feet long, broad in the middle and narrow at the base.

A. ensiforme from Himalaya, A. plantagineum from West Indies, and a few others are of the same style, but much smaller. The fronds are more or less long-stalked. A. Hemionitis or palmatum from Africa, east coast island, is a very distinct species, with long

stalk, long broad ivy-formed fronds from four to six inches each way. There are two curious forms from it, A. h. cristatum and A. h. multifidum. The first is crested at the ends; the other has the main divisions deeply cut in narrow strips.

The caudate section grows young plants at the end of the fronds. A. alatum from West Indies has the fronds from one to one and a half feet long, narrow and arching, simply pinnate; the pinnæ, about three inches long by one broad, are bluntly dentated. The characteristic of this species is a semi-transparent wing-shaped appendage that grows all along the stem through the leafy part. A. brachypteron from Madagascar resembles much the preceding; the pinnæ are deeply cut in narrow strips. A. mizophorurh from West Indies has the fronds spear shaped, terminated by the continuation of the naked stalk, which grows very long, thin, and pendulous, with a bulbil at the end. The pinnæ, spear shaped, are sometimes bluntly dentated and sometimes they are bipinnate with very small pinnules. There are all kinds of forms between these two. A. caudatum from Central America and Polynesia, with fronds one to two feet long, has numerous pinnæ, two to four inches long, spear shaped and sharply dentated, as in the preceding one. The frond is terminated by a long, thin appendage, growing a bulbil at the end. A. longissima from the South Sea Islands has the fronds about three feet long, four to six inches broad all the length; not unlike a nephrolepsis frond in form. The pinnæ are blunt, spear shaped, eared at the base and dentated, of dark-green color, the stalk nearly black. It produces a young plant near the end of the frond. All the plants of this section are of pendulous habit and do well in hanging baskets, where they can show all their beauty.
